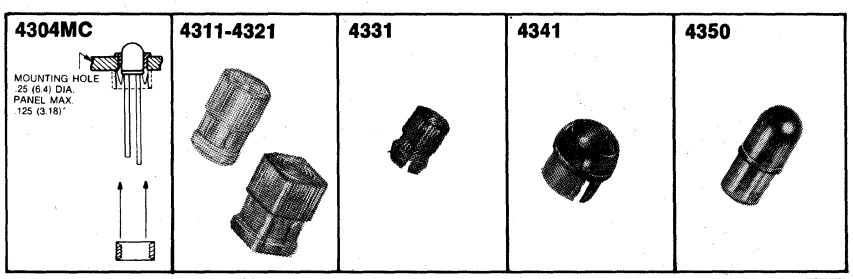
LED Clip and Lenses

4304MC is quick mounting clip to fit 1/4" hole for T-1 3/4 LEDs. 4311 is round 1/4" Fresnel antistatic lens, 4321 is square. 4331 is round 1/64" antistatic miniature lens for T-1 LED. 4341 is 9mm (23/64" antistatic lens with diffusing rings. 4350 is 3/16" wide angle snap in lens for T-1 LEDs.



Surface Mount LED

Designated the model 6200 series, these devices position the LED for easy visibility, particularly in applications where boards are mounted in parallel close to one another.

Bare LEDs

Industrial Devices Inc.
260 Railroad Ave., Hackensack, New Jersey 07601 • (201) 489-8989 • FAX: 201-489-6911 • TELEX 127459

A wide variety of top-quality LEDs in a variety of sizes and package styles.

- All IDI LEDs provide bright, unmistakable indication **SUPER-BRITE** LEDs are GaAsP on GaP for red and yellow, **EXTRA-SUPER-BRITE** (series) are ultra bright LEDs utilizing GaA1As construction for red, GaAsP on GaP for amber, and high-efficiency GaP for yellow and green.
- New "LC" LEDs are high efficiency types available in red and yellow, require only 2 mA, ideal for battery-operated devices and limited-current power supplies.
- −5V LEDs have a current-limiting resistor on the chip, are TTL compatible — require no external current-limiting resistors.
- IDI LEDs are available as components, and also in a variety of panel-mounted and printed circuit-board mounted assemblies.

Relampable Indicator Lights

Industrial Devices Inc.
260 Railroad Ave., Hackensack, New Jersey 07601 • (201) 489-8989 • FAX: 201-489-6911 • TELEX 127459

IDI supplies a complete series of relampable incandescent lights. They use the ultra-reliable T-1¾ and T-2 wedge and slide base lamps shown at the bottom of this page. The lamps are replaceable by removing the lens cap and pulling the lamp from the socket. New lamps press into place with little effort. For complete specifications and dimensions call or write for the new IDI technical data catalog.

CUSTOM PRODUCTS

In addition to the standard products briefly described on the preceding pages, IDI supplies custom products as shown below: A. 18 lamp bus module; B. Assembly for diesel auto; C. Neon lamp for vaporizer; D. Custom lamps for solenoid operated hydraulic system; E. Automotive instrument lens clusters; F. Wire harness for auto vanity mirror: G. Lamp cluster for bowling scorer; H. Special imprinted lamps and clusters and harnesses.

OXLEY SEALED MILITARY & PROFESSIONAL LED INDICATOR LAMPS

With Sunlight Viewability, NVG Compatibility, EMC, and Secure Lighting Features

Approved for MILITARY APPLICATIONS to DESC Selected Item Drawings 85122 and 87019

(See Oxley in Product Section B·2440, MIL COMPONENTS, Page B·1013)

Series	Panel, front and rear sealing	STR/LH/8	STR/LH/8/RAF	STR/LH/8/RAPP	2/STR/LH23/10 3/STR/LH23/10	OXL/MIL/50	STR/LH23/10/—
	Panel and front seating	PS/LH/8	PS/LH/8/RAF	PS/LH/8/RAPP			
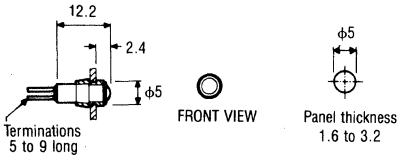
Outline Dimensions (mm)							Mounting Details (mm)		 Panel thickness 3 max.	 Panel thickness 3 max.	 Panel thickness 3 max.	 Panel thickness 6.5 max.	 Panel thickness 1 to 4	 Panel thickness 6.5 max.
Special Features		Plano-convex lens to provide even illumination over a large area of emission. Special functions available:— Low current (Type—/LC) Flashing (Type—/5/Z) Bi-color (Type 2/—) Integral resistor types for operation from 5, 12, 15, 24 or 28Vd.c. supplies available.	Sunlight viewable up to 100,000 lux. Focused light source for optimum forward viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Sunlight viewable up to 100,000 lux. Pin-point light source for very wide angle viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Multicoloured 2 in 1 and 3 in 1 lamps with segmented display areas. Standard segment colors shown in front views above 2 in 1 lamp has two LED's independently terminated. 3 in 1 has common cathode configuration as standard.	Miniature Lamps, high brightness LEDs (100% screened and burnt-in) in a 7.5 mm diameter aluminum package, similar in construction to the STR/-series lamps, MIL/50 fits a 5mm diameter hole for applications where panel space is limited.	Replacement for obsolescent incandescent types. Integral current limiting resistor and protection diode for operating from 5, 12, 15, 24 or 28 V d.c. supplies. Domed lens fitted as standard to give wide viewing angle.
Electro-magnetic Screening Mesh (Type-/-/-/SES)		Option on STR/LH/8 only	Option on STR/LH/8/RAF only	Option on STR/LH/8/RAPP only	Not Available	Available	Not Available
Standard Features		Rugged construction with sealed glass lenses. Panel sealing to a depth of 20 meters of sea water. High brightness LED's. 100% burnt in to optimize reliability. Black anodized shroud to enhance visual appearance, all metal construction for grounding when panel mounted. Nut mounted. STR/-types have sealed rear terminations. Pigtail terminations available for STR/-types.					

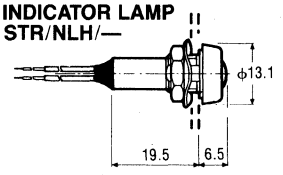
OTHER OXLEY DISPLAY PRODUCTS

MINIATURE LED INDICATOR LAMP, TYPE SSI/5



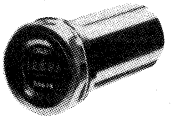
Barb® Cone-Lock self locking mounting technique for rapid assembly. SSI/5 Black anodized body version available for optimum contrast.

HIGH BRIGHTNESS SEALED NEON INDICATOR LAMP TYPE: STR/NLH/—



Similar packaging to above LED types, these lamps incorporate integral resistor for 110 or 240 Vac. This rugged military style panel seal indicator incorporates a glass lens and can, if required, be fitted with an Electro-magnetic screening mesh.

OXLEY SOLID STATE ELAPSED TIME INDICATORS, EVENT COUNTERS AND EQUIPMENT CONDITION MONITORS

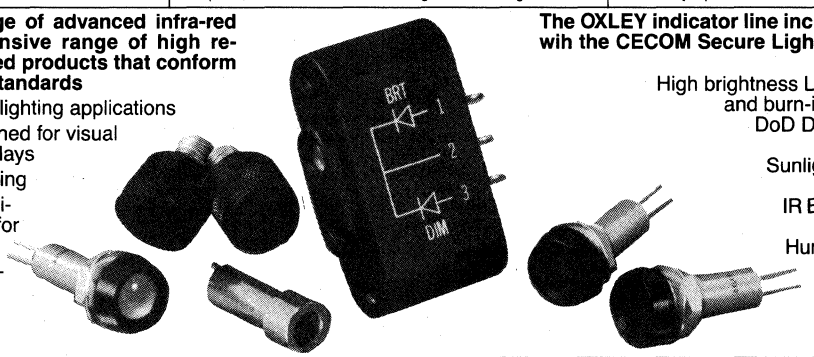


FEATURES:
- Non-Volatile Semiconductor Memory
- Accurate Quartz Crystal Timing
- Military Specifications

Oxley meets the challenge of advanced infra-red technology with an extensive range of high reliability and quality assured products that conform to exacting U.S. military standards

- NVIS compatible cockpit lighting applications
- Color discrimination retained for visual warning and caution displays
- NVG Visible Covert Lighting
- Spectoradiometrically calibrated infra-red emitters for avionic formation lights.
- Custom NVG/NVIS Compatible Lighting

NVIS/NVG COMPATIBLE LIGHTING



The OXLEY indicator line includes parts complying wih the CECOM Secure Lighting Program.

- High brightness LEDs 100% screening and burn-in to MIL-S-19500 US DoD DESC Selected items.
- Sunlight readable displays
- IR Blocking Optical Filters
- Human factor engineered

IR FREE SECURE LIGHTING

DISPLAY COMPONENTS

Ferranti-Packard light reflecting electro-magnetic display components offer the user numerous benefits such as...

1. Excellent Visibility Utilizing a range of fluorescent colors in addition to white, the contrast ratio of an F-P display actually improves as the ambient light increases, ensuring excellent visibility both in low ambient light and direct sunlight.

2. High Reliability Virtually maintenance free operation is achieved since there are no lamps to burn out, and no mechanical linkages or bearings to wear.

3. Lower Power Consumption Because of our unique patented technology, no power is required to maintain the display, and only minimal energy is required to change the status of display.

4. Ruggedness Modules and indicators are highly resistant to shock and vibration and are ideally suited to mobile applications or displays in a high vibration environment.

COLORS The displays are available in a range of fluorescent colors including green, yellow, red and orange, in addition to white. For a complete listing of standard and non-standard colors, refer to the individual product data sheet.

CHARACTER SIZE The general rule for selecting the optimum character size is to allow approximately 26mm (1 in.) of character height for every 15m (50 feet) of viewing distance. This will vary slightly depending on the color selected and the ambient light conditions.

STATUS INDICATORS Disk sizes are 7.6mm (0.3 in.) 8.9mm (0.35 in.) and 13mm (0.53 in.) diameter. A 13mm (0.5 in.) square flag is used in the series 50. These devices are current operated and can be driven from source voltages ranging from 3.3 Vdc to 25 Vdc, depending upon the model selected. Indicators are available for panel mounting or direct PCB mounting. Consult the individual data sheets to determine the indicator best suited for your requirements.

Typical applications include: Transient Recorders, Industrial Process Displays, Fault Indicators, Portable Field Equipment, Continuous Matrix Display

PRE-ENCODED MODULES These modules are designed for applications where a limited number of character symbols are required. Standard modules provide the numerals 0 to 9 plus blank. Non-standard modules can be supplied with up to 12 alphanumeric or special characters including blank. Three character heights are available, 70mm (2.7 in.), 104mm (4.1 in.) and 215mm (8.4 in.). Each character is encoded into the winding of the module coils and no external character generation is required. A single current pulse of 1 millisecond duration applied to the selected control wire erases the existing character and displays the desired character. The pulse can be driven from a single capacitor discharge circuit.

Typical applications include: Weigh-Scale Readouts, Industrial Instrumentation Displays, Cash Register Readouts for parking lots and toll booths, Scoreboards, Time/Temperature Displays, Vehicle Destination Signs.

ALPHANUMERIC MODULES These modules offer the user a complete alphanumeric or special character capability. Each module contains 35 light reflecting disks or elements arranged in a 5 x 7 matrix. Five character heights are available — 70mm (2.7 in.), 104mm (4.1 in.), 215mm (8.4 in.), 328mm (12.9 in.) and 452mm (17.8 in.).

Typical applications include: Scoreboard Displays, Advertising Displays, Message Signs, Traffic Control Signs, Industrial Displays, Passenger Information Displays and Vehicle Destination Signs.

7 SEGMENT MODULES The 7 segment module is basically a numeric readout, but it can display a limited number of alpha characters within its 7 segment format. Five character heights are available — 26mm (1.0 in.), 135mm (5.3 in.), 230mm (9.0 in.), 305mm (12.0 in.) and 457mm (18.0 in.).

Typical applications include: Gasoline Pump Displays, Weigh Scale Readouts, Cash Register Readouts, Time/Temperature Displays, Gas Pricing Signs, Speed Limit Signs, Scoreboards, Industrial Displays.

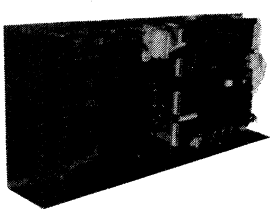
(1) All erase coils connected in series.
(2) Individual erase coils. If connected in series the erase voltage must be 26V minimum.

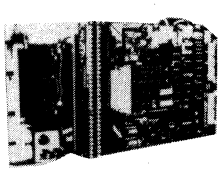
* All products are current operated. Voltages shown are for reference only. Minimum drive voltage must be selected to achieve specified current over the full operating temperature range.

DRIVE UNITS



FP601 CONTROLLER

The Ferranti-Packard Series FP601 Controller is a small, high speed, solid-state device which contains the power supply, logic and drive circuitry required to operate Ferranti-Packard alphanumeric display modules, Model 271XY5-35 and Model 411XY5-35. The suggested mounting is in a protected area preferably within the sign enclosure. Main features include remote driver board capability and various writing directions. (Data Sheet 601.)

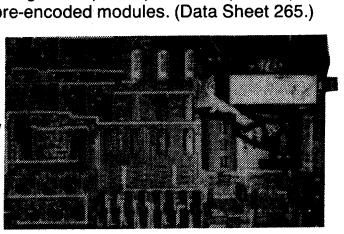


TYPE 1001 CONTROLLER

The 1001 Controller is a versatile, low cost powerful microprocessor based unit for use with displays using Ferranti-Packard large alphanumeric modules: (215mm) 8.4", (328mm) 12.9", and (457mm) 18", alphanumeric modules (70mm) 2.7", (104mm) 4.1", and large seven segment modules: (230mm) 9", (305mm 12", (457mm 18". The main feature of the 1001 Controller is its capability to store and cycle messages. (Data Sheet 1001.)

SERIES 300 DRIVER/DECODER BOARD

The Series 300 driver/decoder boards provide a simple, economical method of driving small display systems comprising either (70mm) 2.7 inch, (104mm) 4.1 inch or (215mm) 8.4 inch type DCP pre-encoded modules. (Data Sheet 265.)



MODEL 700DD DRIVER/ DECODER BOARD
MODEL 701DD DRIVER/ DECODER BOARD

The Model 700DD 7 bar module driver/decoder board provides a simple, economical method of driving small display systems utilizing (230mm) 9 inch, (305mm) 12 inch, (457mm) 18 inch large 7 bar modules. (Data Sheet 700.)

The Model 701DD 7 bar module driver/decoder board drives small display systems utilizing 135mm (5.3 in.) disk matrix segment modules. (Data Sheet 701.)

PRINCIPLES OF OPERATION

Alphanumeric Modules/Status Indicators
The basic display element is a magnetic disk. Short pulses of current in the coil assembly set the magnetic field in the stator pins in either one direction or the other. Each disk rotates to line up with the stator field and shows either its black side, or colored side.

Small 7-Segment Modules
The basic display element is a magnetic segment which pivots on its axis. Short pulses of current in the coil under each segment set the magnetic field in the stator pins in either one direction or the other. Attraction or repulsion by a segment's bar magnet, retracts or shows a segment.

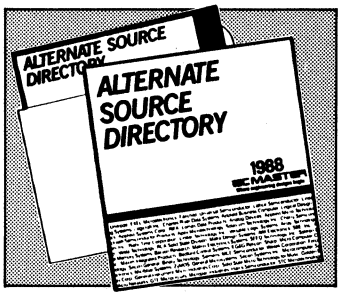
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



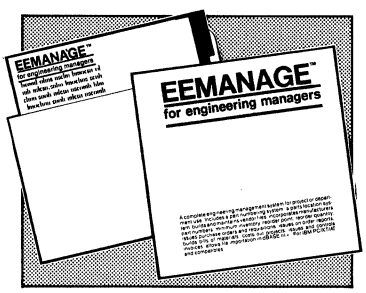
The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

The electronic ASD is FLEXIBLE! You can add ICs and you can add comments. You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the 1988 Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50 each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

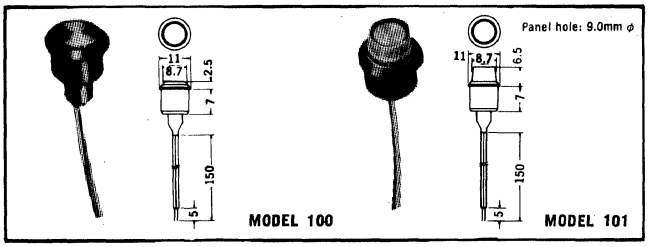
MODELS 100/101 — MODULAR INDICATORS

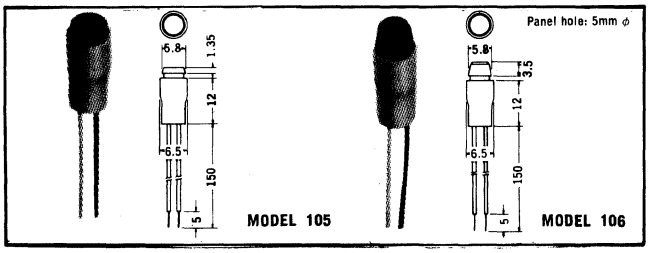


Modular concept provides low cost and great versatility. Rubber bushing snaps into 9mm panel cut out. Lens then snaps into bushing from front while light source fits in from behind. Ordering example: F606-101-R

SPECIFICATIONS — LIGHT SOURCE — LENSES

Light Source	Type	Voltage	mA	Flush Lens	Top Hat Lens
Incandescent	F606	5-6.3V	50		
Incandescent	F614	12-14V	80	100-R Red	101-R Red
Incandescent	F628	24-48V	40	100-A Amber	101-A Amber
Neon	N5115	100-120V AC	1.5	100-G Green	101-G Gren
Green Glow	G5115	100-120V AC	1.5	100-B Blue	101-B Blue
Red LED	L-617RL	2.0 Typ	10	100-W White	101-W White
Green LED	L-617GL	1.9 Typ	10	100-C Clear	101-C Clear
Yellow LED	L-617YL	1.9 Typ	10		

MODELS 105/106 — MODULAR INDICATORS

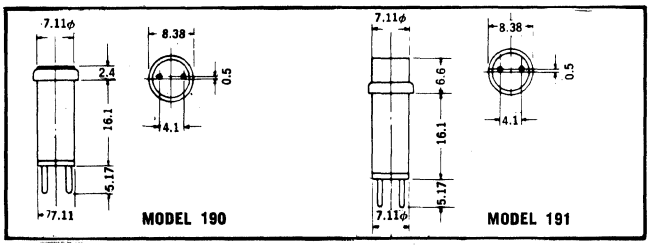


Miniature modular concept requires only 5mm panel hole. They are installed by pressing the lens through the panel from the front into the rubber bushing containing the lamp on the back. Ordering example: F305-105-R

SPECIFICATIONS — LIGHT SOURCE — LENSES

Light Source	Type	Voltage	mA	Flush Lens	Top Hat Lens
Incandescent	F305	4-6V	60		
Incandescent	F314	12-14V	40	105-R Red	106-R Red
Incandescent	F328	24-28V	24	105-A Amber	106-A Amber
Neon	N3115	100-120V AC	1.0	105-G Green	106-G Green
Red LED	L-317RL	2.0 Typ	10	105-B Blue	106-B Blue
Green LED	L-317GL	1.9 Typ	10	105-W White	106-W White
Yellow LED	L-317YL	1.9 Typ	10		

MODELS 190/191 — CARTRIDGE LAMPS

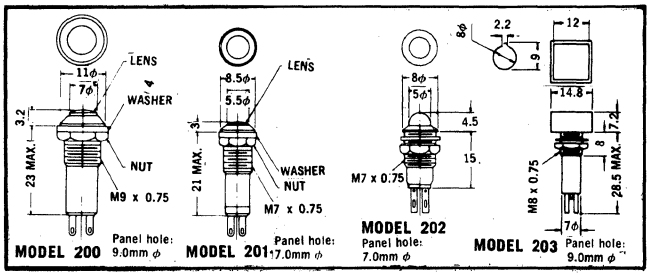


Cartridge style lamps are available in both flush and top hat type lens. Can be used in place of similar types from other manufacturers. Cartridge Lamp holders are also available as CLH-B (black) or CLH-S (silver).

SPECIFICATIONS — LIGHT SOURCE — LENSES

Light Source	Type	Voltage	mA	Flush Lens	Top Hat Lens
Incandescent	CLF06	5-7V	200		
Incandescent	CLF14	12-14V	80	190-R Red	191-R Red
Incandescent	CLF28	24-28V	40	190-Y Yellow	191-Y Yellow
Neon	CLN115	110-120	1.5	190-G Green	191-G Green
Green Glow	CLG	110-120	1.5	190-B Blue	191-B Blue
Red LED	CLLR	2.0	10	190-W White	191-W White
Green LED	CLLG	1.9	10	190-C Clear	191-C Clear
Yellow LED	CLLY	1.9	10		

MODELS 200 to 203 — INCANDESCENT INDICATORS

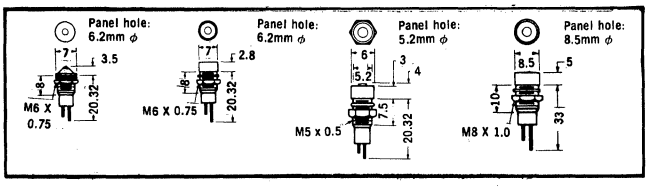


Model 200 is rugged chrome plated brass with long life T1¾ lamp. Model 201 is smaller version of 200 above. Model 202 is chrome plated brass with removable lens for lamp replacement. Model 203 is designed to accommodate custom legends and is front relampable.

SPECIFICATIONS — LIGHT SOURCE — LENSES

Series	Type	Voltage	mA	Lens
200	FA06	5-7	50	R — Red
	FA14	12-14	30	
201	FB06	5-7	50	Y — Yellow
	FB14	12-14	30	
202	FK05	4-6	60	G — Green
	FK14	12-14	40	
	FK28	24-28	24	B — Blue
203	FJ06	5-7	200	
	FJ14	12-14	80	W — White
	FJ28	24-28	40	

MODELS 406 to 409 — SOLID STATE INDICATORS

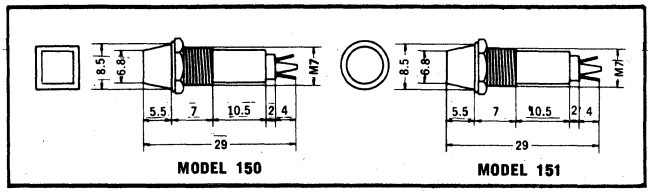


All of chrome plated brass except 409 is black anodized only, with low current LED lamp. Ordering example: LED-406R

SPECIFICATIONS — LIGHT SOURCE — LENSES

Type	Color (All)	Volts (All)	MA (All)	MCD
LED-406	R — Red	2.0	1.0	1.2
LED-407	G — Green			
LED-440	Y — Yellow			
LED-409				

MODELS 150/151 — UNIVERSAL INDICATORS



Attractive, low cost plastic assembly, mounts in 7mm hole with nut and washer supplied. Square or round in a variety of light sources and colors. Ordering example: F151-12R

HOW TO ORDER: XX - 15X - XXX

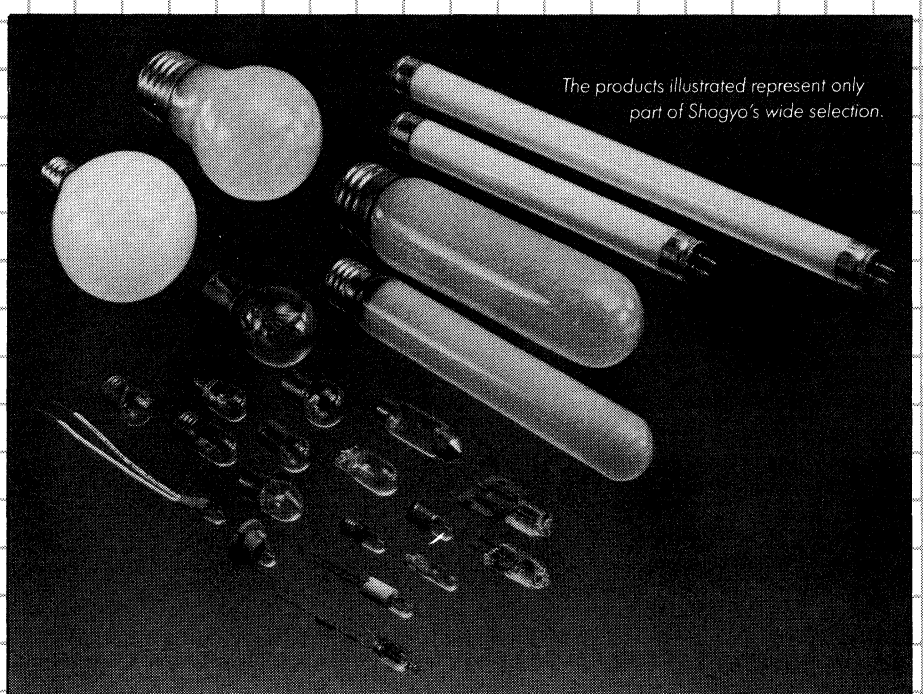
LIGHT SOURCE	SHAPE	VOLTS	COLOR
F — Incandescent	0 — Square	06 — 6 Volts	A — Amber
L — LED	1 — Round	12 — 12 Volts	G — Green
NR — Neon, w/resistor		24 — 24 Volts	R — Red
		10 — 110 Volts	C — Clear
		20 — 220 Volts	B — Blue
			Y — Yellow

SHOGYO LAMPS AND BULBS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

Including a diverse offering of:
- *Incandescent lamps*
- *Standard voltage lamps*
- *Fluorescent lamps*
- *Neon lamps*
- *Xenon flash tubes*
- *Bulbs*
- *Filaments*
- *Bases*

And featuring:
- *A comprehensive variety of styles, sizes, shapes, volts, amps, watts, filament shapes, and terminals (wire, bi-pin, flanged, wedge, knerled, midget grooved, bayonet and slide base).*



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:
Dial 516-466-0911 or

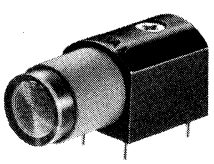
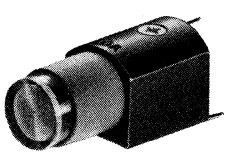
Indicator Lights

"The Touch of Brilliance in Panel Design"

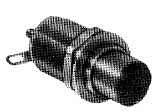
You need a solution!
You need it soon!
We can help you and we will.
You need well packaged LED's.
Standard bright? Super bright?
Ultra bright? Multi chip?

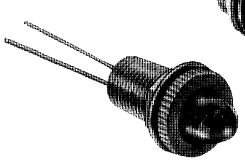




For the last 30 years The Sloan Company has been providing the finest indicator lights available.

For military applications, it's important to know that all of our material and processes meet or exceed military specs.





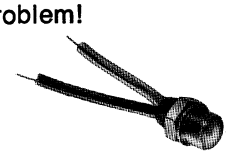
We got'em!

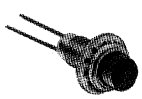
High Rel?

Waterproof?

Oiltight?

No Problem!





Maybe you have a high voltage circuit in a Radio Frequency sensitive environment. We handle that in every shape and size.

In the event that you don't see what you are looking for here, call us, you will find our staff most obliging. You will be pleasantly surprised to find how few you may have to order and how fast you can get them.

Free samples and prototypes available.

We will be glad for the opportunity to help you to find or develop the product you envisioned.

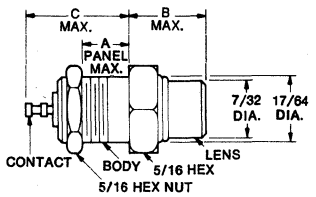
PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

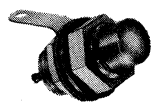
MODEL 102S

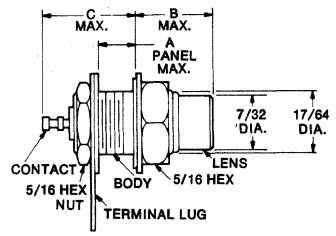


Utilizes the T-1 flanged-based incandescent lamp or LED. An internal silicone rubber pressure pad maintains electrical contact with the lamp and is an effective front-to-back of panel moisture seal.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 Delrin per LP-392
LENS—Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
HDWE—Brass SAE 72 Nickel Plate QQ-N-290 Phenolic per MIL-P-15035 Nylon MIL-M-20693

MODEL 102SI



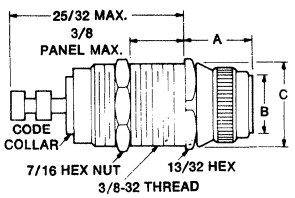


This is the two-terminal version of the basic 102S Model. It is created by the addition of special insulating hardware (above) which includes a solder lug as the second terminal.

NOTE 1—Both the 102S and the 102SI are available in four body styles: S-(above) provides a bright hex flange on the panel, SK-is a knurled flange, SS-a short low-profile hex, and SR-(above left) a small, plain flange.
NOTE 2—The 102S and 102SI are available in several lens styles: Q, QB, DSC, DS, STD. (Contact Factory)
NOTE 3—The 102 series can be furnished in a waterproof version, and can be RF shielded. (Contact Factory)

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

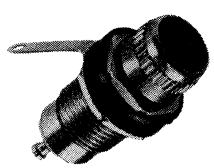
MODEL 855S

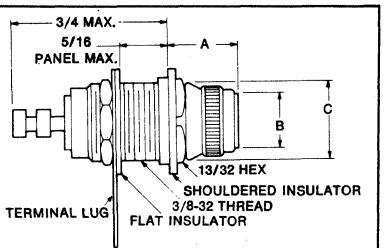


Among the features of the 855 Series are • Small Mounting Size • Front Relamping • Interchangeable Lens Assemblies. Contact pressure is maintained by a silicone rubber pressure pad which seals out moisture front to back of panel. Uses T-1¾ Flanged Base lamp, incandescent or LED.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Butyrate LP-349 Lexan LP-393 Nylon MIL-M-20693 Aluminum 2040-T4 Anodize MIL-A-8625 Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-7-10727
CODE COLLAR—Nylon MIL-M-20693
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290 Nylon MIL-M-20693 Linen Base Phenolic MIL-P-15035

MODEL 855SI





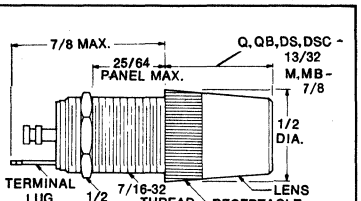
The 855SI Model is the two-terminal version of the 855S Model. It is created by the addition of special insulating hardware (above) which includes a solder lug as the second terminal.

NOTE: Available in Lens styles—Q, QB, DSC, DS, STD, M, MB, D, SE, DDS, U and I, see last page.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 Nylon MIL-M-20693
LENS—Lexan LP-393 Butyrate LP-349 Nylon MIL-M-20693 Brass SAE 72 Aluminum 2024-T4 Nickel Plate QQ-N-290 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

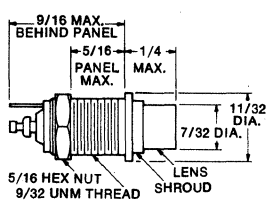
MODEL 856



A two-terminal, front-relampable indicator light designed to use the T-1¾ midget flange based incandescent bulb or LED. An internal silicone-rubber pressure-pad maintains electrical contact inside the lamp body. It also provides an effective moisture seal front to back.
NOTE: Available in lenses styles: Q, QB, DSC, DS, M and MB.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 Nylon MIL-M-20693 Delrin per LP-329
LENS—Lexan LP-393 Alum. 2024 Brass SAE 72 Anodize per MIL-A-8625 Nickel Plate QQ-N-290
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727

MODELS—121, 122—123, 124



The 121 Model lamp holder is a two terminal, front relampable indicator light specifically designed for use with T-1 Midget Flange Based incandescent or LED lamps. The 122 is a waterproof version of the 121. The Model 123 is the same but with the more conventional #6-32 screw body. The 124 is the waterproof version of the 123. Available in lens styles: STB, STC, DS, DSC, QB, Q.

MATERIAL & PROCESSES
BODY—Alum. 2024 Anodize MIL-A-8625 Nylon MIL-M-20693 Delrin per LP-392
LENS—Lexan LP-393 Alum. 2024 Brass SAE 72 Anodize per MIL-A-8625 Nickel Plate QQ-N-290

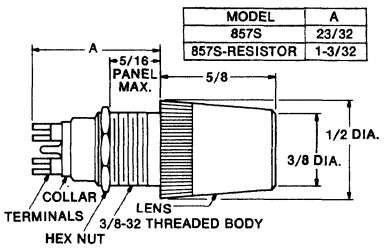
PANEL MOUNT FIXED LAMP

MODEL 857

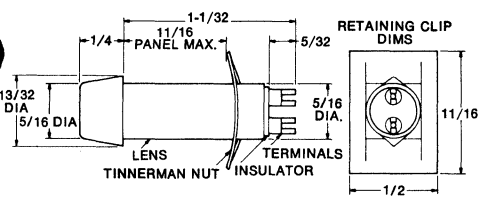


A sub-miniature fixed neon, offering optimum light dispersion and direction. Uses, Hi-Brightness or other NE-2 Series unbased bulb with or without resistors. Mounted in a ⅜ dia. hole with resistor, the Model 857 can be used directly on commercial line currents (115 VAC).

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 General Purpose Phenolic
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate per MIL-T-10727
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 858



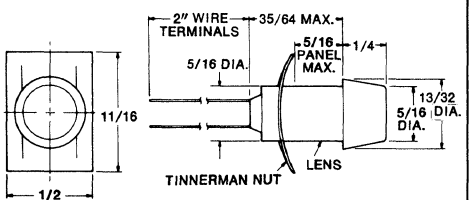
Uses the T-2 unbased neon lamp or can be supplied with the T-1 or T-1¾ unbased incandescent lamp. It accommodates long neon lamps (C2A Type) without dropping resistor built-in, as well as short neon lamps (A1C Type) with dropping resistor built-in. When resistor is built-in it can be used directly on commercial line current (115 volts A.C.). For LED applications see note below.

FOR LED APPLICATIONS LED can be supplied as a special in red, green and amber with or without built-in resistor. Voltage up to 28 volts available. (Contact factory).

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish
INSULATOR—General Purpose Phenolic

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 859

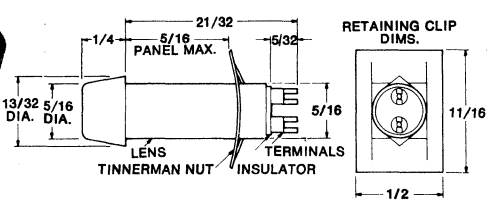


Uses the T-2 unbased neon lamp and long neon lamps without dropping resistor or with dropping resistor. It can also accommodate short neon lamps (A1C type) with or without resistor. With resistor the 859 Series can be used directly with commercial current (115 volts A.C.). Incandescent unbased lamps (T-1 or T-1¾) can also be furnished.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 862

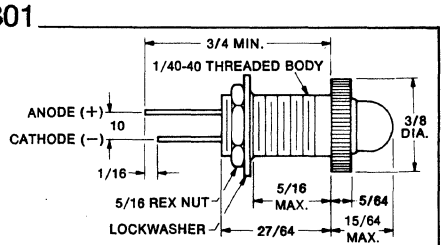


The 862 series accommodates short (A1C) neon lamps only with no resistor built in. Useful where space is limited behind the panel and offers wire wrap™ terminals for soldering.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
INSULATOR—General Purpose Phenolic
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
LED

MODEL 1L301

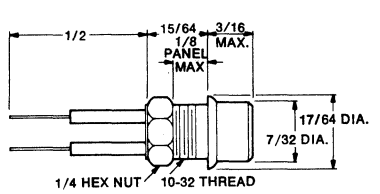


Designed for applications requiring LED indication without a lens. The 1L301 Model provides high brightness in the smallest threaded metal body available in the industry. Termination is by wire leads. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
HDWE—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—.02 Sq. Solid Cu. Tin plated for solderability

PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 105S/1L5S



Featuring a T-1 unbased commercial or MIL-Spec. lamp. Standard unit has two ½" long leads. Longer leads furnished upon request. RFI shielding and waterproofed version available. The 1L5S is the LED indicator model.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—32 AWG Solid Cu.

The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

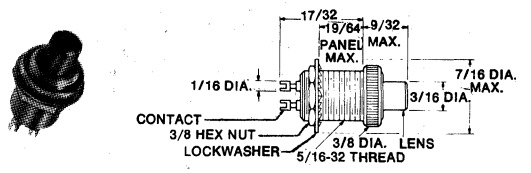
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 106S/1L6



Specifically designed for use with T-1 unbased MIL-Spec., commercial incandescent or LED light source. Can be installed from front or rear of panel.

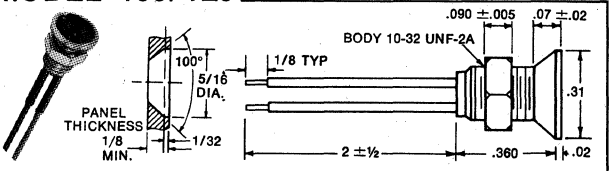
The light source in Model 1L6 is a special high bright T-1¾ LED protruding from a metal body. No lens is provided. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

NOTE: The 1L6 is available in red only.

MATERIAL & PROCESSES
BODY/HEX NUT/RD NUT—Brass SAE 72 Nickel Plated QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
LENS—Lexan LP-393 Nylon MIL-M-20693

T-1 UNBASED INCANDESCENT/LED PANEL MOUNT FIXED LAMP

MODEL 109/1L9



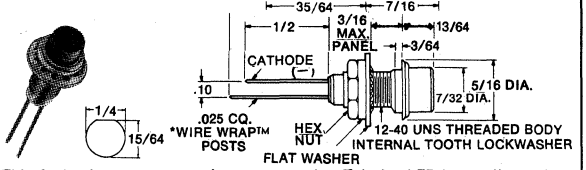
The new flush mount design can be used only with any T-1 size LED or incandescent lamp, including the new super bright LED which gives luminous intensity and color never before possible in the T-1 size. LED colors include red, green and amber with red, green amber, clear and white transparent and translucent lens, and are available with or without a resistor and RFI shielding.

The incandescent models offer the brightness and variety of incandescent colors, including red, green, amber, blue, white and clear with either transparent or translucent lens, and the option of RFI shielding.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP-393
TERMINALS—26 AWG Stranded Cu. MIL-W-16878 24 AWG Solid Cu. **MIL-W-16878**
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L501



This Series incorporate a red, green or amber T-1 size LED in an all-metal threaded body. Available with wire leads or wire wrap™ terminals. Two kinds of color contrast lenses are provided. When unlit, the white or clear lens material alone is visible. When lit, the color LED shows through plainly, giving the appearance of a lens which changes color.

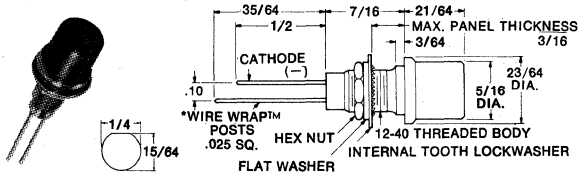
Built-in dropping resistors allow these units to be powered from sources up to 14VDC.

Available with either a round body or flat sided "D" body for consistent terminal location and ease of tightening. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Lexan LP-393 Nylon MIL-M-20693
TERMINALS—Phosphor Bronze ¾ Hard Tin Plate per MIL-T-10727
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L601

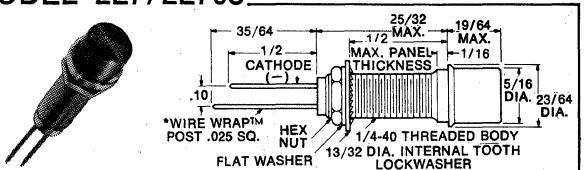


The 2L601 Model incorporates a red, green or amber T-1¾ size Hi-Bright LED in an all-metal threaded body, suitable for panel mounting. Large lens permits 180° visibility, up to 50 mcd. Termination is by wire-wrap™ posts, or wire leads. Lenses available in transparent material for head-on viewing or translucent material for side viewing. Built-in dropping resistors allow these units to be powered from sources up to 14 VDC. Bodies come round or in flat sided "D" for ease of tightening and consistent terminal location. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Nylon per MIL-M-20693 or Lexan per LP-393
TERMINALS—Phosphor Bronze—¾ Hard Tin Plate per MIL-T-10727
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
HI-BRIGHT LED

MODEL 2L7/2L703

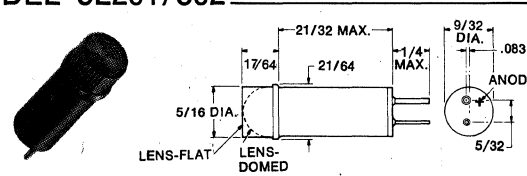


Utilizes a T-1¾ Hi-Bright LED. Permits 180° visibility, up to 50 mcd. The lens incorporates Fresnel rings and flutes which allow maximum distribution of light output. Also available with plain lens (no flutes or rings). Termination is by wire leads or wire-wrap™ post. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. 2L703 is waterproof version bodies can be round or "D" type.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290 Nylon per MIL-M-20693
LENS—Lexan per LP-393
TERMINALS—Phosphor Bronze—¾ Hard Tin Plate per MIL-T-10727
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
LED/INCANDESCENT/NEON

MODEL 5L201/502



These rugged aluminum cartridges incorporate LED, incandescent or neon light sources. Termination is by stainless steel pins suitable for use with a solder lug socket connector, wire wrap™ post adapter or lead wire terminal connector. *Gardener—Denver

Lens styles are flat or domed in transparent or translucent material. All lenses are furnished with fresnel rings for maximum distribution of light output.

MATERIAL & PROCESSES
BODY—Aluminum 3003 Anodize MIL-A-8625
LENS—Butyrate LP-349 Lexan LP-393
TERMINALS—Stainless Steel
HDWE.—General Purpose Phenolic Brass SAE 72 H.T. Spring Steel (Not shown).

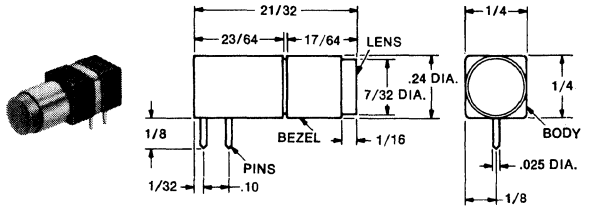
CIRCUIT BOARD MOUNT FRONT RELAMP INCANDESCENT OR LED

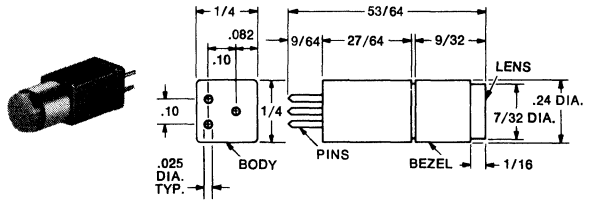
MODEL 101
PARALLEL MOUNT



Designed specifically for printed circuit board mounting. Uses any T-1 flange based lamp.

MATERIAL & PROCESSES
BODY—General Purpose Phenolic Nylon MIL-M-20693
LENS—Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625 Brass SAE 72 Nickel Plate per QQ-N-290
TERMINAL PINS—Brass SAE 72 Tin Plate MIL-T-20727 Berylium Copper

MODEL 111
PERPENDICULAR MOUNT

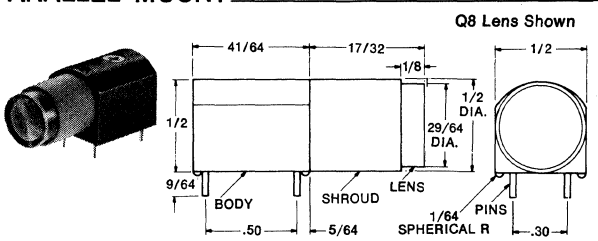


Same features as 101 Model but unit mounts perpendicular to surface of printed circuit board.

MATERIAL & PROCESSES
BODY—General Purpose Phenolic Nylon MIL-M-20693
LENS—Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625 Brass SAE 72 Nickel Plate per QQ-N-290
TERMINAL PINS—Brass SAE 72 Tin Plate MIL-T-20727 Berylium Copper

CIRCUIT BOARD MOUNT FRONT RELAMP INCANDESCENT OR LED

MODEL 864
PARALLEL MOUNT

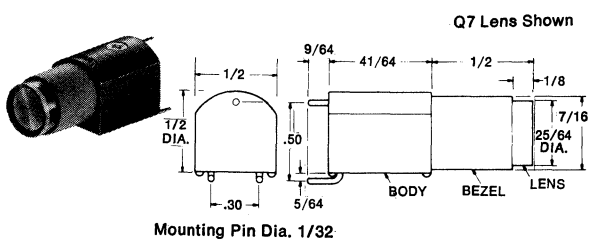


Mounting Pin Dia. 1/32

Designed specifically for printed circuit board mounting. May be used where illumination is need for the circuit board area as well as enunciation thru a panel.
Lens styles available in two diameters: 7/16" (7 series) Q7, QB7, DSC7, DS7 and ½" diameter (8 series) QB, QB8, DSC8, DS8.

MATERIAL & PROCESSES
BODY—Brass SAE 72 General Purpose Phenolic Linen Based Phenolic MIL-P-15035 Nylon MIL-M-20693 Nickel Plate QQ-N-290
LENS—Lexan LP-393 Nylon MIL-M-20693 Brass SAE 72 Aluminum 2024-T4 Nickel Plate QQ-N-290 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Tin Plate MIL-7-10727 Phosphor Bronze QQ-W-321

MODEL 874
PERPENDICULAR MOUNT



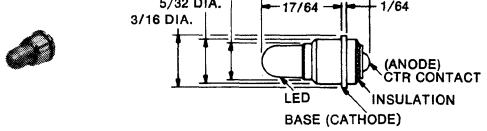
Mounting Pin Dia. 1/32

Same features as 864 Model but unit mounts perpendicular to surface of printed circuit board. Also available in two lens sizes.

MATERIAL & PROCESSES
BODY—Brass SAE 72 General Purpose Phenolic Linen Based Phenolic MIL-P-15035 Nylon MIL-M-20693 Nickel Plate QQ-N-290
LENS—Lexan LP-393 Nylon MIL-M-20693 Brass SAE 72 Aluminum 2024-T4 Nickel Plate QQ-N-290 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Tin Plate MIL-7-10727 Phosphor Bronze QQ-W-321

T-1 MIDGET FLANGED BASE LED

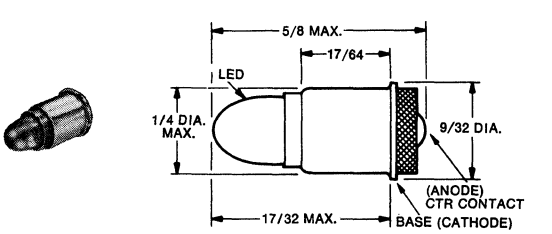
MODEL 4L001



The 4L001, available in diffused lens material is the Sloan T-1 based LED designed to offer diode reliability as a replacement unit in T-1 hardware. When maximum light output is desired using based LEDs in indicator applications, it is recommended that the lens be of transparent material with Fresnel rings. If translucent material is desired, then the lens should be without Fresnel rings.

T-1¾ MIDGET FLANGED BASE LED

MODEL 5L001



The versatile T-1¾ based LED is available in red, green or amber. Viable voltage range is 2.1 volts to 28 volts with power dissipation up to 400mW. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. The higher voltage capability permits the Sloan T-1¾ based LED to be used as direct replacement for incandescent bulbs in applications where light intensity is not critical but diode reliability is required.

The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

GENERAL INFORMATION:

- RFI shielding available with virtually all models.
- It is wise to avoid using blue or green lenses with neon lamps.
- It is also wise to avoid using blue lenses with LED lamps.
- Ultra-bright, multichip and other exotic lamps available.
- All materials meet or exceed applicable military specs.

Clear	CL	—	—	CTP
White	—	WLUC	W	W

LED LAMP INFORMATION

We have virtually any LED you want. The two basic sizes are T-1 and T-1¾ with flanged bases. The brightest varies with color, with green lowest to red highest. To order extra or super bright lamps simply add 01 or 04 to the model number. One more suggestion do not order LEDs with blue lenses.

NO.	LAMP TYPE	T-1	T-1¾
—	Standard-Bright	2 mcd	3-8 mcd
01	Extra-Bright	8-18 mcd	15-18 mcd
04	Super-Bright	20 mcd	60-80 mcd

IMPRINTING

Lenses may be hot stamped, engraved, or opaqued and engraved so that the character only is displayed.

The chart below designates type size available for hot stamping. Size of lens determines size of type that can be used.

TYPE	ACTUAL SIZE	
	WIDTH	HEIGHT
2 Pt	.050	.060
6 Pt	.060	.080
8 Pt	.080	.110
10 Pt	.090	.120
12 Pt	.110	.160
NOTE: For other size type, contact factory.		

LENS STYLE

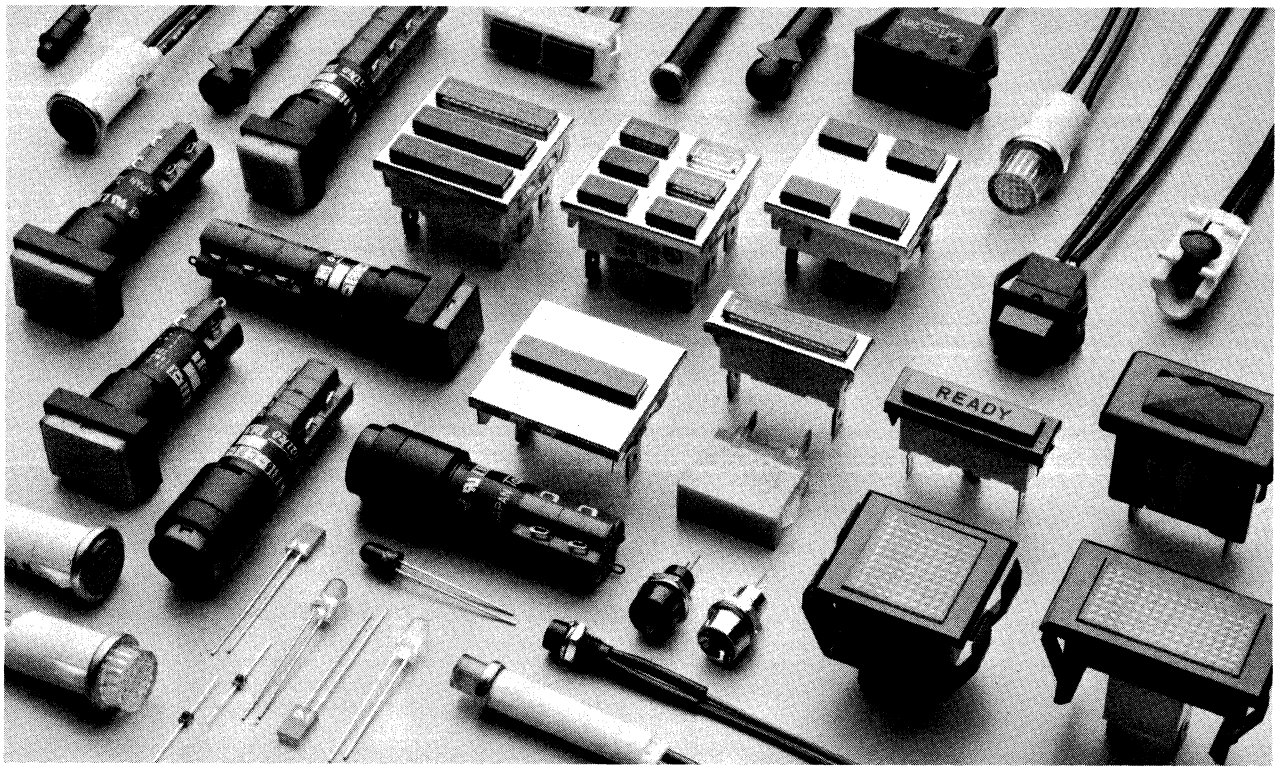
STYLE		DESCRIPTION
Q		Clear anodized bezel allows 180° visibility.
QB		Same as Q lens except with black anodized bezel.
DSC		Clear anodized bezel prevents sidelight emission.
DS		Same as DSC lens except with black anodized bezel.
STD		Full 180° visibility. Maximum illumination.
M		Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility.
MB		Same as M lens except with black anodized bezel.
D		Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication.
SE		Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space.
DDS		DIMMER: Rotating outer collar changes light output from full to minimum. Rotation to dim can be clockwise or counter-clockwise. Easy adjustment with gloved hand.
U		UNLIMITED: Has no lens to diminish light output. Specifically suited to T-1¾ flanged based LED for maximum light output.

120 SERIES

STB		Full 180° visibility. Maximum illumination. Black bezel.
STC		Full 180° visibility. Maximum illumination. Clear bezel.
QB		Black anodized bezel allows 180° visibility.
Q		Same as QB lens except with clear anodized bezel.

STYLES

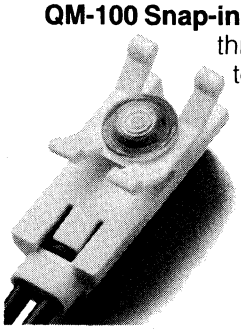
FLAT		NOTE: Lens style may be flat or domed, plain or lensed, meaning that the lens is provided with internal concentric rings on the inner face and flutes on the sides, thus giving better light distribution.
DOMED		



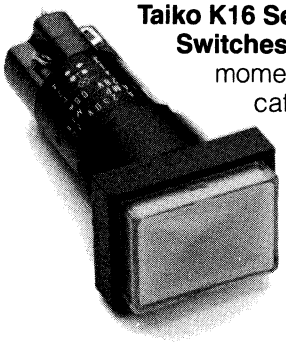
Ask us for solutions to your product lighting needs.

SoLiCo pilot lights, indicator lights and lighted pushbuttons come in a wide variety of styles and sizes for a broad range of products and applications. Give us your panel depth, required hole size, mounting method, lens size and style, material, and termination. Chances are, we'll have an inexpensive standard part for your needs. We'll even send you a free sample on request.

Series 8000 Snap-in Indicator Lights. Real time savers. Snap into .375" hole from front of panel. Pre-wired leads. Red, green, yellow or amber LED's. Red or green neon. Lens bodies domed or flat, translucent or transparent. Bright, quick, easy.



QM-100 Snap-in Indicator Lights. Lens fits through panel front. Lamp snaps to it from back. Pre-wired 6" leads. Standard, blue or green neon lamp. 4 lens shapes, 6 colors. Rated at 125-250V.



Taiko K16 Series Lighted Pushbutton Switches. Incandescent or LED. In momentary, maintained, and indicator styles. Solder lug terminals, independent lamp terminals, and T1 BiPins for durability. Round, square, or rectangular. Lenses clear or in 5 colors. 1, 2, 3, or 4-pole double-make/double-break contacts. Fit 5/8" round hole.

Special items and special assistance, too. Contact our factory sales department for quick solutions to unique lighting demands. Technical aid is always available to help you find the light that's best for your application. To find out just how many ways SoLiCo can help you see the light, call for our full-line brochure—**(203) 527-3092**

WHY do 40,000 Buyers and Electronic Engineers Keep Calling

MASTER DISTRIBUTORS

- BECAUSE orders placed by 3:00 p.m. are shipped the same day.
- BECAUSE we have over 8,000,000 relays & switches in stock.
- BECAUSE of our excellent Value-Added Service.
- BECAUSE of our Just-In-Time Program.

SINGLE SOCKET ASSEMBLIES FOR T-2 SLIDE BASE INDICATOR LAMPS

Available sockets include P N 30153 (round flange) and P N 30151 (rectangular flange). Sockets may be used with or without colored lens cap covering end of bulb which extends 18" beyond .09" flange. Socket P N 30153 (round flange) can also be used with round (.70" dia. × .48" high) or square (.70" ×.48" high) lenses. Both sockets 1.14" M.O.I. Mounting hole, .50" dia. Sockets accept 1-2 lamps rated at 4, 5, 6, 10, 13, 14, 16, 18, 24, 28 or 48 volts.

STRIP SOCKET ASSEMBLIES FOR T-2 SLIDE BASE INDICATOR LAMPS

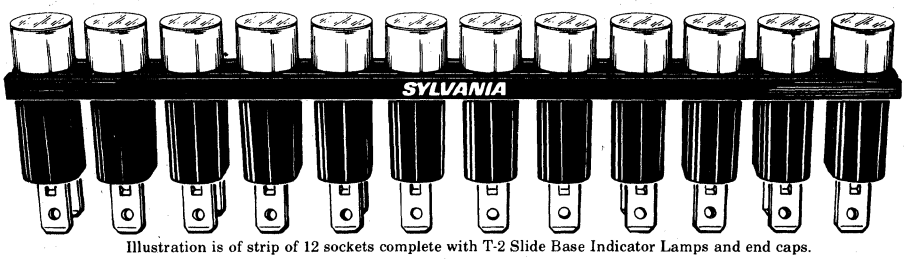

Illustration is of strip of 12 sockets complete with T-2 Slide Base Indicator Lamps and end caps.

Strip socket assemblies may be used with or without end caps listed above. Polycarbonate caps are press fit to the lamp; cannot be used with lamps rated over 1.1 watts. Pyrex caps must be cemented to the lamp with a translucent silicone rubber adhesive. Strip socket assemblies are available with 2 thru 12 sockets on 1 2" or 3 4" centers; common ground or individual contacts. Sockets accept T-2 indicator lamps rated at 4, 5, 6, 10, 12, 14, 16, 18, 24, 28 or 48 volts.

OPTICAL ISOLATORS

For fiber-optics communications, especially for analog or high bit-rate digital transmissions, on application of laser diodes (LD) as the light source, the affect of the reflective light from optical circuit devices to LD has existed. That is, by the reflective light, noises and inferiorization of LD are caused. The optical isolators, therefore, are indispensable to defend against the LD. FDK has succeeded in industrialization of a new growing method of YIG single crystal, called the TSFZ method (Traveling Solvent Floating Zone) and this is very suitable for high quality and low cost garnet type single crystal.
Accordingly, FDK has developed a compact and low cost YIG optical isolator, in which FDK YIG single crystal is applied, as a non-reciprocal circuit device for fiber-optics communications of 1.3 and 1.55μm wavelength ranges. This FDK YIG optical isolator has high reliabilities, i.e. high isolation, low insertion loss and better temperature dependence.

Features

- High isolation
- Low insertion loss
- Small and light
- Low cost

Specifications

Items \ Type	YD-101	YD-103	YD-104

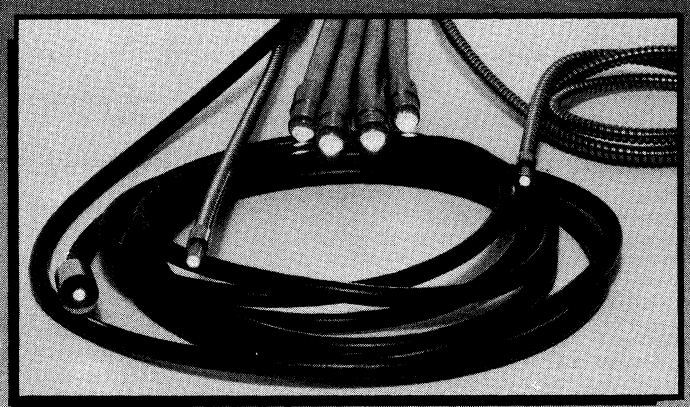
TWENTY YEARS OF EXPERIENCE

Fiberoptic Systems, Inc.

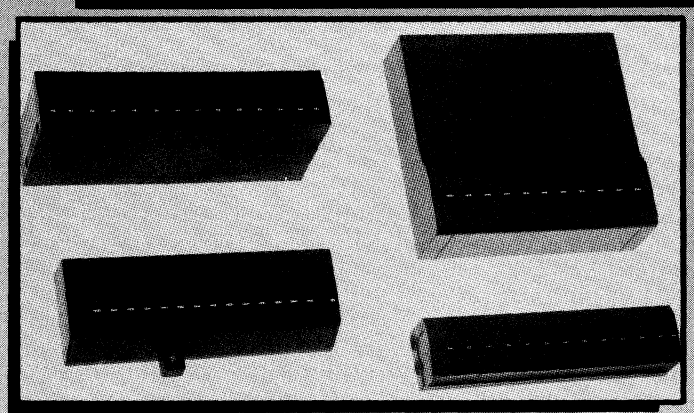
manufactures a broad range of custom-designed, high loss, short distance fiber optics-based products with diverse applications. We will work with you in the concept and design of any device that involves optical sensing or transmission and will manufacture single prototypes or large production runs. Most prototypes are shipped within one week of design completion.

Our sales engineers are available to answer all inquiries immediately.



■ *Randomized Light Guides*

Sophisticated, creative custom light guides and scanning devices for every need...



■ *Reflective Multi-Channel Custom Read Heads*

FREQUENT APPLICATIONS FOR FSI PRODUCTS:

REFLECTIVE READERS
- Single or multichannel
- Bar code readers
- Lottery ticket readers
- Pattern recognition
- Edge detectors

ILLUMINATION
- QC and inspection
- Signalization
- Custom microscope lights
- Optical curing (UV light)
- Surgical illumination

PHOTOELECTRIC CONTROLS
- Microfiche
- Missing parts detection
- Automatic inspection
- Sorting
- Fracture detection

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3)
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

WE SPEAK THE LANGUAGE OF LIGHT

The following pages were designed to give a brief overview of our fiber optic expertise. Our primary emphasis is to create systems for military and hazardous-environment applications, using our standard components or custom-building components as required. We've listed a sampling of our current product line and have made more designs not shown. We can reconfigure or redesign based on your application.

Let us put our fiber optic experience to work for you. Call us toll-free at 800-336-5917 (in Virginia, call 703-953-4751) for more information.

PASSIVE COMPONENTS

Wavelength Division Multiplexers:

As their name implies, WDM's enable multiple channels of analog and/or digital data to be multiplexed, transmitted over a single fiber and demultiplexed at the other end of the data link. Our standard WDM configurations will perform either as multiplexers or demultiplexers.

Part No.	Type	Fiber Size	Pigtail Length	Channel Capacity	Wavelength Range	Typical Insertion Loss	Crosstalk Isolation	Operating Temperature Range	Package Size (inches)		
									L	W	H
3650	Diffraction Grating	100/140 standard; others available	1 meter standard	6	400–1600nm	4dB	-30dB	-40° to 80°C	3.01	0.75	0.75
3652	Diffraction Grating	100/140 standard; others available	1 meter standard	15	400–1600nm	4.5dB	-30dB	-40° to 80°C	3.3	1.5	1.5
3655	Dichroic Mirror	100/140 standard; others available	1 meter standard	2	800–1300nm	2.5dB	-30dB	-40° to 80°C	2.2	0.5	0.5

Low Loss Couplers:

Our couplers can be used "stand-alone" or in linear data buses, and are designed for use in harsh environments. Performance is determined by fiber sizes and split ratios. Two basic examples are shown.

Part No.	Type	Fiber Type	Pigtail Length	Excess Loss	Operating Temperature Range	Package Size (inches)	
						L	Diameter
3666	Symmetric	Multi-mode Fibers	0.5 meter standard	≤ 1 dB	-55° to 200°C	4.0	.375
3662	Asymmetric	Multi-mode Fibers	0.5 meter standard	≤ 0.2 dB	-55° to 200°C	4.0	.375

Optical Sensors:

Other environmental sensors (pressure, temperature, etc.) are available or can be designed and manufactured for your specific application.

Part No.	Type	Max Insertion Loss	Min I/O Ratio	Wavelength Output Range	Channel Pitch Nominal	Channel Width Nominal	Fiber Type	Coding Type	Coding Format	Bits	Resolution/ Travel	Package Size (Inches)
3571	Linear Position Transducer	11dB	10dB	720–950nm	19nm	9.8nm	100/140 step index NA .22	absolute	Gray Code	11	.00075″ / 1.519″	2 × 4 × .87
3567	Rotary Position Transducer	11dB	10dB	720–950nm	19nm	9.8nm	100/140 step index NA .22	absolute	Gray Code	11	0.176° / 360°	1.645 × 1.86 (OD)

Optical Switches:

Our switches are completely passive in that they require no electrical input and offer all the system advantages of fiber optics. The design is rugged and environmentally sealed to allow use in field applications. Various options and customizations are available depending on the wavelength spectrum available, fiber size, pigtail length, connectorization, mounting requirements, etc.

Part No.	Type	Insertion Loss for 100/140 G.I. .29NA	I/O ratio	Wavelength Optimization Availability	Temperature Range	Package Size (Inches)	Notes
3693	Rotary	3dB max	40dB min	800–900nm 1060–1560nm 600–700nm	-55° to 75°C	L – 2.20 OD – 1.24	Up to 10 channels
3692	Pushbutton	2dB max	25dB min	800–900nm 1060–1560nm 600–700nm	-55° to 75°C	L – 1.20 W – 0.96 H – 3.10	Options: normally open or closed, momentary or alternate action.

On-Axis Fiber Optic Rotary Joint (FORJ):

Our fiber optic rotary joints (FORJ's) are components that provide the same unlimited rotational freedom for electro-optical systems that the slip ring has long provided for electrical systems. We manufacture passive on-axis FORJ's with a wide variety of fiber types, including single mode optical fibers. The off-axis FORJ is designed for applications where the centerline cannot be allocated as the fiber optic signal path. It is an active device that is supplied with its own transmitter and receiver.

	Part No.	Outside Diameter (Inches)	Length (Inches)	Fiber Size (μm)	Wavelength (nm)	Pigtail Length Each End (m)	Connection
MULTI-MODE	3585-1	.75	2.16	50/125	800–900	1	None
	-2	.75	2.16	100/140	800–900	1	None
	-23	.75	2.16	50/125	800–900	1	906 SMA
	-24	.75	2.16	100/140	800–900	1	906 SMA
	-22	.75	2.16	200/230	800–900	1	906 SMA
SINGLE-MODE	3581	1.26	3.45	10/125	1300	10	None
	3588	1.26	3.68	10/125	1180-1580	10	None

NOTE: No special features such as flanges or derotation adaptors are included on these configurations.

TRANSMITTERS AND RECEIVERS

Many of our transmitters and receivers are custom-built according to the special needs of our customers. Listed below are representative examples of our current products. A variety of packaging configurations are available, including rack mount and stand-alone versions. In addition, discrete-component, surface-mount and thick/thin film hybrid versions of these products are available.

FIBER OPTIC COMMUNICATIONS

FROM OPTO-HYBRIDS TO COMPLETE SYSTEMS

MERET, Inc., a leader in optical communications since 1975 offers a wide range of components, subsystem assemblies and complete turnkey systems for fiber optic communications

CCTV

FEATURES:
Small Hybrid Package
Simple Operation
High Density Packaging
Stand Alone AC Packaging

APPLICATIONS:
Surveillance
Security Networking
Robotics
Tele-Conferencing

Model	BW	Wavelength	Loss budget	Distance	SNR
284TV	6Hz-5MHz	820 nm	17 dB	4 km	46 dB
285TV	6Hz-10MHz	820 nm	13 dB	3 km	46 dB
28511TV	6Hz-10MHz	820 nm	20 dB	6 km	46 dB
213511TV	6Hz-10MHz	1300 nm	12 dB	10 km	46 dB
214511TV	6Hz-10MHz	1300 nm	21 dB	<20 km	46 dB

HI-RESOLUTION VIDEO

FEATURES:
Up to 120MHz Bandwidth
RGB on One Card
Automatic Gain Option
820nm or 1300nm Systems

APPLICATIONS:
Computer Graphics
Medical Imaging
Flight Simulation
Tempest Networks

Model	BW	Wavelength	Loss budget	Distance	SNR
288TV	6Hz-35MHz	820 nm	4 dB	1 km	46dB
28811TV	6Hz-35MHz	820 nm	14 dB	4 km	46dB
26811TV	6Hz-50MHz	820 nm	12 dB	3 km	46dB
26911TV	6Hz-120MHz	820 nm	7 dB	0.5km	46dB
213911TV	6Hz-120MHz	1300 nm	9 dB	5 km	46dB

ANALOG SYSTEMS

FEATURES:
Bandwidth to 1 GHz
LED or LASER Sources
Simple Operation
820 or 1300 nm
Rack Mount or Stand Alone Packaging

APPLICATIONS:
IF / RF Communications
Ultra-Hi Resolution Graphics
Instrumentation
EMP Testing
Satellite Entrance / Exit link

Model	BW	Wavelength	Loss budget	Distance	SNR
27020	10Hz-40kHz	820 nm	18 dB	4 km	60 dB
24802	DC-400kHz	820 nm	18 dB	6 km	60 dB
259-20	20Hz-140MHz	820 nm	1 dB	0.5 km	46 dB
2139-20	20Hz-140MHz	1300 nm	5 dB	5 km	44 dB
2149-400	20Hz-400MHz	1300 nm	9 † dB	10 km	48 dB
2149-1000	1kHz-1GHz	1300 nm	5 † dB	5 km	46 dB

DIGITAL SYSTEMS

FEATURES:
Data Rates to 150 MB / s
LED or LASER Sources
RZ or NRZ Capability
820 or 1300 nm
Easy Installation and Operation

APPLICATIONS:
Data Buses
Point to Point Links
Tactical Communications
Peripheral Remoting

Model	Data Rate	Wavelength	Loss Budget	Distance	BER
RS232-LS	DC-19.2 kB/s	820 nm	4 dB	1 km	10E -9
481	DC- 5 MB/s	820 nm	8 dB	2 km	10E -9
4811	DC-5 MB/s	820 nm	20 dB	5 km	10E -9
485	DC-10 MB/s	820 nm	4 dB	1 km	10E -9
4145-11	DC-20 MB/s	1300 nm†	50 dB	20 km	10E -9
4595	DC-150 MB/s	820nm	3 dB	0.5 km	10E -9

Military and Specialty Systems

- Ruggedized / Field Deployable / Hardened Systems
- Multi-Media - Digital & Analog Systems
- Battery Powered Transmitters
- Wavelength Division Multiplexing for Multiple Signals on One Fiber
- High Quality Video Plus Audio or Data on One Fiber (Model FM +1)

† on single mode fiber

all loss budgets are given for 50 μ fiber unless single mode (†) is specified

Turnkey Fiber Optic Systems

MERET can supply complete multi-channel systems in cage rack mount configurations. Using MERET hybrid modules, up to 24 channels of analog, video or digital data can be housed in a single standard 19- inch cage, together with all the necessary decoupling, power supplies, fuses, switches, indicators and alarms. Applications include multi-channel remote surveillance video systems with digital data links for camera control, data communications systems, RGB video with sync for computer graphics and CAD / CAM. MERET turnkey systems are supplied with ruggedized multi-channel cable. Field installation service and customer training are also available.

*See product data sheets for ordering information. Complete P/N for cable assembly may include up to 6 extra digits for specifying pigtail or patchcord, length of fiber, size of fiber and source for fiber (NEC a customer). Complete P/N for separate connectors for field assembly may include extra digits for specifying inner diameter of ferrule to match customer's fiber size.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

SHARP®
Optoelectronics

Laser Diodes

Laser Diodes

Sharp's laser diodes use a double hetero junction of gallium, aluminum and arsenide compound (GaAlAs). Long life and high reliability are realized by use of our original VSIS structure (V-channeled Substrate Inner Stripe).

Features

- High power type, low noise type, wide temperature ranges and short wavelength type are included in the scope of products.
- High precision package. PIN photodiodes are built in, and optical power output control is easy.
- The line-up is full, from the ultra compact (ϕ5.6 mm packages) type to the single positive power supply p/w type.
- Long life, high reliability.
- Stable single transverse mode, low threshold current.

	Model No.	Wavelength (nm)	Optical power output (mW) TYP.	Optical power output (mW) MAX.	Features	Main applications
	LT030 Series	750	3	5	Short wavelength	High-speed laser printers, Bar code readers
NEW	LT031 Series		7	10	Short wavelength	High-speed laser printers
	LT020MC	780	3	5	General use	Measuring instruments, Bar code readers
	LT021 Series		10	15	High power	High-speed laser printers, Medical apparatus
	LT022 Series		3	5	Low noise	CD-ROMs, Fiber Optic Communication
	LT023 Series		3	5	Low noise (Multi-mode)	VD players, Analog devices, Fiber Optic Communication
NEW	LT022/023 WIDE TEMP. Series		3	5	Low noise Wide Temperature (−30 to 85°C)	Fiber Optic Communication Factory Automation Equipment
	LT024 Series		20	30	High power	Optical disk memories, Magneto-optical disk systems
	LT026 Series		3	5	Small astigmatism	General use laser printers
	LT027 Series		7	10	General use	Medium-speed laser printers
NEW	LT080MD		3	5	Stabilized wavelength	Measuring instruments, Laser printers, Bar code readers
NEW	LT091MD		14	20	2 channels*	High speed laser printers
	LT010 Series	810	3	5	General use	Measuring instruments, Fiber Optic Communications
NEW	LT016 Series		30	40	High power	YAG laser excitation, Optical disk memories, Magneto-optical disk systems
	LT015 Series	830	30	40	High power	Optical disk memories, Optical memory cards, Medical Apparatus
	LT090 Series		80	100	High power (3 channels)	Medical apparatus, Optical range finders
NEW	LT011MS	840	3	5	Long wavelength	Fiber Optic communications

*Independent channel control

SHARP Optoelectronics

Fiber Optic Data Link/ Laser Receptacle/Photodiode Receptacle

Fiber optic data link

	Model No.	GP0F200
Description	Transmitter	LT022PS (780nm, MAX5mW)
	Receiver	PIN photodiode
	Fiber	Plastic fiber (1mmϕ)
	Feature	Bidirectional type High-speed 32Mb/s transmission Single 5V power supply

Laser diodes with high frequency modulator*

	Model No.	LT015R10	LT024R10
Description	Laser diode	LT015MD (830nm, MAX 40mW)	LT024MD (780nm, MAX 30mW)
	S/N	MIN. 65dB, TYP. 80dB	
	Oscillation frequency	TYP. 250MHz	
	Supply voltage	+ 5V (High frequency modulator)	
	Power consumption	MAX 50mA (High frequency modulator)	

*For laser noise reduction in optical memory application.

Laser receptacle

	Model No.	GP0F50T
Description	Laser diode	LT022MS (780nm)
	Connector	FC type
	Light output	MAX. 0.25mW (*)

* Initial value. From the end of fiber (GI 50/125, length = 1m, the other end is conneted to this receptacle)

Photodiode receptacle

	Model No.	GP0F50R
Description	Photodiode	PIN photodiode
	Connector	FC type
	Sensitivity	TYP. 0.3mA/mW (*)

* Initial value. V_R = 5V, P_{IN} = 0.1mW, λ = 780nm.

Micro Mo®

MINIATURE ELECTRIC DRIVE SYSTEMS AND ROTARY POWER TRANSMISSION COMPONENTS UP TO 1 H.P.

- Originators of Skew-Wound Coreless Micromotors.
- Patented and Licensed the World Over.

- **Coreless DC motors:**
  - .1-30 W continuous output power
  - .01-7.09 oz -in. max. continuous torque
  - Speeds up to 16,000 RPM.
- **PMDC motors:**
  - 4-430 W continuous output power
  - .91-415 oz-in. max. continuous torque
  - Custom windings available up to 180 VDC.
  - Speeds up to 6,000 RPM.
- **Precision gearheads:**
  - Diameters from 10mm-120mm (.39-4.72 in.)
  - Continuous output torque to 96 ft-lb.
  - Bidirectional operation in ratios up to 1,000,000:1

ALSO AVAILABLE:

Aeroflex *brushless dc motors and torquers*

We're more than just a motor company

State-of-the-art design backed by 25 years of engineering and field experience . . . Aeroflex motors and torquers are working, accurately and reliably, in the most difficult military, aerospace and industrial applications. Time and again they have proven how well they can perform in hostile environments on land, sea or in the air . . . in outer space or in the ocean's depths.

Aeroflex fractional and subfractional H.P. brushless D.C. motors offer equal — or better — performance than brush motors, with no compromise in size. They are ideal for those special applications where environment, service life or other brush motor limitations cannot be tolerated. Their high torque-to-inertia ratios, excellent heat transfer characteristics, high efficiencies (75%) and freedom from downtime make them a cost effective choice.

Aeroflex torquers are designed and built for the same demanding kind of use. They're available from 1" O.D. to 24" O.D. in torques from tenths of an oz.-in. to hundreds of ft.-lbs. With designs like this in stock, it's usually a simple matter to meet your application needs.

Should you require a special motor or torquer, we'll work to your specification or help you develop one that meets your need. We can also help you with the electronic drive interface, or even provide the complete electronic/motor assembly.

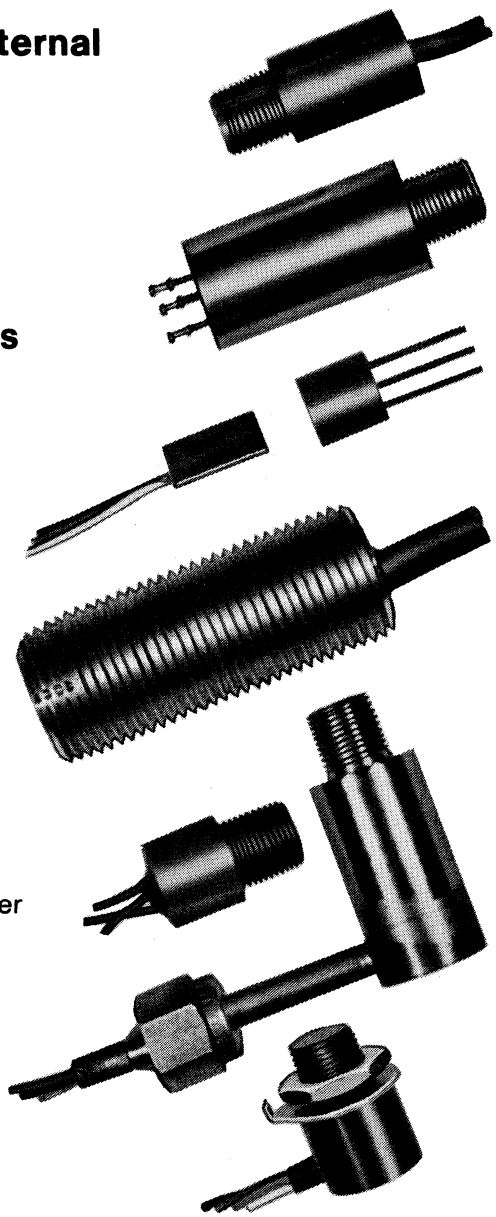
We're more than just a motor company.

MAGNETIC PRODUCTS DIVISION
AEROFLEX LABORATORIES INC.
SOUTH SERVICE ROAD • PLAINVIEW, LONG ISLAND, N. Y. 11803
TEL.: (516) 694-6700 • TWX: 510-224-6417

Speed-Independent Magnetic Pick-ups

Their output voltage amplitudes are totally independent of the rate of change to the external magnetic field. They provide

- **True zero speed sensing**
- **Contactless limit switches**
- **Translational and rotational velocity, direction and position sensing**
- **Counting, indexing, and timing functions**



Benefits:

- Simplify designs
- Low power consumption
- Rugged enough for engine environments
- Aerospace reliability
- Operate from logic power bus
- Freedom from EMI (no choppers or oscillators)
- Freedom from actuator mechanisms
- Can replace optical systems

Applications:

Computer peripherals—sensing of indexing marks for drive mechanisms in card readers / magnetic tape memories / paper roll drive, and character selection in printers

Transportation—wheel speed sensing (skid-controlled braking) / ignition system timing / vehicle sensing (traffic control)

Industrial — speed, position and limit sensing

Aerospace — wide applications

Other Products:

Solid state current sensors /
as well as brushless DC Motors, Torques and Drive Electronics.

These Slip Ring Assemblies have found wide use in gyro gimbal and instrument applications. The fully enclosed and tested assemblies feature fine diameter gold alloy brushes mated to compatible gold alloy rings for excellent noise characteristics at low torque levels. Although miniature in size, the assemblies are surprisingly rugged and are able to withstand most military environmental specifications.

Units have been fully tested to the environmental parameters listed below, proving their ruggedness and reliability. All units are factory tested before shipment and a copy of the test data is available with each unit upon request.

The units shown here are only a sample of those available which include a 50 ring capsule of .685 diameter.

SPECIFICATIONS

MECHANICAL

1. Rings: Gold alloy
2. Brushes: Gold alloy wire, spring temper
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Stainless steel
5. Housing: Anodized aluminum
6. Rotation: Bi-directional

ELECTRICAL

1. Current: Signal level to 1 amp maximum
2. Voltage: Micro-volts to 110 volts rms
3. Dielectric Strength: 500 volts rms (all combinations)
4. Leadwire: #30 AWG teflon insulated, 15″ long minimum
5. Noise: ±5 micro-volts per ma

ENVIRONMENTAL

1. Temperature Shock: +85°C for 1 hour and immediately transferred to −55°C for 1 hour
2. Shock: 18 shocks, 20 "g" with duration of 11 ±1 ms (MIL-E-5272C, Procedure V)
3. Vibration: MIL-STD-202B, Method 204, test condition B
4. Altitude: 50,000 ft. and −55°C
5. Humidity: MIL-E-5272C, Procedure III (95% R.H. @ 120°F for 360 hours)

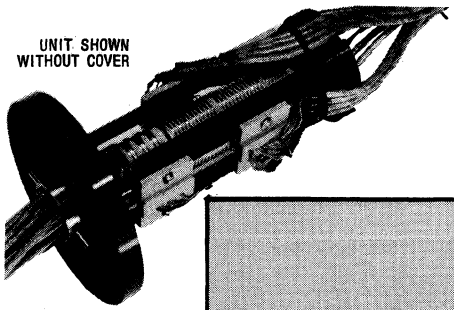
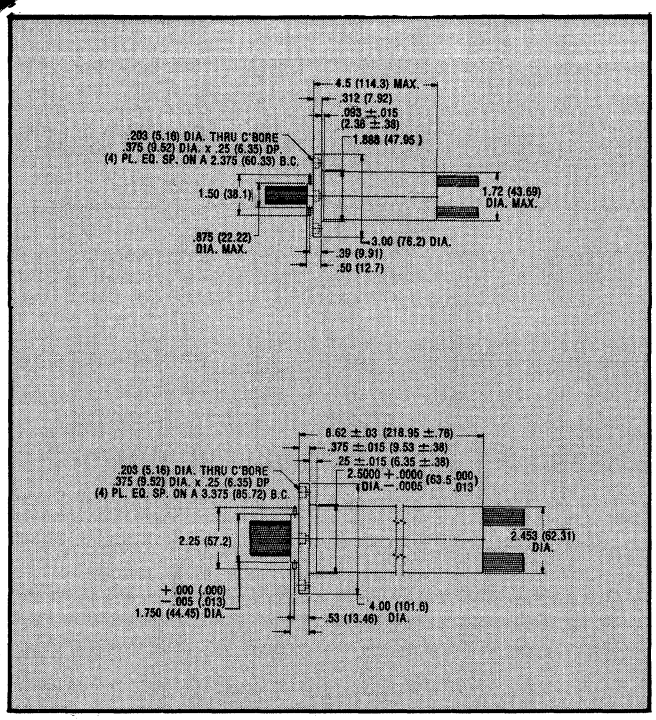
CAPSULE SLIP RING ASSEMBLIES



CAY-150
UP TO **48** RINGS



CAY-1120
UP TO **90** RINGS

These assemblies, specially designed for gyro-rate table and centrifuge applications, have found wide use because of their versatility and compact size. The standard assembly, can be supplied (at slight extra cost) with internally shorted rings for double and triple current ratings, and with single, double and triple shielded wire. Featuring gold alloy wire brushes and compatible gold alloy rings, these assemblies are manufactured from proven production tooling at a very nominal cost. Special assemblies with switching circuits and others with non-standard materials for use in severe environments are available.

DAY-705

These slip-rings are built to your order using many standard components which have proven themselves over many years of reliable operation. The "platter-type" design includes one coin silver ring on each side of each molded sub-assembly; and, leaf type silver graphite brushes which are molded in an insulating block and perfectly matched to the face of each ring. Inasmuch as the assemblies are the stack-up type, we are able to custom build them to your specifications—using our standard components—with a very minimum lead time required.

DAY-710

Similar in construction to our DAY-705, this platter type unit features two coin silver rings on each side of each platter for greater package density, and a "through bore" design which can be used for the passage of fluid or gas lines.

SPECIFICATIONS

MECHANICAL

1. Rings: Coin silver
2. Brushes: Silver graphite
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Anodized aluminum
5. Housing: Anodized aluminum
6. Speed: 500 rpm maximum

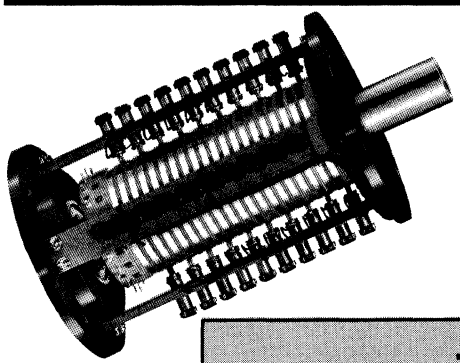
POWER CAPSULE SLIP RING ASSEMBLIES



CAY-125

A general purpose, off-the-shelf slip ring assembly especially applicable for strain gage and thermocouple measurements where rotating detector circuits must be brought out to stationary measuring equipment.

CAY-755

The standard cartridge, (AHW-16), has been used for many years on our CAY-125 assembly and is now available with the CAY-755 which is also drawn, or individually, for use on any ring which is a minimum of ⅛" wide. The silver graphite brushes, coil springs, caps and holders may be purchased individually or as an assembly and are all available from stock.

CAY-125

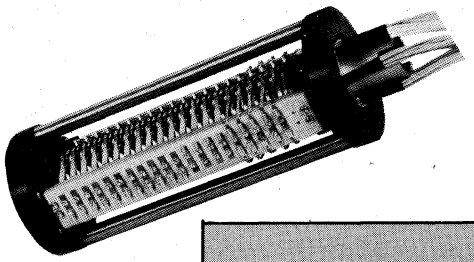
MULTI-PURPOSE SLIP RING ASSEMBLIES



These assemblies, designed for use in commercial equipment, have been used in applications ranging from thermocouples to the transmission of medium power. They feature coin silver rings, silver graphite brushes, convenient terminals on both the slip ring and brush blocks, and a rotor design which allows the leadwires to be exited through the shaft bore, or under the bearing when a shaft clearance hole is required. The wide variety of sizes and configurations available, including "in-between" shaft diameters, allows the designer to select a standard assembly for his application, eliminating time consuming and costly design charges.

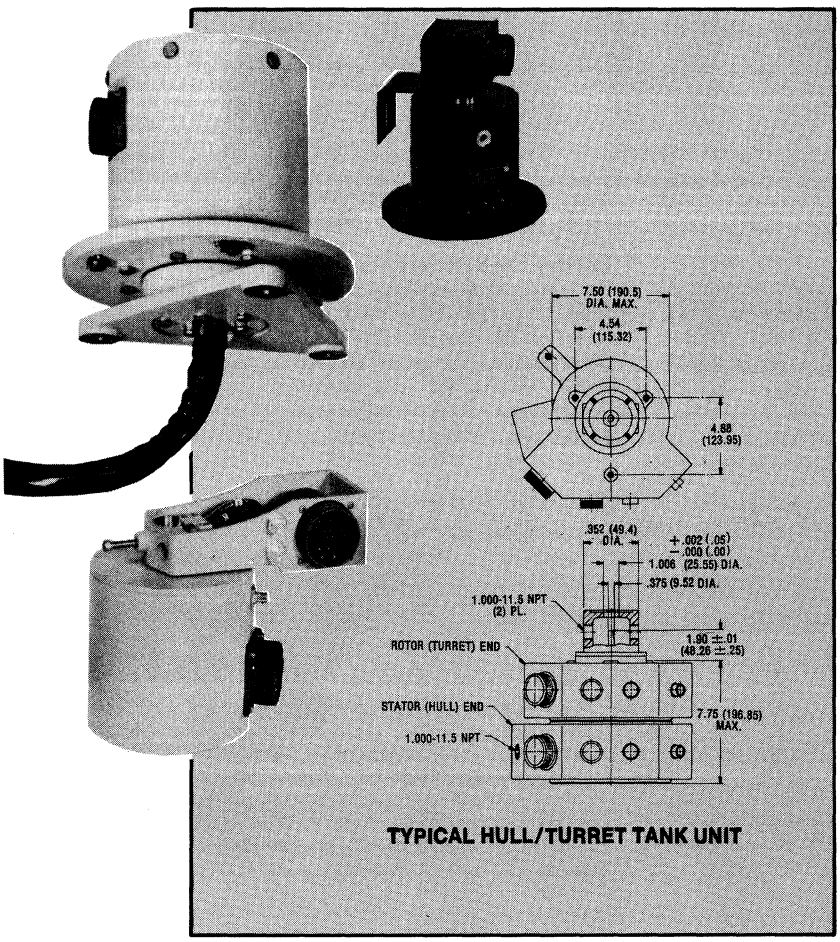
Airflyte ELECTRONICS CO.

VEHICLE SLIP RING ASSEMBLIES



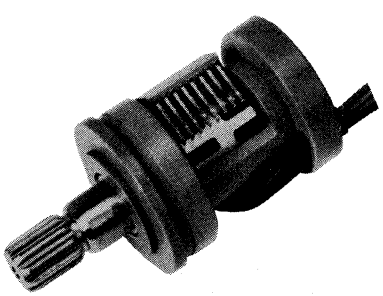
TYPICAL HULL/TURRET TANK UNIT

Airflyte Electronics has experience in the design and manufacture of assemblies for personnel carriers, tanks and other military vehicles. We have built slip rings for periscopes, turrets and commander stations. These assemblies range in size from 6″ or less in outside diameter to slip rings with clearance holes larger than 28″. This type of assembly is characterized by its rugged construction, usually has two high power rings, several low power and up to 50 signal rings. Illustrated are several of the configurations we have built in production quantities.

SPECIFICATIONS

1. Voltage: from 28 VDC to 208 VAC
2. Current: from 1 amp to 600 amps
3. Frequency: DC to 100 MHz
4. Speed: Usually about 20 rpm
5. Noise: Less than 10 mΩ peak to peak
6. Hydraulics: 3000 psi operating
7. Pneumatics: 1500 psi operating
8. Torque: 15 ft.-lb. max. (no hydraulics)
9. Life: 3000 hrs.
10. Environmental: Vibration, shock, etc. per MIL SPEC
11. Terminations: Connectors & fittings customer compatible

ENCODERS & SWITCHES



Airflyte encoders and rotary switches feature drum construction with solid gold alloy conducting segments embedded in epoxy and machined flush. Brushes are multi-strand, spring-temper gold-alloy. As small as ½″ diameter.

ENCODERS

Special encoders with BCD, Gray, True Binary or non-standard codes are available. Units supplied with or without logic circuitry.

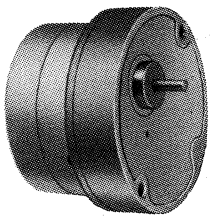
SWITCHES

When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

NEW HOOK ROAD, BAYONNE, NEW JERSEY 07002 201-436-2230 TWX-710-729-4489 FAX 201-436-6024

AC, DC, STEPPER AND GEARED MOTORS

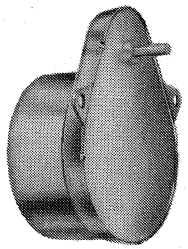
Airpax offers a broad range of high-quality geared AC, DC and stepper motors. Available in standard or custom design to meet the needs of any application. Contact Airpax Company, West Johnson Avenue, Cheshire, CT 06410. (203) 272-0301. A division of North American Philips Corporation.



Instrument Motors

2-phase stator and permanent magnet rotor. Can be furnished as a synchronous motor; 24, 120 or 220 VAC, or as a stepper motor; 5 or 12 VDC. Standard gear reductions will produce high torque outputs, plus speeds to 1 RPM on asynchronous models and step angle to 0.05° on stepper units.

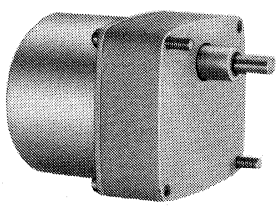
81400 Series	Synchronous operation
82400 Series	Stepper operation



Reversible Synchronous Motors

For commercial/industrial use. 50 or 60 Hz operation; voltages from 12 to 230 VAC. PM rotor, 2-coil windings. Electrically reversible. Rotor speeds 300 RPM at 60 Hz or 720 RPM at 60 Hz. Rotor torque 0.75 oz.-in. and 1.1 oz.-in., respectively. Output speeds from 300 RPM to 1/1000 RPM.

81300 Series	300 RPM rotor
S7100 Series	720 RPM rotor



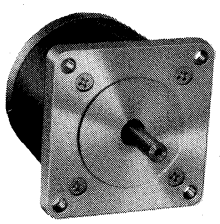
Low-Cost, High-Torque Geared Motors

Ideal as either a synchronous or stepper motor for use in medical and scientific instruments and computer peripherals. Both models are equipped with NEMA-type 2-11 gearbox. Standard output speeds as low as 1/2 RPM or step angle as small as .05°. Rotor bearings and output shaft bearings are permanently lubricated.

86100 Series	Synchronous operation
86200 Series	Stepper operation

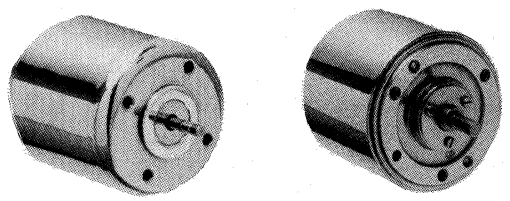
Low-Cost, Iron Rotor DC Motor with Gearbox

39 mmØ – furnished as a self-contained unit with integral gearbox. Operating voltages of 6, 12 or 24 VDC. Torque up to 18 oz.-in. Output speeds from 8.2 to 330 RPM. All units have sleeve bearings and built-in spark suppression.



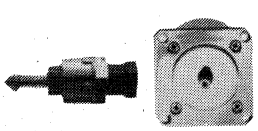
41 to 80 oz.-in. Holding Torque, 1.8° Step Angle – Series 4SH

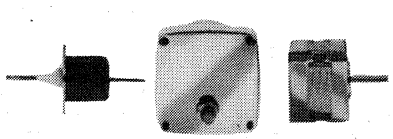
Size 23 unipolar stepper motors have a small step angle of 1.8° to provide fine increments for direct, precise positioning without reduction gears for use in computer peripherals, business machines and control equipment. Hybrid permanent magnet construction.



Ironless Rotor DC Motors

Available in 3 frame sizes: 29, 40 and 65 mmØ. Reversible, low inertia and inductance. High efficiency – as much as 75%. Sleeve bearings – ball bearings available on many models. Available in voltages of 12 to 30 VDC.

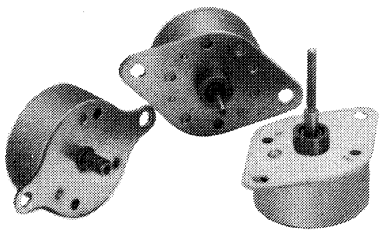




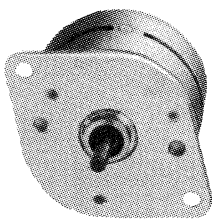
AIRPAX®
INTERNATIONAL DIVISION

STEPPER MOTORS

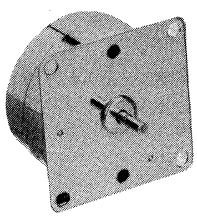
Airpax offers a broad range of high-quality stepper motors in standard or custom design. Ideal for computer peripherals, medical instruments, and other applications where accurate positioning is required. Contact Airpax Company, West Johnson Avenue, Cheshire, CT 06410. (203) 272-0301. A division of North American Philips Corporation.



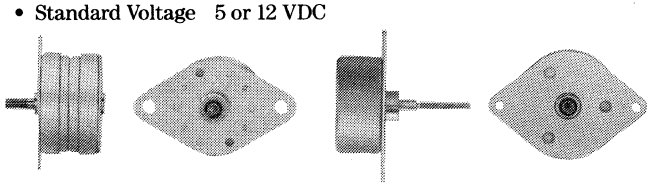
82100
Ideal for battery-driven applications, tape head positioner, portable digital cassettes and similar instruments where space and weight are of a premium.
This motor can be driven over 2500 pps with running torque of .45 oz-in (3.2mNm).
Features:
- 26mm 1″ Dia.
- Holding Torque 1 oz-in
- Step Angle 7.5°, 15°
- Power IN 2.5 Watts
- Standard Voltage 5 or 12 VDC

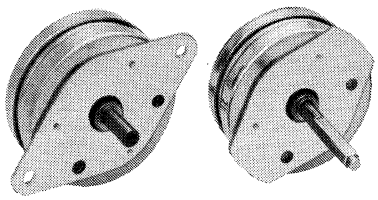


82200
Ideal for application where torque to inertia ratio is critical. Ideal for ribbon drives, ribbon lifts, small printer carriage and paper positioner, tape head positioner, chart recorders, medical applications, etc.
Features:
- 36mm 1.42″ Dia.
- Holding Torque 1.9 to 3.9 oz-in
- Step Angle 7.5° (82200), 15° (83200), 18° (82300)
- Power IN 4 to 4.5 Watts
- Standard Voltage 5 or 12 VDC

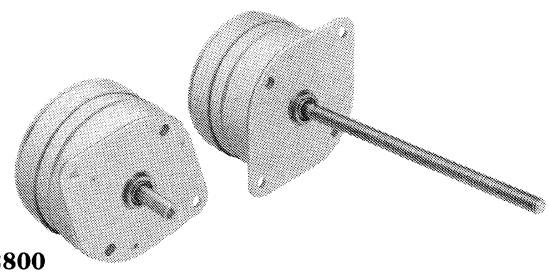


82400
With its efficient running rate and stepping accuracy, the bi-directional motor is an economical answer to a variety of applications.
Features:
- 42mm 1.65″ Dia.
- Holding Torque 12 oz-in
- Step Angle 7.5°
- Power IN 5 Watts
- Standard Voltage 5 or 12 VDC

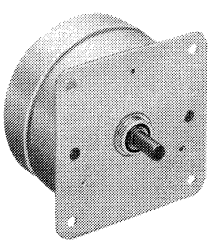




82700
These bi-directional stepping motors offer high efficiency and high running rates in a small package weighing only 8 ounces. Ideal for many applications such as paper advance, carriage drives, medical pumps, HVAC, plotters, etc.
Features:
- 58mm 2.25″ Dia.
- Holding Torque 8 to 17 oz-in
- Step Angle 7.5° (82700), 15° (83700)
- Power IN 8 Watts
- Standard Voltage 5 or 12 VDC



82800
Ideal where more brute force is required and the long life of ball bearings is a critical requirement.
Features:
- 59mm 2.33″ Dia.
- Holding Torque 18 to 28 oz-in
- Step Angle 7.5° (82800), 15° (82600)
- Power IN 8-11 Watts
- Standard Voltage 5 or 12 VDC



82900
This bi-directional permanent magnet stepper is ideal for many applications where high torque is a requirement.
Features:
- 70mm 2.75″ Dia.
- Holding Torque 26 to 46 oz-in
- Step Angle 7.5°, 15°
- Power IN 15 Watts
- Standard Voltage 5 or 12 VDC

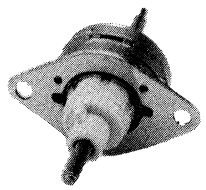
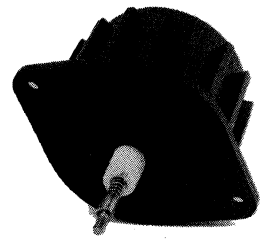
LINEAR ACTUATORS AND BRUSHLESS DC MOTORS

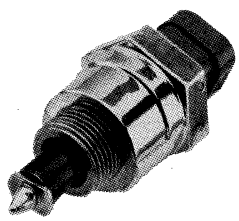
Airpax offers a broad range of high-quality precision linear actuators and brushless DC motors. Available in standard or custom design for any application. Contact Airpax Company, Cheshire Industrial Park, Cheshire, CT 06410. (203) 272-0301. A division of North American Philips Corporation.



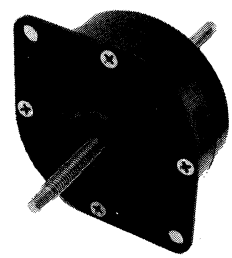
Low Force – Series 92100
Will control devices requiring a "pushed" or "pulled" force of up to 21 ounces. 5 or 12 VDC operation. Shaft moves in increments of 0.001″, 0.002″ or 0.004″ per pulse.



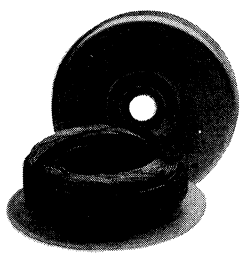
Medium Force – Series 92200
Will control force requirements between 3 and 4 lbs. Accurate incremental movement of 0.001″, 0.002″ or 0.003″ per pulse. Available for 5 or 12 VDC operation.



Automotive Actuators
Shown is one of many digitally controlled linear actuators designed for underhood fuel management systems. Operating voltages from 7.5 to 14.5 VDC. Linear force to 90 oz.

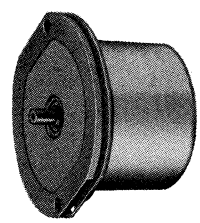


High Force – Series 92400
For applications requiring force of approximately 19 lbs. Rugged 0.250″ diameter shaft extends in 0.001″ or 0.002″ increments to a maximum 3″ from either side of the actuator. Longer shafts available upon review of the application.



Three-phase Brushless DC Motors
Consist of 4-pole permanent magnet field rotors and 3-phase wye-connected stator windings. Electronically commutated servo; hall cells provided. Shipped as assembly kits. User provides logic, drivers and spindles. Assembled motors with spindles available. Efficiency up to 85%. Stall torques from 30 oz.-in. to 700 oz.-in. Optimum power output. Excellent speed control. No major EMI. Minimum maintenance, long life. Particularly well-suited for rigid and floppy disk drives, phase-locked servo spindle controls and high-reliability tape recorders.

L85101 Series	24 VDC
K85401 Series	24 VDC
K85601 Series	48 VDC



Size 15 Brushless DC Motor
Bi-directional, 2-pole permanent magnet motor with external rotor and 3-phase wye-connected stator winding. Includes integral 8-pole tachometer with a range of 3000 to 6000 RPM. Output pulses 8 per revolution. Output voltage (Sq. Wave) 5V, TTL. Ideal for 1/4-inch streamer applications, floppy disks and small fans. Low EMI and high acceleration characteristics.

K85915 Series	12 VDC

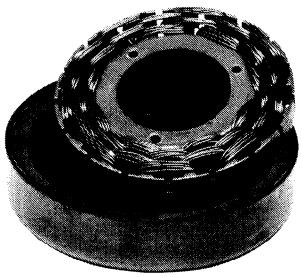
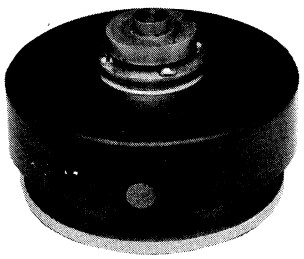
BRUSHLESS DC MOTORS FROM AXIAL MAGNETICS



ROTOR AND STATOR SET, Brushless DC

Dia: 3.00 inches
Length: .63 inches
Max ID: 1.40 inches
Torque Sensitivity: 10.0 oz-in/amp
Resistance: 5.0 ohms

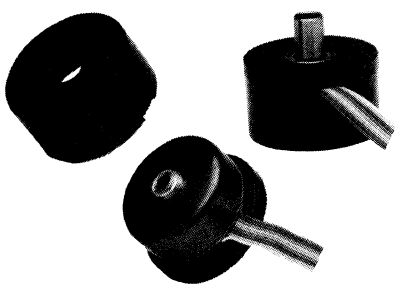
This shows the middle size of a family of 6.50, 4.00, 3.00, and 2.00 inch diameter ceramic magnet motor sets available in various lengths and ratings. Available with mounted Hall Effect Sensors.



SPINDLE MOTOR, Brushless DC

Dia: 4.00 inches
Length: 1.5 inches
Shaft Runout: .0005 inches
Torque Sensitivity: 5.0 oz-in/amp
Resistance: .5 ohms

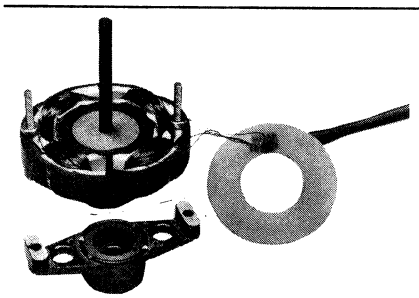
Example of complete motor sold in prototype and quantities made by Axial Magnetics for 6, 12, and 24 volt systems. Torque Sensitivites of up to 50 oz-in/amp have been supplied in this 4.00 inch diameter with Delta connected 3 phase windings.



HOLLOWSHAFT MOTOR, Brushless DC

Dia: 2.25 inches
Length: 1.25 inches
Shaft ID: .25 inches
Shaft Runout: .0005 inches
Torque Sensitivity: 4.2 oz-in/amp
Resistance: 22.0 ohms

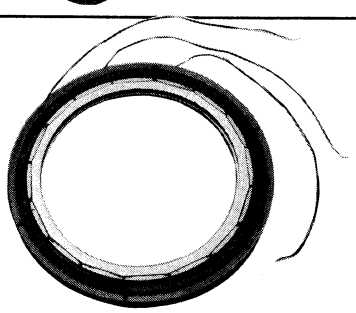
Custom design for slow speed rotation of laser prism for etching electronic circuits.



LOW COST MOTOR, Brushless DC

Dia: 3.30 inches
Length: 2.50 inches
Torque Sensitivity: 6.0 oz-in/amp
Resistance: 1.0 ohms
Construction: Sleeve Bearings

This is a motor designed and built for a high volume requirement to a low cost custom application.



TORQUE MOTOR ROTOR AND STATOR SET, Brushless DC

Dia: 6.50 inches
Length: .45 inches
Max ID: 4.75 inches
Torque Sensitivity: 24 oz-in/amp
Resistance: 2.4 ohms

This is the largest of a family of inner member rotate Rare Earth Magnet designs having maximum diameters of 6.50, 5.50, 4.50, 3.50 and 2.50 inch diameters.

Quality in Motion®

© Bodine Electric Company

For many motion control applications, even those that are relatively complex, standard product is the best, quickest, and most cost-effective solution . . . and in such situations, your Authorized Bodine Distributor is your best, quickest, and most cost-effective source.

Bodine offers you the industry's widest selection of off-the-shelf small gearmotors, motors and electronic motion control . . . available factory-direct in OEM quantities or through 103 stocking Authorized Distributors and Service Centers in the USA, Canada and Europe. And Bodine Distributors can help you in the selection, application and use of gearmotors, motors and motion controls.

The broad and varied Bodine product line is characterized by performance that is not only exceptionally reliable, but also exceptionally consistent, motor-to-motor and lot-to-lot. Bodine motors don't last forever, it's true, but it takes them longer to wear out—and if they do, we're there to recondition them. It's reassuring to have this help nearby, and to know that our network of Authorized Service Centers is a critical part of the Bodine "insurance policy."

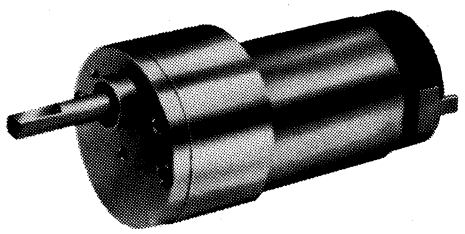
In addition to broad inventory and excellent customer service capabilities, Bodine also provides comprehensive technical and product application literature. In particular, our standard off-the-shelf line is fully described in Stock Catalog S and European Voltage Stock Catalog SME . . . the motor specifier's basic references, available free on request. Ask for your copy of either, or both.

Mini-guide to Bodine stock products

- 400 USA/Canadian models, plus 100 European voltage models
- Motors: 10 and 30 AC, DC, universal; HP 1/2000 to 1/2; dia. 2.27" to 6.00"
- 24 VDC gearmotors and motors
- Parallel shaft gearmotors: AC, DC; up to 341 Lb.-in. torque
- Right-angle shaft gearmotors: AC, DC; up to 340 Lb.-in. torque
- New state-of-the-art DC Stepper controls
- 72 RPM HY-Sync™; instrument, torque, floppy disc motors
- Matched SCR and Thyristor DC speed/torque controls for PM and shunt wound drives
- Synchronous and non-synchronous, split phase, permanent split capacitor, shunt wound, PM, series wound
- Most stock products U.L. construction recognized, many CSA-certified and VDE-approved
- Other models and modifications available built-to-order in small or large quantities

BREVEL MOTORS

Model 713 (12 VOLT) Stock D.C. Gearmotor



The Model 713 D.C. Gearmotor was designed for low torque applications. The extremely compact gearmotor is ideal for robots, instrumentation, and other uses where space is at a minimum, but quality and reliability is of maximum concern.

Several models of each design are available as stock items from over 100 Brevel Distributors nationwide. . .or Brevel will custom design to fit your applications.

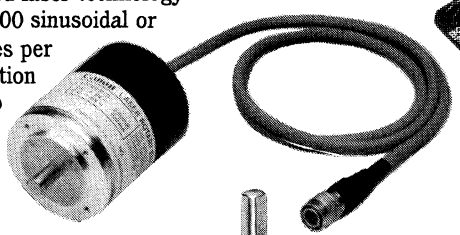
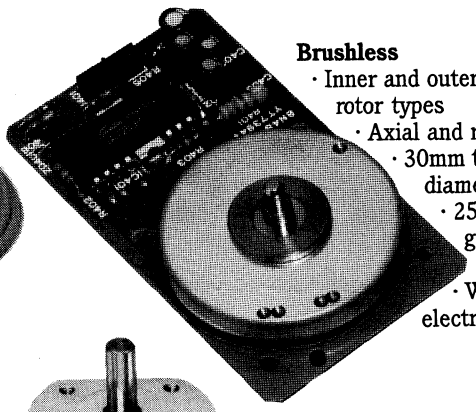
Sub-fractional DC Motors

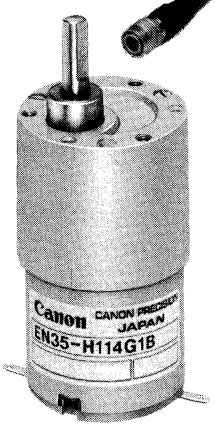
Absolute & incremental laser rotary encoder
- Patented laser technology
- 50,000–81,000 sinusoidal or square pulses per revolution
- Compact 36mm to 56mm diameter





Brushless
- Inner and outer rotor types
- Axial and radial gap types
- 30mm to 90mm diameter
- 25 to 700 g-cm starting torque
- With or without electronics

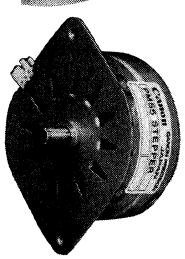
Gearmotors
- Over 100 different combinations
- Ratios from 5:1 to 3000:1
- 25 to 20,000 g-cm rated torque
- 1.3 to 830 rpm
- 6 to 24 VDC
- Concentric or offset shaft
- Gearheads from 20mm to 54mm dia.

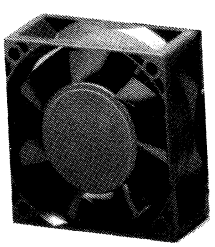


Iron core
- Over 70 models
- 12mm to 52mm dia.
- 12 g-cm to 9000 g-cm starting torque
- Integral AC tach, optical encoder
- Ball or sleeve bearings on some models

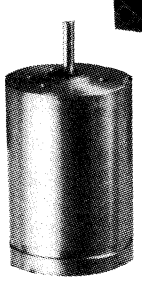
PM Type Steppers
- Low in cost, high in performance
- Step angle 7.5 and 15 degrees
- 35mm, 42mm and 55mm diameters

Hybrid Type Steppers
- Step angle 0.9 and 1.8 degrees
- 39mm, 42mm and 56mm diameters
- Modifications of standard units available in OEM quantities





Brushless DC box fans
- Low cost
- Long life
- Low mechanical noise
- High air flow
- Sizes: 40mm to 120mm



Coreless
- 12mm to 40mm dia.
- 28 to 455 g-cm starting torque
- Ball bearings available on some models

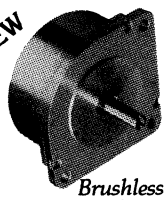
Dependable...fractional horsepower motors by Clifton Precision

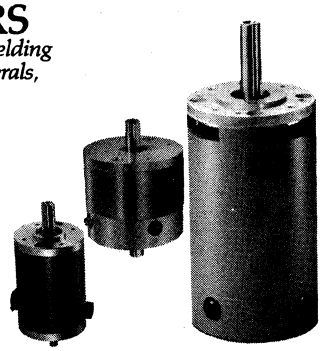
DC PM MOTORS

Wheelchairs, door openers, welding wire feeders, computer peripherals, machine tools

NEW



Brushless — Limited Rotation



. . . with torques from 90 to 3500 oz-in., 2 inch to 4 inch O.D. Advanced magnetic materials . . . cartridge brushes

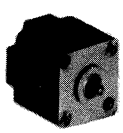
BRUSHLESS DC MOTORS

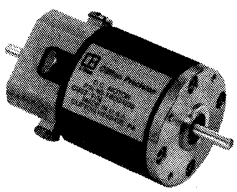
Floppy and Winchester disk drives, machine tool drives, pumps, fans, robotics

. . . with 40 to 150 mm O.D.; 1, 2, or 3 phase. Specializing in rotor/stator parts sets, with housed units also available. Will customize upon request.

MINIATURE HIGH-TORQUE DC SERVOMOTORS

Computer peripheral drives, instrument recorders, laboratory instruments, medical equipment robotics

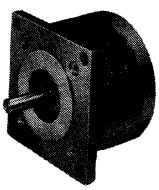


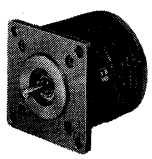


. . . with torques from 2 to 50 oz-in. .75 inch cube to 1.32 inch O.D. Cartridge brushes, Alnico or rare earth magnets

PM, HYBRID, AND VR STEPPER MOTORS

Computer peripheral drives, office equipment, machine tool drives, avionics, & military applications



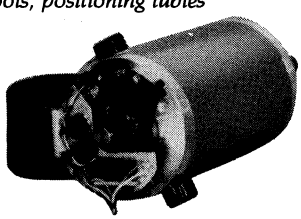


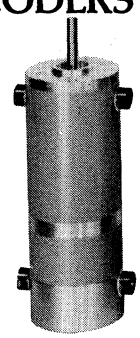
CLIFTON SPECIALIZES IN CUSTOM DESIGNED PRODUCTS

. . . with step angles 1.8°, 1.875°, 15°, 30°, 45°, 90°, 120°; .75 inch to 2.3 inch O.D. Ceramic Alnico or rare earth magnets. Available with integral encoders.

INTEGRAL MOTOR/ENCODERS & TACHOMETERS

Robotics, computer and office equipment, machine tools, positioning tables

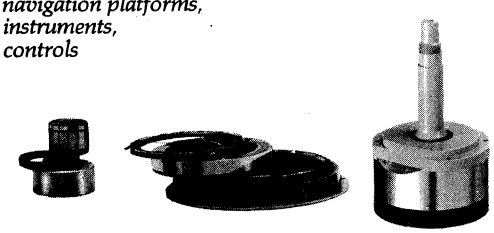




. . . for closed loop feedback: optical encoder resolution to 2500 cycles. Analog tachometers integral to motor. No assembly or alignment necessary.

DC PM HOLLOW SHAFT TORQUE MOTORS

Inertial navigation platforms, aircraft instruments, aircraft controls



. . . with torques from 6 to 2700 oz-in., 1.1 inch to 20 inch O.D. Precision tolerances, gold commutators, high reliability

For information on Stepper Motors and Brushless DC Motors, call Murphy, NC (704) 837-5115; for all other motor information, call Clifton Heights, PA (215) 622-1000.

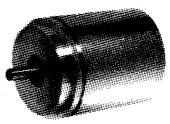
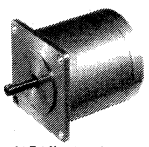
EAD EASTERN AIR DEVICES, INC.

The technological leader and problem solver in motion products

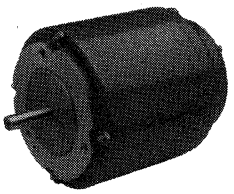
STEPPING MOTORS



Sizes 8 through 20 VR and PM stepping motors, 7.5, 10, 15, 22.5, 30, 45, and 90 degree step angles with a wide range of voltage and torque ratings. Heat sinks and mechanical dampers available.

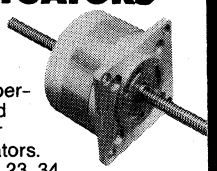


Size 23 (2 7/32″ dia.) and size 34 (3⅜″ dia.) permanent magnet stepping motors with 1.8, 1.875, 2, 2.5, 5, and 7.5 degree step angles. Torque ratings from 50 to 150 oz. in. for size 23, and 150 to 450 oz. in. for size 34.



Size 42 (4 3/16″ dia.) PM stepping motors with 1.8° step angles. High holding torques of 650 and 1150 oz/in. High positioning accuracy of ± 3% noncumulative. Bidirectional. High speed drivers and other options.

LINEAR ACTUATORS



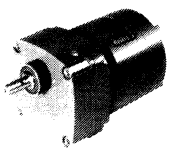
Stepper-based linear actuators. Sizes 23, 34, and 42. Linear force up to 1 ton. Linear resolution down to .000125″ travel per 1.8° step. Long strokes.

INSTRUMENT MOTORS AND GEAR MOTORS

Holtzer Cabot Model M instrument motors with ratings up to 1/20 HP. Available as induction, torque, and synchronous motors in either face or foot mount. Only 2⅞″ sq. Popular for floppy disk drive applications.

Holtzer Cabot Model L & S instrument motors with ratings up to 1/100 HP. Available as servo, polarized synchronous, synchronous, torque, induction, and DC motors. Only 2 5/16″ square.

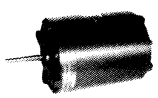
Holtzer Cabot Model L & S instrument gear motors with ratings through 150 oz. in. Available with gear reductions from 3:1 to 3600:1 in either spur or in helical gearing. Only 2 5/16″ square.



Size 34 (3⅜″ dia.) synchronous and nonsynchronous gear motors. Speeds from 2 RPM to 150 RPM. Torque output up to 40 lb. in. For applications that require quiet operation and long life.

Holtzer Cabot right angle gear motors. Up to ⅛ HP in a variety of voltages, either AC or DC. Gear ratios from 6:1 to 1140:1 in either single or double reduction gear reducers.

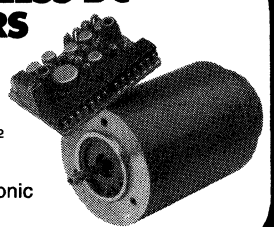
SYNCHRONOUS AND INDUCTION MOTORS



Size 34 (3⅜″ dia.) and 44 (4⅜″ dia.) synchronous and induction motors. 1/300 through ½ HP. 600 to 12,000 RPM. Single or dual speeds, single or dual voltage. 50/60 or 400 Hz.

Size 31 (3⅛″ dia.) and size 39 (3⅞″ dia.) synchronous and induction motors. 1/200 through ½ HP. 600 to 3600 RPM. Single or dual speeds. 50/60 Hz.

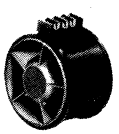
BRUSHLESS DC MOTORS



Motors, fans, blowers. Sub-FHP to ½ HP. To 20,000 rpm. With or without electronic drive circuits.

FANS AND BLOWERS

Propeller and Tubeaxial fans. Up to 12″ dia. up to 1500 CFM. The EAD line of axial fans for cooling application is manufactured for continuous duty and efficient air circulation.



Vaneaxial fans. Available in 1½″, 2″, and 4¾″ dia. from 3 to 500 CFM at high static pressures. EAD V-Line fans are small and powerful air moving devices particularly suited to high-density electronic packages.

Centrifugal blowers. From 3 to 2000 CFM, static pressures up to 5″ of water. These centrifugal squirrel cage blowers have general-purpose performance characteristics for systems with medium back pressures.

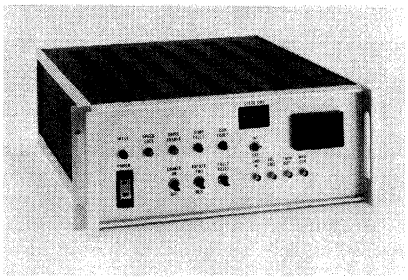
DC SERVO SYSTEMS

For applications requiring closed servo loop performance

MODEL 7-300-030-00
BRUSHLESS D.C. VELOCITY SERVO SYSTEM



The basic system includes the following:
- Brushless DC servo controller
- Brushless DC motor
- Commutation position encoder
- Incremental optical encoder

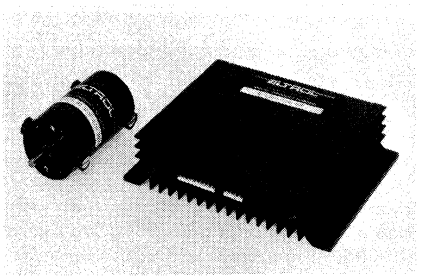
The system provides precise velocity control in a complete package: Internal D.C. power supplies, crystal reference, controls for bidirectional rotation and variable speed, digital speed readout, operating controls and status indicators.
Instantaneous speed regulation to ±.001%
Fault protection: Overtemperature, shorts to ground, shorts across motor
Current loop: High bandwidth with current limiting
Input power: 115/220VAC, 1 0, 50–60 Hz

MODEL 5-480-028-00
BRUSHLESS D.C. SERVO CONTROLLER

Motion control of velocity or torque. Available in three optional configurations:
- Transconductance amplifier: switch mode drive, 22 KHz switching freq., four quadrant operation, three phase delta or wye stators, high bandwidth current control loop with current limiting
- Phase lock servo: digital 5V square wave input command with velocity proportional to frequency, instantaneous speed regulation to ±.001%
- Velocity servo: analog input command, typical speed regulation ±0.5%

Commutation logic: accepts three phase 60 degree logic signals from the motor commutation position encoder
Fault protection: overtemperature, shorts across motor, shorts to ground, external fault indication and reset
Input power bus: 24–60 VDC
Peak output current: 5–30 amps

MODEL 6-120-024-00
BRUSH-TYPE LINEAR D.C. SERVO CONTROLLER



Motion control of position, velocity, or torque.
Simple adjustments for application adaptation
Peak output current: 2–10 amps
Linear operating mode: No switching EMI, high servo stiffness, no torque dead zone
Fault protection: Shorts across motor, shorts to ground, peak and time dependent continuous foldback current limits, external fault indication and reset.

The Eltrol motor-tach shown above is ideally suited to take full advantage of the servo controller's capabilities.

Eltrol Corporation is an engineering oriented firm specializing in D.C. servo systems. We provide standard, modified standard or custom designed systems to your electrical and mechanical specifications.

Write or call us today for additional information.

ETI SYSTEMS

PRODUCT LINE

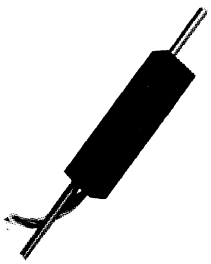
POTENTIOMETERS

SINGLE TURNS

- Conductive Plastic or Wirewound
- ½" diameter to 3" diameter
- Bushing or Servo Mount
- Multi Ganged
- Low Torque
- Oil Filled

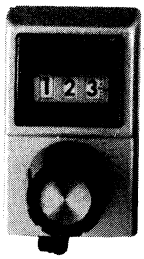
MULTI TURNS

- Wirewound or Hybrid
- ½" diameter to 2" diameter
- Bushing or Servo Mount
- 5 Amp Limit Switches
- Oil Filled or Sealed



LINEAR MOTION

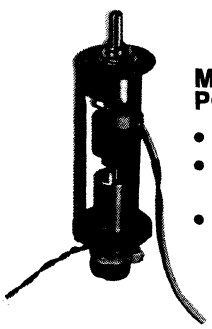
- Wirewound or Conductive Plastic
- 7/16" diameter to 2" square
- Oil Filled or Sealed
- Spring Returns and Threaded Shafts



TURNS COUNTING DIALS

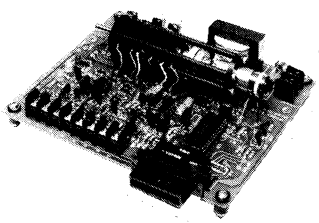
- Concentric or Rectangular
- Up to 100 Turn Counts
- Combination Pots and Dials "Combos"
- Over-Center Locks

POSITION CONTROLS



MOTORIZED POTENTIOMETERS

- 6, 12 or 24 VDC or 24, 115 VAC
- All Single Turn and Multi Turn Pots can be Motorized
- Motorized Variable Transformers and Rheostats



CIRCUITRY

- Circuitry to Drive DC Motor Pots
- Inputs of 4 to 20 Milliamps; 0 to 5 or 10 VDC;8 and 16 Binary Codes
- Power Supply with +15, −15, +5 VDC Output

ROTARY ACTUATORS

- Valve Positioner
- Rotary Mechanisms
- Throttle Controls
- Up to 200 Inch Lbs. or Torque

For pricing and delivery, please call our Sales Department.
For application assistance, please call our Engineering Department.
For fast service, please utilize our Fax Machine,
which accepts up to a size "B" drawing.

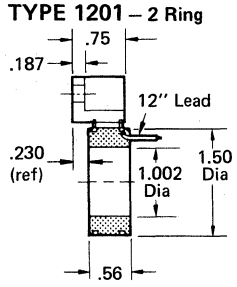
SLIP RING ASSEMBLIES

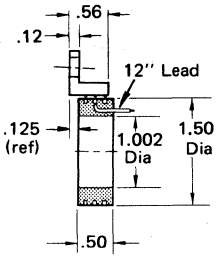
BEST DELIVERY **1**

SEPARATE ROTOR AND BRUSH BLOCK ASSEMBLY — STOCK DELIVERY

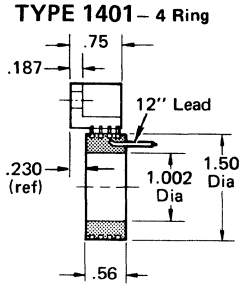
TYPE 1201 – 2 Ring



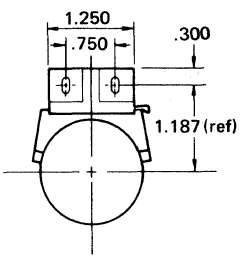
TYPE 1301 – 3 Ring



TYPE 1401 – 4 Ring

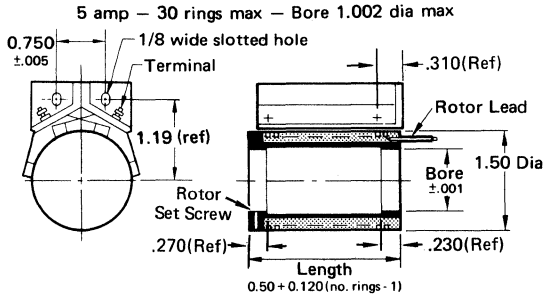


TYPICAL END VIEW



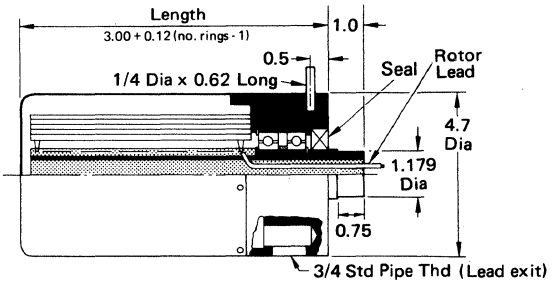
Slip Ring Assembly Type **1057**
Separate Rotor and Brush Block

5 amp – 30 rings max – Bore 1.002 dia max



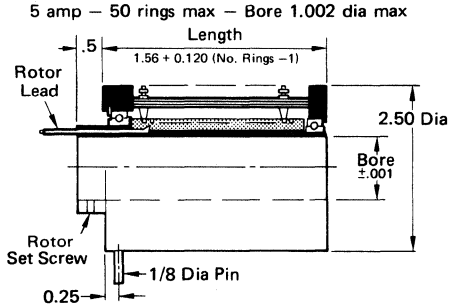
Slip Ring Assembly Type **1302**
Sealed Housing

5 amp – 50 rings max – Solid Bore



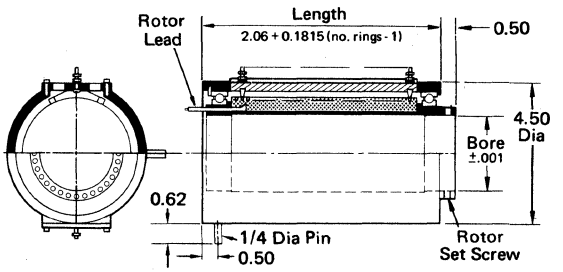
Slip Ring Assembly Type **1186**
Rigid Tube Housing – Exposed Stator Terminals

5 amp – 50 rings max – Bore 1.002 dia max



Slip Ring Assembly Type **1067**
Rigid Tube Housing – Exposed Stator Terminals

5 amp – 100 rings max – Bore 2.252 dia max



CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds.

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

PART NUMBER CODING – Specify fully when ordering

BRUSH MATERIAL

- Fabricast grade Fag 180, the universal low noise level grade used for all standard brush assembles.
- Fabricast grade FAG 193, the lowest noise level grade, however, the ring surface speed is limited to 250 SFM.
- Fabricast grade FAG 150, the highest surface speed grade, however, noise levels are compromised.

Grade No.	Composition	Recommended Surface Speed	Carrying Capacity
FAG150	50% silver, 50% graphite	Over 3500 ft. per min.	100 Amps per sq. in.
FAG180	80% silver, 20% graphite	Up to 3500 ft. per min.	250 Amps per sq. in.
FAG193	93% silver, 7% graphite	Up to 250 ft. per min.	300 Amps per sq. in.

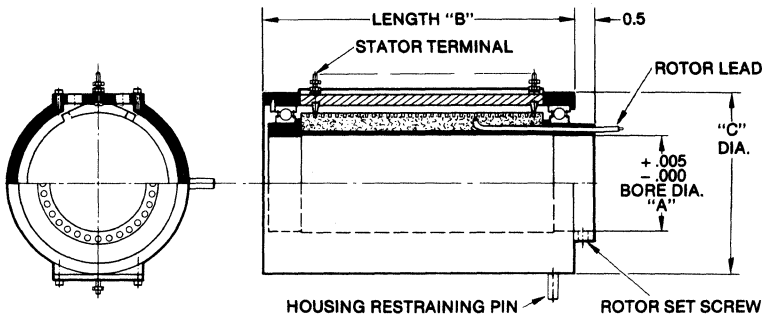
SLIP RING ASSEMBLIES

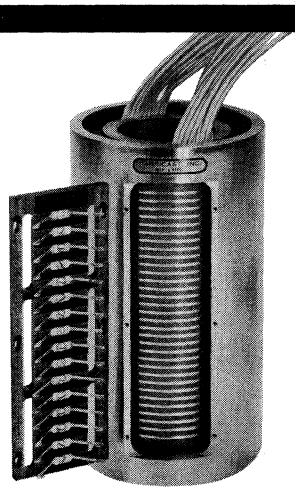
SELF—CONTAINED RIGID TUBE HOUSING

3

DISTINGUISHING CHARACTERISTICS

Rigid one piece housing eliminates bearing alignment problems. Larger section bearings are generally used in these units for a more rugged unit.





TYPE	BORE DIA "A" INCHES		NO. RINGS MAX.	CURRENT AMPS	LENGTH "B" INCHES	HOUSING DIA "C"
	NOMINAL	RANGE				
1230	Solid	—	100		3.50 + .120 (no. rings -1)	2.50
1186	1.000	0 - 1.002	100	5 amp std 2 brushes per ring	1.56 + .120 (no. rings -1)	2.50
1197	1.250	1.0 - 1.252	70		1.56 + .130 (no. rings -1)	3.50
1289	1.500	1.25 - 1.502	100		1.56 + .150 (no. rings -1)	4.00
1067	2.000	1.5 - 2.252	100	10 amp std or lo noise 4 brushes per ring	2.06 + .181 (no. rings -1)	4.50
1420	3.000	2.25 - 3.002	100		1.38 + .181 (no. rings -1)	4.75
1506	3.500	3.0 - 3.502	100		2.88 + .200 (no. rings -1)	6.50
1390	4.000	3.5 - 4.252	100		2.00 + .187 (no. rings -1)	5.75

* RING COMPLEMENT MAY BE LIMITED BY ABILITY TO PASS ROTOR LEADS UNDER BEARINGS.
* FOR 50 AMP STANDARD POWER ASSEMBLIES SEE POWER ASSEMBLY SECTION.
* INSTRUMENT AND 50 AMP POWER CIRCUITS MAY BE CAST ON COMMON SLEEVE.

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

CURRENT: Noted in tabulated block
Rating may be doubled with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

HOUSING: One piece tube construction

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

PART NUMBER CODING – Specify fully when ordering

CHARACTERISTICS

RINGS: Coin Silver AMP Rings.
Copper 50 AMP Rings.

BRUSHES: Silver Graphite.
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable.

NOISE: 10 Milliohms dynamic resistance MAX.
5 Milliohms max with 4 brushes per CKT.

CURRENT: Noted in tabulated block.
Rating may be doubled with 4 brushes per ckt.

HI-POT: 1000 VAC 60 cycle for 15 seconds.

ROTOR: One piece steel sleeve.
Ring complement vacuum cast on sleeve as unit with epoxy dielectric.

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
50 AMP Leads – 8 GA – Teflon
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

BRUSH BLOCK: Glass epoxy laminate.
Optional mounting methods shown.

PART NUMBER CODING – Specify fully when ordering.

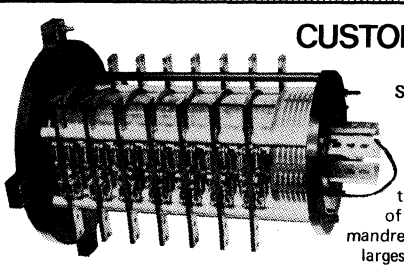
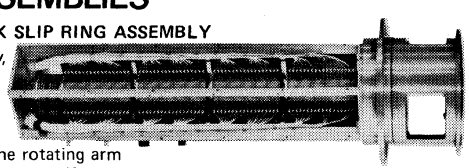
CUSTOM DESIGNED SLIP RING ASSEMBLIES



CUSTOM 7000 AMP SLIP RING ASSEMBLY

This slip ring assembly, as designed and manufactured by Fabricast, Inc., is used to supply 7000 amperes of current to the rotating mandrel of the world's second largest spin forging machine.

CUSTOM 222 TRACK SLIP RING ASSEMBLY



This slip ring assembly, as designed and manufactured by Fabricast, Inc. was used to complete the electrical circuits to the rotating arm of an astronaut carrying centrifuge.

The unit consists of 50 amp. power, 5 amp. instrumentation and 50 megacycle coaxial modules.

FABRICAST WILL ALSO CUSTOM DESIGN SPLIT RING ASSEMBLIES AND SEGMENTED SLIP RING ASSEMBLIES

GRAPHALLOY®

SILVER GRAPHALLOY BRUSHES and BRUSH & SLIP-RING ASSEMBLIES...

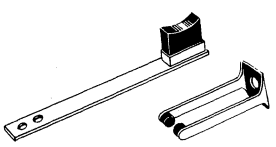
USED IN **MICROWAVE EQUIPMENT • SERVO SYSTEMS • SYNCHROS • INVERTERS • THERMOCOUPLE and STRAIN GAGE CIRCUITS • PULSE SYSTEMS • COMPUTER GROUNDING CONTACTS • TORQUE INDICATORS • MEDICAL EQUIPMENT • PACKING MACHINERY**

GRAPHALLOY® BRUSHES

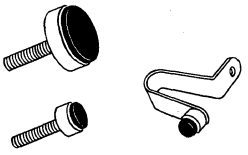
Silver-Graphalloy Brushes have been widely used because of low *and* constant contact drop, extremely low electrical noise, *and* long life. Over 100 grades are now serving in a wide variety of applications. Silver-Graphalloy Brushes on ½-inch-diameter coin silver slip rings have operated successfully in highly critical electrical circuits at speeds up to 100,000 r.p.m.

Standard sizes from ⅛"-square to ¾"-square. Many sizes in stock.

Our Engineering Department will assist you in determining the exact grade of GRAPHALLOY for your needs. *Ask for our Brush Inquiry Form 109.*



LEAF SPRINGS



CUP CONTACTS

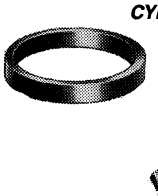
GRAPHALLOY® SLIP RINGS

We supply Coin Silver and Bronze Slip Rings, both *cylindrical* and *flat* types ... and recommend three brushes per ring ... spaced at 120° ... for best contact. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type, or slip-ring assemblies, can be furnished with leads attached.

No. 168 Series FLAT TYPE to 20" O.D.

Standard FLAT Rings have ¼" radial contact surface and ⅛" radial spacing between adjacent rings.

No. 116 Series CYLINDRICAL TYPE to 36" O.D.



Typical Layout

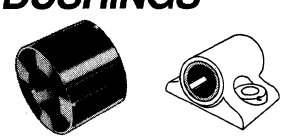
GRAPHALLOY BUSHINGS and PILLOW BLOCKS



Survive unlubricated! Replace oil-lubricated bushings in synchros, instruments, timers and missiles. Advantages:

(1) Lower friction at room temperatures;
(2) No oil to solidify at low temperatures;
(3) No oil to carbonize at prolonged elevated temperatures.
(4) No oil or grease drag.

Ask for Data Sheets 270 and 277 on Miniature Bronze-Graphalloy Bushings.

Ask for the following Data Sheets

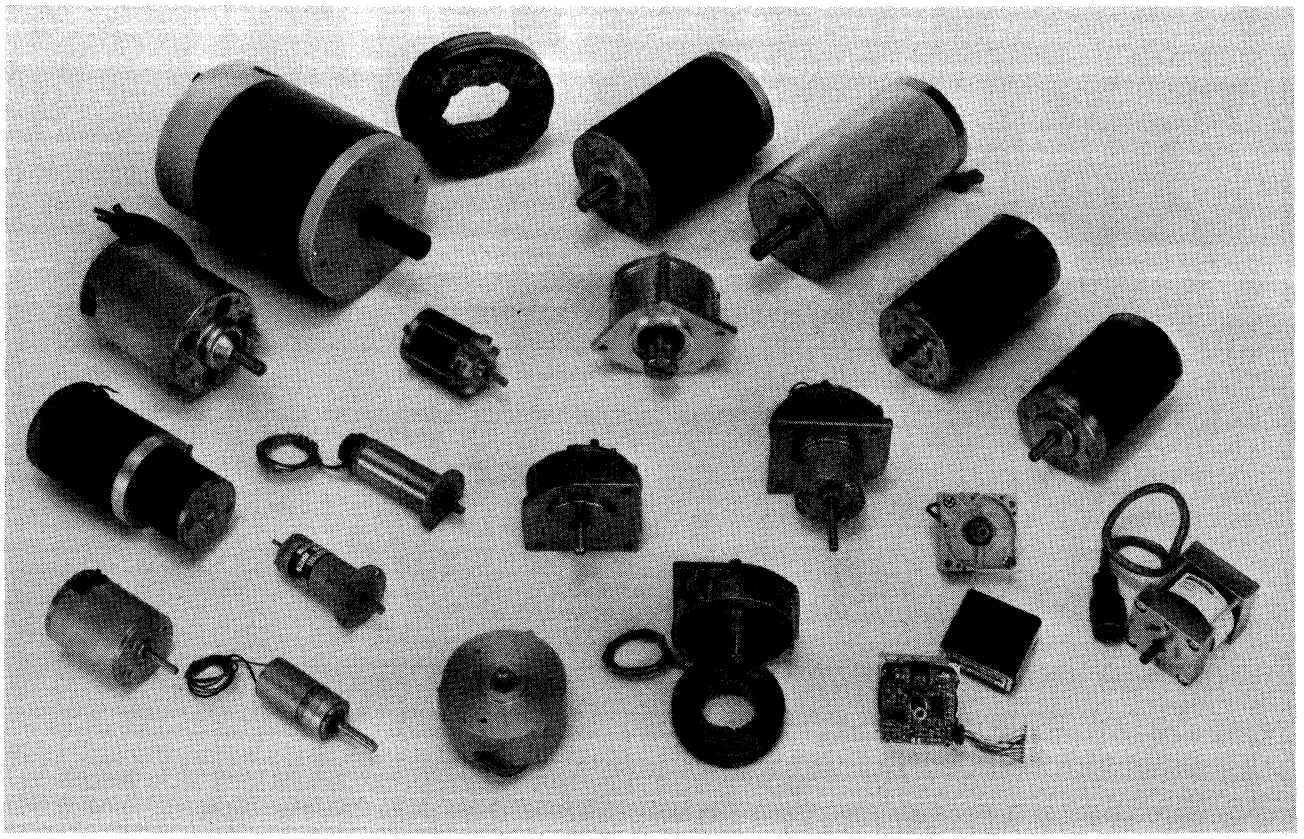
Hathaway MOTORS

BRUSHLESS AND BRUSH TYPE PMDC MOTOR LINE



The value resource in electronic motion control.

HATHAWAY has developed and is currently producing several sizes of BRUSHLESS DC MOTORS. Hathaway's brushless DC motors are priced competitively with offshore manufacturers, even at high volumes. Our engineers can help you with fast turnaround on prototypes for your specific applications.

HATHAWAY offers quality, cost effective PMDC BRUSH TYPE motors to meet your product's critical performance or high volume requirements. HATHAWAY motors are specifically designed for today's technology. If you are currently designing performance, quality or reliability into your product, contact HATHAWAY.

HATHAWAY ADVANTAGES

- Engineering — Hathaway's engineering staff is recognized as an authority in PMDC motor design.
- Manufacturing — Modern automatic equipment and high volume production capability.
- Applications — Hathaway experience and know-how covers a broad spectrum, from military and aerospace hardware, to OEM consumer products and computer peripheral equipment.
- Customer Service — Ask a Hathaway customer.
- Magnets — Neodymium, rare earth cobalt, ceramic, alnico

APPLICATIONS

- Computer peripheral drives
- Military systems
- Servo positioning
- OEM consumer products
- Encoder assemblies
- Fans/Blowers
- Instruments
- Appliances
- Medical products
- Aerospace
- Pumps

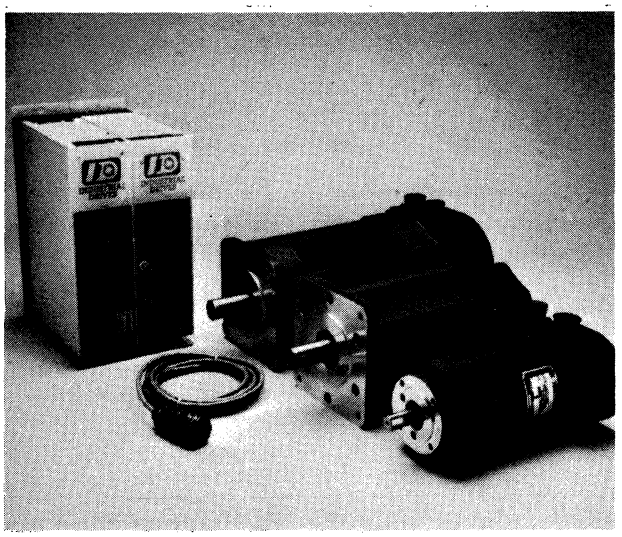
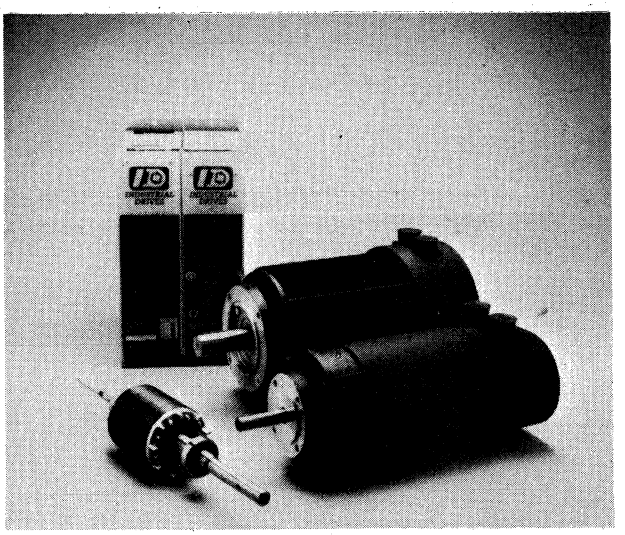
INDUSTRIAL DRIVES
A KOLLMORGEN DIVISION

INNOVATIVE PRODUCTS FOR MOTION CONTROL

BRUSHLESS MOTORS & DRIVES





AC SYNCHRONOUS PERMANENT MAGNET SERVOS

The AC synchronous (DC Brushless) systems from INDUSTRIAL DRIVES offer premium performance from a completely brushless motor. These AC synchronous motors having rare earth permanent magnet rotors yield the highest torque-to-size and torque-to-inertia ratios. Microprocessor-based sine-wave modular drives employ a patented torque angle control algorithm. This provides wider speed range and the optimum torque sensitivity even under transient speed and load conditions. The proprietary design features of the BR-310X motor in combination with these drives provide extremely smooth operation having torque ripple as low as 0.3%. Also, special high speed motor systems, with speeds to 60,000 rpm, and high torque models of 1000 lb-ft (1360 N•m) are available. Standard systems are offered in a range from 2.2 lb-ft (3.0 N•m) to over 55 lb-ft (75 N•m) T.E.N.V., over 150 lb-ft (203 N•m) with cooling, speeds to 7500 rpm to meet the most demanding application.

AC INDUCTION SERVOS

INDUSTRIAL DRIVES' brushless AC induction servos combine advanced designed sine-wave servo drives with proven and inexpensive induction motors. The result is reliable, high performance servo systems without the maintenance problems or commutation limitations associated with brush type servo motors. A microprocessor-based three phase sine-wave modular amplifier uses a proprietary slip control technique to optimize motor performance over a wide range of speed and load conditions. Precise control is maintained down to zero speed. Induction motor servos from INDUSTRIAL DRIVES are available with ratings from 1.5 lb-ft to in excess of 31 lb-ft (2 to 42 N•m) and operate to 6,000 rpm. Competitively priced, these systems are the ideal choice for most applications requiring brushless motors.

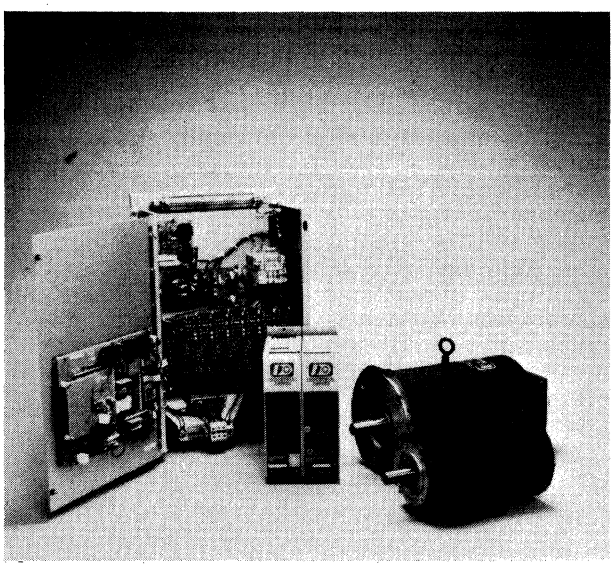
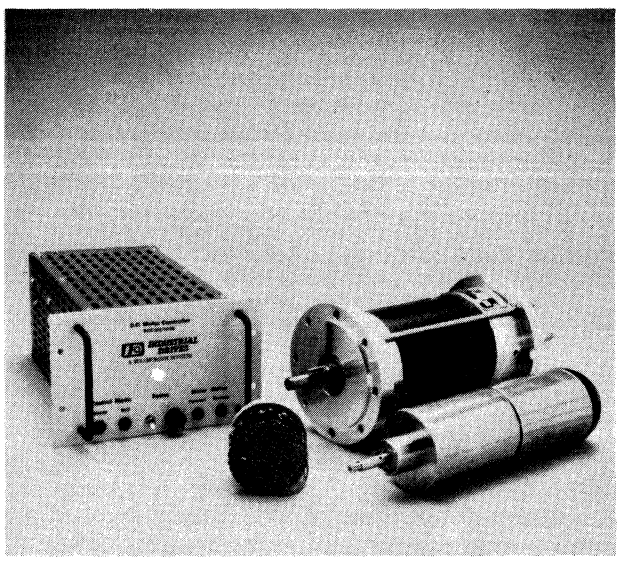
INNOVATIVE PRODUCTS FOR MOTION CONTROL

BRUSHLESS MOTORS & DRIVES



AC INDUCTION SPINDLES

The AC spindle systems from INDUSTRIAL DRIVES deliver high performance from reliable induction motors. High speed operation, wide constant horsepower speed range and smooth operation are among the features of these systems. Microprocessor-controlled sine-wave drive amplifiers provide the optimum slip from a patented control technique. Drive options include spindle orient, up-to-speed and zero-speed indicators. Optimized-design motors are compact, efficient and are offered with various cooling alternatives. Systems with speeds to 7500 rpm and power ratings from 7.5 HP (5.6 kw) to over 30 HP (22.4 kw) continuous are offered to satisfy a diverse range of applications.



SUBMERSIBLE MOTORS

In response to the need for reliable fluid-filled and pressure-compensated submersible motors, INDUSTRIAL DRIVES has developed a wide range of brushless motor systems. Motors incorporating permanent magnet rotors and brushless feedback along with stainless steel frames, provide reliable operation in a salt water environment at depths to 20,000 feet (10,000 PSI). Motors ranging from 0.3 HP (224 watts) with an integral drive package to 20 HP (14.9 kw) models with separate six-step drive amplifiers are available. Whether as a thruster or in a closed servo loop for a manipulator, these brushless motor systems solve the problems normally associated with the demanding requirements of submersible vehicles.

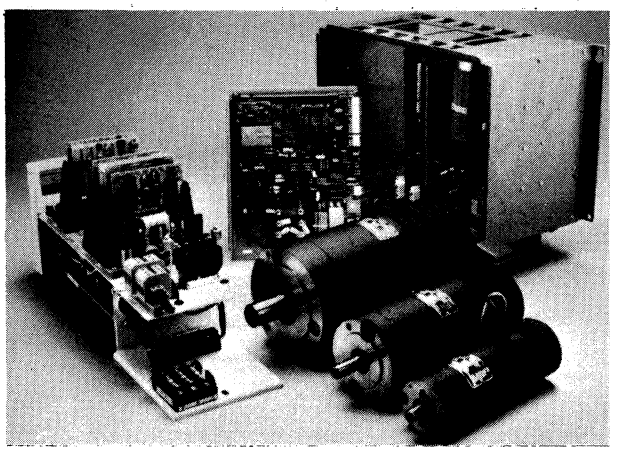
INNOVATIVE PRODUCTS FOR MOTION CONTROL

BRUSH-TYPE SERVO Motors and Drives



BRUSH-TYPE DC SERVOS

Permanent magnet brush-type DC servos from INDUSTRIAL DRIVES offer proven capabilities from advanced designs. A wide selection of motor sizes and features are available with continuous torques from 35 oz-in (0.25 N•m) to over 100 lb-ft (136 N•m), and speeds to 6,000 rpm are offered. Patented technology PWM transistor drives, or the more traditional SCR amplifiers, complement all motor sizes and windings. From 6 amps to 200 amps continuous, these amplifiers are highly reliable and contain features such as high bandwidth, commutation current limits, and overspeed shutdown, to mention a few. INDUSTRIAL DRIVES DC servos provide inexpensive solutions to high performance requirements.

POSITIONING SYSTEMS

FLEXIBLE POSITIONING SYSTEMS

INDUSTRIAL DRIVES' position control systems are microprocessor-based and provide precise control of our servomotor systems. The positioner can serve as a smart link between an industrial control and the servo drive and motor. Motion control capabilities include indexing, profiling, camming, velocity ratio, and digital master/slave.

The FPS-B (Flexible Positioning System-Basic model) is programmed with a simple intuitive language through an RS232 port by an ASCII terminal. A maximum of 32 general purpose inputs and outputs, and executive I/O for program select, system start, etc., allow versatile stand-alone operation.

Our FPS-C is an enhanced version of the FPS-B. A self-contained, remote control module provides user friendly, menu driven programming with a built in four line alphanumeric display. A remote display unit provides a bright readout of up to four real time parameters simultaneously. English language error messages are displayed, providing quick troubleshooting.

Our positioning systems are engineered to provide the versatility necessary to solve your unique application.

All Flexible Positioning Systems feature:

- Programmable compensation parameters
- Linear, S curve, and parabolic acceleration profiles
- Non-volatile program memory
- Single or multi-axis capability
- Compatible packaging with our DC PWM Single Board Drive, or modular brushless AC synchronous servos, AC induction servos and spindle drive amplifiers

INDUSTRIAL DRIVES has immediate solutions for your motion control requirements. Write for more detailed information or talk to one of our applications engineers today.

HOW TO SPECIFY A SLIP RING

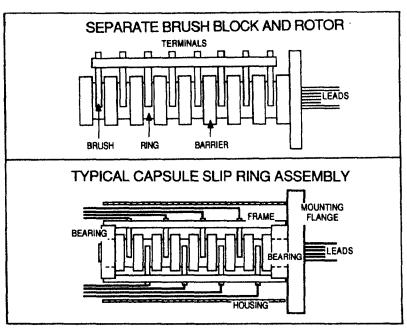
Many of the more than 4,000 Poly-Scientific slip ring designs are available for use in their existing configuration, or they may be modified to meet your specific requirements. New designs can also be created to meet the most demanding specifications.

Our engineers are experienced in a wide range of slip ring applications. We utilize resources such as the Anvil computer-aided design (CAD) system. And, a very active in-house quality circle program solicits the best inputs from all of our many skilled craftspeople, from start to finish.

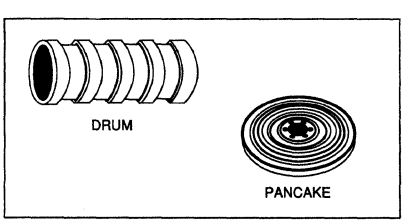
This section is designed to guide you through the process of specifying a slip ring. We've outlined below the major considerations that a slip ring engineer will need to know about your application.

A. Basic Slip Ring Design

Throughout these pages, you will see the terms "slip ring capsule" and "slip ring separates". The term "separate" indicates an individual rotor/brush block combination. The term "capsule" is used to denote a self-contained unit consisting of a rotor, stator and its own integral ball bearings.



There are two basic slip ring configurations to consider based on space allocation in your system: the more common drum approach where each ring is adjacent to the next along the centerline, somewhat like the threads on a bolt, and the pancake approach where the rings are concentric with one another like the grooves on a phonograph record. The pancake approach is used when length is at a premium but diameter is less restrictive.



B. Defining the Mechanical Envelope

The envelope is, of course, largely dictated by the space available in the system. The slip ring engineer should be given the maximum space available in the system so all existing candidate designs can be considered. It is imperative that the space required for the slip ring be specified in the early stages of the system design and that it be consistent with the structural and electrical demands.

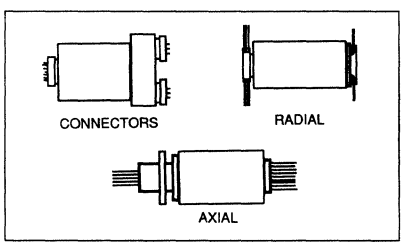
C. Defining System Interface Requirements

The slip ring engineer will need to know these system interface considerations:

1. Is a bore required through the slip ring for routing coolant plumbing, hydraulic lines, pneumatic lines, waveguides, etc? In such applications, the slip ring actually mounts concentric with these lines in the system.

2. How will the slip ring attach to the system? It is never advisable to hard mount both the rotor and the stator to the system since the slip ring bearings may overload if there is any misalignment between them and the system bearings.

3. How should the electrical connections to the slip ring be made? Is it desirable to have connectors integral with the slip ring on both the rotor and stator, or would flying leads on one or the other ends be desireable? And if flying leads are preferred, should they exit the rotor in a radial or axial direction, and what length should the leads be?



D. Defining Electrical Requirements

The current specified enables the slip ring engineer to propose a unit with the appropriate cross-sectional area of the rings, brushes and lead wires. The specified voltage dictates the spacing between adjacent rings and brushes. It is helpful in achieving the most cost effective and smallest practical envelope not to rate all circuits at the maximum level. For example, if you need 20 circuits total, three of which must carry ten amps, designate three for high current. Don't go for 100% functional interchangeability by specifying that all 20 be able to carry ten amps. And, if the ten amps is a surge current with a continuous current of only two amps, tell us that, too. There is no reason for you to pay for ten amps continuous capacity when you only need two.

Be aware that voltage surges and spikes are the major cause of system slip ring failures. Poly-Scientific uses a very conservative approach to circuit design, however, it is not uncommon in some power supply systems to see voltage spikes ten or more times the normal operating voltage. We strongly recommend surge protection on all power supplies.

Most smaller slip rings will satisfactorily conduct signals to 1 MHz or 500 Kilobits. Special slip rings can be used to pass broadband signals from dc to 1 gigahertz and data rates of 500 megabits or even higher. Crosstalk, insertion loss and bit error rate information can be provided if data rates, formats and impedances are defined.

E. Defining Mechanical Requirements

1. Operating speed (rpm's). Almost any slip ring can operate successfully at speeds to 100 RPM although many applications only require operation at a few rpm. But slip rings are also routinely used to instrument jet turbine engines operating at speeds in excess of 20,000 RPM. The operating speed in conjunction with the diameter dictates the surface speed of the brush relative to the ring and hence the internal design approach and material selection.

2. What rotational life is necessary for your application? Will the unit oscillate or rotate at a continuous speed?

F. Defining the Environment

The environment in which the slip ring must survive is a key factor. Operating temperature is important in specifying the proper lubricant. And if the slip ring will operate exposed to the elements or to a hostile environment, integral seals must be included in the design. Any unusual shock or vibration should also be specified.

The next eight pages of the catalog give a brief overview of our slip ring design and production expertise. The last page of our section allows you to list your specific application needs. For specific product information, please contact our sales department at 1-800-336-5917 (in Virginia, call 703-953-4751).

SLIP RING SEPARATES

Sometimes a self contained "capsule" slip ring is not practical due to size constraints or cost limitations. (Don't however, fail to include in this comparison your costs for mating the slip ring and brush block or to consider the risk of damage to the fragile unprotected brushes). If a separate rotor/stator approach is dictated for your application please review the following tabulation of an assortment of candidate designs—or contact us for a custom design.

MINIATURE SLIP RING CAPSULES

These smallest of all slip ring assemblies are widely used in the pitch, roll and yaw axes of inertial navigation systems where there can be no sacrifice in reliability to achieve packaging density.

Very tight pitch controls are maintained on individual ring locations with center-to-center spacings as small as 0.015 inch between adjacent rings.

HIGH SPEED SLIP RINGS

For successful slip ring operations above several thousand RPM, increased structural demands and frictional heating at the sliding contact surface are two concerns that must be addressed. Applications for high speed slip rings include aircraft turbine testing, stressometer feedback in rolling mills, and gasoline or diesel engine testing.

VACUUM AND SPACE CAPSULES

The use of slip rings in a hard vacuum environment focuses special attention on the area of outgassing organics that could interfere with other components in the system and in the area of lubrication for long term operation. Our contact material recommendations are based on a two year continuous life test program that we conducted in a 10^{-7} environment and have been proven in numerous space flights.

POLY-TWIST CAPSULES

The Poly-Twist is a reliable slip ring substitute for limited rotation applications. Sometimes called a twist-cap, this device provides a self-contained, no-sliding contact rotary interface using flexible circuit tapes. Typical dimensions and data are tabulated below for a few of our many twist-cap designs. Although the majority of applications for the thousands of units supplied to date have required miniature twist-cap assemblies, some very large designs have also been provided.

HELICOPTER SLIP RINGS

Slip rings that power de-icing and blade folding systems must transfer high current levels to blade systems rotating at high speeds. They must also withstand vibration levels and environmental hazards typical of helicopter operation. The latest de-icing applications include both main and tail rotor slip rings, with main rotor current levels to 60 amperes and tail rotor speeds to 1,500 RPMs.

		POWER				SIGNAL

VEHICULAR SLIP RINGS

Electrical and hydraulic slip rings are used in vehicles such as tanks, retrievers, mobile missile launchers, and armored personnel carriers. A typical armored vehicle might contain slip rings in the turrett, the commander station, and the periscope.

PEDESTAL SLIP RINGS

Typically found in radar, missile and gun fire control systems, Pedestal Slip Rings contain varying combinations of logic, control, and high frequency analog signal and power circuits.

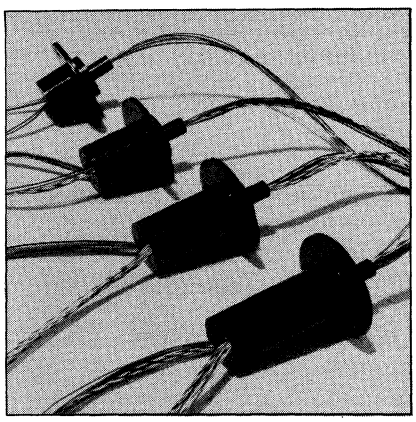
12	4102	.5A	BB 1.05 SR 1.67	.982 .46	Slip ring and brush block set Slip ring bore .196 inch
14	3141	1 ground-150A 1-150A 12-7.5	9.28	11.25	Sealed, rugged construction
16	4019	1A	2.35	1.00	Fiber brush capsule. 3000 RPM

No more than 20% of all rings should be loaded with rated current simultaneously.

Many industrial applications such as continuous-panning CCTV cameras, automated machinery and robotic end-effectors can benefit from the continuous, unrestrained, rotational freedom of a slip ring. Our 4023 Industrial Slip Rings offer the reliability of precious metal contacts at an affordable price. This is made possible by standardizing on four basic models (6, 12, 18, and 24 rings), which are mass produced for volume pricing.



SPECIAL SLIP RINGS

Cable Reel Slip Rings

Cable reel slip rings can be found in a wide range of military and industrial applications including marine/seismic exploration, underwater towed vehicles, remote tele-operated vehicles, construction cranes, and buoyant submarine antennas. These slip rings are designed for a particularly rugged environment while also providing field accessability of the brush block assemblies if repairs are necessary. With access plates in place, sealed bearings, and integral gasketed connectors, the internal portion of the unit is well protected from environmental conditions.

Mooring Slip Rings

Deep water drilling requires a slip ring to allow complete freedom to weathervane for floating power generation stations (SALM type installations). Experience to date in mooring applications include currents to 600 amps, voltages to 35,000 volts (transmission of 36 megawatts of power) in sizes to 8 feet in diameter by 10 feet in length.

Medical Electronics Slip Rings

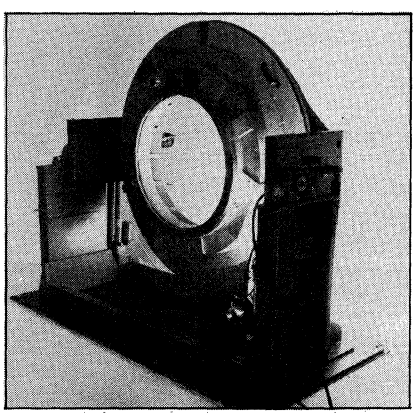
Slip rings are used in various scanner applications, particularly for computed axial tomography (CAT Scanners) which require the need to scan at faster speeds, unencumbered by mechanical stops. These units provide a large through bore for mounting as an integral part of the gantry.

Voltages to 200,000 volts are handled safely with careful attention to gradients, internal surface contours, material selection, debris management and dielectric oil compatibility.

Our slip rings require minimum inertia for spin-up and braking consistent with structural and electrical safety. Drive torques for oil-filled body concentric mounts are typically in the 50-100 ft-lb range.

Slip rings for medical scanners are built on a history of reliable low maintenance applications, with reliability levels exceeding a million circuit hours being demonstrated.

Our CT slip rings are typically sealed with static seals and redundant dynamic lip seals at all rotary interfaces.



Slip Ring Applications Are Only Limited by Your Imagination

These are just a few of the unique applications of slip ring technology. When you need to pass power and/or data through a rotating interface—turn to Litton.

Many of the designs and manufacturing processes are proprietary and are covered under one or more U.S. or European patents.

Cost effective.

Mabuchi Subfractional-HP motors. Small. Light. Reliable. Efficient. Better than ever.

We're the world's largest manufacturer of subfractional-HP motors — producing over 2.3 million per day! Shown here is merely a small sampling of the extensive spectrum of our standard motors with average performance characteristics at indicated voltage. So comprehensive is our range of standard models, it's a virtual certainty there's one or more to fit your needs perfectly — that's cost-effectiveness!

Please request or fill out a questionnaire and/or indicate your desired performance: we'll suggest the motors most suited to your needs.

Power curves and 3-view drawings with production tolerances available upon request. Mabuchi Subfractional-HP motors are used for such machine worlds as audio/video equipment, home appliances, personal care, cameras, peripherals, office/medical equipment, automotives, garden tools, hand tools, etc.

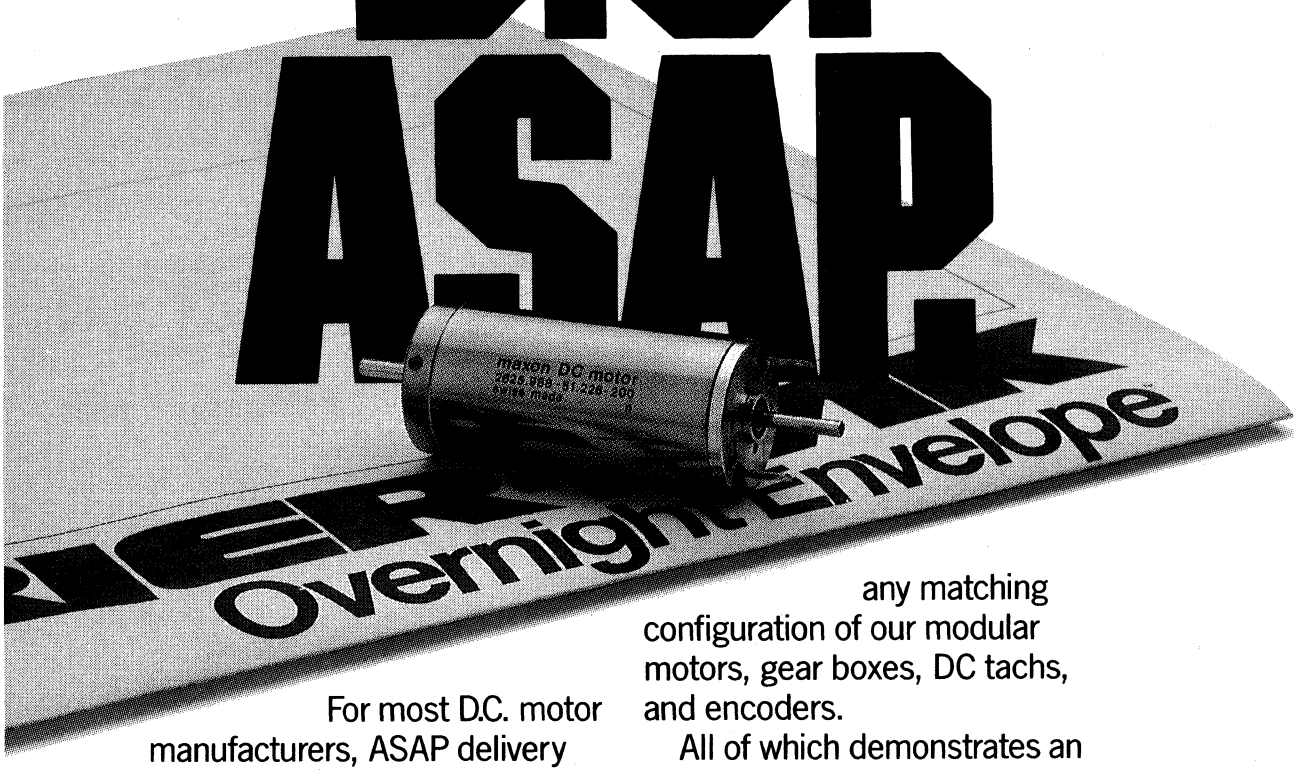
D.C. ASAP.



For most D.C. motor manufacturers, ASAP delivery actually means several weeks.

But when maxon DC motors says ASAP, we truly mean it.

Because we maintain an extensive stock program. So if you choose any motor from our Stock Program Catalog, you'll get a prototype in just days.

Besides a broad selection of ferrite, AlNiCo, and rare earth D.C. motors, our ASAP delivery applies to virtually any matching configuration of our modular motors, gear boxes, DC tachs, and encoders.

All of which demonstrates an important difference about maxon: We understand how important your design schedule is. So, unlike other manufacturers, we don't make you work around ours.

That's why you should send for our Stock Program Catalog. You'll find when it comes to ASAP delivery of D.C. motor prototypes, we're as good as our word.

maxon
PRECISION MOTORS

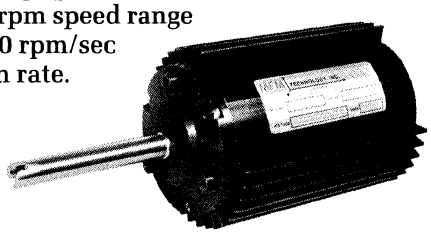
Maxon Precision Motors, 838 Mitten, Burlingame, CA 94010, (415) 697-9614

INTEGRATING TECHNOLOGY & INNOVATION

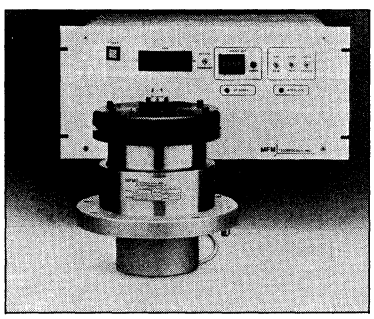
MFM BRUSHLESS MOTORS & CONTROLLERS

Complete Velocity and Positioning Servo Systems. Interface with User Host Computers and Controllers.

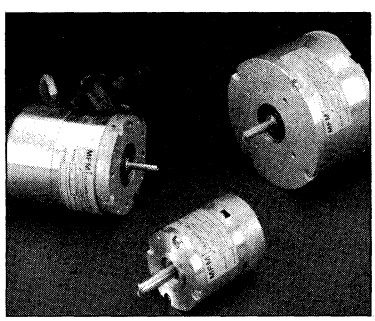
High performance semi-custom brushless DC motors are designed to meet critical process control requirements. Model D16824 Spinner Motor used in semiconductor wafer fabrication equipment has a 0 to 12,000 rpm speed range and a 50,000 rpm/sec acceleration rate.



Precision ball-bearing spindles with imbedded brushless DC motors are available with micro-inch shaft run-out tolerances. Model BDC 0530 linear sine-wave drive offers closed-loop servo control and IEEE-488 or RS-232 digital interface.

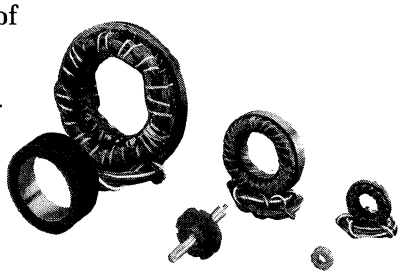


Using samarium-cobalt magnets, MFM brushless DC motors are available in 10 frame sizes from 1.25 inch through 10.0 inch diameter with peak torque ratings from 13.5 oz-in. to 4500 lb-in. Modular motor components are matched to provide optimum performance using 1,350 standard stator configurations.

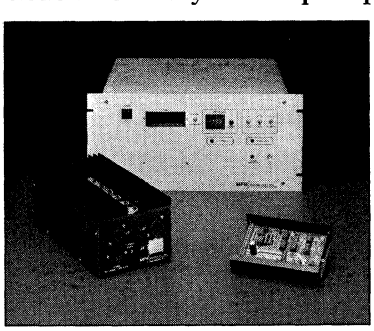


Model BDC 2000 is a 1000 Watt brushless PWM sine-wave drive configured as a transconductance amplifier for ±10 volt speed commands. Model BDC 2001 is available as a six-step drive with four quadrant operation.

Unhoused motors are supplied as kits for direct mounting onto the driven shaft to eliminate performance-reducing effects of conventional couplings, belts, or pulleys. Choice of resolver, optical encoder, or Hall effect commutation available.



Linear sine-wave drives are recommended for magnetic, optical, and sensitive instrument applications where very low torque ripple and virtually no EMI/RFI are essential for proper performance.



Call today for catalog and technical specifications.

eem MINIGLOSSARY SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

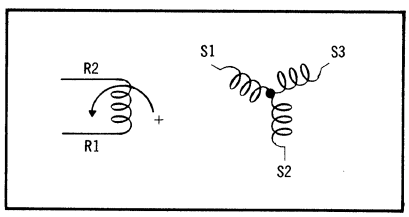
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

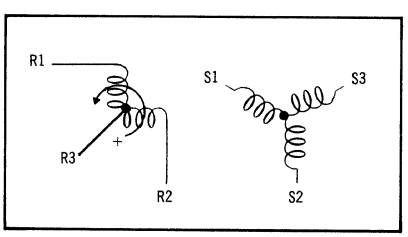
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

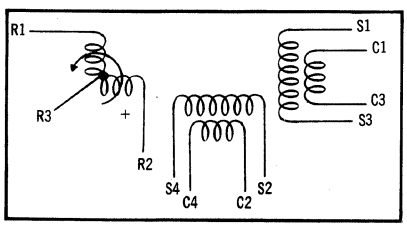
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

Immediate Solutions by Phone and FAX

At Motor Technology we solve most applications over the phone lines.

Your call to us goes straight to a competent motor application engineer, never to a clerk, correspondent or some other non-technical person. You discuss your project with a highly qualified engineer who is experienced with motors—motor application problem solving, motor design, and motor related hardware.

For a lot of projects, you won't always know the exact torque or speed you need. Or, maybe there's a voltage variation you're not sure how to cope with. The odds are 100:1 we've had experience with a similar application. So, basically, all you need to do is explain the conditions and what you want the motor to do. We help fill in the blanks, then come up with a design that's cost efficient for you.

If you're ready to talk about a prototype, the same application engineer will give you the price and a firm ship date—all in the span of a single phone call. (We don't shuffle you to other departments or make you wait days for the answers you need.)

Get an immediate solution by phone or FAX from Motor Technology the next time you have an application. And have the prototype on your desk within a few days.

Custom Prototypes in Three to Four Days

Motor Technology is a quick response company.

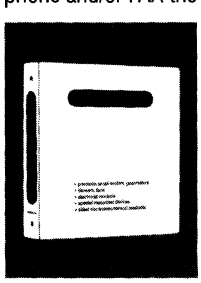
We custom engineer while you're on the phone, then follow-up with your prototype 3-4 days later. A distributor might be able to deliver as fast, but he couldn't match Motor Technology's factory engineering assistance. And our solution comes to you with two important guarantees:

1 We guarantee performance—the torque you need, over the speed range required, at the voltage selected. The motor, motor tachometer or gearmotor will do exactly what we say, or you don't pay for it.

2 We guarantee the prototype to be production feasible. That's assurance you aren't likely to get with a "kludge" assembled by a distributor technician.

Motor Technology is the quick response company that starts you off with a prototype that's engineered to be right for your breadboard and cost efficient in production.

To find out more about us, write or call for our extensive catalog. Or, just phone and/or FAX the problem to us.



The Motor Technology Catalog

Wide range of standards, with complete performance and specification data. Includes short course on how to predict performance when torque, speed or voltage conditions vary. Shipped UPS, same day.

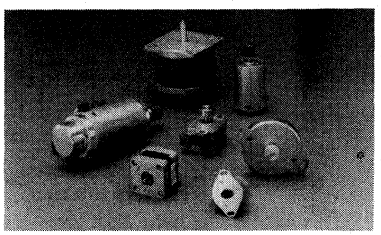
NEW

PRECISION STEPPING MOTORS

NMB TECHNOLOGIES

Highly dependable ASTROSYN® hybrid and PM stepping motors – a broad range of standard or custom designs. High precision machining, molding and stamping operations together with automated processing and assembly offer very competitive pricing with high volume capability.

FEATURES



Either an existing ASTROSYN motor or a custom design will fit your exact specifications. Quality and dependability are built-in since parts and subassemblies are manufactured in-house.

Sheet metal models in sizes 08 to 28 with step angles of 1.8° to 18° Laminated models in sizes 14 to 42 with step angles of 0.9° to 5°

BENEFITS

- WIDE RANGE OF MODELS – Many sizes and types offer customers a unique single source
- PRECISION/AUTOMATED PRODUCTION – Dependable performance delivered in high volume
- CUSTOM DESIGN – Size, step-angle, and other parameters can be tailored to specific requirements
- OPTIONS AVAILABLE – Pulleys, connectors, shaft modifications and double-ended shafts

NOVAtronics
Reliability by design

As a proven designer and manufacturer of highly reliable sensing, indicating and actuating devices, Novatronics of Canada Limited has both a past and a future in the world of military and commercial aerospace.

COMPANY CAPABILITIES

- ☐ Full Engineering and R & D.
- ☐ CAE/CAD/CAM expertise.
- ☐ 28,000 square feet of modern manufacturing and machine shop.
- ☐ Qualified prototyping.
- ☐ Environmental test laboratory.
- ☐ Quality Assurance in accordance with AQAP. (1015) MIL Q 9858.

SENSORS

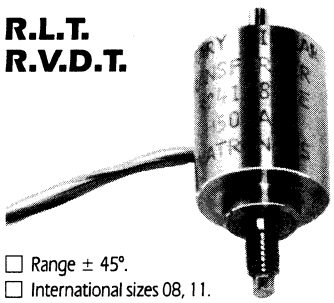
SYNCHROS

- ☐ International and special frame sizes (08-23).
- ☐ 400 and 60 Hz.
- ☐ Position accuracy ± 7 minutes of arc.
- ☐ Single and Tandem.
- ☐ Built to MIL Standards.

RESOLVERS

- ☐ International frame sizes (08-23).
- ☐ 400 Hz.
- ☐ Position accuracy ± 7 minutes of arc.
- ☐ Single and Tandem.

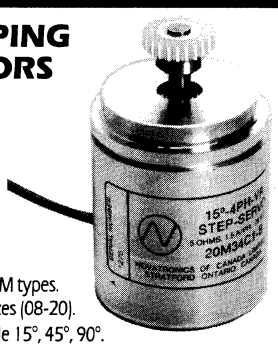
R.L.T. R.V.D.T.



- ☐ Range ± 45°.
- ☐ International sizes 08, 11.
- ☐ Positioning accuracy ± 0.75°.
- ☐ Rotary Variable Differential Transformers.
- ☐ Rotary Linear Transformers.

MOTORS AND ACTUATORS

STEPPING MOTORS



- ☐ VR and PM types.
- ☐ Frame sizes (08-20).
- ☐ Step angle 15°, 45°, 90°.
- ☐ 3 and 4 phase. ☐ With or without lead screws.

SERVOS

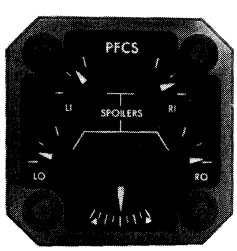
- ☐ Frame sizes.
- ☐ With or without gearheads.
- ☐ With or without tachogenerators.
- ☐ Inertial damping available.

BRUSHLESS DC MOTORS

- ☐ High reliability.
- ☐ High torque. ☐ Low current.
- ☐ Free from EMI. ☐ Long life. ☐ Frame sizes 08-20.
- ☐ Electronics packaged – internal or external.

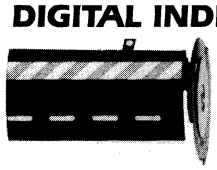
INDICATORS

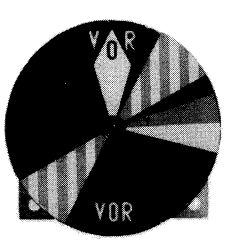
POWERED FLIGHT CONTROL SURFACE INDICATOR



- ☐ Custom electromechanical cockpit display module.
- ☐ 5 display function. ☐ 8 channel outputs to FDR.
- ☐ Input signals from 8 synchro sensors.
- ☐ Meets stringent lighting requirements.
- ☐ MTBF: 40,000 aircraft operational hours.
- ☐ Total design and manufacturing capability.

DIGITAL INDICATORS





- ☐ Electromagnetic wheels.
- ☐ Flags and shutters.
- ☐ Bi-directional built-in detent memory.
- ☐ Excellent readability.
- ☐ In-house custom silk screening.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
ABS acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CAMAC computer automated measurement and control
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3)
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

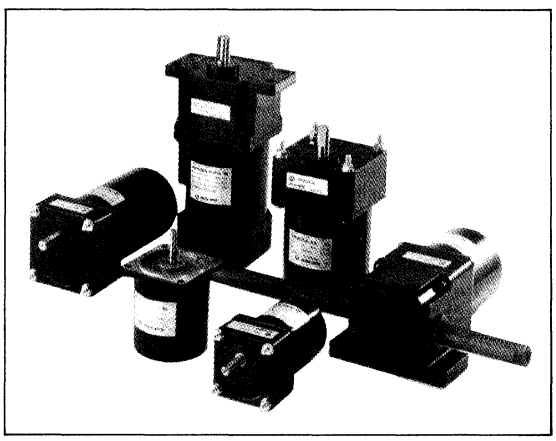
W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

ORIENTAL MOTOR®

HIGH QUALITY FHP ELECTRIC MOTORS



Oriental Motor's reputation for high quality, cost-effective products is well known among automation equipment manufacturers. These motors are used in a variety of products that touch and improve the lives of millions of people. From automating the office in printers, to automating medical and factory automation equipment, **Oriental Motor** is there.

Oriental Motor has over 2000 different standard products that are available in quantities from one, to huge OEM volumes. All **Oriental Motor** products are built with the pride and craftsmanship of a century of manufacturing experience. The engineers at **Oriental Motor** have strived to designed each product to give years of trouble-free service.

Our Product line has 4 different parts: **Oriental Motor** brand AC motors, gearmotors, and speed control motors. **Vexta** Control motors including Step motors and DC brushless motors. **Orix** long life fans, and **SUPER VEXTA** motion control systems.

Features:

Over 2000 standard products available, request our general catalog.
Instrument quality motors at reasonable prices.
Designed with ball bearings for long-life and maintenance-free service.
Available in quantities from one piece to the largest OEM volumes.
Backed by Oriental Motor reputation for award-winning quality.
Standard versions available from stock or with short 3 to 6 week lead times.
Available from our nation-wide stocking distributor network.

Induction Motors

Specifications **115V. 60Hz. – Continuous Ratings**

Model and Dimensions No.			Motor Specifications						Gearmotor

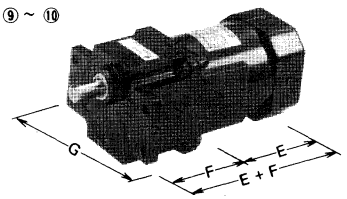
⑨ ~ ⑩



Oriental Motor instrument quality AC motors are available in 5 types:
Induction motors AC PSC Reversible motors for continuous duty applications.
Instantly Reversible AC motors with friction brake for reversing and simple positioning.
Synchronous AC motors for precise speed regardless of load fluctuation.
AC Torque motors for applications requiring continuous stalling.
AC Speed control motors for adjustable speed over a 19:1 range without brushes.
All motors can use our modular gearheads for speed reduction and torque multiplication. Gear ratios from 3:1 to 180:1 and higher are available.

The list above is a partial list of the wide variety of motors that Oriental Motor produces. Our AC motors are also available made-to-order (shaft flats, special shaft lengths, custom windings, special lead wire colors, assembled with connectors, etc.) are available in moderate OEM quantities. Contact your local sales office for details.

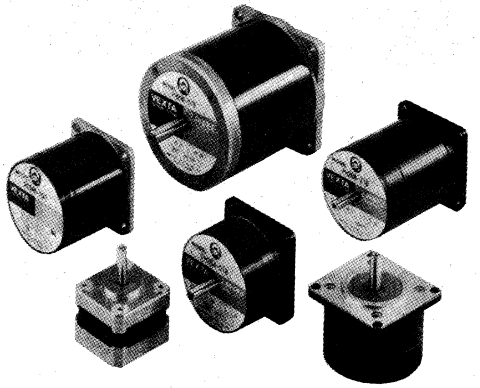
VEXTA® STEPPING MOTORS



These Hybrid stepping motors are designed and manufactured by Oriental Motor and are sold under our VEXTA brand name. They are used in a wide variety of applications ranging from Printers for Office Automation, to robots and assembly machines for Factory Automation. Many models are interchangeable with other step motors for improved quality and cost reduction. Oriental Motor is the premier step motor supplier to the world of motion control.

Available in quantities from one piece to the largest OEM volumes.
Backed by Oriental Motor reputation for award-winning quality.
Standard versions are available from stock or with 3 to 6 week lead times.
Step angle error is small and non-accumulative.
Rotating speed proportional to input pulse frequency.
Available from our nation-wide stocking distributor network.

-03	**-03B**	12	1			12	72					

The list above is only a partial list of the wide variety of stepping motors that Oriental Motor produces. Our VEXTA brand of step motors are also available in:

"M" version 0.9° Full step 0.45° Half step versions for 400 and 800 steps per revolution for smoother moves and better accuracy.
8 lead wire versions of the motors listed above are available for maximum flexibility in driver selection.
"L" Lamination versions are available for lower noise and microstepping compatibility.
Step motors that are made-to-order (shaft flats, special shaft lengths, custom windings, special lead wire colors, assembled with connectors, etc.) are available in moderate OEM quantities. Contact your local sales office for details.

And best of all, it's backed by Oriental Motor's award winning quality and century of manufacturing experience. FOR MORE INFORMATION CALL ORIENTAL MOTOR AT (213) 515-2264.

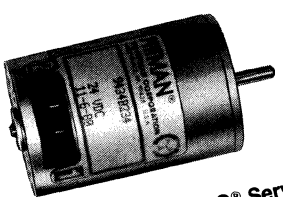
COMPUTER TESTED BRUSH-COMMUTATED

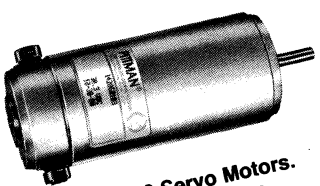
Now all Pittman® motors are available optionally with optical encoders. Every motor is thoroughly tested by a sophisticated computer-controlled instrument array that checks eight vital performance parameters and records the measured values. And every unit is composed of standardized sub-components pre-assembled to extremely demanding specifications. That's Pittman, applying the latest in mass production techniques to reliable, precision motion control products to assure you of a welcome combination of performance and economy. Choose the motor type you need. Then contact us for complete data and application assistance. Call (215) 256-6601. TWX: 510-661-8696. FAX: 215-256-1338.

Series 8000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.2 in.; 3 lengths to 2.4 in. overall. Stall torques to 12 oz.-in. Mechanical time constants about 21 ms.

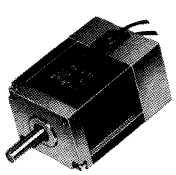
Series 9030 Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in. Stall torques to 41 oz.-in. Mechanical time constants as low as 9.2 ms (some models).



Series 9000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 14.9 ms. (some models).



Series 14000 Servo Motors. 11-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 2.13 in.; 4 lengths to 5.2 in. overall. Stall torques to 286 oz.-in. Mechanical time constants as low as 6.2 ms. (some models).



Series 7000 Servo Motors. 13-slot armatures. 4 pole, samarium cobalt fields. Voltage inputs to about 40 VDC. 1 in. x 1.25 in. cross section; lengths to 1.85 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 4.8 ms (some models).

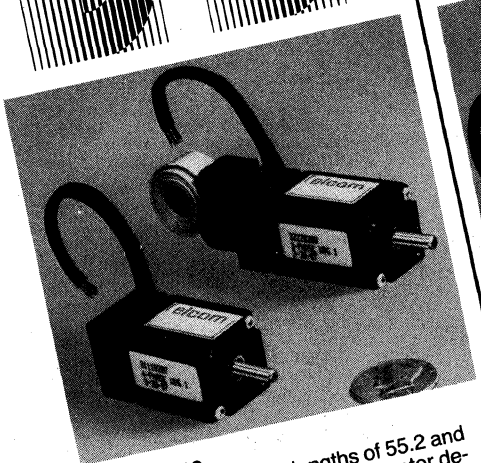
DEMONSTRABLY SUPERIOR BRUSHLESS SERVO MOTORS



Series 3000
30mm sq. frame size; lengths of 55.2 and 65.4mm. At 7,200 rpm, longest motor develops 1/15 hp, continuous duty, with normal heat sink.

Series 4000
40mm sq. frame size; lengths of 67.8, 75.3, and 83.0mm. At 7,200 rpm, longest motor develops 1/6 hp, continuous duty, with normal heat sink.

Series 5000
50mm sq. frame size; lengths of 77.4, 90.1, and 102.8mm. At 7,200 rpm, longest motor develops 1/3 hp, continuous duty, with normal heat sink.

All motors are available with your choice of 3-phase or 4-phase stator winding connections. Options include optical encoders and/or planetary gearheads. Get the whole story on unique Pittman® ELCOM® electronically commutated servo motors by calling (215) 256-6601. TWX: 510-661-8696. FAX: (215) 256-1338.

- **Samarium cobalt rotor construction**
- **Exceptional thermal efficiency**
- **Negligible magnetic cogging**
- **Very low winding inductances**
- **High torque-to-inertia ratios**
- **Low mechanical time constants**
- **Very high performance at speeds to 25,000 rpm**

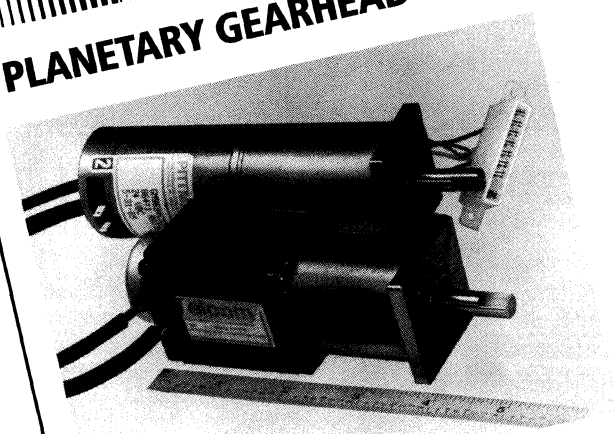
GEAR MOTORS

SPUR GEARHEAD

Series GM8700 Gearmotors. Output torques to 100 oz.-in. with standard gearing. Uses selected 8000 Series servo motor plus spur gearbox. Eleven available ratios from 6.3:1 to 1804:1. 1.37″ o.d.; lengths to 3.6″ overall depending on motor and gearbox specification. Optional gearing permits output torques to 160 oz.-in.

Series GM9400 Gearmotors. Torque to 175 oz.-in. with standard gearing. Uses selected 9000 or 9030 Series servo motor plus spur gearbox. Fourteen available ratios from 5.9:1 to 4730:1. 2.0″ o.d.; lengths to 3.96″ overall depending on motor and gearbox specification. Optional gearing permits output torques to 500 oz.-in.

PLANETARY GEARHEAD



This family of planetary gearheads is designed to provide reliable delivery of up to 125 lb.-in. of torque at the output shaft, dependent upon ratio and the thermal characteristics of the selected motor. Any brush-commutated DC motor in PITMO® 9000, 9030, or 14000 Series can be mated with these gearheads or, for exceptional performance in smallest size, choose any ELCOM® brushless servo motor from Series 3000, 4000, or 5000.

Eleven ratios from 4:1 to 31104:1 are available. Gears are precision hobbed from 4140 steel to AGMA 10 tolerances. Output shafts are Fatigue-Proof® steel, running in generously sized, oil-impregnated, sintered bronze bearings. Ball bearings or roller bearings are available optionally.

For a specific recommendation of a gearmotor to suit your application, please contact your local Pittman sales representative or call us at (215) 256-6601. TWX: 510-661-8696. FAX: 215-256-1338.

Fatigue-Proof® is a registered trademark of LaSalle Steel Co., Chicago, Ill.

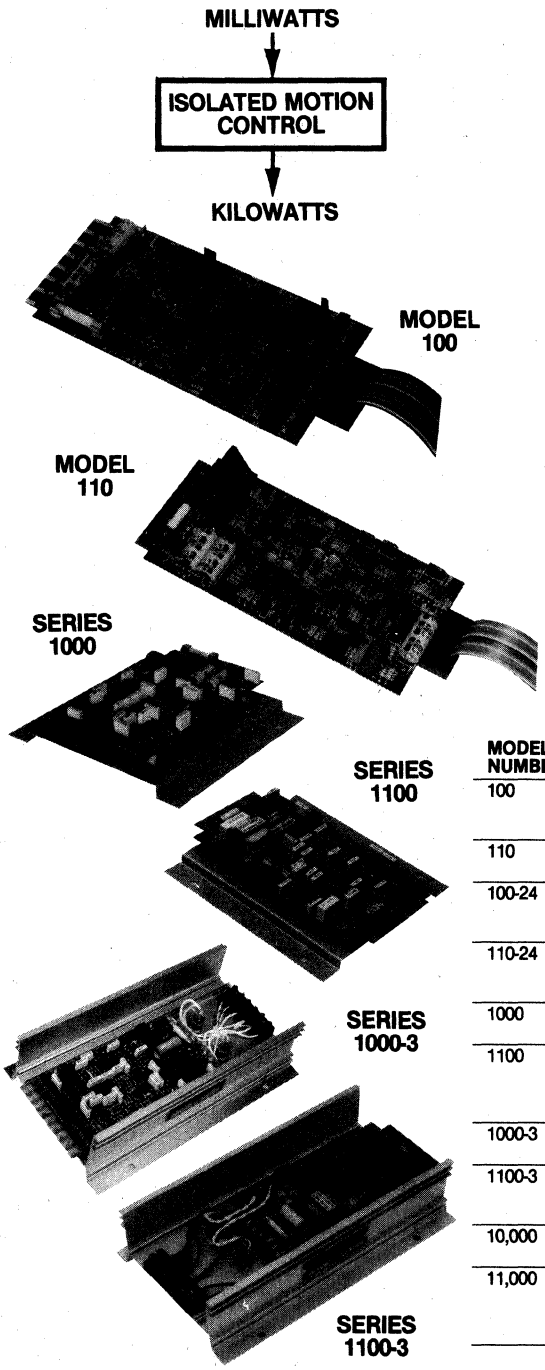
POWRUPS

ISOLATED INPUT DC MOTOR CONTROLS



8 Bit Parallel Microprocessor/TTL Compatible
1500 volt isolation ..... or
Isolated Analog Inputs
1500 volt isolation, voltage or current inputs
Bi-Directional, Regenerative (4 Quadrant) Operation
Controls large inertial loads with fast response
Output Horsepower
3 power ranges control motors from 1/50 HP to 3 HP
Motor Armature Voltage
90, 130 and 180 VDC full scale outputs; 24 VDC also available
Motor Field Voltage
For all PM motors as well as 50 and 100 VDC fields
AC Input Voltage
Nominal 115 VAC or 230 VAC, 47-63 Hz
Isolation Voltage
1500 VDC standard; up to 5000 VDC available
Speed Range
50:1 standard or wider with tach feedback
Adjustments
Full Speed, IR comp, Torque limit, offset adjust
Ambient Operating Temperature
−20°C to +70°C
Input/Output Connections
Plug removable connectors, solder lugs or ribbon cable, inputs and outputs physically separated
Failsafe Protection
Motor is de-energized if control is not powered
Torque Limiting
Adjustable torque limits, CW and CCW

MODEL NUMBER	INPUT VOLTAGE	HP RANGE	NOTES
100	115 VAC 60 Hz	1/30 HP-1/8 HP	TTL/Microprocessor Compatible; Board level; low cost for OEM applications
110	115 VAC 60 Hz	1/30 HP-1/8 HP	Isolated Analog Input; Board level; low cost for OEM applications
100-24	115 VAC 60 Hz	1/30 HP-1/8 HP	TTL/Microprocessor Compatible; Board level; low cost for OEM applications; 24 VDC output
110-24	115 VAC 60 Hz	1/30 HP-1/8 HP	Isolated Analog Input; Board level; low cost for OEM applications; 24 VDC output
1000	115/230 60 Hz	1/6 HP-1 HP	TTL/Microprocessor Compatible; Open Frame Construction
1100	115/230 60 Hz	1/6 HP-1 HP	Isolated Analog Input: User may select ±100 mv, ±5 VDC, 4-20 ma or 10-50 ma inputs. Open Frame Construction
1000-3	115/230 60 Hz	1 HP-3 HP	TTL/Microprocessor Compatible; Open Frame Construction
1100-3	115/230 60 Hz	1 HP-3 HP	Isolated Analog Input; User may select ±100 mv, ±5 VDC, 4-20 ma inputs. Open Frame Construction.
10,000	115/230 60 Hz	1/6 HP-1 HP	TTL/Microprocessor Compatible; Die Cast Case Construction
11,000	115/230 60 Hz	1/6 HP-1 HP	Isolated Analog Input; User may select ±100 mv, ±5 VDC, 4-20 ma or 10-50 ma inputs. Die Cast Case Construction.

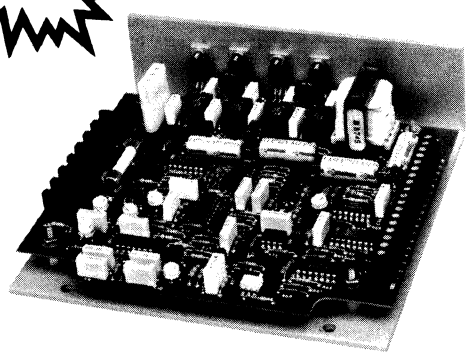
POWR-UPS

MOTOR CONTROLS

For Industrial and Robotics Applications

NEW

FULL WAVE REVERSIBLE REGENERATIVE DC MOTOR DRIVE



The 2745 series motor controls are full wave, static reversible, regenerative units that control the speed and direction of shunt wound or permanent magnet (PM) DC motors with outputs ranging from 1/6 to 3.0 horsepower.

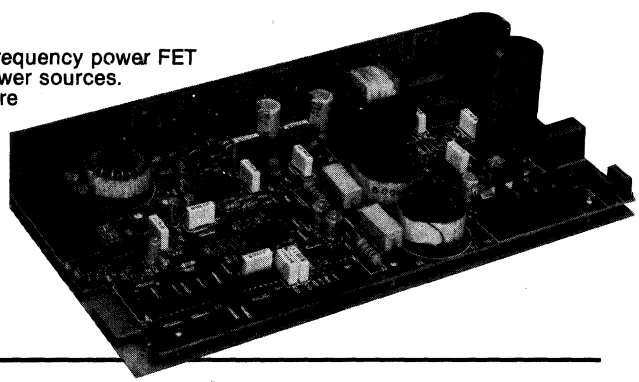
These controls are designed to be easily interfaced to microprocessors or TTL digital circuitry. Logic input signals are opto-isolated from the motor with a minimum isolation voltage of 1500 VDC. This eliminates the possibility of grounding or noise problems.

A 10 bit parallel command selects motor direction as well as 9 bit (1 part in 512) control of speed. A failsafe circuit de-energizes the motor if the control power is not present.

Model 2745 is supplied for operation from 115 VAC, 50/60 Hz mains and drives DC motors with 90 VDC armature ratings and 50-100 VDC fields. Model 2746 is supplied for operation from 220/240 VAC, 50/60 Hz mains and drives DC motors with 180 VDC armature ratings and 100-200 VDC field windings.

The units are of open frame construction, suitable for O.E.M. use in user provided enclosures. The aluminum mounting bracket serves as a heat sink for the power semi conductors. Inputs and outputs are connected by barrier strips.

24 VDC OUTPUT MOTOR CONTROLS



POWR-UPS Model 124 DC motor controls are high frequency power FET units that operate from standard 115 or 230 VAC power sources. These units are completely self contained and require no additional power supplies.

Model 124 features:

- Compatible with virtually all PM DC motors
- Bipolar outputs up to +24 VDC
- Four quadrant, regenerative operation
- Output to 2 amperes
- Armature or tachometer feedback
- Wide bandwidth for servo applications
- High frequency PWM filtered output
- Isolated analog or digital interfaces

INTEGRAL LCD SPEED/TORQUE DISPLAY

POWR-UPS Model 310 DC Motor Control is a half-wave, regenerative unit that controls the speed and direction of motor torque of motors with outputs from 1/30 to 0.5 HP. The integral front panel 10 turn potentiometer permits repeatable setting of motor speed. Model 310 features:

- 10 turn precision speed control potentiometer
- LCD readout of speed/torque analog
- Bi-directional, regenerative (four quadrant) action
- Operates from nominal 115 VAC power lines
- Controls PM or Shunt field motors up to 0.5 HP

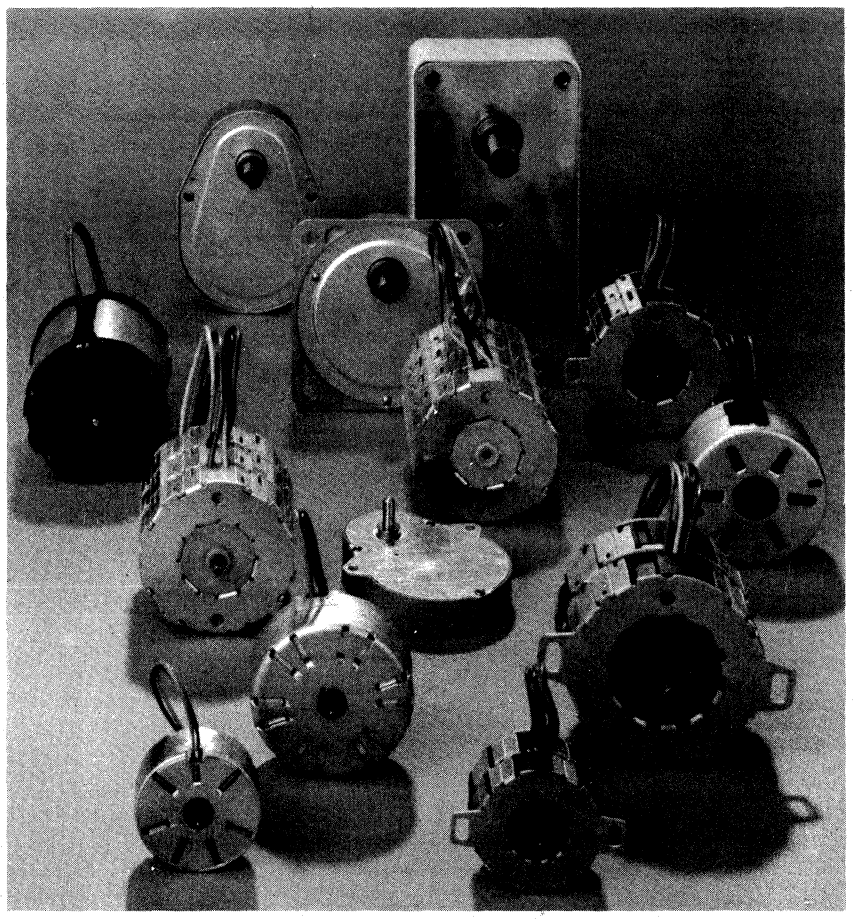
Stepper & Synchronous Motors

Step'n sync with SAIA



SAIA AG, with factories located in Murten, Switzerland, has developed complementary lines of same-size synchronous and stepper motors with interchangeable gear boxes. That makes for a commonality which means economy for you. But what's uncommon about these economical motors is their versatility: two-phase and four-phase steppers; unidirectional and reversible synchronous. And with "snap-on" reduction gears (with optional clutch) that meet any mechanical and electrical variant, you can be sure of a solution to your particular needs. Manufactured to Swiss standards of precision and quality, you can also be sure of reliability and long life.

Use this short-form catalog to specify your general requirements on the enclosed business reply card. We will send you detailed data sheets and offer engineering assistance in the selection of the right motor for your application.

SYNCHRONOUS MOTORS

UBS 1 (AMY 7)...distinguished by especially silent running and long life, this motor is used in timing relays, registering instruments, sychronous clocks. The direction of running is controlled by means of auxiliary poles.

UDS 1 (AMY 81)...an economically-priced synchronous motor with an effective ratio of size to torque. A reverse-running stop assures rapid starting in the correct direction at high torque.

UDS 5 (AMY 81-W)...a brushless DC motor that is a combination of the AMY 81 unirotational motor and an electronic circuit which enables it to be connected to DC, resulting in a brushless DC motor having the advantages of a synchronous motor--no brush wear, long life, and speed not load-dependent.

UDS 7...totally new design with non-reverse device, high torque and very high efficiency (40%). Features of the new design are the fixed permanent magnets and rotating soft iron armature. Applications include power drive for actuators, valves, flaps, feed systems, domestic appliances, office machinery, and vending machines.

UBR 1...electrically reversible, permanent magnet synchronous motor with 48 stator poles. Motor is fitted with maintenance-free sintered bronze bearings encased in a plastic housing to protect the bearings from dirt and prevents leakage of bearing lubricant by capillary action. Applications include HVAC, and time-synchronized drive in recording, medical, laboratory, and analyzing devices and apparatus.

UDR 1 (AMY 9)...an electrically-reversible motor of heavy duty design and wide running range. Applications include valve actuators, phono-units, copying machines, assembly robots, medical devices, registering instruments.

UFR 1/3/4 (AMY 12/13/14)...these reversible motors are especially suitable for power drives featuring long life and silent running. Applications include actuating valves, ring-type transformers, pumps, label printing machines, medical and optical instruments, electro-pneumatic converters, antenna drives, machine automation, registering instruments, sound devices.

STEPPER MOTORS

UBB 1/2/5/6...two-phase and four-phase motors with 15 degree step angles; holding torque up to 1.5 cNm.

UBD 1/2/5/6...two-phase and four-phase motors with 7.5 degree step angles; holding torque from 1.0 cNm to 1.5 cNm.

UDB 1/2 (AMA 9)...slightly larger motor with 15 degree step angles; holding torque up to 2.3 cNm; two- and four-phase versions available.

UFB 1/2/3/4 (AMA 12/14)...step angles of 15 degrees; holding torque up to 8.2 cNm and external dimensions up to 51.3 x 56 mm.

UFD 1/2 and **UHD 1/2**...largest 7.5 degree step angle motor; two- and four-phase operation with holding torques up to 16.0 cNm.

Typical applications for SAIA stepping motors are recording instruments, facsimile equipment, peristaltic pumps, as well as printers and electronic typewriters.

REDUCTION GEARS

High quality reduction gears, as modular clip-on gearboxes, are constructed for multistage, spur gear reduction. The gear wheels rotate on hardened and highly-polished steel shafts lubricated for life, and are therefore absolutely maintenance free. Internal roller bearing one-way and two-way slipping clutches allow the output shaft to be rotated while the motor is stationary.

DPi 13536

Tachometers, Encoders, Brushless Tach/Commutators.

dc tach generators

Servo-Tek 1.135" OD tachometer generators are built to last. With silver-alloy commutators, stainless-steel shafts and bearings, brushes rated for 100,000-hour life, temperature compensation, and full factory run-in, our tachs deliver stable, long-term performance. A complete line with a variety of mechanical and electrical characteristics is available from stock. Output ratings from 1 to 45 V/1000 rpm.

incremental encoders

These high-resolution (100 to 512 pulses/revolution) optical encoders are offered both as options on 1.135" Servo-Tek rotating components (pictured) and as stand-alone feedback devices. All configurations provide 3-channel (2 in quadrature and 1 index) LSTTL logic output. Combination units give position, speed, and direction feedback.

5 Vdc supply; 3.2 mA output standard; 16 mA with standard amplifier, others available, STTL.

For inexpensive single-pulse-train feedback, Servo-Tek Pulsers are your best bet. 4 to 12 pulses/revolution; 4.5 to 15 Vdc supply; stand-alone and add-on models.

tachsyn® brushless tach/ commutators

Does your brushless dc drive require

- High-accuracy commutation?
- Linear, low-noise tach signal?
- Elevated-temperature operation?
- No electronics in the motor?
- Low-inertia rotor?

The new patented Tachsyn tach/commutator from Servo-Tek may be the ideal transducer for your exacting requirements.

The Tachsyn brushless three-phase transducer is available in 4-, 6-, and 8-pole configurations to match your motor. With remote signal conditioning electronics, it provides accurate 6-step Hall-equivalent or sine-wave signals plus a low-ripple analog dc tachometer output.

The rotor is a low-inertia, passive component suitable for high speeds. Overhung mounting eases addition to your motor–no extra bearings or couplings are required.

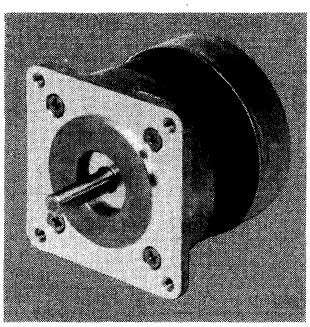
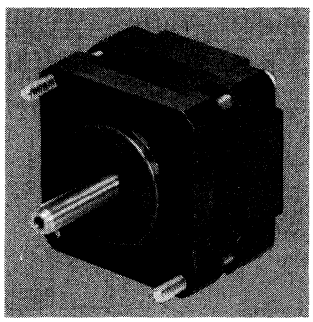
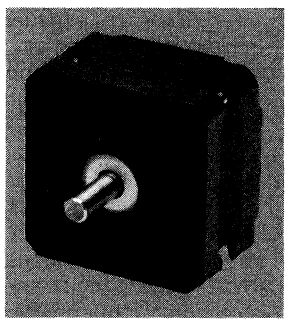
STEPPING MOTORS

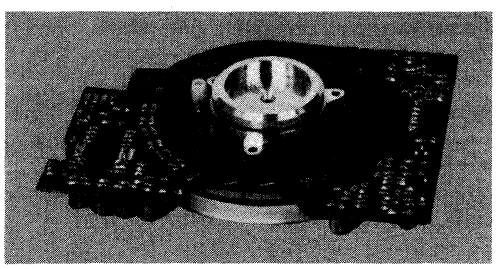
Sizes 15 (35mm), 17 (39mm) & 23 (56mm) **Step Angles:** 0.9°, 1.8°, 3.6° & 3.75°. Hybrid, unipolar or bipolar, precision ball bearings 3% accuracy, state-of-the-art performance. **Applications:** Disk drive, tape streamer, printers, plotters, medical equip., office automation machines.



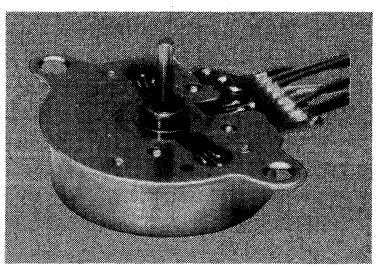




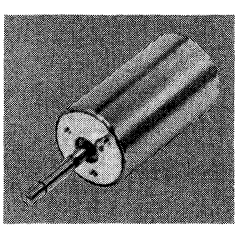
BRUSHLESS DC MOTORS

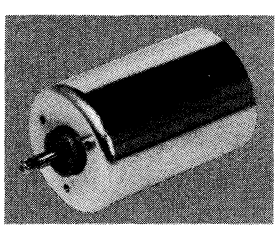


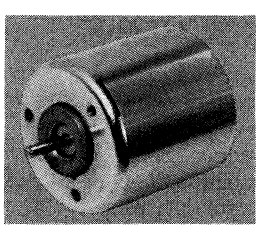
Inner & outer rotor types, 3 phase radial gap types, 42mm to 90mm dia, rare earth magnet, ball bearings, hall sensors. **Options:** Tachometer, encoder, integral driver. **Applications:** Disk drives, streamers, medical equip., computer peripheral equip., fan & blower drives.



CORELESS DC MOTORS

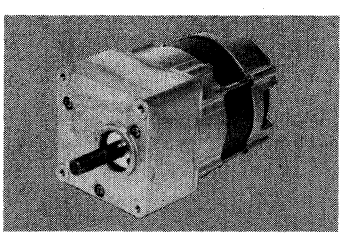






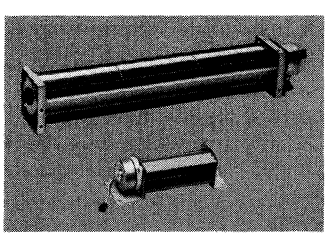
Ironless rotor, 12mm to 50mm dia., 8.5 to 1400 GM-CM starting torque. **Options:** Ball bearings, tachometer, terminals. **Applications:** Medical equip., office equip., recorders, small printers, plotters.

AC MOTORS



Induction motors: 120 or 220 VAC, 50 OR 60 HZ, frame sizes of 60, 70, 80, 90 & 102mm dia. **Options:** Gearheads, cooling fans, capacitor run or shaded pole. **Applications:** Copy machines, print press, fan & blower drives, conveyors.

TANGENTIAL BLOWERS



Brushless DC motor with integral driver, rugged steel construction, quiet operation, air flow up to 2.0 CMM. **Applications:** Small computers, copiers, office equip., audio equip., printers, space heaters.

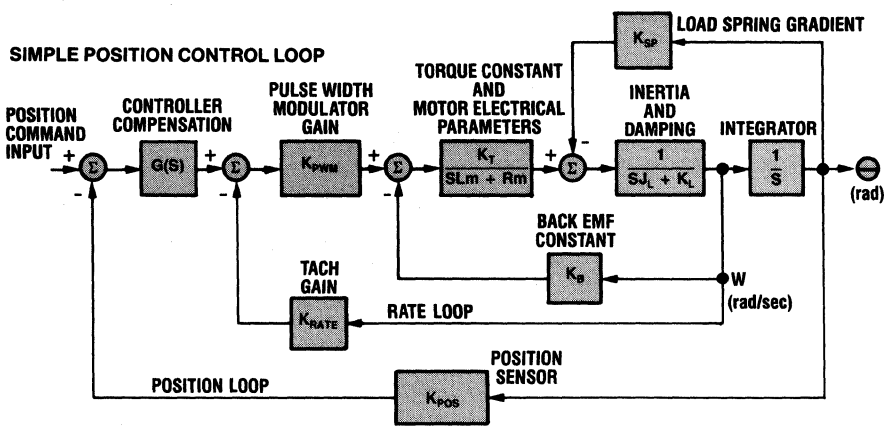
Sierracin/Magnedyne

Complete Solutions in ELECTRONIC MOTION CONTROL

Sierracin/Magnedyne leads in the development of sophisticated motion control devices. We have over 20 years of experience in all phases of development, design, applications engineering and manufacturing. From large, powerful devices for military applications, to the smallest, most precise medical applications, Sierracin/Magnedyne has successfully developed innovative motion control solutions to the most exacting requirements. Additionally, our products include brushless and brush type motors, tachometers, and the entire range of electronic positioning, drive, and motion control devices. We work with our customers, identifying their needs, selecting and designing systems to meet their needs, and engineering and producing cost-saving solutions.



APPLICATIONS ASSISTANCE

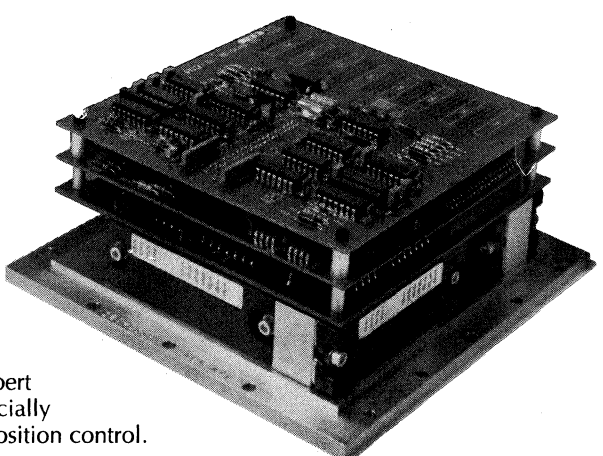
Contact Sierracin/Magnedyne early in your system design process. Our experienced applications engineers can usually help you save money by participating in the motion control aspects of your design process. The experience we have gained in thousands of applications can become part of your design team. The result: shorter design and development time for high reliability motion control systems, a more integrated design for your product, and the assurance that the Sierracin/Magnedyne system we specify will optimize the performance of your product.

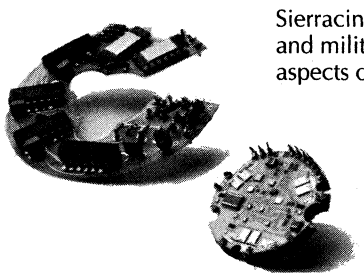
Call or write for the Sierracin/Magnedyne Design Guide to learn the range of motion control products and applications we make available. The Design Guide includes a tutorial on motion control devices and a product guide/specification section that illustrates just what we can do for you.

Motion Control Systems

INTEGRATED MOTION CONTROL MEANS IMPROVED SYSTEM PERFORMANCE

When Sierracin/Magnedyne participates in your design process, you realize significant performance improvements on your products. Motion control devices frequently involve design trade-offs throughout your system, and our engineers know how to integrate motion control devices to provide optimum performance. Your benefits include reduced cost in design and redesign, improved product performance, and motion control solutions that reflect years of expert engineering. High performance motors can be integrated with specially tailored electronics to provide high reliability torque, speed and position control.





Sierracin/Magnedyne has worked with commercial, industrial and military applications in both the electronic and mechanical aspects of system integration. We provide integrated motion control from concept through manufacturing within your performance and packaging requirements. The design cycle is computer-aided and includes:

- System and control conceptual design
- System and module detailed design
- Servo loop analysis and design
- Detailed electronic design
- Prototype fabrication
- System integration
- Testing

DRIVE ELECTRONICS

The systems Sierracin/Magnedyne designs range from simple drives to complex hybrid electronics with microprocessor programmability, so we can help your products reach their highest potentials in terms of integrated design and motion control. We can house the drive electronics separately or integrate them into your package.

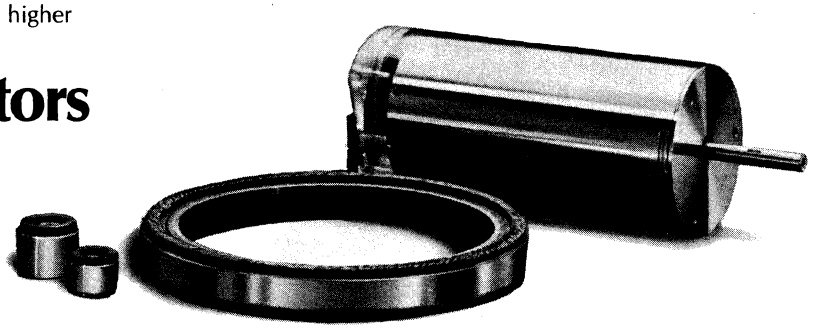
STATE-OF-THE-ART MOTOR DESIGN

Sierracin/Magnedyne continues to apply the latest, proven materials to improve motor performance factors. Through the use of Samarium Cobalt, Neodymium, and other materials, we are able to produce motors with higher torque, lower sensitivity to overcurrent, and greater flexibility in concentricity mounting tolerances. Our on-going development programs provide superior reliability and operational life at higher performance.

CONTROLLER FEATURES INCLUDE:

- Unidirectional or bidirectional
- Current limiting
- Short circuit protection
- Reverse polarity protection
- Speed control
- Digital or analog servo control

DC Brushless Motors



DC brushless motors make possible equipment and applications that previously had been beyond reach. They are able to operate at infinitely variable speeds with high torque; to have speed settings that can be exactly duplicated; and can start, stop and reverse countless times without ill effects. Brushless motors come in a variety of sizes and power ratings, and they can be adapted to the harshest environmental conditions. They include the following characteristics:

- Long operational life
- Low maintenance
- Effective heat dissipation
- Low EMI
- High torque
- Low inertia

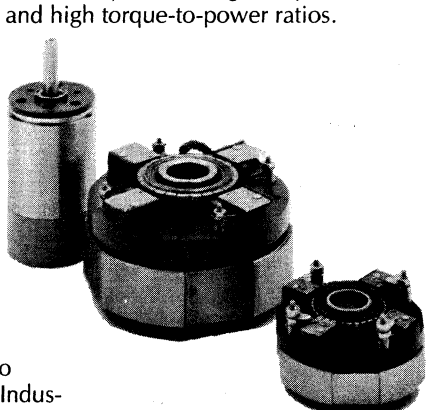
Sierracin/Magnedyne has qualified motors in a wide variety of applications, and they can be built to the most exacting specifications of any industry or use. Sierracin/Magnedyne has probably solved applications problems very close to yours. When your motion control problems are unique, our staff of engineers is ready to design a brushless DC motor and control system to your specific needs.

Brush Type Motors

Sierracin/Magnedyne designs and manufactures direct drive DC torque motors in an especially wide range of sizes and ratings. Our motors range from less than 1" in diameter to over 60", so the possibilities for applications are virtually unlimited. Existing models can be adapted to meet most specifications, or our engineering staff can design a motor for your requirements.

Sierracin/Magnedyne's ongoing development program assures that our products use the latest materials for operational reliability and for high torque-to-weight and high torque-to-power ratios.

DC Tachometer Generators



Extremely low ripple and high sensitivity Sierracin/Magnedyne tachometers are the standard for the machine tool control industry. Small, frameless units offer you flexibility for use in many applications. A variety of mounting and connecting arrangements can be tailored to your needs including housed tachometers and housed DC torque motor/tachometer combinations on a common shaft.

Sizes range to 12.5" O.D., with fully encapsulated designs that meet MIL-SPECs. Also available are reduced axial length and light weight units for aerospace applications. Industrial, military, and process control applications are served by these high reliability units.

WHY do 40,000 Buyers and Electronic Engineers Keep Calling

MASTER DISTRIBUTORS

- BECAUSE orders placed by 3:00 p.m. are shipped the same day.
- BECAUSE we have over 8,000,000 relays & switches in stock.
- BECAUSE of our excellent Value-Added Service.
- BECAUSE of our Just-In-Time Program.

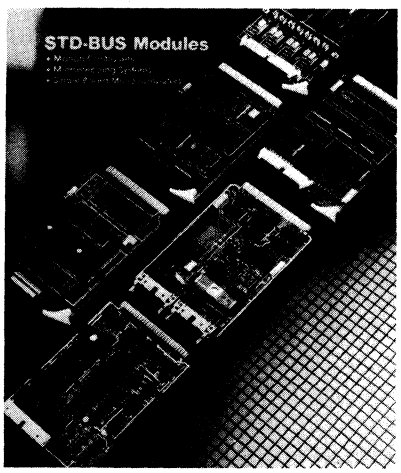
Stock Drive Products—founded by engineers provides unique application assistance in the form of detailed handbooks and catalogs. In keeping with SDP traditions, this material provides very complete details on SDP products to help design engineers choose the products most applicable to their needs. It is an accepted industry fact that SDP product quality is of the highest order as is SDP engineering assistance. Wherever possible, SDP encourages the use of standard products detailed in the catalogs. However, expert advice is available for your special or custom requirements by calling 516/328-0200. Ask for Application Engineering.

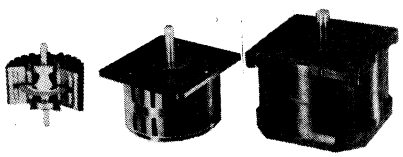
Send for your free copy of the extensive catalog of over 1,000 standard motion control products including DC and AC motors (both direct and reduction drive), steppers, tachometers, gearheads and fans and off-the-shelf STD-BUS cards and motion control modules. Call 516/328-0200 or 328-3300.

STD-BUS MOTION CONTROL MODULES



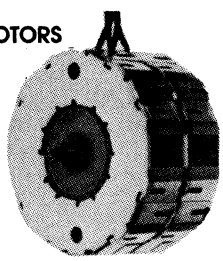
Control motor position, velocity or torque via RS-232, STD-BUS or local switch. Digital filtering. Ideal for robotics/automation. Commands in ASCII. Stepper control, linear or circular interpolation. Microstep to 12,800 steps/rev. 8031 microprocessors. Microstep DAC controls 4 dc motors. A complete family of control modules, cards and boards available off-the-shelf. Catalog TI-822.

THIN DISC PM STEPPER MOTORS



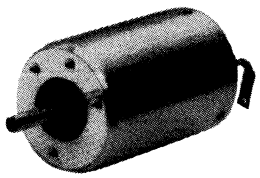
New technology stepper motors with samarium/cobalt permanent disc rotors. Up to 100KW/S power rate in 30, 50 & 70 mm diam. and step angles of 1.8° & 3.6° with peak holding torque up to 90 oz. in. Superior power rate to weight ratio. Weigh 50% less than comparable motors.

"TIN-CAN" PM STEPPER MOTORS



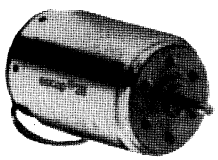
Permanent magnet motors for two and four phase operation. Step angles 7.5° & 15°. Holding torque from 1.0 up to 7.7 Ncm. Operate at 6, 12 or 24 Vdc and from −15°C to +55°C. Mount in any fixed position by means of expandable snap-on clip or screw clip. Available with a wide range of gearheads.

IRONLESS ROTOR DC MOTORS



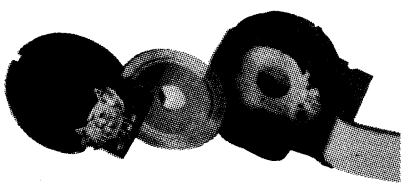
Permanent magnet ironless rotors provide up to 90% efficiency and high power/volume ratios. Many standard models from 16 to 36 mm diam. for 1.2 to 36 Vdc and up to 25.5 oz. in.

DC TACHOMETERS & MOTORS/TACHOMETERS



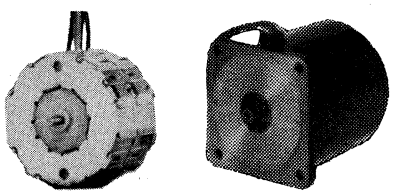
Ironless rotor construction ensures maximum reliability and performance. EMF constant 0.84 to 13.5 V/1000 rpm. Typ. ripple (pk-pk): 6–10%. Linearity & reversion error ±0.1%. Motor/tachs available with speed reducers.

OPTICAL ENCODERS



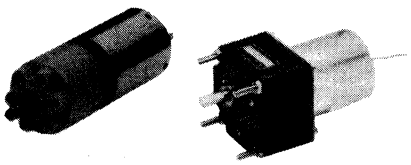
Available in two standard sizes: 28 mm O.D. with 100–512 cycles/rev.; 56 mm O.D. with 192–1024 cycles/rev. Digital output compatible with LSTTL logic, two and three channels. Also available with integral motor.

AC MOTORS



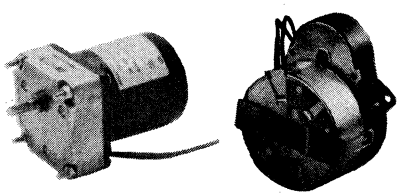
Available as synchronous reversing or unidirectional types. Also hysteresis or induction types. A wide variety of standard sizes and torques up to 1600 Ncm are available. For either 50 or 60 Hz operation and with UL, VDE and CSA approval.

DC GEARMOTORS



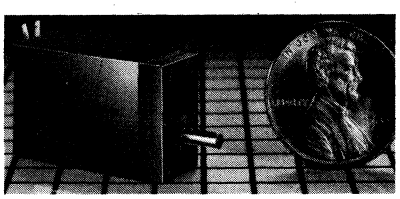
Supplied in either of two basic styles either with integral ironless rotor dc motors and gearheads or as assembled motors and gearbox components. A very wide range of torque and gear ratios.

AC GEARMOTORS



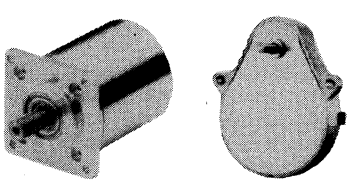
Available in wide range of reduction ratios to fit all standard AC motors and with precision gears and permanently lubricated bearings to ensure quiet long life. With or without one or two way slipping clutches.

MINIATURE DC GEARMOTORS



Tiny precision ironless rotor dc motors with an integral gearbox with a choice of reduction of 3.67 to 2430; 1 of the 7200 rpm 2 or 4 Vdc motors. Motor torque is 0.072 oz. in. @ 2V (0.068 @ 4V). Max. size is 9 mm wide × 15 mm high × 21.8 to 34.7 long. Wt.: 10 to 13 grams.

GEARHEADS/SPEED REDUCERS



Precision construction in a variety of styles and ratios to fit most standard ac or dc motors. Ratios range from as little as 4.0625:1 up to 360,000:1. A wide range of output torques are available. See catalog SDP-823.

SLO-SYN® DC Stepping Motors

Permanent magnet type stepping motors that provide high torque-per-pound and torque-to-inertia ratios. Can be driven to speeds above 20,000 steps/second with low power input. Motors have Class B insulation and can be operated at an ambient temperature range of −40°C to +65°C. Continuous duty temperature is 65°C. Standard 1.8 degree step angle motors can be half-stepped or microstepped with accuracies of ± 5% or ± 3% noncumulative. Holding torque ratings from 53 to 5000 oz-in. To simplify installation and connections, new quick-connect, plug-in types are available. Motors have no brushes, ratches or gear and use shielded ball bearings to ensure reliability and long life.

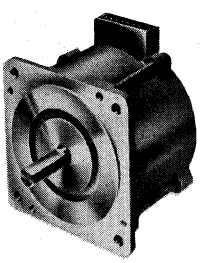
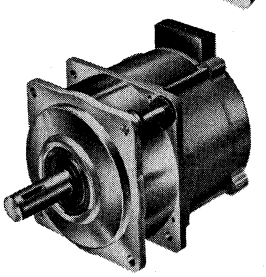
(2) Both windings energized at rated current.
(3) Calculated from holding torque in oz-in and rotor inertia in oz-in-sec^2 (lb. in^2/24).
(5) Values are subject to change without notice. Parameters used as part of a specification should be verified with the factory.
(6) Operation below rated current will reduce torque and may degrade step accuracy.

SLO-SYN® AC Synchronous & Gearmotors





Provide slow basic shaft speed synchronous with line frequency. Allow direct load coupling without gearing. Instantaneous starting, stopping and reversing eliminate clutching and braking. Simple single-pole, 3-position switch provides complete forward, reverse and off control. Will not overheat or be damaged if stalled. Starting and running currents nearly identical. Conventional motors have speeds of 72 and 200 rpm at 60 Hz and torque ratings from 25 to 1800 oz-in.

New **high torque models** provide more power per frame size than any other synchronous motors. Types offered in NEMA frame size 23 and 34 with minimum running torque ranging from 60 to 420 oz-in. Shaft speed is 72 rpm at 60 Hz, 60 rpm at 50 Hz. **AC gearmotor models** offer torque ratings to 5000 oz-in and shaft speeds as low as 0.72 rpm at 60 Hz. All are designed for quick-connect, plug-in connection with optional mating connectors having 36 in. minimum length leads.

Write or call for complete information.

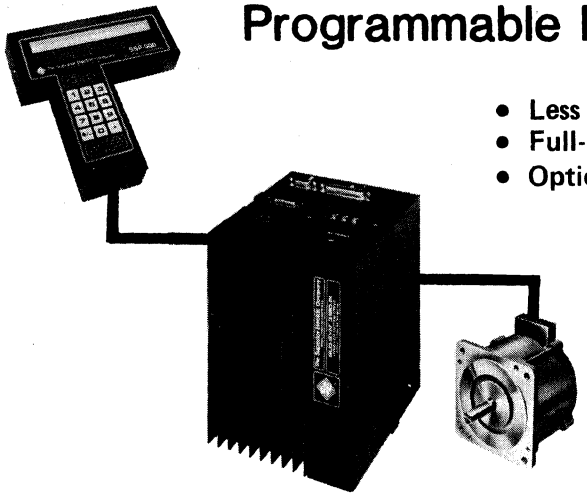
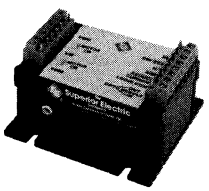
SLO-SYN® Micro Series Step Motor Drives & Programmable Motion Controls

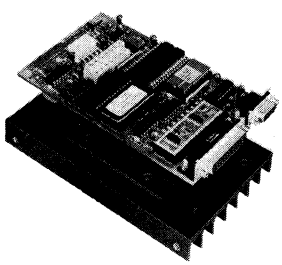


- Less than 1/8 the size of conventional controllers
- Full- or half-stepping plus microstepping in the 3180 Series
- Optional switch interface panels or hand-held programmers
- Full- or half-stepping in the 230 and 430 Series
- Standard pulse and direction interface
- Pulses may be either sourcing or sinking
- Optically isolated inputs protect against noise
- Optional heat sinks for heat dissipation
- Greater performance, increased flexibility

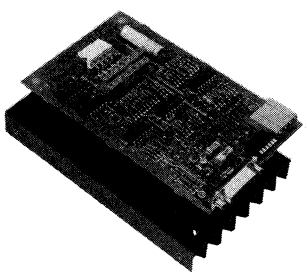
3180 Series Packaged Translators and Indexers — Provide maximum power to SLO-SYN® DC Stepping Motors. Translators have unique, proprietary current control method that improves speed/torque characteristics of many motors. Outperforms existing drives for microstepping, full- or half-stepping. Available with optional oscillator/pulse generator for manual control. Oscillator can be used as a digital pulse source for speed control, manual set-up or final positioning. Indexers are capable of full- or half-step, 1/10 or 1/125 microstep. Store up to 400 lines of program using industry standard motion language (RS274). May be programmed or edited through parallel switch panel ports or RS232 serial ports. Have 2 programmable inputs and outputs, overtravel limit switches and integral power supply.



Drive Modules — Optically isolated 20kHz chopper drives available in 2A and 3.5A per phase, 30VDC types. Can be operated at less than rated current. Use alone or as integral component on a PC board. Also available with heat sinks to dissipate heat and maintain drive integrity or packaged with power supply.

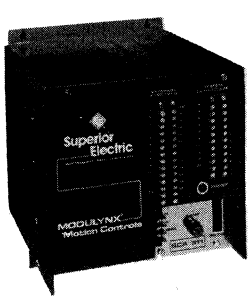


Programmable Indexer/ Drive Modules — Operate applications from single repetitive index to 400 lines. Up to 99 units can be daisy chained. Use industry standard motion language (RS274). Have 2 programmable inputs and outputs, overtravel limit switches. Programmed, edited and manipulated through parallel switch port or RS232 serial port. Also packaged with power supply.

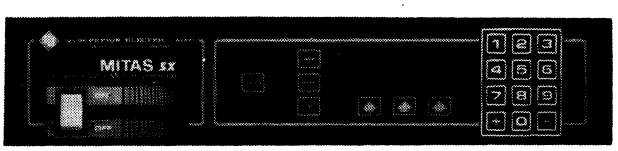


Oscillator/Pulse Generator Drive Modules — Oscillators serve as an alternate pulse source for manual setup and final positioning or as multiple range variable or constant speed drives. Can be remotely operated. All signal inputs optically isolated for maximum protection; have integral heat sinks. Also available as fully enclosed packaged units with integral power supply. Easy connections.

MODULYNX® & MITAS® Motion Controls



MODULYNX® Motion Controls — Permit user to select the appropriate circuit cards suited to individual needs. Up to 6 axes can be operated from each controller with up to 3.5HP available power. Controllers permit SLO-SYN DC Stepping Motors to be run at speeds to 20,000 steps/second with minimum power input. User selectable TTL levels and types of interface needed from RC232C or IEEE488 to simple switches.



MITAS® Programmable Motion Controllers — Available in packaged single- or two-axis systems. Controllers can be operated from the front panel, a remote device or from an RS232 terminal. Units with or without drives are also available housed in enclosures that comply with NEMA 12 specifications for use in industrial environments. Single-axis systems have nonvolatile memory for storage of multiple programmed operations. User controls speed, move distance and acceleration/deceleration rates. Two-axis systems are capable of up to 3.5HP. Controllers have nonvolatile memory that permits programming in feet, inches, meters and degrees and allow storage of multiple programs.

MINIGLOSSARY OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

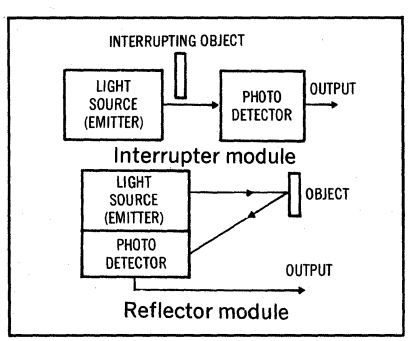
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

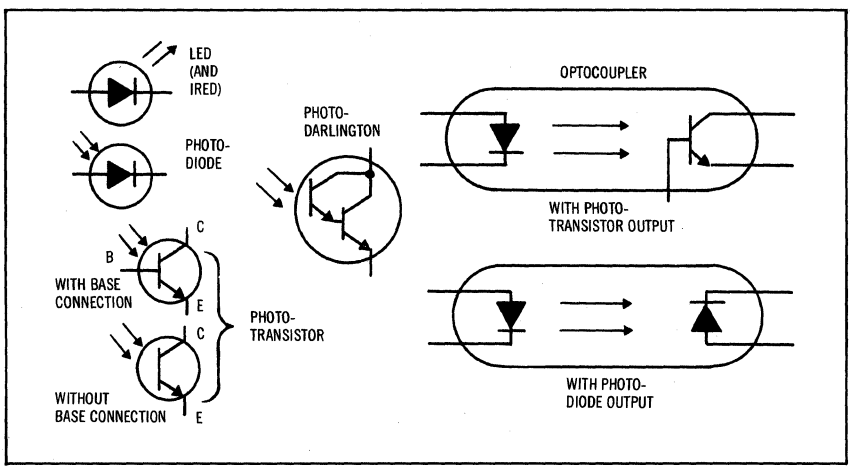
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

SUPER VEXTA®

A NEW GENERATION OF HIGH PERFORMANCE EASY-TO-USE MOTION CONTROL PRODUCTS

UMD STEP MOTOR DRIVER PACKAGE SERIES

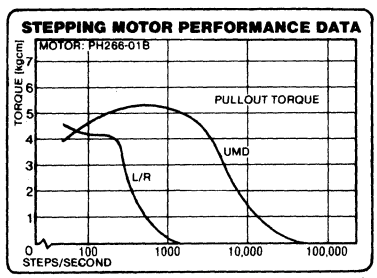
UMD ⟶ Unit=Motor+Driver

Each of the UMD motor/drivers includes a self-contained compact chopper driver and precision stepping motor integrated into one convenient high performance package. The UMD driver is a stepping motor translator, driver and power supply all-in-one, which has been factory adjusted to match the motor included in the package. This all-in-one design and factory motor driver matching makes installation and hook up a snap.

FEATURES:

- Highly efficient chopper driver maintains high torque at high speeds
- UMD Motor/Driver packages come in Holding torques from 25 to 300 ozin.
- User-friendly driver is factory pre-adjusted to match the motor included in the package for fast and easy set up.
- Compact high-tech design uses custom ICs and MOSFET technology for high power from a small package.

Excellent High Speed Performance!



AVAILABLE UMD MOTOR/DRIVER PACKAGES

Model Number		Step Angle	Holding Torque	
Single Shaft	Double Shaft	deg.	oz-in	N-cm
UMD264-01	**UMD264-01B**	1.8	40.3	28.4

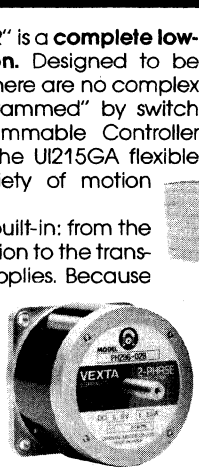
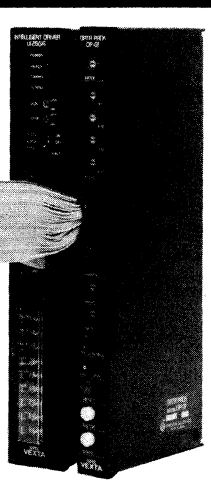
UMD299H-AA	**UMD299H-AA**		300	212

INTELLIGENT DRIVER-UI215GA

The **UI215GA** "INTELLIGENT DRIVER" is a **complete low-cost single-axis motion solution.** Designed to be easy-to-hook up – easy-to-use, there are no complex languages to learn. It is "programmed" by switch closures, which means Programmable Controller compatibility, and yet makes the UI215GA flexible enough to meet a wide variety of motion control applications.

The UI215GA has everything built-in: from the microprocessor for pulse generation to the translator and motor/logic power supplies. Because everything is contained in a single package, the UI215GA and DP-01 can be out of the box and **up and running in minutes.**





The DP-01 Data Pack converts the UI215GA into a preset-indexer, repeating the same movement with each "start" signal. The "start" signals can be issued by a PLC or a switch, or the UI215GA/DP-01 pair can be used as a stand-alone unit.

The UI215GA is probably the best price/performance single-axis motion solution available. It is available from your local member of our nation-wide network of stocking SUPER VEXTA distributors. And best of all, it's backed by Oriental Motor's award winning quality and century of manufacturing experience.

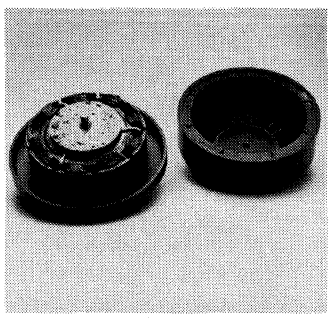
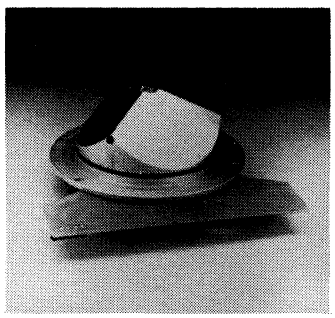
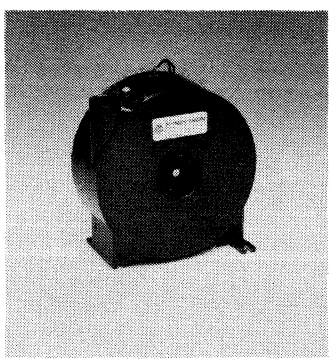
Variable-Speed Brushless Motors and Drives



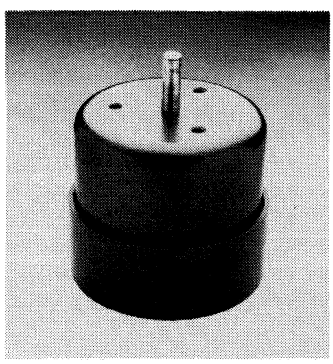
P/N 501009



P/N 501010



P/N 501011



P/N 501012

Synektron variable-speed, brushless motors and drives save valuable space and reduce noise while increasing reliability and performance over brush motors. The control electronics are inside the motor package.

A variety of control schemes are available to optimize speed/torque requirements for various applications. Synektron motors feature outer-rotating rotors. This provides a positive means of magnet retention and increases flexibility in motor design and packaging.

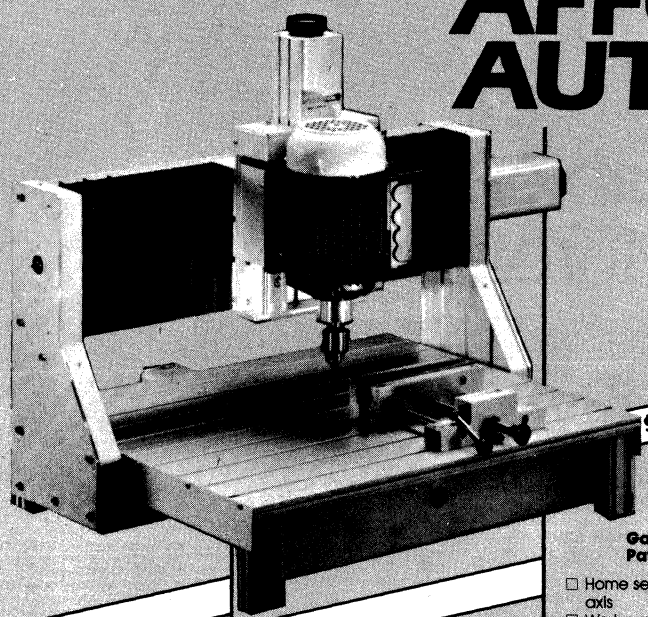
AFFORDABLE AUTOMATION



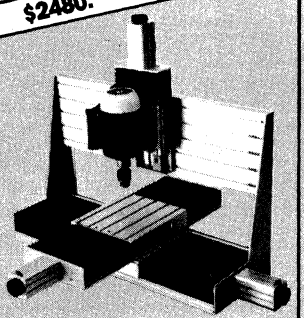
Call for your ***FREE*** *64 page Techno catalog (TI-830)* ***516-328-3970***

$2230.

Gantry Type XYZ Table with Patented Linear Bearings

- ☐ Home sensing switches on each axis
- ☐ Work surface with "T" slots
- ☐ Stepper motor and ball screw drives

$2480.



X/Y Tables with Bridge Mounted Z Axis and Patented Linear Bearings

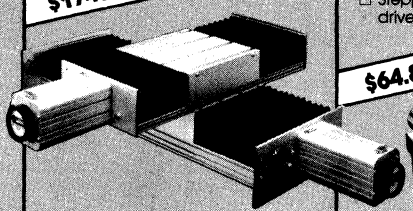
- ☐ Home sensing switches on each axis
- ☐ Work surface with "T" slots
- ☐ Stepper motor and ball screw drives

$2800.

Modular Automation Controller

- ☐ Control up to 16 motors
  8 axes full/half step
  8 axes microstep
- ☐ 8 axes linear interpolation
- ☐ 4 axes circular interpolation
- ☐ Up to 56 outputs and 32 inputs
- ☐ RS232 communication port for complete integration of 256 controllers

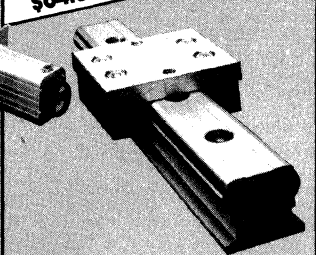
$1748.



Precision X/Y Table with Patented Linear Bearings

- ☐ Home sensing switches on each axis
- ☐ Work surface with "T" slots
- ☐ Stepper motor and ball screw drives

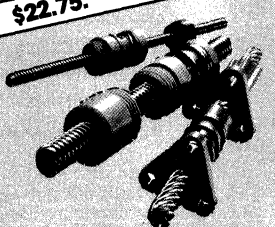
$64.80



Double Rail Linear Slides

- ☐ Patented design with unique proprietary features
- ☐ Available in standard lengths up to 56 inches
- ☐ Recirculating ball bearing unit available as single unit
- ☐ Bearing blocks with adjustable clearance also available

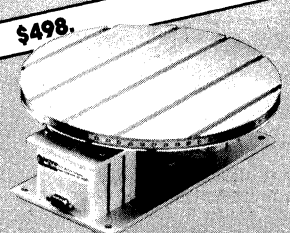
$22.75.



Lead Screw Drive Components

- ☐ Stainless acme screws
- ☐ Self-lubricating SUPERNUTS™
- ☐ Spring loaded anti-backlash nuts
- ☐ Metric ball screws and nuts

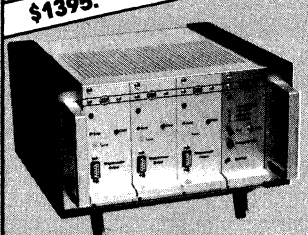
$498.



Rotary Table

- ☐ Stepper motor driven with 1:4 timing belt drive ratio
- ☐ Up to 13.5 minutes of arc accuracy per pulse
- ☐ 9.45" dia. top plate with "T" slots

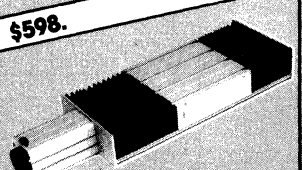
$1395.



Three Axes Controller with Computer Interface

- ☐ RS232C serial interface, 9600 baud transmission
- ☐ Two axes linear interpolation
- ☐ Optional battery back-up
- ☐ Full and half step drive max. 10,000 steps/sec.
- ☐ Bi - polar stepper motor output 40V, max. 2.0A per phase

$598.



Single Axis Table with Patented Linear Bearings

- ☐ Home sensing switch installed
- ☐ Work surface with "T" slots
- ☐ Stepper motor and ball screw drive

Prices shown are typical within each product group. Pleated protective covers optional. Repeatability for all tables is .0004". Accuracy is .0003" per inch.

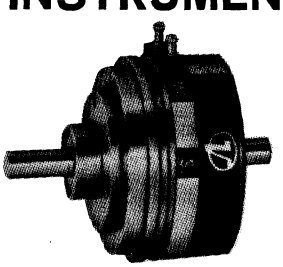
CLUTCHES AND BRAKES

PRECISION INSTRUMENT



These units are manufactured primarily to satisfy the high standards of Military requirements. Their above-standard quality is further emphasized by a high efficiency-to-size ratio. If precision is the need — then these are the instruments for you.

PERMANENT MAGNET HYSTERESIS CLUTCH

PMC Series

Designed for applications requiring repeatable torque and long life. Units can be utilized to comply with OSHA safety regulations and as a fail-safe device to protect other expensive components. In the 1.5 in. diameter frame size—torque is factory adjustable up to 8.5 oz. in. and can be held within 10% max., from unit to unit in speeds up to 10,000 R.P.M. Repeatability of torque level can be maintained within ±1%.

The PMC series will operate over a temperature range of −65°F to 260°F.

FAIL SAFE BRAKES (SBF SERIES)

DESIGN FEATURES

- ☐ Braking action occurs when coil is de-energized, or power fails.
- ☐ Unit is adjustable to compensate for wear.
- ☐ Zero backlash armature with spring release.
- ☐ Clamp-Lock hub for positive retention.
- ☐ Stationary field coil — no slip rings or brushes.
- ☐ Fast response time.

Vernitron Controls is a leading supplier of Mil-Spec synchros and resolvers, and is a primary source for the more sophisticated, ultra-high-accuracy single, dual and multi-speed pancake-type componentry consistent with today's state of the art.

Vernitron Controls operates from a modern 60,000 square foot facility located on 4.6 acres in San Diego, California, specifically designed for the manufacture of electromagnetic devices.

Vernitron Controls has supplied products for such programs as Harpoon, TOW/-Cobra, FVS, A-6, Trident, Phalanx, Leopard II, DD963, CG47, and many more. Vernitron Controls' products are also found in many areas of industrial applications, including robotics, automatic machine tools, and computer disk drives.

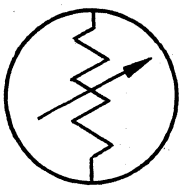
OPTOELECTRONIC DEVICES
CLAIREX MAKES THEM ALL!

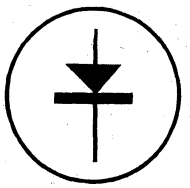
PHOTOCONDUCTIVE CELLS

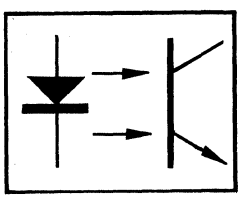
Clairex offers a complete line of cells with spectral response in the visible and near infrared ranges. Units are available in a variety of sizes, in plastic, metal or glass packages with varying resistance and voltage combinations.



PHOTODIODES

A series of silicon planar photodiodes that may be operated in either the diode or voltaic mode as well as a series of monolithic integrated circuits for use as silicon digital output detectors.



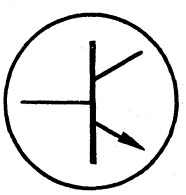


OPTOISOLATORS - OPTOCOUPLERS - PHOTOMODS ®

These three terms are used interchangeably to describe a device that utilizes a high quality, long-life light source with a photodetector in a single, light-tight encapsulated or hermetic package. Variations in output of the light source produce changes in the output of the photodetector. Thus the input and output circuits are isolated from each other electrically. Clairex offers a line of standard units with a variety of electrical characteristics in a variety of packages, as well as engineering assistance to produce custom units.

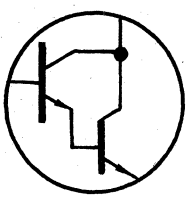
PHOTOTRANSISTORS

Clairex manufacturers several generic series of phototransistors in plastic and hermetically sealed packages that can be produced with or without lenses. In addition, custom units can be produced to meet your specific requirements.



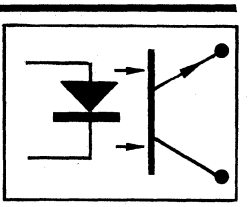
PHOTODARLINGTONS

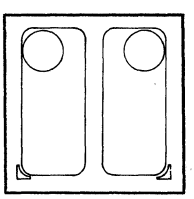
Standard and custom photodarlingtons are also available in the same variety of packages as transistors.



OPTICAL INTERRUPTERS

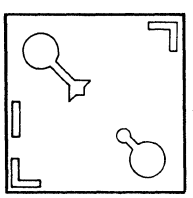
Optical interrupters are similar to optoisolators in that they contain a photodetector and a light source with an air gap between the two so that a light beam can be interrupted by a mechanical device. Clairex offers a wide variety of packages, mountings, and configurations with a variety of electrical characteristics in each package. Custom units available too.





OPTO ARRAYS

Clairex welcomes inquires for custom designed arrays of emitter and sensor chips. We supply arrays positioned in precise patterns or multiple chip patterns designed with close and precise spacing and with multiple lead headers, ceramic or PC board substrate or with molded boards and housings.



OPTO CHIPS

Clairex offers a broad range of standard designs of photovoltaic, photodoide phototransistor, and photodarlington chips. Custom chip design capabilities also exist. All chips have gold backing suitable for either eutectic or conductive epoxy ohmic die attachment.

LIGHT EMITTING DIODES

Clairex supplies a series of LED's that are designed for a variety of optoelectronic applications. Some units are designed to emit light in the visible red spectrum, some at 800 nanometers and others at 940 nanometers. Selection of the proper unit depends upon the application.

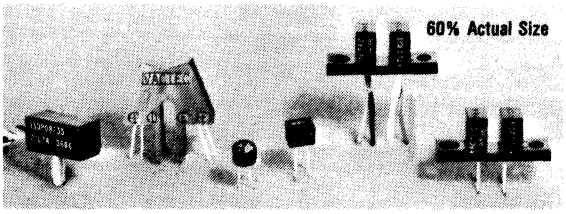
EG&G VACTEC

INDUSTRY'S BROADEST OPTOELECTRONIC LINE

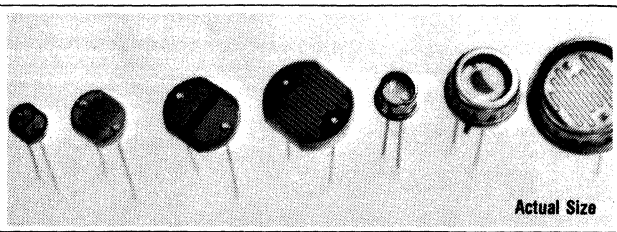
RETROREFLECTIVE & INTERRUPTER SWITCHES (SLOTTED)

Standard and custom optical switches—infrared GaAs LED and silicon phototransistor interrupters available in sealed housing of I-R transmitting plastic or opaque plastic with open apertures. Three retro styles: arrow, TO-18, and cubic.



PHOTOCONDUCTIVE CELLS

Vactec light dependent resistors (LDR's) are available in three hermetic enclosures (TO-18, TO-5, TO-8) and 4 ceramic types. Ceramic types have automatically inserted wires which insure perfect contact integrity. Six materials of CdS, CdSe and CdSeS-CdS mixtures with spectral response peaks from 565-735 nm. Each material has a variety of sensitivities to satisfy all requirements.

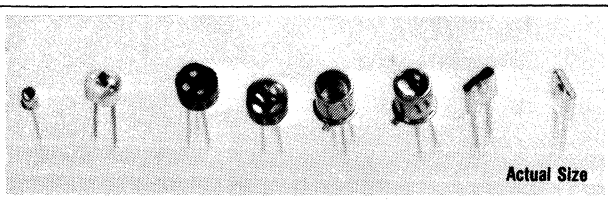


SILICON PHOTOVOLTAIC CELLS

Three processes: BLUE ENHANCED, LOW CAPACITANCE, STANDARD SOLAR. All available in a variety of hermetic, ceramic, as chips, or with flying leads. The BLUE ENHANCED cells are unique large area detectors with high U-V sensitivity to as low as 200 nm. Almost non-existent U-V enhancement effect with stability equivalent to high quality photodiodes. LOW CAPACITANCE cells have fast response less than 15μS with 10KΩ load. The high shunt impedance is desirable for driving amplifiers. SOLAR cells have high V_{oc} at low illumination (typ 200mV at .05mW/cm²). Linear over wide illumination range.

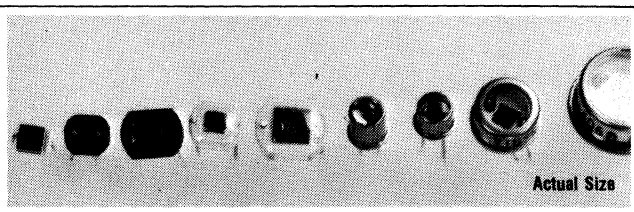
PHOTOTRANSISTORS — LED'S — PHOTODARLINGTONS — LIGHT ACTIVATED SWITCHES (LAS)

Phototransistors and photodarlingtons are NPN passivated—4 chip sizes of 25, 40, 50, and 60, mil square in TO-18, ceramic, coaxial, and lateral (side looking) packages. High light current at very low drive current ideal for instrumentation applications. GaAs I-R LED's with excellent stability in TO-18, T-1, T-1¾, lateral packages. LAS (light activated switches) have high sensitivity with Schmitt Trigger output. New—high power GaAlAs I-R LED's in TO-18, T-1, T-1¾ packages.



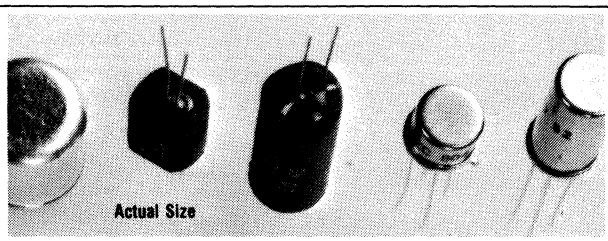
PHOTODIODES

BLUE ENHANCED photodiodes are extremely low dark current devices with excellent response in the U-V. Less than 10pA (I_D) for small chips. Large area diodes (VTB5051) 14.8mm² active area with 1.2A/(W/cm²) at 365nm and I_D of 250pA max. FAST photodiodes have low capacitance. Use with reverse bias for fast response time and excellent linearity. Ideal for remote I-R sensor digital controls.



VACTROLS

Optical couplers using LED's, neons, or incandescent lamps as the emitter and Vactec photoconductive cells (LDR's) as the detector. For noiseless switching and signal monitors for audio. Neon types to sense telephone ring. LED types for triac gate control. Incandescent types for low cost true RMS sensor as voltage regulator or control of constant wattage heater. Five package types include 2 hermetic.



SELENIUM PHOTOVOLTAIC CELLS

Large area detectors for direct meter drive or in conjunction with amplifier. Spectral response peaks at 575 nm and is close to visible response. Available with integral #102 filter to match standard observer curve (CIE). Available in many flat or round cells with or without leads—also in 9 package styles including 2 hermetic.

HEI has been designing and building optical switches and assemblies to the strictest industrial and military standards for 20 years. Today HEI produces standard optical switches in seventeen basic configurations with over 100 variations, including direct replacement parts for most industry standard switches.
The company is also a leader in designing and building custom optical switches for special application requirements. Compact, accurate and dependable HEI optical switches are suitable for any optical switching application.

OPTICAL SWITCH APPLICATIONS

- Optical Encoding
- Limit Switching
- Paper Tape Readers
- Paper Passage Detector
- Rotational Speed Monitoring
- Counter Circuits
- Flow Metering
- Precision Position Detection
- End-of-Tape Detection

OPTICAL SWITCH FEATURES

- Over 100 packaging and electrical variations
- TTL, DTL, CMOS and Analog Outputs
- Pin or Wire Leads (12-in. standard)
- Variety of Gap Sizes
- Special Aperture Designs

CUSTOM OPTICAL SWITCHES

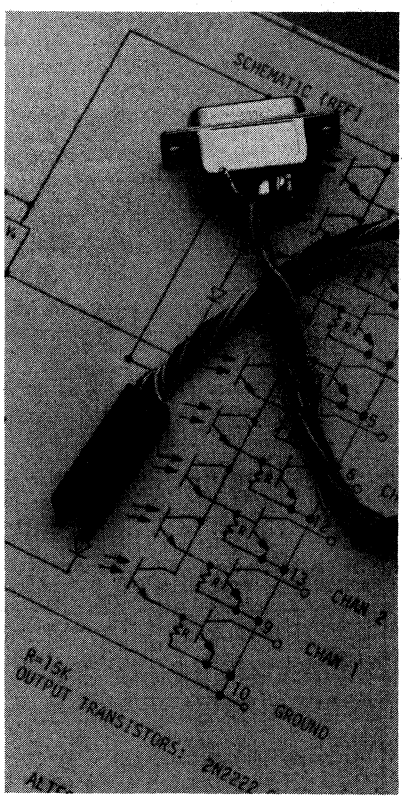
HEI also offers complete custom design and build services. From prototype to final production, HEI engineers assist customers in development of reliable and economical designs. The HEI custom optical switch process offers design options to customers in four categories. HEI engineers assist in setting specifications, and then develop prototypes for application testing.

Mechanical—
selection of housing size and format, mounting detail

Electrical—
signal characteristics, input/output requirements

Optical—
number of channels, light frequency, aperture size, sensor distance

Interface—
lead length-pin, wire or connector



HEI CUSTOM APPLICATION EXPERIENCE

- Photo Arrays
- Vertical Format Readers
- Optical Encoders
- End-of-Tape Sensors
- Ribbon Edge Sensors
- Card and Tape Readers
- Drip Sensors
- Precision Position Sensing
- Indexing
- Linear Measurement

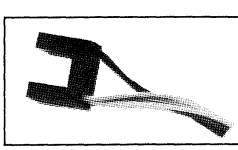
THE HEI QUALITY COMMITMENT

HEI has instituted a statistical process manufacturing control system to insure that each component meets performance specifications dependably and consistently. The company performs 100-percent electrical inspection of every device before shipment. As a result of these quality assurance processes HEI has been qualified as a dock-to-stock supplier by a number of original equipment manufacturers.



* 12-inch 28-AWG wires custom lengths available

N1 Schmitt trigger typical switch threshold ($I_{F(ied)}$) mA
N2 Schmitt trigger quiescent current = 1.2mA TYP.
N3 10710 was used as the light source $I_F = 35mA$ $V_{CE} = 5V$

FIBER OPTIC PHOTOELECTRIC SENSOR CABLES

New line of fiber optic sensor cables allow photoelectric sensing in confined areas where space prohibits conventional emitters and detectors. Electrical isolation is provided for access into explosive or wet environments. Fiber optic sensor cables are compatible to standard PC board active device mounts and bulkhead receptacles allowing all electronic components to be mounted on the PC board. Proximity type sensors combine emitter and detector into a homogenous .032″ or .062″ active diameter.

Specifications:
Transmission: 600 to 700 dB/Km
Numerical Aperture: 0.56NA
Acceptance Angle: 68°
Operating Temperature: -40°F to +225°F
Outside Diameter of Cable: .125″
Minimum Bend Radius: .25″

Photo Transistors

NEC Part Number	Max. P_C (mW)	Max. I_C (mA)	Max. V_{CEO} (V)	I_{CEO} (nA)	V_{CE}(sat) (V)	I_L* (mA)
PH101	100	50	20	500	1.5	4
PH102	100	40	30	200	0.3	.050
PH103	100	50	30	400	1.5	2
PH104	100	40	30	100	0.3	.020
PH106	100	40	30	100	0.3	.060
PH108	100	40	30	100	0.3 (I_C=0.5 ma) (H=5.0 mW/cm²)	0.3 (V_{CE}=5V) (H=0.5 mW/cm²)

Note: I_{CEO} tested at V_{CE} = 10V — L = 0.
V_{CE}(sat) tested at L = 1000ix.
I_L tested at V_{CE} = 2V — L = 100ix.
*Minimum Value

Photo Interrupters

NEC Part Number	Max. I_F (mA)	Max. V_{CEO} (V)	Max. I_C (mA)	V_F (V)	I_{CEO} (nA)	V_{CE}(sat) (V)	CTR (%)
PS4001	50	30	50	1.1	400	1.2	20
PS4003	50	30	50	1.1	400	1.2	15
PS4005	50	30	50	1.1	400	1.2	20
PS4007	50	30	50	1.1	400	1.2	20
PS4008	50	30	40	1.1	100	0.3	0.5
PS4009	50	30	50	1.1	400	1.2	20
PS4010	50	30	50	1.1	400	1.2	20
PS4011	50	30	50	1.1	400	1.2	20
PS4014	50	30	40	1.1	100	0.3	0.5

Note: V_F tested at I_F = 20 mA, except PC6001A I_F = 30 mA.
I_{CEO} tested at V_{CE} = 10V and I_F = 0.
V_{CE}(sat) tested at I_F = 10 mA — I_C = 0.5 mA.
CTR tested at I_F = 10 mA — V_{CE} = 2V.
PS4008 V_{CE} (sat) tested at I_F = 10 mA — I_C = 50 μA.

Photo Diodes

NEC Part Number	Max. V_R (V)	Max. P_C (mW)	Max. I_F (mA)	Sensitivity (nA)/lx	I_D* (pA)	t_r (nS)
PH302	32	150	N/A	50	30	50
PH302B	32	150	N/A	32	30	50
PH309	20	150	N/A	50	30	30

Note: t_r tested at R_L = 1 KΩ.
I_D tested at V_R = 10V
Sensitivity in units of nA/lx
Wavelength of maximum sensitivity is 940 nm.

SHARP® Optoelectronics

Photocouplers

Photocouplers

Features

Various output methods:
- Single phototransistor
- Darlington phototransistor
- OPIC*
- Bidirectional output transistor
- Phototriac
- Photothyristor

Various package formats:
- Standard dual-in-line package
- Flat package
- Mini-flat package
- Dual-in-line package for long creepage distance

Wide line-up of products approved by overseas safety standards: UL, VDE, TÜV, BS, SEMKO, DEMKO, EI
High isolation voltage: PC100/PC700/PC800 series, etc.

Classification chart

Photocouplers
- PC100 series — VDE approved (long creepage distance type)
- PC200 series — Mini-flat package type
- PC300 series — Opaque mini-flat package type
- PC700 series — DIP 6-pin, Viso:5kVrms
- PC800 series — Opaque 4-pin x N (N = 1,2,3,4), Viso: 5kVrms
- PC900 series — OPIC*
- PC4N series — Standard 4N series
- 6N series — Standard 6N series (OPIC*)

Phototriac couplers

Photothyristor couplers

*OPIC is a registered trademark of Sharp and stands for Optical IC. It has a light detecting element and peripheral circuits integrated onto one chip
**In PC4N series, PC700 series, and PC800 series, the flat package products are also available in a wide variety.

SHARP Optoelectronics

Photointerrupters

Photointerrupters

Features

- Various output methods
  - Single phototransistor
  - Darlington phototransistor
  - OPIC
    - Single-phase digital output
    - Two-phase digital output (transmissive type)
- Various mounting methods
  - Snap-in mounting type
  - PWB mounting type
  - Both-side mounting type
  - Either-side mounting type (transmissive type)
  - Side-mounting type (transmissive type)
- Transmissive type — Line-up of products with a detecting accuracy of slit width ranging from 0.15 to 2.5mm.
- Reflective type — Line-up of products with detecting distance ranging from 1 to 7mm (optimum).
- Transmissive type — Line-up of products having an object passing width ranging from the light emitter and detector gap of 0.9 to 13.2mm.

Versions with cover case, 3-pin connector terminal, and super-compact products are available to meet a variety of customer needs.

High Performance Automatic White Balance Module

(Vcc = 5V, Ta = 25°C, R_L = 1000kΩ)

Model No.	Absolute maximum ratings			Electrical characteristics			
				Output voltage (1)	Output voltage(2)		Dissipation current
	Vcc (V)	I_O(R,G,B) (mA)	Topr (°C)	V_O(R,G,B) (V) TYP.	ΔV(B−G) (mV) TYP.	ΔV(G−R) (mV) TYP.	Icc (mA) MAX.
GP1W03	0 ~ +7	−0.5 ~ +0.15	−10 ~ +50	1.65	100	150	6

*1 Vo can be set at the rating value by adjusting VR1 and VR2 under the light source with color temperatures of Tc = 3,200K and Tc = 6,750K, respectively.
*2 Characteristics with VR1, and VR2 adjusted to the condition noted in *1
*3 Absolute output voltage fluctuating according to the load resistance against the output voltage when R_L = 5kΩ (pull down).
*4 When the value of Tc is changed from 2,856K (1,000 lx) to 6,750k (1,000 lx)
*5 The time it takes to reach 90% of the output voltage of 6,750K when incident light color temperature changes from Tc = 2,856K to Tc = 6,750K.

SURGE PROTECTORS

Widest Range of Protectors Available Anywhere!

Data Line Protectors
MCG provides a sophisticated blend of high speed (less than 5ns) and brute force protection for the sensitive equipment on your data lines.
Protects:
- RS232
- RS422, 423
- Modems
- 20ma loops
- Video lines
- Twisted pair/coaxial cables

See EEM Pages B-1333-1341.

AC Power Line Protectors
MCG AC Power Line Protectors are heavy-duty, bipolar clamping devices that limit lightning and switching transient spikes to safe levels.
Protects:
- 120VAC to 480VAC
- 5A to 5000A
- 1 Phase, Delta, Wye configurations

See EEM Pages B-1328-1332.

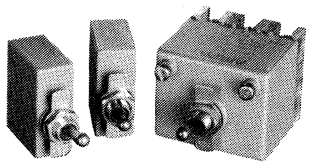
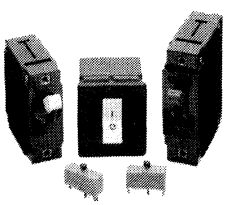
CIRCUIT BREAKERS

Airpax circuit breakers are rated at 50 milliamps to 50 amperes in more than 50 configurations and styles. And we can design one to your exact specifications. Contact Airpax Company, Woods Road, Box 520, Cambridge, MD 21613. (301) 228-4600. Fax (301) 228-8910. Telex 6849138. A division of North American Philips Corporation.



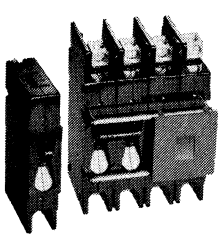
Models AP and UP**

Hermetically sealed. DC, 50/60 Hz or 400 Hz versions. Various delays to meet your needs. UP version has wide glass terminals.
Specifications: 1 to 3 poles. Ratings: 0.05-20A, 240 VAC, 50 VDC. Interrupting capacity: AP MIL 500A @ 120 VAC, 50 VDC; 300A @ 240 VAC. UP 1000A @ 32 VDC, 240 VAC.
Approval: Ⓒ Ⓛ Ⓤ QPL: MIL-C-39019 Lloyds
**(UP, single pole, series only)



Models SNAPAK®, CARDGARD®, IEG and IEL

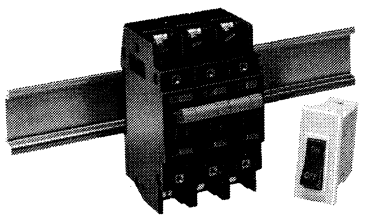
All conform to VDE and IEC spacing requirements. CARDGARD is PC board mountable.
Specifications: SNAPAK: 1 or 2 pole ratings. 7.6 to 15A at 32 VDC/125 VAC, 0.10 to 7.5A at 50 VDC/250 VAC.
2-pole only (2-pole breaking) and ratings: 7.6 to 15A at 125/250 VAC, 32/50 VDC. Interrupting capacity: 1000A at 125 VAC, 250 VAC, 32 VDC and 65 VDC.
Approval: IEC Ⓒ Ⓤ VDE* Ⓛ Ⓢ Lloyds
CARDGARD: 1 pole. Ratings: 1.0-6.0A, 32 VDC, 250 VAC. Interrupting capacity: 10 times rated current, at rated voltage.
Approval: Ⓤ Ⓒ
IEG and IEL Ratings: 0.05-30A, 277 VAC, 65 VDC (Model IEG). 0.05-50A, 277 VAC, 65 VDC (Model IEL). Interrupting capacity: 3500A, 277 VAC max., 2000A, 65 VDC (Model IEG). 5000A, 277 VAC max., 2000A, 65 VDC (Model IEL).
Approval: Ⓒ Ⓛ Ⓤ VDE*



Model 209

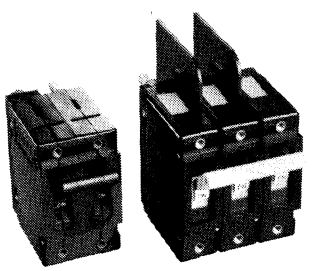
Ideal for branch circuits. Mounts in switch boards, panel enclosures, panel boards, junction boxes. Series includes 219 manual motor controller, 229 appliance controller, 249, 259 and 269 marine power selectors.
Specifications: 1 to 6 poles. Ratings: 0.10-100A, 125 VDC; 0.10-77A, 600 VAC; 0.10-100A, 120, 240, 277 and 480 VAC. Interrupting capacity: 5000A.
Approval: Ⓒ Ⓛ Ⓤ Lloyds

*Limited approvals; consult factory.



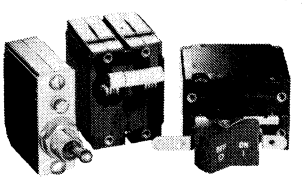
Models 203 and IELHR

203 is a front panel mounting device which combines over-current protection, ON-OFF switching and pilot light. Series, shunt or relay trip.
Specifications: 1 to 3 poles. Ratings: 0.05-10A, 250 VAC, 50 VDC, 10.1-20A, 120 VAC, 32 VDC. Interrupting capacity: 1000A.
Approval: Ⓒ Ⓛ Ⓤ Lloyds
IELHR designed for 35 mm symmetrical DIN rail; quick mounting, easy removal. Handle assembly available in 7 colors.
Specifications: Ratings: 0.05-50A, 65 VDC and 250 VAC. Operating temperature: −40°C to +85°C.



Models APL/UPL and 205

These breakers offer precision operation for critical service. Series, shunt and relay configuration options. Choice of delays, ratings. 205 is dust-sealed for harsh environments.
Specifications: 1 to 9 poles. Model APL/UPL Ratings: 0.05-20A, 277 VAC; 0.05-50A, 250 VAC; 0.05-100A, 65 VDC. Interrupting capacity: 5000A, 120 VAC; 2000A, 65 VDC. Model 205 Ratings: 0.05-20A, 277/480 VAC; 0.05-50A, 250 VAC; 0.05-100A, 32 VDC. Interrupting capacity: 5000A, 277/480 VAC; 5000A, 250 VAC; 2000A, 32 VDC.
Approval: Ⓒ Ⓛ Ⓤ QPL: MIL-C-55629 Lloyds



Models APG/UPG/IPG

Low-cost, precision operation. Multi-pole assemblies, single or multi-handle. For data processing, broadcast equipment, vending machines, controllers, etc.
Specifications: 1 to 4 poles. Ratings: 0.02-30A, 277 VAC, (Model IPG, 250 VAC), 65 VDC, 31-50A, 50 VDC. Interrupting capacity: 1000A, 277 VAC, (Model IPG, 250 VAC), 2000A, 65 VDC, and at 5000A, max. ratings of 30A at 120 VAC, 20A at 250 VAC, 10A at 277 VAC, (Model IPG, 250 VAC).
Approval: Ⓒ Ⓛ Ⓤ QPL: Mil-C-55629 Lloyds Model IPG-VDE*

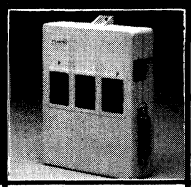
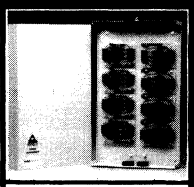
NOW THE BEST TRANSIENT VOLTAGE SUPPRESSION

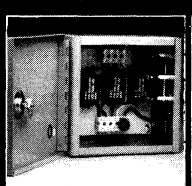
DATA LINE PROTECTORS

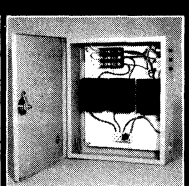


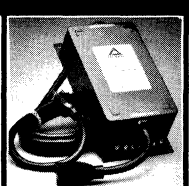


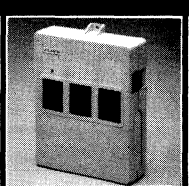
FEATURES	IMC SERIES*	DL SERIES	DLM SERIES
MAX SURGE CURRENT:	Up to 1,000 A per line (6,500 A optional)	Up to 1,000 A per line (6,500 A optional)	Up to 1,000 A per line (6,500 A optional)
RESPONSE TIME:	< 5 nanoseconds	< 5 nanoseconds	< 1 nanosecond
HOLD OVER CURRENT:	None	None	None
NUMBER OF WIRES PROTECTED:	4 (shield optional)	Up to 8	Up to four lines and shield per card. 8 or 24 card enclosures available.
APPLICATION:	Transient voltage protection for three AC power devices and one data communication interface. Several connector types available. *For AC features see IM Series below.	Transient protection for Standard RS-232 and RS-422 data lines. The DL Service connects directly in line for Data Com interface protection.	Transient voltage protection for a variety of data line types. Dense mounting enclosure for individual or trunk data lines.

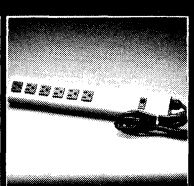
POWER LINE PROTECTORS











FEATURES	MB SERIES	MB-HPB SERIES	RB SERIES	IM SERIES	ST SERIES
MAX SURGE CURRENT:	65,000 A	1,000 A	Up to 25,000 A	5,000 A	5,000 A
RESPONSE TIME:	50 nanoseconds	< 1 nanosecond	< 1 nanosecond	< 1 nanosecond	< 1 nanosecond
FAIL SAFE MODE:	Short	Short	Short	Short	Short
FAILURE INDICATOR:	Yes	Yes	Yes	Yes	Yes
HOLD OVER CURRENT:	None	None	None	None	None
APPLICATION:	Placed at the service entrance, the MB Series protects against incoming transient voltages. Conforms to new UL1449 Standard, effective 7/2/87.	Used in conjunction with the MB Series, the MB-HPB Series provides transient voltage protection for secondary panels. Conforms to new UL1449 Standard, effective 7/2/87. When used in conjunction with MB Series.	Plug in transient voltage suppressor for computer systems, large or small, and any solid-state equipment. Conforms to new UL1449 Standard effective 7/2/87.	Transient voltage protection for up to three separate units, including terminals, PC's, printers and Data Com equipment. Conforms to new UL1449 Standard, effective 7/2/87.	Transient voltage protection for up to six separate units, including terminals, PC's, printers and Data Com equipment. Conforms to new UL1449 Standard, effective 7/2/87.

All products covered by Seven Year Limited Warranty.

ATLEE COMPONENT HOLDERS

Atlee component clips are made of spring steel and beryllium copper because they afford the most generally desirable combination of properties. Specific selection of material will depend on conditions of the application. In addition clips can be manufactured to your specification for a variety of uses. Please contact the factory with your questions and special requirements.

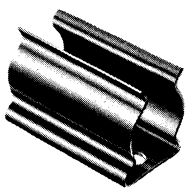
Atlee offers a complete line of MS and NAS component clips.

M24066 **M17160**

MS28136 **MS28137** **NAS1464**

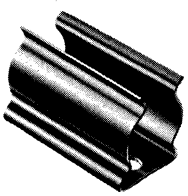
FEATURES

- The design of our component holders, from raw material through the finished product, ensures maximum performance and reliability under extreme usage, insertion, withdrawal force, and shock and vibration.
- Holding power increases as shock and vibration increase, measured by force required to remove component.
- Special contour design acquires closer set to component during shock and vibration, increasing security without localized pressure.
- Slotted design assures firm retention for fragile components without risk of injury.
- As an indication of the spring characteristics of Atlee's component holders, all of which are heat treated after forming, the following data is supplied; beryllium copper will withstand over 500 and spring steel 100 insertion-withdrawals of a slug 1/32" larger than nominal diameter, without metal fatigue.



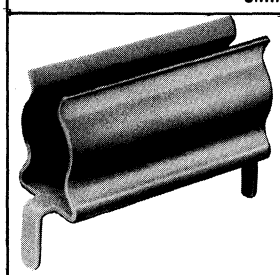
Beryllium Copper, QQ-C-533a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-U-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



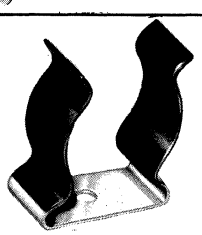
Spring Steel, QQ-S-777a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



Tab Mounted Clips

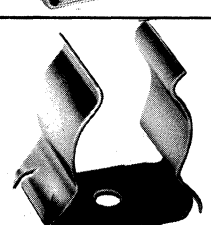
MATERIAL: beryllium copper, QQ-C-533a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors, relays and similar cylindrical components. Fastened to a circuit board by tabs.



Industrial Component Holders

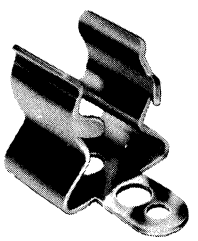
MATERIAL: spring steel S.A.E. 1065, .020 thick.

PLATING: commercial nickel, commercial nickel and vinyl coating
Designed for use in industrial and commercial applications.



No-Twist Clips

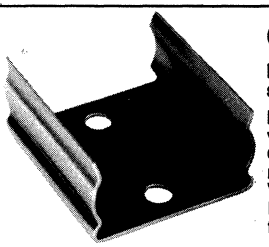
MATERIAL: spring steel, QQ-S-777a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed for holding capacitors and similar cylindrical components, without twisting.



Fuse and Resistor Holders

MATERIAL: phosphor bronze, QQ-B-750; beryllium copper, QQ-C-533a.

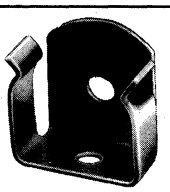
PLATING: silver, QQ-S-365a.
Finishes available silver plate.
Designed to hold fuses and ferrule-type resistors plus reduce heating by providing high contact pressure.



Crystal Clips

MATERIAL: spring steel, QQ-S-777a, spring steel S.A.E. 1065.

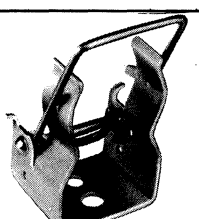
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to provide secure mounting for flattened elliptical components.



Transistor Clips

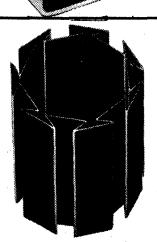
MATERIAL: beryllium copper, QQ-C-533a.

PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold transistors without depending on soldered leads and at the same time act as a heat sink.



Locking Clips

MATERIAL: spring temper phosphor bronze, QQ-B-750.
PLATING: silver, QQ-S-365a; cadmium, QQ-P-416a; nickel, QQ-N-290; Class II, Type VI.
Various finishes available.
Designed to hold a fuse, ferrule-type resistor or similar component against the most severe shock and vibration.



Heat Dissipating Liners

MATERIAL: beryllium copper, .002 thick per QQ-C-533a, heat treated.

FINISH: black matte
Designed to cool many types of components combined with different types of cooling methods.

ATLEE 10 BAYFIELD DRIVE, NORTH ANDOVER BUSINESS PARK, NORTH ANDOVER, MA 01845
(617) 681-1003 • TELEX #928252 • **FAX: (617) 686-2934**

Atlee manufactures a full line of Bus Bars Card Guides and Component Holders. For additional information, please contact the factory.

WHY do 40,000 Buyers and Electronic Engineers Keep Calling

MASTER DISTRIBUTORS

- BECAUSE orders placed by 3:00 p.m. are shipped the same day.
- BECAUSE we have over 8,000,000 relays & switches in stock.
- BECAUSE of our excellent Value-Added Service.
- BECAUSE of our Just-In-Time Program.

*Pigtail (AP)

Listed by Underwriters' Laboratories through 7 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 8AG is designated as a normal blow fuse for use in general circuit protection. Their smaller size permits use where space limitations prevent use of Type 3AG. Pigtail leads (Type 8AP) are available when direct soldering into circuits is desired.

bel BEL FUSE INC. 198 Van Vorst Street/Jersey City, NJ 07302/(201) 432-0463/TWX 710-730-5301/FAX (201) 432-9542

5MF800	8/10	250	5MF7	7	125
			5MF8	8	125

Listed by Underwriters' Laboratory from 50 mA to 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 5MF fuses, described as fast acting are manufactured to meet the requirements of UL 198G and CSA 22.2. They permit European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. **Pigtail leads (5MFP) are available when direct soldering into circuits is desired.**

TYPE 5MT TIME LAG GLASS TUBE FUSE SERIES

ELECTRICAL CHARACTERISTICS

Rating	Blow Time

5MT800	8/10	250	5MT7	7	125

Listed by Underwriters' Laboratories from 50 mA to 5 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 5MT fuses, described as time lag offer additional surge protection for circuits where momentary transients are anticipated. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. **Pigtail leads (5MTP) are available when direct soldering into circuits is desired.**

Approved by SEMKO for 80 mA, 125 mA, and from 250 mA through 6.3A.

Type 5SF fuses, described as quick acting, low breaking capacity, are manufactured to the specifications of IEC 127, CEE 4, Standard Sheet II (Type F). Used throughout Europe, they carry the SEMKO mark in the ratings indicated. They are used for general circuit protection in electrical and electronic equipment where momentary transients are not anticipated. **Pigtail leads (5SFP) are available when direct soldering into circuits is desired.**

Listed by Underwriters' Laboratories from 50mA to 5 amperes and certified by CSA through 5 amperes.

Type 5TT fuses, described as slow blow, are designed to withstand higher surge currents occurring at switching during the normal life of equipment than the 5MT series. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration.

Pigtail leads (5TTP) are available when direct soldering into circuits is required.

MF is UL listed and CSA certified through 7A and MFS is UL recognized and CSA certified through 500 mA.

MF/MFS are subminiature fuses for use in circuits where space requirements are an important factor. They are supplied with kynar sleeve insulation. Their axial construction permits them to be packaged in bulk or taped and reeled. On special orders the MF/MFS fuses can be cut and formed by the factory and supplied as radial lead devices.

CARLINGSWITCH CIRCUIT BREAKERS

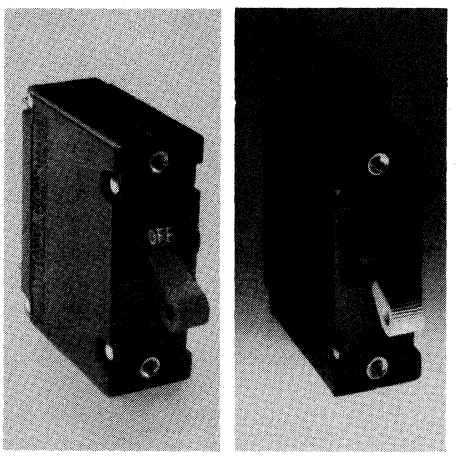
Magnetic Circuit Breakers

Applications: EDP, power supply, power conditioner, instrumentation, office and vending machines, marine and other OEM applications.

"A & B" Series — Toggle

Compact, temperature stable magnetic design for precision operation in both domestic and world market applications. 1–6 poles, .1–50 amps, AC or DC, choice of time delays, terminals and actuator colors.

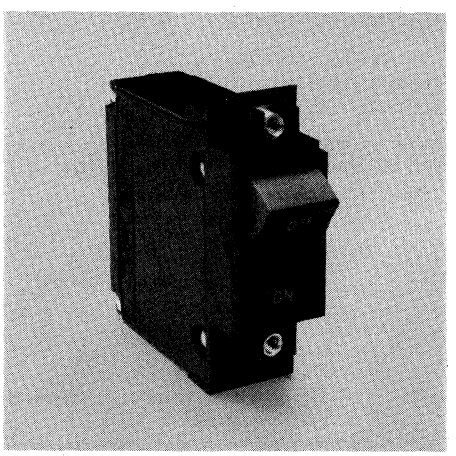
Approvals: UL recognized, CSA certified, VDE certified ("B" Series only).



"A" Series — Rocker

Same specifications as "A" and "B" Series toggle. Where front panel operation and aesthetics demand a clean contemporary design, the unique Visi-Rocker® two-color actuator, an industry first, can be specified to indicate either the "tripped" (off) mode or the "on" mode. One to three pole variations are available.

Approvals: UL recognized, CSA and VDE certified.



"C" Series — Toggle

The "C" Series breaker is designed for those applications requiring higher amperage and higher voltage handling capabilities. World market design available with English or Metric "Stud" terminals. "Saddle Clamp" type screw terminals are also offered. 1–6 poles, .1–70 amps, 65VDC, up to 480 VAC, with a choice of time delays and actuator colors.

Approvals: UL recognized, CSA certified, with other world market approvals pending.

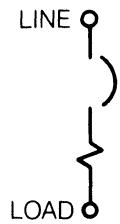
CARLINGSWITCH CIRCUIT BREAKERS

Circuit Options

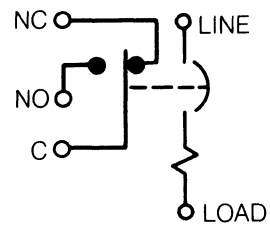
Series Trip

A basic two (2) terminal device usually used as a combination power switch and overload protector. The contacts and current sensing coil are connected in series with the line and load terminals.



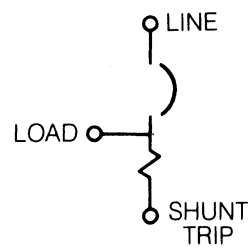
Series Trip with Auxiliary Switch

Same as "Series Trip" except with the addition of a SPDT snap-action switch which is *electrically isolated,* but *mechanically* linked to the movement of the main breaker contacts. Commonly used to remotely signal the status of the breaker (on or off/tripped).



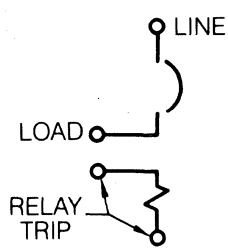
Shunt Trip

A three (3) terminal device similar to a "Series Trip" with the addition of a third terminal between the contacts and coil. This circuit is usually used to control two separate loads from the same power source, while sensing overload current in only one load.



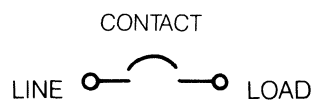
Relay Trip

A four (4) terminal device in which the contact and coil circuits are *electrically isolated* but are still *mechanically* linked to each other. An overload in the coil circuit will cause the contact circuit to open. Both circuits may be of opposite polarity to each other. Commonly used in "dump" circuit or "remote shut down" applications. (Note: World Approval Agencies may require an extra "Series Trip" pole for this function.)



Switch Only

Same as a "Series Trip" device without a sensing coil. Provides low cost, heavy duty switch capability when overload protection is not needed.



Note: The preceding circuits may be mixed on multi-pole units for special application requirements—(consult factory).

CARLINGSWITCH, Inc., 60 Johnson Avenue, Plainville, CT 06062-1156

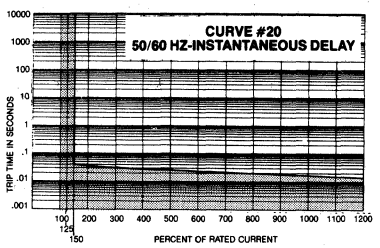
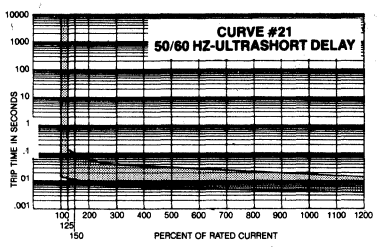
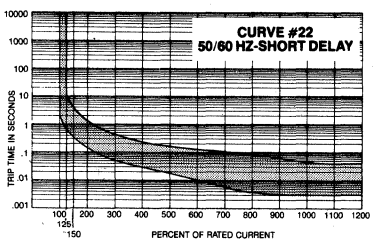
CARLINGSWITCH CIRCUIT BREAKERS

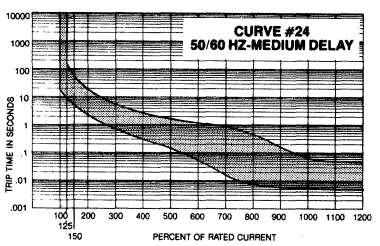
Time Delay Options

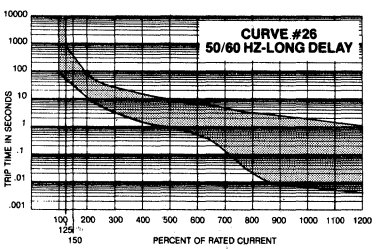
AC



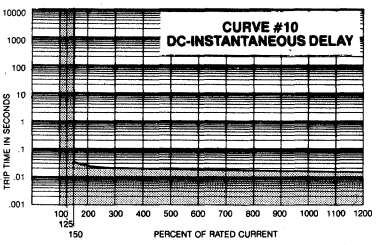


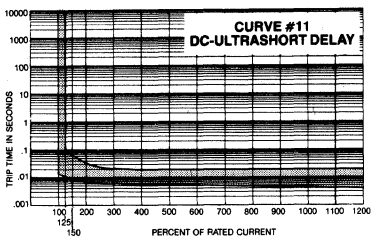


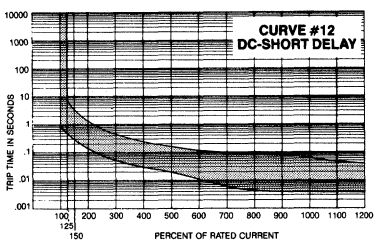


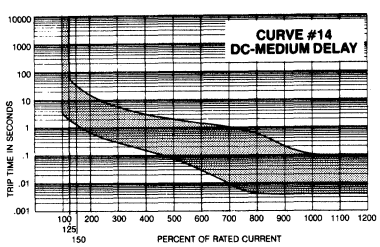


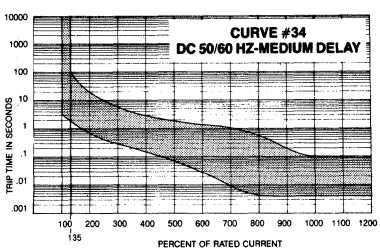
DC











Curve #34 is a combination AC/DC Time Delay Curve.

Notes:

High Inrush Time Delay Curves #42, 44, 46 are also available

Time Delay Curves (#11, 12, 14, 21, 22, 24 & 26):

Breakers must hold 100%, may trip between 101% to 125%, must trip at 125% of rated current and above within time limits shown in curves.

Time Delay Curve (#34):

Breaker must hold 100%, may trip between 101% to 135%, must trip at 135% of rated current and above within time limits shown in curve.

Instantaneous Curves (#10 & 20):

Breakers must hold 100%, may trip between 101% to 150%, must trip at 150% of rated current and above within maximum times shown in curves.

All Curves:

Curve data shown represents breaker response at ambient temperature of 77°F (25°C) with no preloading. Breakers are mounted in standard wall-mount position.

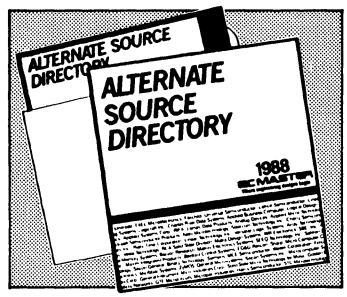
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

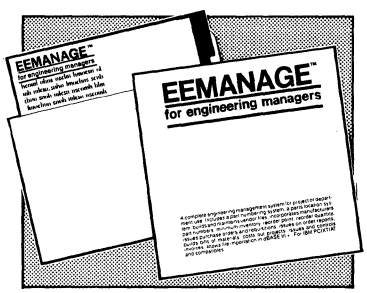
The electronic ASD is FLEXIBLE! You can add ICs and you can add comments.

You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the 1988 Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50 each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

Hearst Business Communications

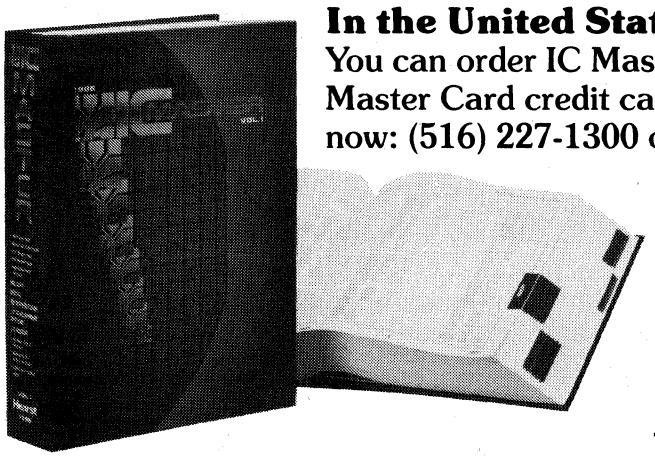
645 Stewart Avenue Garden City, NY 11530 Att: Marie Botta

IC MASTER BELONGS ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below.

IC MASTER is a two-volume set of technical data carefully organized to direct the engineer to the integrated circuits and related products that are closest to his specific needs. It is the surest and fastest way to find the optimum devices to answer an engineering design requirement. By ordering now, you won't have to borrow or search for IC MASTER the next time you need it.

Typical Use of IC MASTER
Can an engineer find out who makes a 256K dynamic RAM with an access time of 120 nanoseconds or faster in less than 30 seconds? He can if he turns to the Memory section of IC MASTER and looks for the 256K organization (words and bits per word) that he needs. Because each device is listed in order of access time, he can easily determine the devices that satisfy his speed requirements.



In the United States only:
You can order IC Master simply by charging it to your VISA or Master Card credit card. To place your order (USA only) call now: (516) 227-1300 or (408) 249-6800.

Or mail your order to

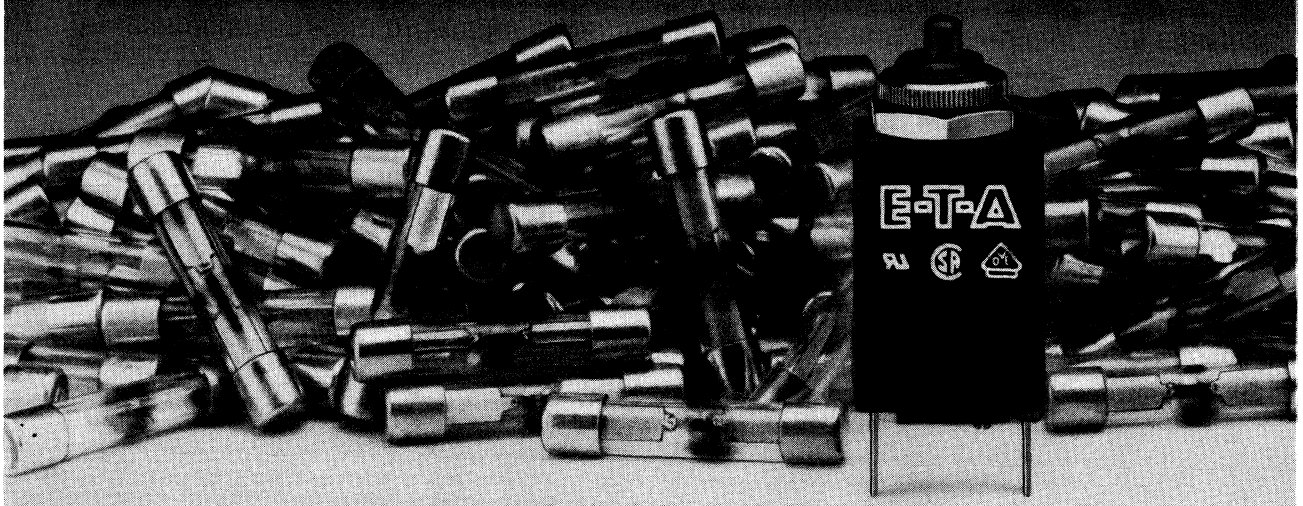
DON'T BLOW IT WITH FUSES

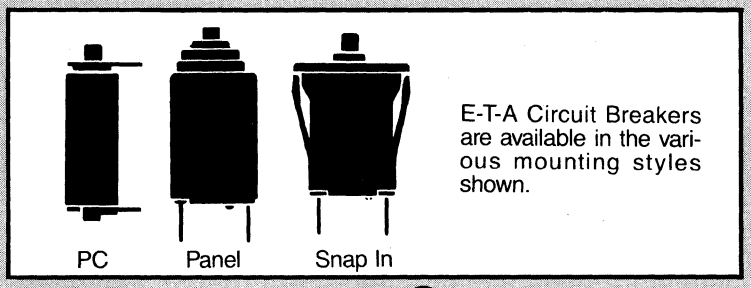


Start with "THE RIGHT STUFF"–

E-T-A CIRCUIT BREAKERS

Blowing a fuse is a small matter but not when it affects your product's performance, causing inconvenience, downtime and replacement costs. E-T-A Circuit Breakers provide dependable protection. These manual reset Circuit Breakers *do eliminate* fuse replacement.

E-T-A has "THE RIGHT STUFF"–it is the same concept as a magnetic circuit breaker. It can handle high inrush currents without nuisance trips. And, it is not shock or vibration sensitive. 100% of E-T-A's Circuit Breakers are calibrated and tested. They not only meet requirements for, but carry VDE and other worldwide approvals.



E-T-A Circuit Breakers are available in the various mounting styles shown.

Ideally suited for a wide variety of applications, E-T-A Circuit Breakers are used in equipment such as Data Processing, Medical Instruments, Communication, Power Supplies, Marine and Automotive.

Get all "THE RIGHT STUFF"–Better Protection, Economical Prices and Dependable Delivery. Call (312) 647-8303 or write.

Commercial & Military Approved Panel Mount Fuseholders

- Superior Clip Design for Solid Fuse Contact
- UL Recognized & C.S.A. Certified
- Most Commercial Models are recognized under the Marine Electrical and Fuel System (PEQZ2) as "Ignition Protected Devices"
- Blown Fuse Indicating & Non-Indicating
- High Impact Plastic for Superior Strength
- Dead-Front, Watertight
- Military Versions Meet MIL-F-19207

Commercial Fuseholders

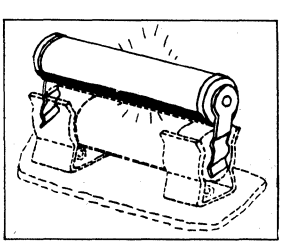
Blown Fuse Indicators

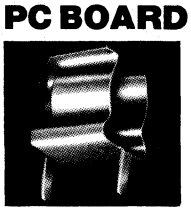
When A Fuse Blows, A Light Glows!®

Several Models To Choose From

- Bolt Down for Rectifier Fuses
- Snap On for Ferrule Fuses
- Top Mounting for Knife Blade Fuses



PC BOARD FUSE CLIPS



Low profile clips (.360" high) are soldered to printed circuit boards eliminating eyeletting or riveting. Available in Spring brass, beryllium copper or spring bronze with various platings.

HEINEMANN® Circuit Breakers First in Features, First in Quality

Heinemann offers the widest choice of styles and current ratings in high-quality, reliable circuit protectors. Ratings range from 0.01A to as high as 700A. Their applications are as diverse as medical equipment, computers, industrial air conditioners, electric locomotives and telecommunications equipment.

Heinemann can also supply circuit breakers that provide auxiliary functions. For example, a heavy-duty relay, an on/off switch and a hydraulic-magnetic circuit breaker, all in one economical and compact unit.

Use this condensed guide to locate the type of circuit breaker that best meets your requirements. Then write or call us for a copy of the appropriate product bulletin containing detailed specifications and ordering information. Or call one of our technical assistance engineers to dicuss your particular application.

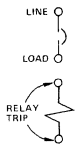
Technical assistance, important features and quality products...three reasons why it pays to look to Heinemann "When your reputation's on the line."

SPECIAL-FUNCTION CIRCUITS

Heinemann circuit breakers (except for PS1, KD, TX and Hector) can be furnished with a number of special-function internal circuits. They permit a single protector to perform the protection and control functions of several components.

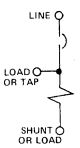
RELAY-TRIP

Permits remote actuation using a separate control circuit. Electrical isolation allows use of a different current or voltage from contact circuit. Both time delay and non-time delay constructions are available.



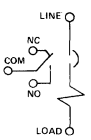
SHUNT/TAP

Use of third terminal permits remote tripping by utilizing line voltage with or without a time delay response. On breakers rated up to 1A, the trip point may be raised by shunting with an external resistor on the shunt/tap terminal.



AUXILIARY SWITCH

Used for logic functions, alarms, lights and other circuits. Miniature snap-action SPDT or DPDT switch is mounted on the back of the breaker, mechanically connected to the switching mechanism. Contact capacity: 10A at 125/250 V, 50/60 Hz; 4A resistive at 30 Vdc; 2.5A inductive at 30 Vdc. Minimum operating voltage 6 Vdc or ac, at 3 VA dc or ac.

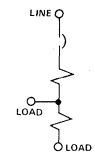


SERIES TRIP (Standard internal circuit)

Ideal for use as both power switch and overload protector. Usually installed in series with line and load terminals to provide circuit interruption in the protected circuit.

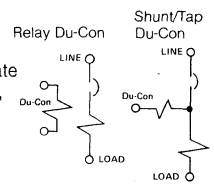
DUAL RATING

Two concentrically-wound sensing coils provide two discrete current ratings in the same breaker. Protects equipment designed to operate at two different current levels or supply voltages within certain limitations.



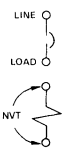
DU-CON™ (DUAL-CONTROL)

Provides sensing of both overcurrent and separate voltage signals in the same pole through a small, non-continuous-duty voltage sensing coil. DU-CON overload and voltage coils must be specified separately.



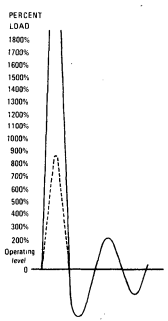
NO-VOLTAGE TRIP

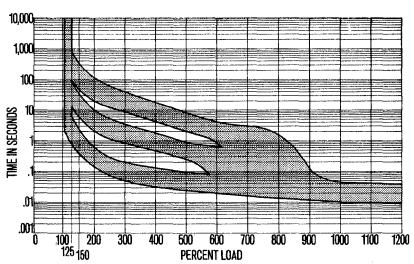
Prevents uncontrolled re-start of equipment after power outage. Used in ground-fault interrupters and other safety applications. Not intended for overload protection without one pole connected in series-trip configuration.



HIGH-INRUSH

Economical protection of high-reactance loads, which draw starting surges often as high as 30 times normal load current in a 50/60 Hz 1/2-cycle pulse, such as ferro-resonant power supplies and distribution transformers. Eliminates nuisance tripping without derating or special circuitry.





Typical Time Delay Curves

Circuit breakers are available in a variety of time-delay curves for applications such as high-inrush, 50/60 Hz and dc as well as with no intentional delay.

When your reputation's on the line

HEINEMANN® Circuit Breakers First in Features, First in Quality

	PS1 FUSE-SWITCH	RE-CIRK-IT® SERIES KD1	TYPE TX	HECTOR
					Fuse-Switch provides ON/OFF control and fuse protection in a single low-cost component. Its use eliminates a hole and interconnecting wiring and makes it easy to re-fuse from the front panel. It accepts standard 1/4-inch diameter by 1¼-inch fuses. An adapter is available for 5 mm x 20 mm fuses. Can be supplied for normally open or normally closed operation.	A low-cost, pushbutton supplementary protector for electrical equipment, designed to fit in a standard 5/8-inch round or "D" fuseholder panel cutout. Resettable at up to 1000% of its rated current from 2.5A through 15A, 500% from 0.25A through 2A. Slide-on retaining ring included.	The attractively designed Type TX circuit protector doubles as an economical ON/OFF switch and with an optional lamp as a power indicator. Rocker arms available in a variety of colors; in one and two pole models. Its trip free design cannot be held closed against a fault. Features quick-connect terminals and snap-in mounting.	A low-cost fuse eliminator for the protection of electronic equipment and high-inrush circuitry from 4A to 20A. Its trip-free design prevents the contacts from being held closed manually during an overload condition. Supplied with mounting nut and faceplate reading "PRESS TO RESET." It has 1/4-inch quick-connect terminals that are also solderable.
APPLICATIONS	Consumer and industrial products that would otherwise use a separate ON/OFF switch and fuse holder.	Consumer and industrial products, office machines, appliances, power supplies, convenience outlets, electronic games.	Commercial and consumer products, power supplies, medical electronic equipment, office and reproduction equipment, data processing equipment.	Consumer and commerical electronic equipment, appliances and high-inrush circuitry.

HEINEMANN® Circuit Breakers First in Features, First in Quality

SERIES HM	SERIES L	SERIES J/S	SERIES AM	SERIES AM-MIL
				Lightweight, subminiature, multi-frequency circuit breaker designed to withstand severe environmental extremes such as shock, vibration and high humidity. Housed in a corrosion-resistant brass case, nickel plated. Meets MIL-C-39019, is explosion- and fungus-resistant, operates in any position. Silver contacts provide good conductivity with low power loss.	This compact hydraulic-magnetic circuit protector provides the same quality, precision and choice of time delays found in larger Heinemann magnetic circuit breaker. Over-the-center, non-teasable mechanism provides snap-action operation that prolongs contact life by reducing arcing. Handles available in seven different colors for decorative or circuit-identification purposes.	Compact, lightweight, moderately-priced circuit breaker for single or multi-pole OEM applications. Also available with snap-in mounting or rocker handles. Sealed mount models are also available, single pole only. Series J/S breakers are suitable for domestic or world-market applications. Models also available for marine applications.	A low-cost, lightweight breaker available in single or multi-pole configurations, the Series AM features rear-connection studs, a high level of moisture resistance, and a current range up to 100A dc or 60A ac. Qualified under MIL-C-55629 to 50A dc and ac.	Heinemann Series AM-MIL breakers are specifically built and tested in accordance with the requirements of MIL-C-55629. Fungus- and moisture-resistance is provided by treating all ferrous parts with a special finish, and by using special springs and inherently fungus-resistant phenolic cases, covers and handles.
Military programs and commercial products, power supplies, mining and medical applications where hermetically-sealed circuit protection is required. HEINEMANN® Circuit Breakers First in Features, First in Quality

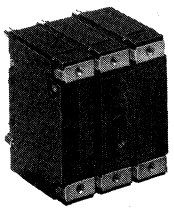
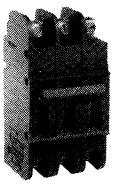
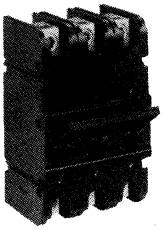
SERIES AM/S	SERIES CF E-FRAME	SERIES GH EH-FRAME	SERIES GJ	SERIES GJ1P
				






Series AM/S "world class" circuit breakers meet International Standard IEC 380 and German Standard VDE 0730. The 8-mm spacing requirement and dielectric-withstand specification are incorporated into the standard AM breaker housing without changes in size, thereby eliminating mounting procedure modifications or the need for adapter plates.	Priced considerably lower than competitive E-frame breakers, the Series CF is the most compact and versatile circuit breaker available for equipment and branch-circuit protection. Single- and multi-pole models are stocked in a wide range of standard ratings for fast, off-the-shelf delivery.	This rugged new EH-frame breaker offers all the advantages of a completely magnetic, three-pole breaker with 14,000A interrupting capacity for less than most thermal units. Compact, environmentally stable and to 100A at 480 Vac and 250 Vdc.	Where space is at a premium and current capacity up to 250A is called for, the Series GJ is the answer. Available in one-, two-, or three-pole models, it is especially suitable for panelboards, service entrances, and electric vehicles.	GJ1P parrallel-pole breakers incorporate Precision Current Equalization (PCE) to automatically distribute current equally through the current-sensing elements. PCE thereby minimizes nuisance tripping which can occur with conventional parallel-pole breakers. An optional shunt permits metering of current. Since shunt output is only 25 mv, light-gauge wiring can be used between shunt and meter.
OEM (data processing equipment, mobile applications, humid environments).	Panelboards, switchboards, branch circuits, EDP equipment, machine tools, environmental systems, single- and three-phase applications.	Motor controls, air conditioning, electric heating, computer main frames, transportation, indoor or outdoor installations.	Commercial, industrial, and residential service — entrance or panelboard applications; lighting, appliance, transformer, electric vehicles, EDP power supplies, heating, air conditioning, and electronic circuit protection.	Telecommunications, transportation, air conditioning, other outdoor "heat-loaded" equipment.

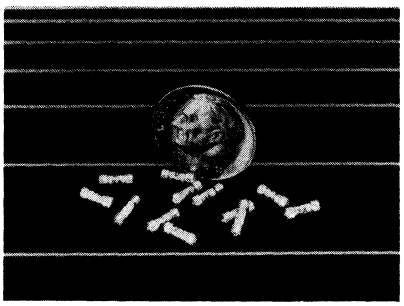
Littelfuse® CIRCUIT PROTECTION DEVICES

SUBMINIATURE SURFACE MOUNT NANOFUSE™



- Design compatibility for surface mount applications.
- Reduced subminiature size for compact board layouts.
- Supplied on 12mm tape and reel for use with automatic placement equipment per EIA Standard 481.
- Designed to meet a wide variety of electrical and environmental MIL specifications for more demanding applications.

Opening Time: 100%, 4 hrs. min. 200%, 1 sec. max. (1/16-5A), 5 sec. max. (7-10A), 20 sec. max. (12-15).
Interrupting Rating: 300A D.C. and 50A A.C. at rated voltage.
Approvals: U.L. Recognized and Certified by C.S.A.

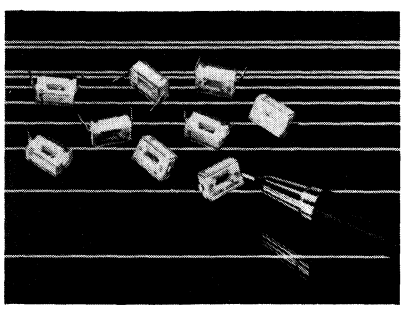
FLAT-PAK® DIP FUSES



- Low profile design.
- New subminiature rectangular shape for easy fuse identification.

- Visible element for blown fuse indication.
- Stamped with "T" symbol and color-coded blue to indicate Slo-Blo® performance feature.
- Stamped with "F" symbol and color coded red to indicate fast-acting performance feature.
- Unique DIP design and magazine cartridge packaging make Flat-Pak® ideal for high speed automatic insertion.
- Patent Number 4,563,666.

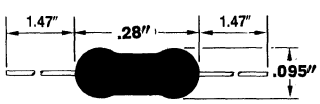
PICO II™ SUBMINIATURE FUSES

- World's smallest axial lead fuse for use in micro electronic circuits including computer and aerospace applications.
- Available on tape and reel.
- Low resistance values.
- Hi-speed action.
- Epoxy coated body for protection against environmental conditions.
- Withstand axial pull of 7 lbs.
- Available with or without color-coding per I.E.C. standards.
- Interrupting rating of 300A D.C. and 50A A.C. at rated voltage.

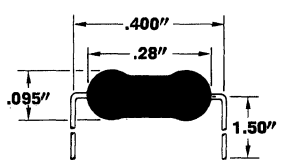
ENVIRONMENTAL CHARACTERISTICS
- Operating ambient temperature range: −55°C to 125°C
- Current carrying capacity:
  −55°C = 110% of rating
  25°C = 100% of rating
  125°C = 80% of rating
- Withstand vibrations of 10-55 Hz per method 201 of MIL-STD-202 and vibrations of 55-2000 Hz at 10 G's per method 204 test condition C of MIL-STD-202.
- Withstand shock of 100 G's for 6 milliseconds per method 213 test condition I of MIL-STD-202.

Opening Time: 100%, 4 hrs. min.; 200%, 5 sec. max. (1/16-7A) 3 sec. max. (10A) 10 sec. max. (12-15A).
U.L. Recognized and Certified by C.S.A. through 15 amperes.

251 Series - Axial Leads



252 Series - Radial Leads



Note: Leads are solder-coated copper, .025" diameter for 1/16-10A, .032" diameter for 12-15A.

3AG AXIAL LEAD FUSES

Same as above but with Axial leads for direct wiring into chassis. Leads are 1-1/2" long, copper wire.

Opening Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 5 sec. max.

U.L. Listed and Certified by CSA

Note: To order fuses with axial leads, change **312** series number to **318.**

3AG SLO BLO® FUSES (250V or less) ¼" x 1¼"

Designed to withstand momentary high-current surges but still blow quickly on shorts. Provide protection for equipment with high reactive current surges or heavy starting currents such as solenoids, motors and lamp circuits.

*32 volt. Note: For axial leads, change **313** to **315.**

3AG SLO BLO®AXIAL LEAD FUSES

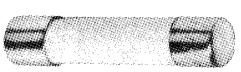
Same as above but with Axial leads for direct wiring into chassis. Leads are 1-1/2" long, copper wire.

Opening Time: 100%, 4 hour min.; 135%, 1 hour max., 200%, 5 sec. min.

U.L. Listed and certified by CSA through 7 amps.
U.L. Recognized from 8-30 amps.

Patents: U.S. patents 4,409,729 and 4,445,106.

3AB CERAMIC SLO BLO® FUSES (250V or less) ¼" x 1¼"



Similar to 313(000) series above, but have higher interrupting rating.

Opening Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 5 sec. min.

U.L. Listed 1/100 - 10 amps.
U.L. Recognized 12-30 amps.
CSA Certified 1/4-10 amps.
Patents: U.S. Patents 4,409,729 and 4,445,106.

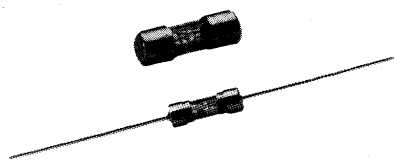
Littelfuse®

CIRCUIT PROTECTION DEVICES

2AG SUBMINIATURE FUSES



Smallest glass fuse available today. Size .177" dia. × .58".

FAST ACTING TYPE

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 1 sec. max.

Interrupting Rating: 1/8-1 amp — 10,000A (125V); 35A (250V). **1.5-3.5 amp** — 10,000A (125V); 100A (250V). **4-7 amps** — 10,000A (125V).
Approvals: U.L. Listed and Certified by C.S.A.
PATENTS: U.S. Patent 4,636,765

SLO-BLO® TYPE

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 3 sec. min./1 min. max.
Interrupting Rating: 1/4-1 amp — 10,000A (125V); 35A (250V). **1.5-3.5 amps** — 10,000A (125V); 100A (250V). **4-7 amps** — 400A (125V).
Approvals: U.L. Listed and Certified by C.S.A. thru 3.5 amps. U.L. Recognized 4-7 amps.
PATENTS: U.S. Patent 4,409,729 and 4,445,106.

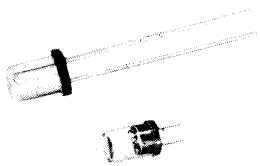
MICROFUSE SUBMINIATURE FUSES (125V)



Designed for applications where space is a critical factor. Ideal for installation on printed circuit boards. Interrupting rating — 125 volts at 10,000 amperes A.C.

Opening Time: 100%, 4 hour min.; 200%, 5 sec. max. (1/500-3/10A). 2 sec. max. (4/10-5A).
Size: 1/4" dia. × 11/32" (fuse body).
U.L. Recognized and Certified by C.S.A.
Plug-in, transparent cap type listed. Use prefix **272** for plug-in, metal cap; prefix **279** for radial, transparent cap; prefix **278** for radial, metal cap.
PATENTS: U.S. Patent 3,110,787.

TYPE T FUSE BLOCKS WITH SCREW TERMINAL CLIPS

Open type blocks available for 3AG and (13/32" × 1-1/2") fuse sizes from one to twelve poles. Bases are of grade X black laminate with 1/32" insulator sheet cemented to underside. Screw terminal clips.

Mounting Hole: 3AG — .142"/.147" dia. with .295"/.302" by 82°CS. **5AG** — .171"/.176" dia. with .342"/.349" x 82°CS.
Clip Material: 356 Series—Nickel Plated Spring Brass. **359** and **556** Series—Silver Plated Beryllium Copper.
Size: Width: 2-3/8" (3AG), 2-3/4" (5AG). See chart for length dimensions. **356 Series and 556 Series are Recognized under the Components Program of Underwriters Laboratories.**

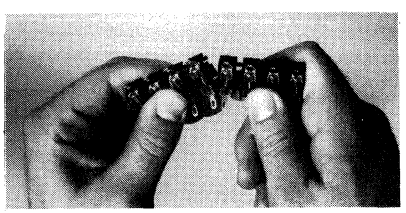
For 3AG block with silver plated beryllium copper, change series number to **359.**

2AG OMNI FUSE BLOCK



ELECTRICAL SPECIFICATIONS:
- 7 amps at 300 volts.
- Minimum dielectric - 1,500 volts RMS

MATERIALS:
Clip Terminals: Solder or Quick-connect, tin-plated, spring brass.
Base: Thermoplastic, glass reinforced. (Black standard) UL94V0 flammability rated.
Approvals: UL Recognized and Certified by CSA.

Catalog Number		Number of Poles	Overall Width (B)

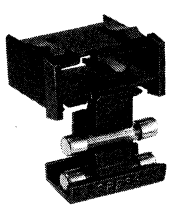
FLIP TOP SHOCK-SAFE PANEL MOUNT FUSEHOLDER #346877 FOR 3AG. (#286377 FOR 2AG, ∓286677 FOR 5x20mm)

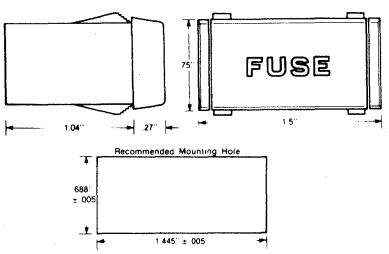
FUSE CARRIER HOLDS SPARE FUSE



Shock-Safe design eliminates any possibility of electrical shock, per IEC Standards 257 and 65. Fuse carrier holds spare fuse for fast, easy fuse replacement and convenient servicing. Low profile design complements modern panels.
APPROVALS: Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

SPECIFICATIONS:
Electrical Rating: See Approvals.
Insulation Resistance: 10,000 megohm minimum at 500 VDC.
Contact Resistance: Less than .01 ohm.
Dielectric Strength: 250 volts minimum.
Mounting: Snap-in mounting. No hardware required. Panel thickness = .032"/.125".
Molded Parts: Thermoplastic, 94V0 black standard (other colors available as special).
Fuse Carrier: Springloaded. Unlocks with a press of the finger. Locks into place to prevent accidental circuit interruption. Permanently attached to fuseholder body to prevent loss. Extracts fuse from live terminals.
Terminals: Copper alloy, tin plate. Accept .250" × .032" quick-connect or solder. .072" dia. hole.
Ambient Temperature: −40°C to +85°C.

Vibration: 10-55-10 Hz at .06 double amplitude (Method 201, MIL-STD-202).
PATENTS: U.S. Patent 4,543,557.



Note: Dimensions differ for 2AG and 5×20 styles.

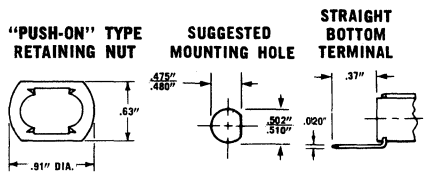
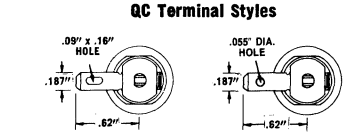
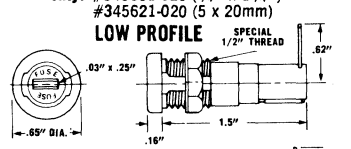
345711	345731		X

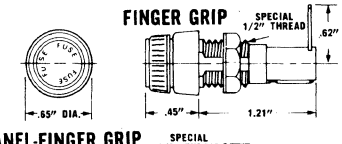
Body and Retaining Nut only: #345701-010 (Rt. Angle) #345711-010 (Straight)
Knob only: #345601-020 (¼" x 1¼") #345621-020 (5 x 20mm)

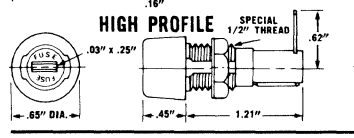
NOTE: Knobs are color-coded. On screwdriver slot type, knobs are grey for 1/4" × 1-1/4" fuses, black for 5 × 20mm fuses. On finger grip type, the lettering on knobs for 1/4" × 1-1/4" fuses are filled with white paint.

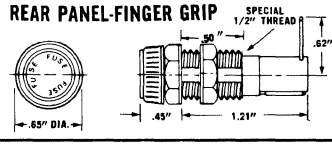


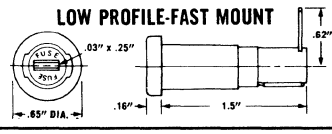


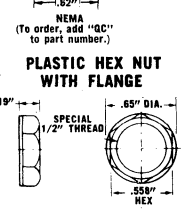




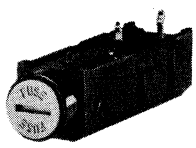








P.C. BOARD SHOCK-SAFE FUSEHOLDERS FOR 3AG OR 5x20MM FUSES



Similar to shock-safe fuseholders shown above but designed for p.c. board mounting. Shock-safe design per IEC Standards 257 and 65. Two different knob styles available for use with ¼" x 1¼" or 5 x 20mm fuses.

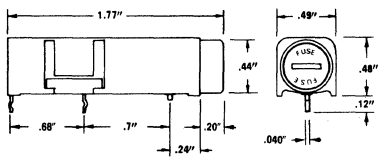
SPECIFICATIONS:
Electrical: Rating See APPROVALS.
Insulation Resistance: 10,000 megohm minimum at 500 VDC.
Contact Resistance: Less than .005 ohms average at a current of one ampere.
Dielectric Strength: 4000 volts minimum.

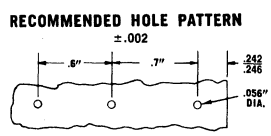
Mounting: Intended for soldering to printed circuit boards.
Molded Parts: Body Material: Black glass-filled thermoplastic. Knob Material: Grey or black glass-filled thermoplastic.
Knob: Screwdriver slot, fuse extractor type with nickel-plated copper alloy insert. Spring-loaded, bayonet style.
Terminals: Brass. Tin-plated.
Ambient Temperature: −40°C to +85°C.

APPROVALS: Recognized under the Components Program of Underwriters Laboratories (16A, 250V)
Certified by CSA (15A, 250V).
SEMKO approved (6.3A, 250V). VDE approval pending.

L.F. No.	
1/4" x 1-1/4 FUSES 345101	5mm x 20mm FUSES 345121

Body only: #345101-010
Knob only: #345101-020 (¼" x 1¼") #345121-020 (5 x 20mm)





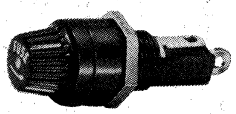
NOTE: Knobs are color-coded; grey for 1/4" x 1-1/4" fuses, black for 5 x 20mm fuses.

Littelfuse® CIRCUIT PROTECTION DEVICES

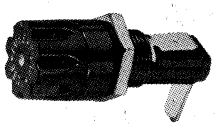
3AG FUSEHOLDERS WITH SOLDER TYPE, 3/16" OR 1/4" QUICK-CONNECT TERMINALS

Extend only 1" behind panel. **UL Recognized and Certified by CSA.**

KNURLED KNOB



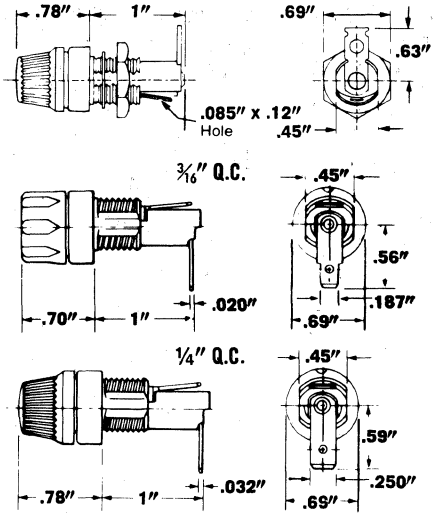
FLUTED KNOB



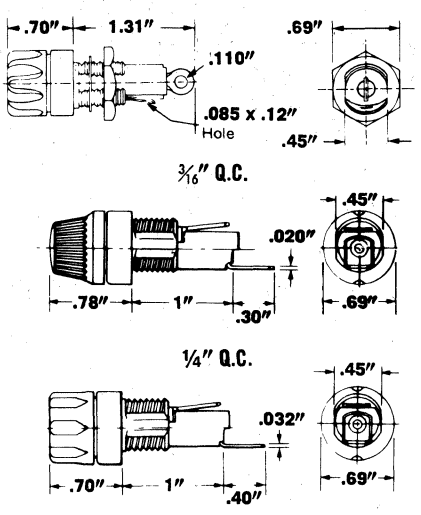
SPECIFICATIONS

Electrical: Rated at 20 amperes for any voltage up to 250V. Dielectric withstanding voltage exceeds 2400 volts.
Mounting: Withstands 15 pound/inch (1.69Nm) mounting torque. Maximum panel thickness 18" (4.8).
Molded Parts: Black thermoplastic.
Knob: Bayonet style with white lettering.
Copper and Copper Alloy Terminals: Tin plated except 1/4" quick connect terminals are nickel plated.
Hardware: Standard fuseholders supplied with a neoprene washer and a hex nut unassembled. Lockwasher (L) and drip-proof seal (P) variations available by adding appropriate suffix letters (L, P or PL) to catalog number.

Right Angle Terminal
SOLDER



Straight Bottom Terminal
SOLDER



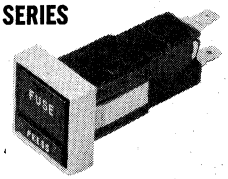
RIGHT ANGLE TERMINAL

Fluted Knob	Knurled Knob	Type of Terminal
342004	342022	Solder
342028	342048	3/16" Q.C.
342828	342848	1/4" Q.C.

STRAIGHT BOTTOM TERMINAL

Fluted Knob	Knurled Knob	Type of Terminal
342014	342012	Solder
342038	342058	3/16" Q.C.
342838	342858	1/4" Q.C.

LOW PROFILE FUSEHOLDERS 348 (000) SERIES

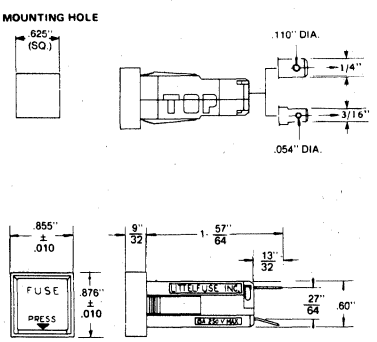


Snap into panel. Eliminate need for mounting hardware. Square cap design and choice of cap and bezel colors. 3/16" or 1/4" Q.C. terminals. **U.L. Recognized and Certified by CSA.**

SPECIFICATIONS

Molded Parts: Body-Black Thermoplastic. Cap-High temperature thermoplastic.
Terminals: One piece-brass-Electro-tin plated.
Electrical Characteristics: Rated at 15 amps for any voltage to 250. Dielectric withstanding voltage between terminals and terminals to ground at room temperature and 90% R.H. exceeds 1,500 volts.
Patents: U.S. Patent 3,659,252.

Mounting: .625" sq. hole in 1/32" through 1/8" thick chassis panel.



HOW TO ORDER LOW PROFILE FUSEHOLDERS

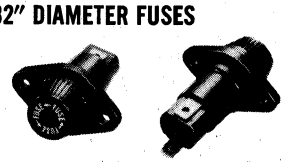
The six digit catalog number is a coded description of the finished unit. To specify type required, select appropriate code numbers from chart below. To order a cap assembly only for 3AG fuses, use **348** series numbers and insert a "0" in the terminal style and bezel color locations. To order a body assembly only, use **348** series number and insert a "0" in the cap color location.

SIX DIGIT CATALOG NUMBERS CONSIST OF

Series No.	Terminal Style	Bezel Color	Cap Color
348 For 3AG Fuses		1 Red	1
		2 Green	2
		3 Yellow	3
		4 Blue	4
	6 3/16" Wide Terminals	5 White	5
	8 1/4" Wide Terminals	7 Black	7
		9 Grey	9

For example: 348615 is a holder with 3/16" terminals, red bezel and white cap.

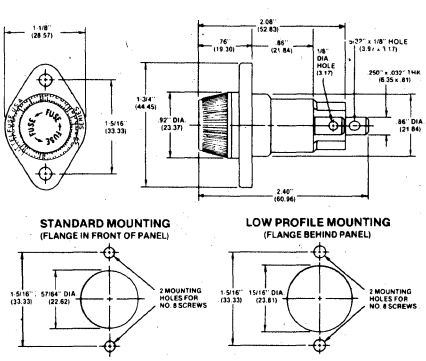
PANEL FUSEHOLDER FOR 13/32" DIAMETER FUSES



Recessed side terminal for additional shock-safe characteristics. **U.L. Recognized and Certified by CSA.**

Catalog Number		Fuse Length Range*
Standard	Watertight	
571027	571027P	15/16" — 1 3/8"
571007	571007P	1 13/32" — 1 1/2"

* Fuse diameter is 13/32".



SPECIFICATIONS

Molded Parts: Black Thermoset.
Knob: Screw type, with engraved markings: Unfilled characters (571007, 571007P), light blue characters (571027, 571027P).
Terminals: Brass, tin plated. Combination solder/1/4" quick-connect. Side terminal has .125" diameter hole. Bottom terminal has .156" x .124" elongated hole.
Mounting: Flange mounting either in front of or behind panel. Watertight version must be front panel mounted. Maximum panel thickness is .75".
Electrical Characteristics: Rated at 30 amps for any voltage up to 600. Dielectric withstanding voltage greater than 2400V.

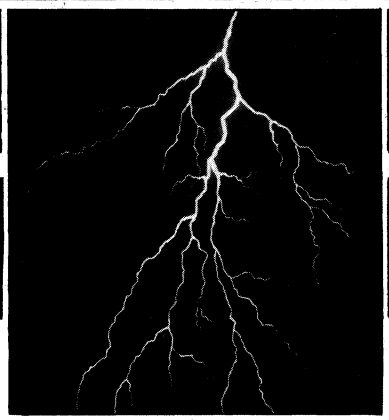
AC POWER LINE PROTECTOR

SPA/SPB/SPC SERIES



PROTECTS SENSITIVE EQUIPMENT FROM DAMAGING TRANSIENT OVERVOLTAGES!

Lightning and power line transients surge along AC power lines producing costly damage to computers, medical equipment and other sensitive electrical devices. Prevent these malfunctions and downtime with a reliable, maintenance-free SP Series AC power line protector.

Operating in nanoseconds, the SP series will vigorously clamp lightning and transient overvoltages on the AC line to safe levels whenever the clamping threshold is exceeded. After each transient, the protector recovers automatically—without power interruption. The use of redundant protection elements virtually guarantees no "downtime."

How to Choose the Proper Protector Size

A surge of voltage running into a facility will dissipate by subdividing throughout the building's power distribution system.

The capability of a surge suppressor is determined by its intended location. At the point of entry, the energy contained in a surge is at maximum. Fanning out on its journey through the system, it will offer less magnitude to each branch panel encountered. Finally, the least amount of damaging potential will be experienced by the local panels and outlets deep in the system.

The SP Series is designed to make the selection of a model not only easy, but also provide the best choice of protection versus cost.

Main Service Panel Protector—SPC Series

To keep damaging overvoltages from entering the building, choose the heavy-duty SPC series. These shunt connected protectors vigorously clamp high energy transients with a sophisticated combination of high speed and brute force MOV's. An SPC installed at the main service panel is your most cost-effective solution to protecting the facility's AC lines.

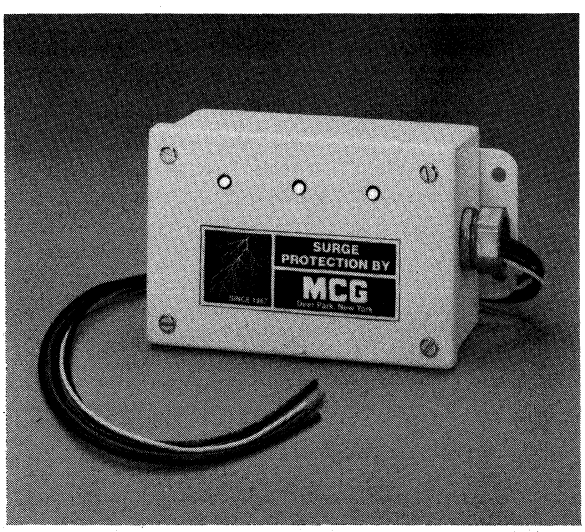
Branch Panel Protector—SPB Series

Installed in shunt at the branch distribution panel, the SPB series provides ideal protection for several rooms or an entire floor of a building. The SPB protectors, when located at the branch panel, also provide transverse protection (i.e., it prevents transients generated from one room being coupled through a common panel into another room).

Local Service Panel Protector—SPA Series

The SPA protectors install in shunt at the local panel or directly at the equipment. These compact units provide very substantial protection for one or more pieces of sophisticated equipment or a small computer room.

SPB/SPC protects branch distribution and main service panels.



SPA protects at the local service panel.

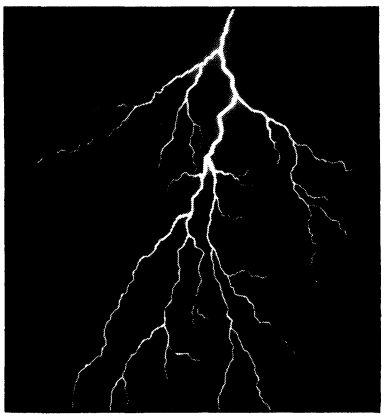
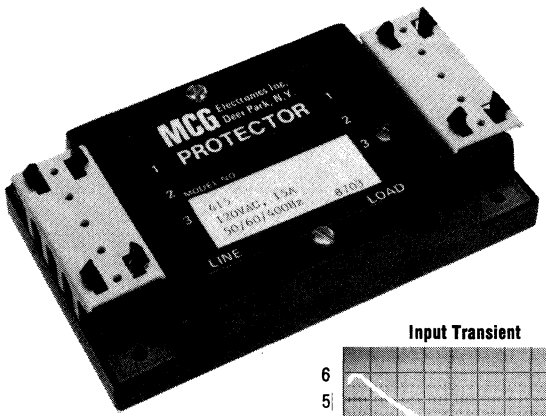
AC POWER LINE SURGE PROTECTOR



415 SERIES to 15A

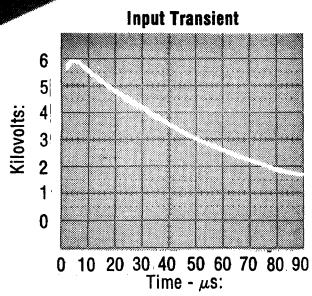
A SOPHISTICATED BLEND OF HIGH SPEED AND BRUTE FORCE PROTECTION

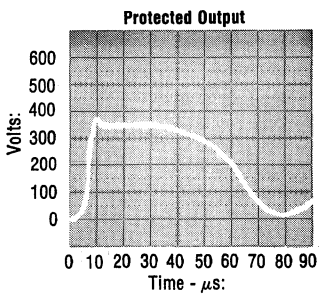
- **480 joule transient absorption**
- **Reliable protection against transients and spikes**
- **Vigorously clamps IEEE 587 ring and impulse waves**
- **1 nanosecond response**
- **Low profile**
- **Brute force EMI/RFI filtering**
- **Field repairable**



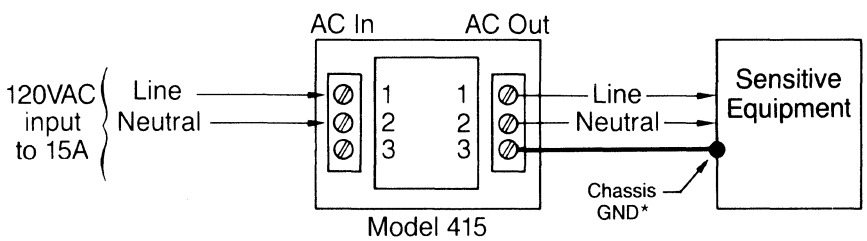
$55
(1–4 pieces)

Equipment level protection installed "within" a piece of equipment. Employs a sophisticated combination of brute force surge protection and impulse filtering to prevent equipment damage or malfunction. Reaction time less than 1 ns with automatic reset after transient has passed. Absorption capability exceeds 480 joules. Provides superior attenuation at the critical lower frequencies. For 120VAC single phase, 50/60/400 Hz power lines handling currents to 15A. Incorporates a green LED that indicates unit is operational and protection is present. Military versions are available.

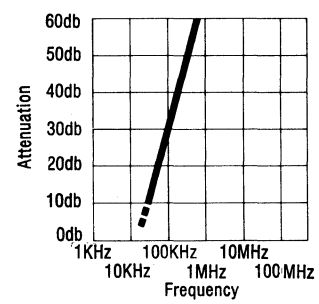




Connection Information



***Installation Note:** Important, connect protector terminal marked "ground" to frame, case or chassis of equipment being protected. Keep lead (#12 AWG) as short as possible, less than 6" is highly preferred.



Also available for 250 VAC single phase, 50/60/400 Hz, power lines handling currents to 30A. Consult factory for details.

Superior Power Protection Against Voltage Surges and Power Line "Noise"

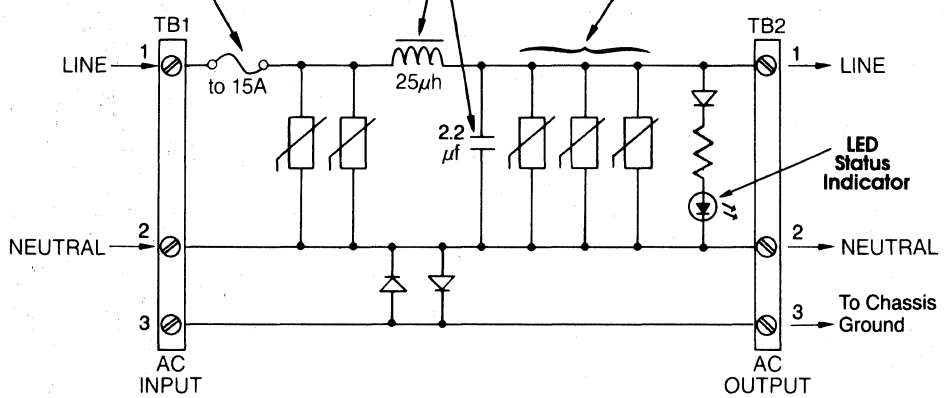
415 SERIES (con't)

The Inside Story . . . Heavy Duty Components . . . Superior Protection

Replaceable fuse
Automatically disconnects unit from power line in the event of serious line current overload.

Heavy duty EMI/RFI filtering
Provides superior attenuation at the lower frequencies (20db/65KHz, 40db/170KHz, 60db/650KHz). Wire wound inductors ensure continued performance under severe transient conditions.

Extraordinary 480 joule protection
- "Brute Force" MOV transient suppressors
- The only protector engineered to provide protection against all possible transient entry conditions.
- 3 line L-G, L-N, N-G protection



General Specifications

Rated voltage	120VAC
Rated current	15A RMS
Frequency/Service	50/60/400Hz, single phase
Energy absorption	480 joules (watt/sec)
Clamp voltage	235V (1ma) Threshold 375V peak 6KV (IEEE 587 Cat. B)
Response time	<1ns
Filter attenuation	65KHz—20db 170KHz—40db 650KHz—60db
Operating temperature	−40 to +85 degrees C
Efficiency	99+%
Size (L x W x H)	4.95″ x 2.8″ x 1.15″
Weight	<1.0 lb.

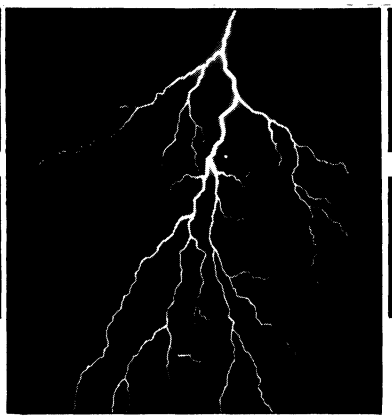
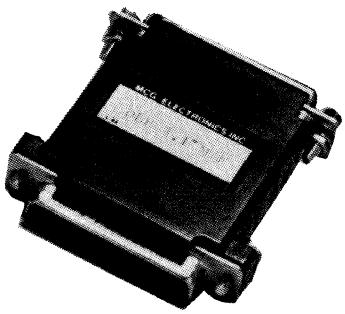
DATA LINE PROTECTORS



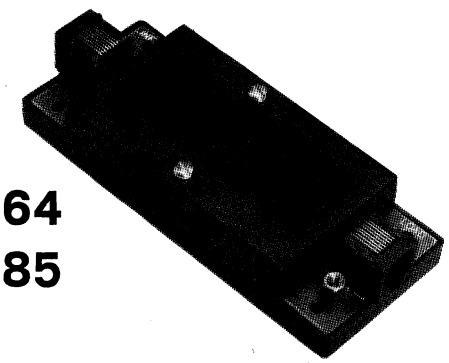
DLP-3.1
DLP-4.2, 4.4

DLP-3.1

$48



DLP-4.2 $64
DLP-4.4 $85



RS232 In-line computer and terminal protection from damaging transients caused by lightning and switching surges. Installs in minutes in series with data line providing a quick retrofit for existing equipment or new installations. Employs 25 pin D-Sub connectors and the standard unit (RS232) protects pins 2, 3, 4, 5, 6, 7, 8 and 20.

Dial-up/leased line modem protection. Prevents costly downtime and equipment failure due to lightning and transient overvoltages. Use DLP-4.2 for 2 wire (tip and ring) dial-up telephone lines. Use DLP-4.4 for 4 wire leased lines. Protects RS232, 422, 423 and 20ma loops. Installs between modem and wall outlet, telephone or leased lines. RJ11 jacks.

General Specifications

Clamp Voltage (±)	25V
Pins protected	2, 3, 4, 5, 6, 7, 8, 20 (Referenced to pin 1 and shell)
Meets or exceeds	IEEE 587 Cat. A Ringwave 1500V (100KHz, 125A)
Dimensions (L x W x H)	2.18″ x 1.86″ x .65″

General Specifications

Clamp voltages available (±)	6V, 10V, 15V, 25V, 200V
Series resistance	25 ohms
Meets or exceeds	FCC Docket 68 IEEE Std. 472 (SWC) 1KV, (10 x 1000) μs waveform

Installation Information

Installs in series with existing data line

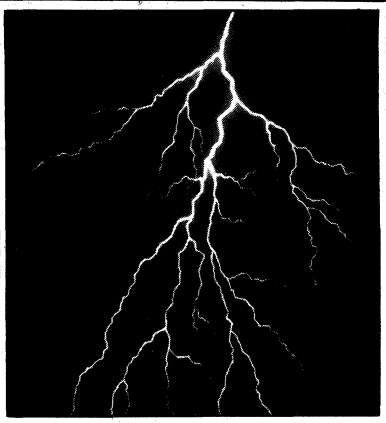
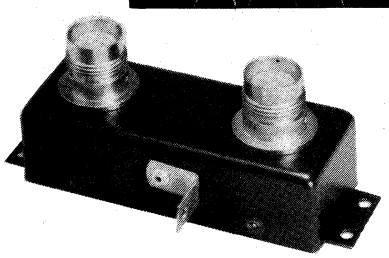
DATA LINE PROTECTOR



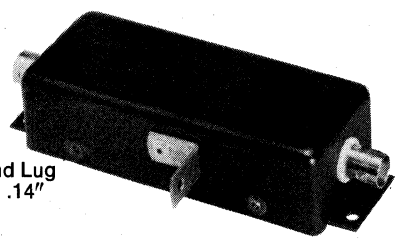
DLP-5.1, 5.2
Protects High Speed Video and Data Lines

WIDELY USED ON IBM SYSTEMS!

Protects high-speed video and data lines from damaging transients caused by lightning and switching surges. Provides 20 MHz or greater bandwidth, with attenuation of less than 1db. Installs in-line with coaxial or twin axial cable and is located adjacent to equipment to be protected. Ground lug accepts #10 AWG. Ideal for IBM and similar equipment having cable runs extending to 1500 feet.



$104
DLP-5.2-10V5
Height 1.9″



Ground Lug
I.D. = .14″

$76
DLP-5.1-6V5
Height 1.1″

General Specifications

Clamp Voltages	±6V (DLP-5.1) ±10V (DLP-5.2)
Series Resistance	5 ohms
Attenuation	<.8db to 20 MHz
Meets or Exceeds	IEEE 587 CAT. B IEEE Std. 472 (SWC) 1 KV (10 x 1000) μs waveform FCC Docket 68

Typical Application

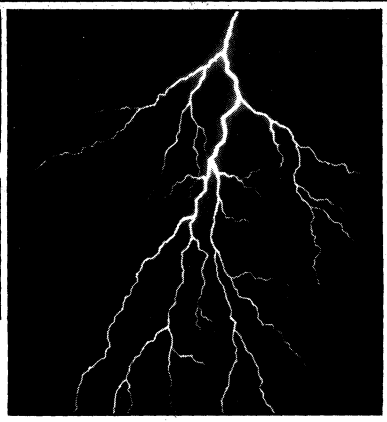
DATA LINE PROTECTORS



DLP-36A SERIES

MIX AND MATCH MODULAR PROTECTION FOR TELEPHONE AND DATA LINES

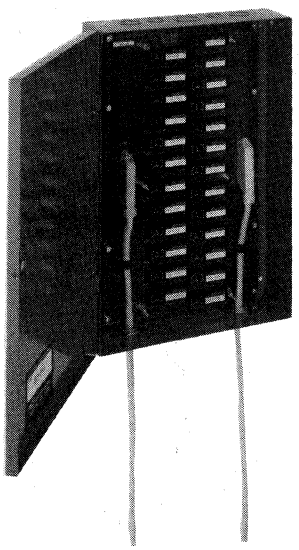
Protects PABX systems, CPU's, key systems, multiplexers, port selectors, etc. from damaging transients.

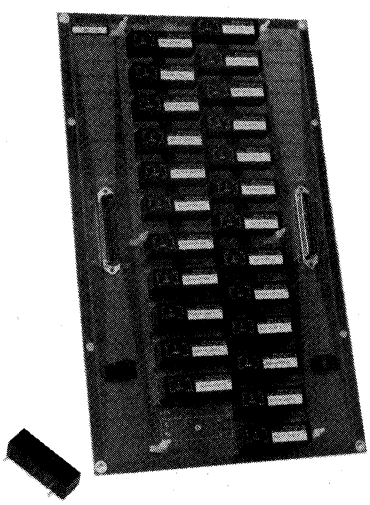
The DLP-36A is a new 25 pair, point-of-entry transient suppressor. The unit offers high speed protection for PABX systems, CPU's and instrumentation systems that use telephone lines, RS232, 423 and 20 ma loops.

Modular protection elements (25 provided) allow you to mix and match telephone and data lines at different clamping levels. This flexibility offers a convenient "one protector" solution to the varied protection needs in a building. And, if your application changes, simply switch the module to accommodate the new requirement. The plug-in module feature also permits on-site repair or replacement by non-technical personnel.

The unit uses fast-acting Avalanche diodes (1 nanosecond) and brute force gas tubes to ensure continued protection even under severe transient situations.

Utilizing 50 pin telephone industry connectors, the DLP-36A is ideal for termination to 66 blocks. To suit most applications, the unit is available with or without the enclosure.





General Specifications

Clamp voltages available	+/–6, 10, 15, 25, 50, 200V peak
Energy handling capability	50 joules/line
Gas Discharge Tube	
Life	100 coulombs (amp/sec)
Energy handling	5000 joules (one time)
Current	5000 amps
Series resistance	25 ohms (standard)
Response time	less than 1 nanosecond
Effectively clamps	IEEE 587 Cat. B. 2KV (10/50μs, 8/20μs) IEEE Std. 472 (SWC) 1KV (10 × 1000 μs) waveform
Dimensions	H-18″ W-15″, D-4″
Operating temperature	–55 to +125 degrees C
Circuit attenuation (db)	–3db/3MHz (Rs = 25, RL = 1K, Cs = 2000pf)

$880 w/enclosure
$795 w/o enclosure

DATA LINE PROTECTORS

DLP-36A SERIES (con't)

To Specify the DLP-36A

Determine the signal voltage:
a) look in the service manual
b) call your service company
c) use an oscilloscope
The most effective protection will be attained by clamping overvoltages as close to the normal signal voltage as possible (i.e. for a data line with a signal level of 12V, choose a clamping voltage of 15V).

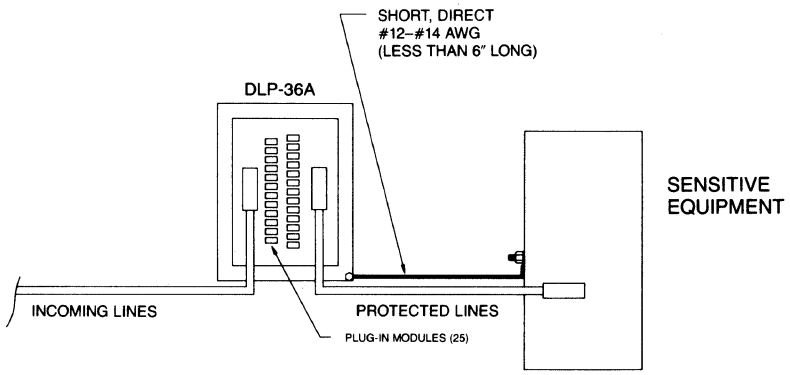
DLP-36A 15V 25

Model
Clamping Voltage
Series Resistance

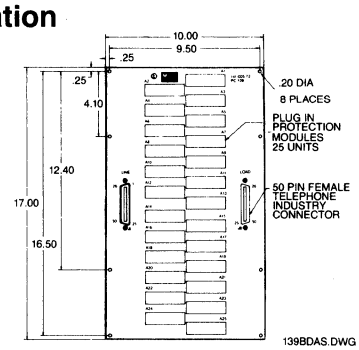
Installation

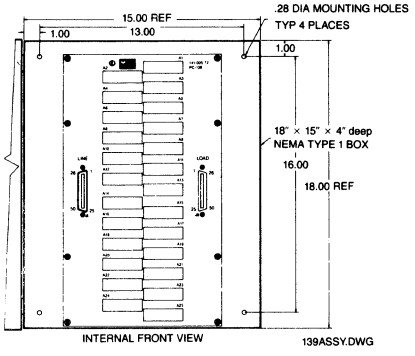
Preferred Installation: Important, connect protector terminal marked "ground" to frame, case or chassis of equipment being protected. Keep lead (#12AWG) as short as possible, less than 6 inches is highly preferred.
Alternate Installation: Locate the protector close to the building's structural steel at the building entry point. The protector terminal marked "ground" must be connected to the structure with a direct, short (less than 6 inches) #12AWG lead. It is essential that the building structure be grounded—verification is vital.

Application



Mounting Information





NOTE: Had the need been for less than 50 wires protected, the user would have the option (because of the modular design) of buying only the number of protection modules required. If the unit is purchased fully-packed, the extra modules may be kept as spares or for expansion. Each module protects 2 wires.

DATA LINE PROTECTORS

DLP-45 SERIES

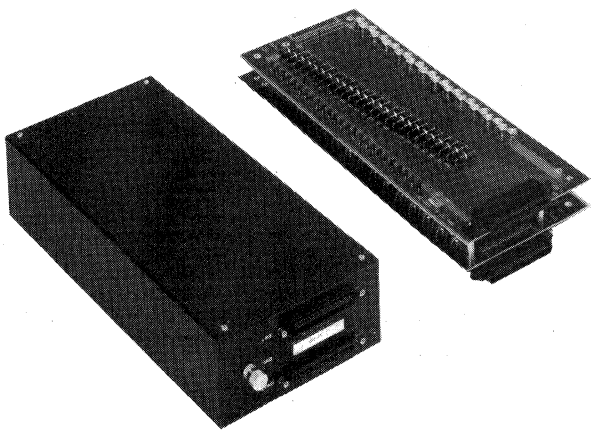
MINI PABX PROTECTOR–SMALLEST AVAILABLE ANYWHERE

Guards PABX systems, CPU's, key systems, security systems, etc. from damaging transients.

The DLP-45, a 50 wire (25 pair) protector, guards sensitive instrumentation that uses dial-up telephone lines, RS232, 423 and 20 ma loops. Lightning, surges and transients are rapidly diverted away from your equipment, thus preventing damage. The DLP-45's small size (H-12″, W-6″, D-2.94″) makes it ideally suited where space is a limiting factor.

Combining fast-acting Avalanche diodes and brute force gas tubes, the DLP-45 ensures continued protection even under severe transient situations. This field-proven technology has a failure rate of only 32 failures in 132,000 wires.

Installation is in series between external telephone/data lines and internal systems. The unit utilizes a M/F 50 pin Telco connector for easy termination to 66 blocks.



$775.

Model DLP-45 offers high speed, brute force protection in a compact case.

General Specifications

Clamp voltages available	+/–6, 10, 15, 25, 50, 200V peak

Energy handling	5000 joules (one time)
Current	5000 amps
Series resistance	25 ohms (standard)
Response time	less than 1 nanosecond
Effectively clamps	IEEE 587 Cat. B, 2KV (10/50μs, 8/20μs) IEEE Std. 472 (SWC) 1KV (10 × 1000μs) waveform
Connectors	M/F 50 pin Telco Connectors
Dimensions	H-12″, W-6″, D-2.94″
Operating temperature	–55 to +125 degrees C
Circuit attenuation (db)	–3db/3MHz (R = 25, RL = 1K, Cs = 2000pf)

All MCG Data Line Protectors come with a two-year, no nonsense warranty. Consult factory for details.

DATA LINE PROTECTORS

DLP-45 SERIES (con't)

To Specify the DLP-45

Determine the signal voltage of the system:
a) look in the service manual
b) call your service company
c) use an oscilloscope
The most effective protection will be attained by clamping overvoltages as close to the normal signal voltage as possible (i.e. for a data line with a signal level of 12V, choose a clamping voltage of 15V).

DLP-45 - 15V 25

Clamping Voltage
Series Resistance

Installation

Preferred Installation: Important, connect protector terminal marked "ground" to frame, case or chassis of equipment being protected. Keep lead (#12AWG) as short as possible, less than 6 inches is highly preferred.

Alternate Installation: Locate the protector close to the building's structural steel at the building entry point. The protector terminal marked "ground" must be connected to the structure with a direct, short (less than 6 inches) #12AWG lead. It is essential that the building structure be grounded—verification is vital.

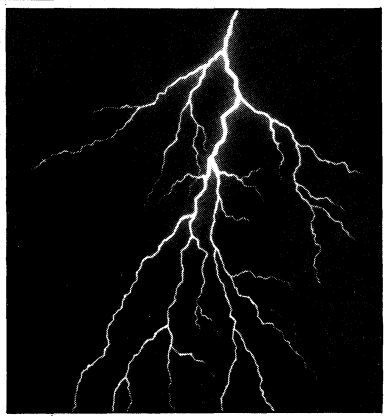
DATA LINE PROTECTORS



DLP-50 SERIES

MULTI-WIRE TRANSIENT PROTECTION FOR OVER 2000 PAIRS!

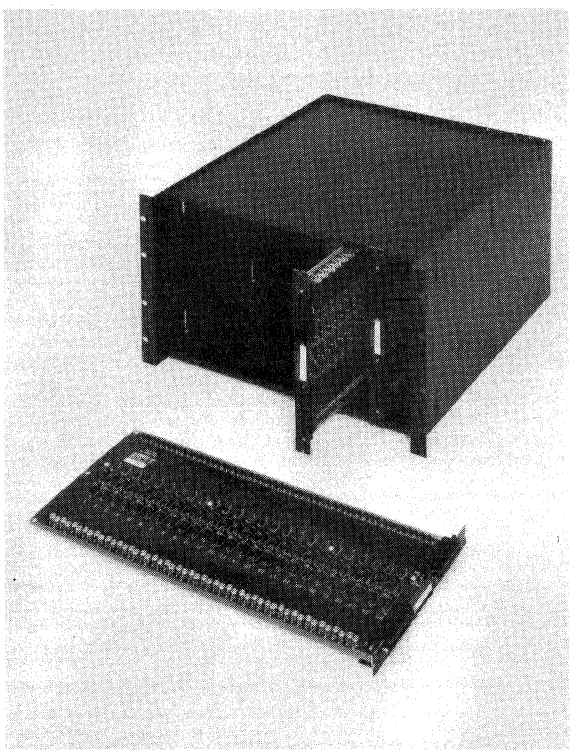
Protects PABX systems, mainframes, multiplexers, CPU's, etc. from damaging transients

Sensitive equipment using dial-up telephone lines, RS232, 423 or 20 ma loops is vulnerable to cumulative damage and serious disruption from high speed transients. The DLP-50 System transient protector offers reliable, cost-effective protection for multiple communication lines.

The DLP-50 System consists of a card cage assembly and protection cards. Each card cage holds up to 17 cards capable of protecting 25 pairs each or 425 pairs total. A fully loaded standard 19″ rack equipped with five DLP-50 systems will protect 2,125 pairs.

Incorporating field proven technology (32 failures in 132,000 wires), the protector combines fast acting Avalanche diodes and brute force gas tubes, ensuring continued protection even under severe transient situations.

The DLP-50 System comes standard with 50 pin telephone industry connectors for easy installation.



General Specifications

Clamp voltages available	+/−6, 10, 15, 25, 50, 200V peak
Energy handling capability	50 joules/line
Gas Discharge Tube	
Life	100 coulombs (amps/sec)
Energy handling	5000 joules (one time)
Current	5000 amps
Series resistance	25 ohms (standard)
Response time	less than 1 nanosecond
Effectively clamps	IEEE 587 Cat. B, 2KV (10/50μs, 8/20μs) IEEE Std. 472 (SWC) 1KV (10 × 1000μs) waveform
Connectors	M/F 50 Pin Telco Connectors
Dimensions	Fits standard 19″ rack 10.5″ (6U) high, 19″ deep.
Operating temperature	−55 to +125 degrees C
Circuit attenuation (db)	−3db/3MHz (Rs = 25, RL = 1K, C_S = 2000pf)

DLP-50 card cage (rack mountable) **$150** each

PICA-50-200V25 protection card **$630** each

All MCG Data Line Protectors come with a two-year, no nonsense warranty. Consult factory for details.

DATA LINE PROTECTORS

DLP-50 SERIES (con't)

To Specify the DLP-50 System

The DLP-50 System includes a card cage plus up to 17 protection cards.

To Specify Protection Cards

Determine the signal voltage of the system:
a) look in the service manual
b) call your service company
c) use an oscilloscope

The most effective protection will be attained by clamping overvoltages as close to the normal signal voltage as possible. If you were protecting dial-up telephone lines, for example, with tip and ring voltages totalling 190V, a 200V clamping is appropriate. For this application, specify protection cards PICA-50-200V25.

PICA-50 200V 25

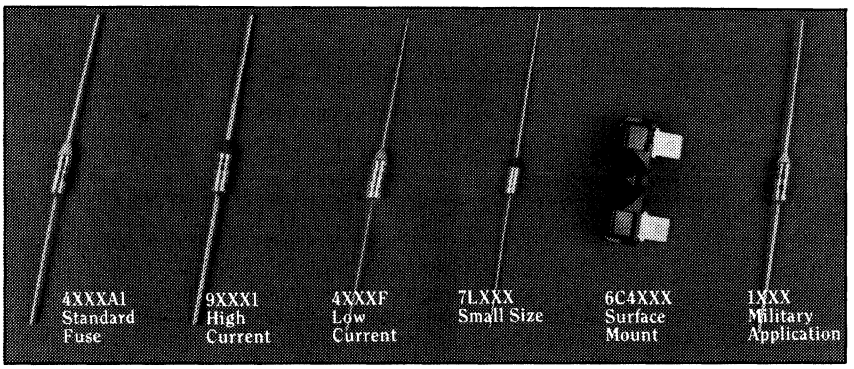
MICROTEMP® Thermal Cutoffs

MICROTEMP Thermal Cutoffs provide permanent over-temperature protection for motors, transformers, appliances, HVAC equipment and electronic equipment. Once a MICROTEMP Thermal Cutoff opens a circuit, it remains open until the fault is corrected and the fuse is replaced.



Thermal Cutoff Series Selection

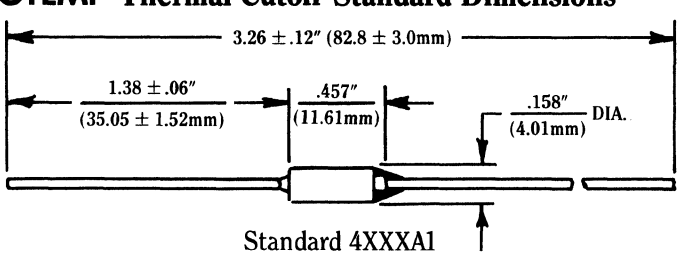
To determine which series is best for your application, remember:

- To consider the normal and abnormal electrical currents and voltages of your product.
- That the current passing through a MICROTEMP Thermal Cutoff can generate I^2R, self heating. This must be considered when selecting the proper series and opening temperature for your application.
- That the outer case of the MICROTEMP Thermal Cutoff is electrically live and may require insulation. Additionally, since insulation can reduce heat transfer, it also must be considered in selecting the final opening temperature.
- That custom configurations and packages are available.
- That a thermocoupled dummy should be installed in the product circuit to determine the correct temperature setting.

MICROTEMP® Thermal Cutoff Types

Type No.	Temp. (°C) Calibration Range	Wire Size AWG	Maximum Recommended Operating Current and Voltage (Resistive)
4XXXA1	60-240	18	15 Amp/240 VAC
9XXX1	60-240	15	25 Amp/240 VAC
4XXXF	60-240	23	5 Amp/240 VAC
7LXXX	72-184	23	6 Amp/240 VAC
6C4XXX	60-184	—	15 Amp/240 VAC
1XXX	60-240	18	15 Amp/240 VAC

MICROTEMP® Thermal Cutoff Standard Dimensions



Standard 4XXXA1

MICROTEMP® Thermal Cutoff Temperature Ratings

Reading the temperature chart.
All MICROTEMP Thermal Cutoffs are identified by their Type No. (4XXXA1, 9XXX1, etc.). The "XXX" digits are determined by the opening temperature you specify. For example: A 4136A1 is a MICROTEMP Thermal Cutoff with an opening temperature of 60°C.

EMERSON®

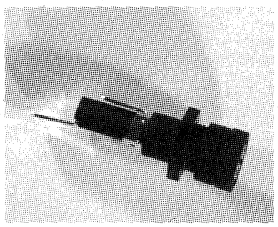
International Fuseholders & Fuse Blocks

Panel-mount Fuseholders with dual-size fuse carriers

These fuseholders accommodate either the North American 1/4 x 1-1/4" fuse or the international 5 x 20 mm fuse by simply selecting the correct fuse carrier, and are "touchproof" in accordance with European agency requirements.

Approvals: UL recognition (20A/250VAC);CSA certification (16A/250VAC); VDE (10A/250VAC) (SEMKO pending).

Front-mount fuseholder, high profile (other models available)

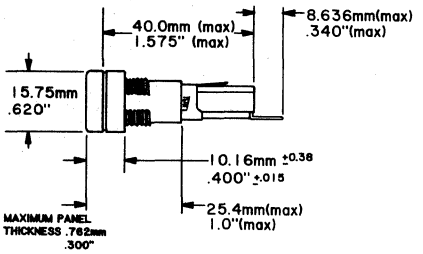


Front mounting, high-profile fuseholder in four contact styles:

80910050: In-line, solder contact
80910060: Right-angle, solder contact
80910070: In-line, 1/4" Q.D.
80910080: Right-angle, 1/4" Q.D.

Select fuse carrier (available separately):

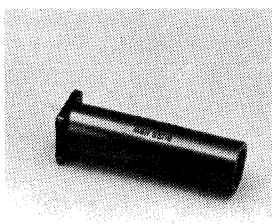
80910300: for 1/4 x 1-1/4" fuse
80910310: for 5 x 20 mm fuse



PC-board mount Fuseholders

Pc-board mounting fuseholders; specify fuse carrier (available separately) for international 5 x 20 mm fuse or North American 1/4 x 1-1/4" fuse.

Approvals: UL recog. 12A/250VA; CSA cert. 12A/250VAC; VDE 6.3A/250VAC; SEMKO 6.3A/250VAC.

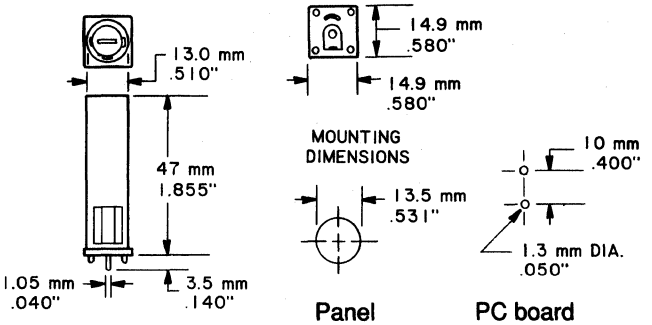


Model HBW: Vertical pc-board mount fuseholder without stabilizer pins

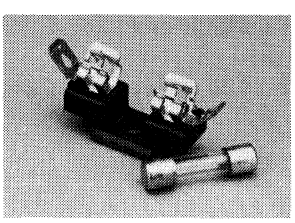
Model HBH: Horizontal pc-board mount fuseholder (not pictured)

Select fuse carrier (available separately):

FBI: for 1/4 x 1-1/4" fuse
FBM: for 5 x 20 mm fuse



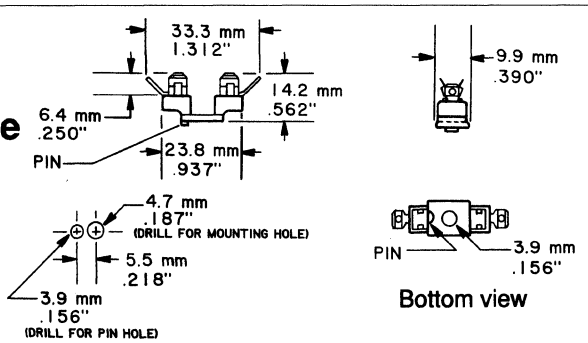
Fuse Blocks

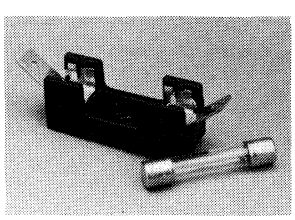


For 5 x 20 mm fuse

Fuse block for single 5 x 20 mm fuse:

P/N 2000-1:
solder contacts





For 1/4 x 1-1/4" fuse

Fuse block for single 1/4 x 1-1/4" fuse:

P/N S-8002-01:
with 40° angled solder contacts

P/N S-8202-01:
with 40° angled 1/4" Q.D. contacts

Perma Power®

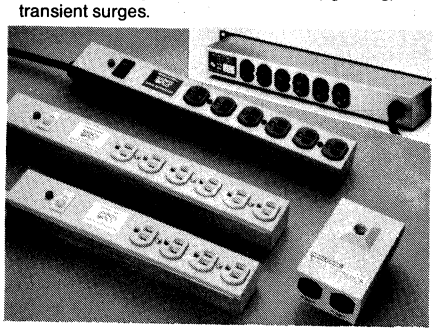
- **SURGE SUPPRESSORS**
- **POWER CONTROL CENTERS**
- **POWER CONDITIONERS**
- **STANDBY POWER SYSTEM**

AUTOMATIC SHUTDOWN

If surge supressor wears or burns out, Perma Power stops all power to your system . . . as completely as if the plug was disconnected . . . unlike light or buzzer "Warnings" which still let raw unprotected power through to the computer. Only Perma Power's patented Automatic Shutdown keeps your equipment safe from damaging raw power.

Perma Power® Surge Suppressors with Automatic Shutdown

Perma Power Surge Suppressors feature low let-through voltage and high energy suppression ratings. Unlike many other surge suppressors in their price range, they protect against both normal-mode (switching) and common-mode (lightning) transient surges.



Perma Power Extended Life Surge Suppression offers the extra protection of two four-element, two-stage filters, with an almost unlimited operating life, through a coordinated circuit using both metal oxide varistors and silicon avalanche diodes.

Standard models feature

- Protection against both normal-mode (switching) and common-mode (lightning) transients.
- 600 V. max. let-through voltage.
- 70 joule single-surge energy rating.
- Positive Shutdown Mechanism protects equipment if surge suppressor fails.
- Performance specifications based on IEEE Std. 587, Test Waves.
- One-year warranty.

Extended Life models provide these extras

- 400 V. max. let-through voltage.
- 5 Watt steady state (repetitive surges) power rating.
- 100,000-pulse lifetime.
- Enhanced RF/EMI noise protection.
- Five-year warranty.

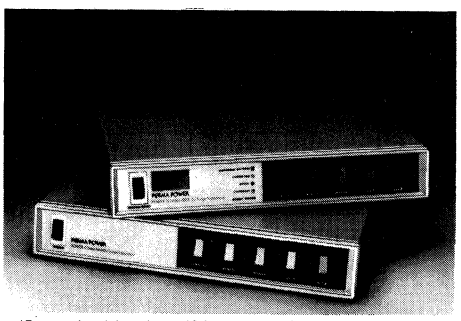
Perma Power Power Commander™ and Power Commander II™ Computer Power Control Center/Surge Suppressor

Control your computer and four peripherals separately or together. Protect against spikes, transients and noise with Perma Power's Extended Life Surge Suppressor.



15 amp circuit breaker • 12 ft. power cord
12" w x 2¼" h x 13" d

Power Commander Model RS562 and Power Commander II Model RS562-4

- Master on/off, plus individual control of up to five components.
- Protect against transient voltage surges and spikes.
- Reduce line noise caused by RF/EMI and static.
- Protect against overload . . . built-in circuit breaker.
- Five-year warranty.

Power Commander II extra features

- Protects modems and other equipment from voltage transients on the phone line.
- Monitors power line to warn of data-disturbing sags and surges; detects power line disturbances which go undetected by typical utility company and electricians' voltmeters.
- Protects equipment against burnout when electrical distribution accidents result in severe overvoltages.
- Provides safe discharge of static build up.

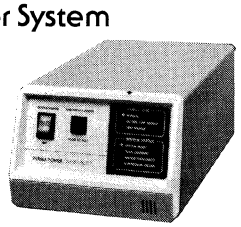
2. UL Std. 1449, Revisions effective July, 1987; 1.2 x 50 μs, 6000 Volt; 8 x 20 μs, 500 Amp.
3. ANSI Std. C62.41 (IEEE 587-1980); 0.5 μs, 100KHz., 6000 Volt, 200 Amp., ringwave.
4. 5 KW peak, 10 x 1000 μs, exponential. (Accepted industry test impulse for inductive load switching transients.)
5. Limited in 120 VAC distribution systems by wiring devices arc-over to 6000 Volts peak (ANSI Std. C62.41).

Perma Power Standby Power System

- For mini/micro computers, LAN and telephone equipment.
- Protects from all power line anomalies: blackouts, sags and brownouts, plus high line voltages, spikes, surges, and RFI/EMI noise.
- 40 minutes battery back-up for typical desk-top computers.
- Panel lights always tell system and power line status.
- Automatically prevents overload.
- Unique sensors permit start-up and reset only when line is safe.
- 2-year warranty.



Model SPS-500 Wt. 37 lbs.
8"h x 6"w x 16"d

SPECIFICATIONS

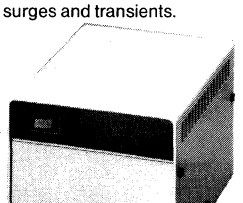
Backup Rating	500 VA (4.3 amps) Max.
Transfer Time	Less than 1 millisecond total sense and transfer.
Recharge Time	3.5 hours maximum.
Surge Suppression	Normal and common modes; let-through voltage less than 600 Volts; response time 1 nanosecond.
Noise Filtering	20 dB, 50 kHz-100 MHz.

Perma Power Power Conditioner

Protects your computer and peripherals from all power line problems short of total blackout.

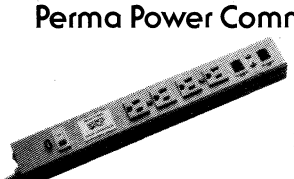
Perma Power Power Conditioners are high isolation ferroresonant transformers with supplementary surge suppression. They maintain 120 VAC constant output, even when power lines fall as low as 95 V or rise as high as 130 V, and protect against power line voltage surges and transients.

- Responds instantly to power line overvoltages and undervoltages; provides clean 120V regulated power to your computer and peripherals.
- Provides surge suppression comparable to Extended Life surge suppressors.
- Filters out RF/EMI noise.
- Protects against power interruptions up to 3 milliseconds.
- 250VA and 550VA models, to suit your desktop computer.



Model RV-250 Wt. 20 lbs. 5½" h x 6½" w x 9½" l
Model RV-550 Wt. 45 lbs. 6¼" h x 8½" w x 9½" l

Perma Power Communications Surge Suppressors



Protects your modem, computer, terminal or electronic telephone equipment from surges on the phone line and the power line.

Bypass high voltage lightning-induced and other transient voltage surges that occur on your incoming telephone line and power line to protect modems, terminals, computers, electronic telephones, and data transmission equipment.

Model RTD-410

- 12" case, 4 outlets; 7' jumper cord for connection to phone line
- Let-through Voltage 350 V max, Tele-Line; 600 V, Power Line
- Response Time 1 nanosecond

Model PD-200

- Tele-Line Suppressor only
- 3⅛" w x 4¾" h x 2¼" d

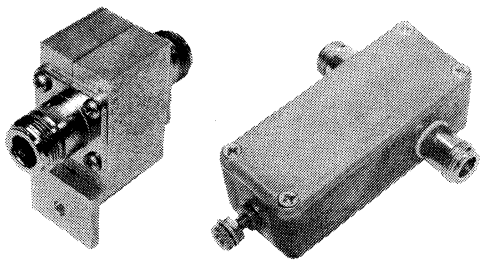
Nano-Fast Coax Protection from PolyPhaser Corporation



The patented PolyPhaser Impulse Suppressor Family is your best answer for protecting those vital communication links from lightning and static induced impulses (as well as high altitude nuclear blasts-EMP).

With over 44 models of patented Impulse Suppression, PolyPhaser Corporation makes more reliable, longer lasting, faster, better VSWR, lower loss and having less throughput energy to your valuable equipment than air-gap type arrestors. Designed using the time proven controlled gas ionization discharge tube, these family members can handle tens-of-thousands of amperes time after time. They are made from quality, highly conductive aluminum with 18-8 stainless fasteners and weather-coated for marine applications.

No sooner does a fuse go to work than it quits forever. But when a PolySwitch® device stops overcurrent, it can reset itself. And go on protecting your product again and again.

PolySwitch circuit protectors do it with technology so elegant it makes other approaches look burnt out. When a current overload hits its conductive polymer compounds, the PolySwitch PTC (positive temperature coefficient) device heats and turns nonconductive. Lower the current and the device's conductivity resumes. Along with your product's reputation for reliability.

PolySwitch PTCs accomplish all this without manual resetting or replacement. Thereby eliminating any chance of going from a bad fuse to something worse—the wrong fuse.

But solving your product's most common reliability problem is only the start. PolySwitch PTCs are also small, monolithic, board-mountable, and testable. And they're available in hundreds of optimized designs—for everything from rechargeable batteries to telephones to stereo speakers.

Finally, PolySwitch PTCs are from Raychem. Which means they're reliable, and backed by experience and support that never shuts down.

Call for a free sample and more information. Because this is one time your product can clearly benefit from on-again, off-again performance.

SIEMENS

Transient/Surge Protectors

Protect electronic and telecommunications equipment from harmful voltage spikes arising from lightning and inductive kickbacks.

Siemens offers the industry's most complete line of products:

Metal Oxide Varistors (SI0Vs)
Gas-filled Surge Voltage Protectors (SVPs)

BENEFITS:

- Eliminates Dangerous Voltage Transients
- Lowers Overall System Costs by Reducing Downtime and Maintenance Costs
- Improves Component and System Reliability
- Reduces Lightning Effects
- Reduces EMP/RFI Interference
- Promotes Personal Safety

WHAT IS AN SVP?

Surge Voltage Protectors (SVPs) are hermetically sealed gas discharge tubes consisting of two or three electrodes properly spaced by insulators, and filled with a rare gas. The main purpose of the Surge Voltage Protector is to provide a conductive path for unwanted and excessive transients, thereby preventing the transient energy and associated voltages from damaging equipment and components, and causing harm to personnel.

Siemens has the broadest line of transient protectors in the industry, resulting in the ability to provide cost-effective protection whether the transient energy is moderate or severe. Devices are available for both general-purpose application in electronic equipment and specific telecommunications applications governed by REA specifications.

It is the combination of current carrying capability, size and price that makes SVP's unique among transient protection components.

TYPICAL PROTECTION APPLICATIONS:

- Protection of semiconductors (diodes, transistors, thyristors, ICs etc.)
- Appliances connected to 110V or 220V AC.
- Industrial equipment vulnerable to transients on the AC power line (computers, traffic controls, motor controllers, etc.)
- Protection of equipment connected to telephone or signal lines, such as security systems, railroad equipment, fire alarm systems, etc.
- Arc suppression across relay and switch contacts.
- Protection of instrument input terminals from accidentally connected high voltages.
- Power control equipment for power distribution lines.
- GFI (Ground Fault Interrupters).

SIEMENS

SIOV's Metal Oxide Varistors for Transient Suppression

FEATURES:

- Nanosec. Switching Response Time, <15 nsec. with minimal lead length.
- High Transient Current Capability (up to 70,000 Amps).
- No Extinguishing or Follow-on Current Limitations.
- Small Size for Compact Designs.
- Wide Operating Temperature Range −40 to +85 degrees C.
- Compatible with Automatic Insertion. Tape and reel configuration available on SO5 and SO7 series. Contact marketing for details.
- Excellent Clamping Characteristics.
- Low Standby Power Consumption.

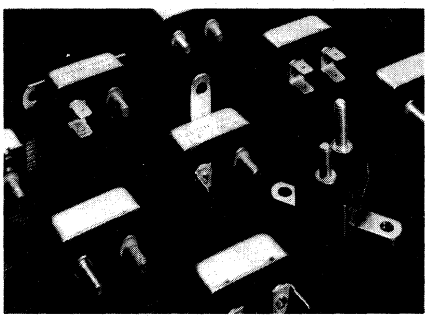
COOPER INDUSTRIES **USD**

Circuit Protection Devices

"Shortstop" Circuit Breakers 12 & 24 volts

"Shortstop" low voltage DC Circuit Breakers are rapidly replacing fuse installations in automotive applications, appliances and other direct current circuitry. The benefits of these breakers include automatic reset and modified reset capability, permanence of installation and a low rate of replacement in contrast to fuses.

"Shortstop" Circuit Breakers operate on the positive principle of bimetallic snap action. Overcurrents will heat the bimetal and open the breaker. In the automatic reset version (Type I), the



breaker will close when the bimetal cools. In the modified reset version (Type II), the built-in heaters heat the air inside the breaker and keep the bimetal from cooling, therefore keeping the circuit open until the voltage source is removed. Using these circuit breakers, the circuit is actually interrupted. In contrast, the circuit would be permanently broken if a fuse had been employed.

The many benefits of the USD Shortstop Circuit Breaker make it a valuable alternative to fuse installations.

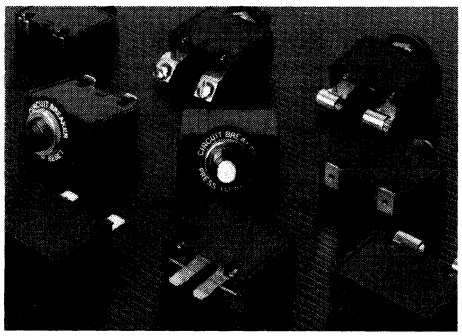
Circuit Protection Devices

Manual Reset Circuit Breakers
174XX Series

Automatic Reset Circuit Breakers
171XX Series

USD thermal circuit breakers have been designed as an alternative for 3AG fuses. They offer you the advantage of resettable circuit protection, in either manual or automatic formats.

USD circuit breakers can be used in many electrical applications to protect an electric circuit, replacing fuses, except in certain solid-state situations.



Applications include: electronic video games, multiple outlet strips, industrial controls, appliances, battery chargers, recreation vehicles, trucks, buses, tractors, motorcycles, etc.

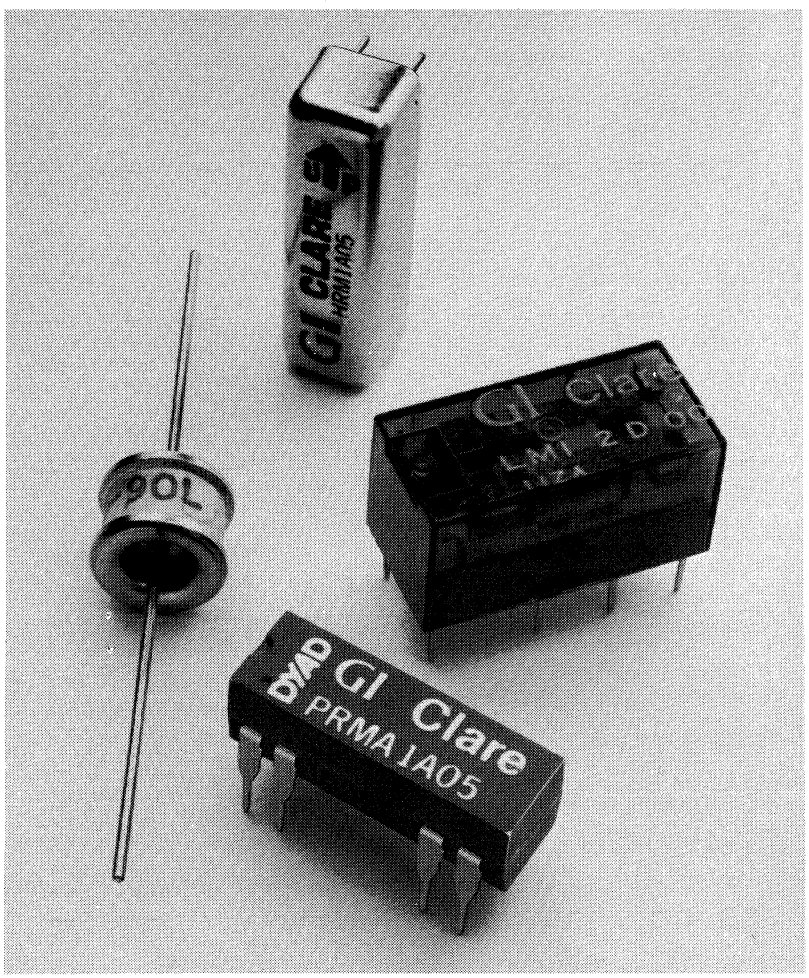
The Clare Division Family Of Quality Products.

Reliability Through Technology.



Quality in the Clare Tradition.

Clare Division has earned the position of being the world's largest supplier of mercury-wetted and dry reed relays.

This leadership position has not come easy, but has come as a result of Clare Division's total commitment to products offering improved technology through innovation . . . and to the quality and performance you expect from the leader in switching technology.

Couple this with high volume manufacturing capabilities, and you get superior quality products, at competitive prices, with fast off-the-shelf delivery.

Call your local Clare Representative or authorized Clare Distributor for more information about:

- Mercury-wetted contact relays
- Dry reed relays
- Electromechanical relays
- Surge arresters

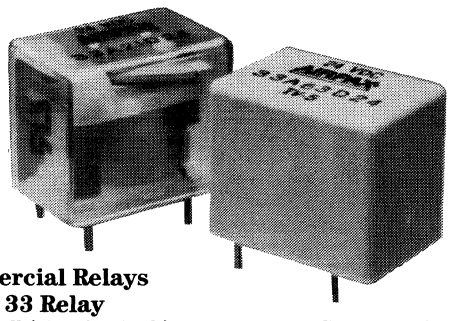
RELAYS AND SOLENOIDS

Airpax relays and solenoids are specified around the world for hundreds of PC board applications. In standard or custom designs. Contact Airpax Company, Husky Park, Frederick, MD 21701. (301) 663-5141. A division of North American Philips Corporation.

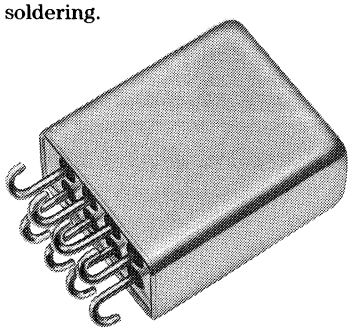


Commercial Relays
Series 33 Relay

This small (1/2 cubic inch) relay is especially suited for use as an output device for remote control and cable television, office equipment, appliances, door openers, automotive controls and various types of instruments. It offers complete isolation from noisy environments and can also handle high-inductive and tungsten filament loads. Coil voltages from 3 VDC to 48 VDC may be specified. Sensitive models, requiring as little as 180 mW of coil power, are available. Terminals are designed for PC board installation.

Features:

- Small size — 1/2 cubic inch.
- Sensitive — as little as 180 milliwatts coil power.
- TV 5 rating available.
- Approval — ᵁᴸ Ⓒ
- Inexpensive — typically under $1.00.
- 4KV Dielectric available.
- Sealed for wave soldering.

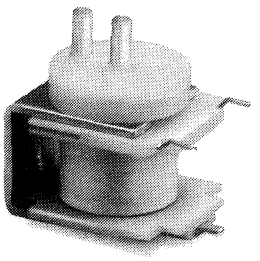


Military Relays
Series 07 — Crystal Can

Developed specifically for the aerospace industry. The standard unit features a solder terminal arrangement, 26.5 VDC coil voltage and 10 amp contacts.

Features:

- Qualified to MIL-R-5757, M 5757/23, MS 27245, MS 27247 and MIL-R-6106.
- Withstands severe vibration and shock.
- DPDT Contacts.



Custom Solenoids
Series 7150 — Vacuum Solenoids

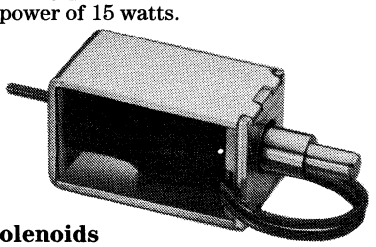
Applications for these custom solenoids include control functions for vacuum operated climate control modules and vacuum operated cruise control for the automotive industry. Our designers will work with you to develop a durable low cost package that will meet the requirements of your most difficult applications.

Features:

- PC board mounting available.
- Leakage rate of 10 cc/min. maximum @ 20 in. Hg vacuum to as low as −20°C.
- Sensitive: as little as 85 milliwatts coil power consumption.
- Duty cycle: continuous.
- Ambient temperature range: −40°C (−40°F) to +125°C (+257°F).

Custom Solenoids
7019 Solenoid

This direct Current Tubular Pull Type Solenoid is designed to provide up to 50 ozs. of force with a maximum stroke of .437″. Actual usable force will depend on the stroke and power level. Coils are available from 6 VDC to 115 VDC with a continuous duty power level of 5 watts and an intermittent (25%) duty power of 15 watts.



Custom Solenoids
7007ED33-0013 D.C. Box-Frame Push-Type Solenoid

Provides up to 20 ozs. of force with a maximum stroke of .200″. Actual usable force will depend on the stroke and power level. Coils are available from 6 to 115 VDC with a continuous duty power level of 3.0 watts and an intermittent (25%) duty power level of 9.0 watts.

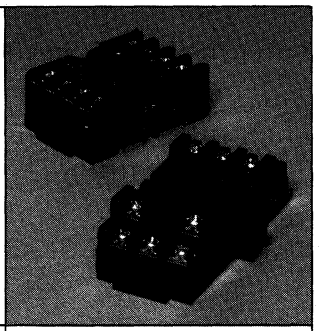
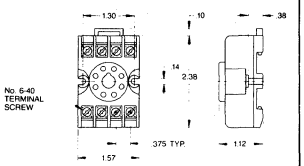
INDUSTRIAL RELAY SOCKETS

SNAP TRACK MOUNTED

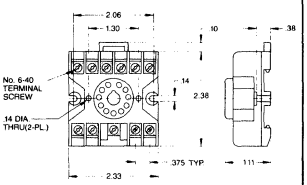


Construction	Self-extinguishing, black polycarbonate body with integral molded barrier.
Terminals	Combination slot/phillips head screws and captive self lifting terminal clamps.

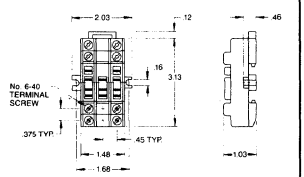
H50SL608S
8-pin octal socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



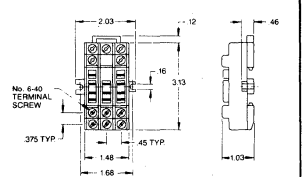
H50SL611S
11-pin magnol socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



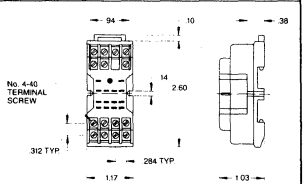
H50SL708S
8-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL711S
11-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL715S
14-pin blade type socket. Rating: U/L and CSA, 5 amperes, 300VAC. Wire sizes: up to #14 AWG. Terminals: pan head 4-40 slot.



Mounting Track	Standard Track SL601 and SL602 will accept either regular and snap track sockets.

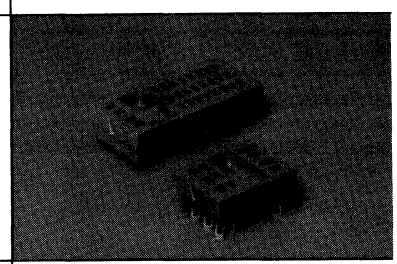
Cradle Socket and Accessories



Construction

Body molded of glass filled flame retardant polyester (PBT). Meets UL94VO and is fungus resistant.
One piece contact/terminal construction of berylium copper.
Selectively plated gold over nickel on contact area. 60/40 Brite-Tin on terminal area.

Arrangement

Number of Poles
2 = 2-pole socket
4 = 4-pole socket
6 = 6-pole socket
8 = 8-pole socket

Terminal/Mounting

Type of Terminal
1 = Solder lug/chassis mounted
3 = Standard PC in-line mounting
5 = PC mounting .100″ x .100″ grid throughout
7 = PC mounting .100″ x .100″ grid in contact
.100″ x .150″ grid in coil

Accessories

Socket Assemblies
10 = Socket only
11 = Socket with ground spring installed
12 = Socket with ground spring installed and retainer
13 = Socket with retainer

eem MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

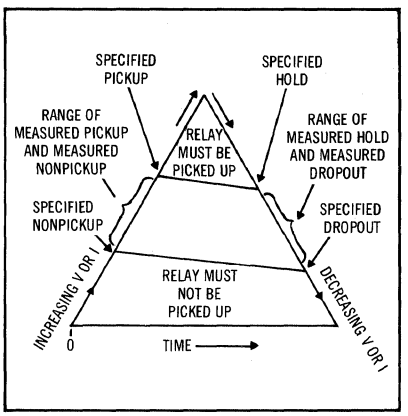
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

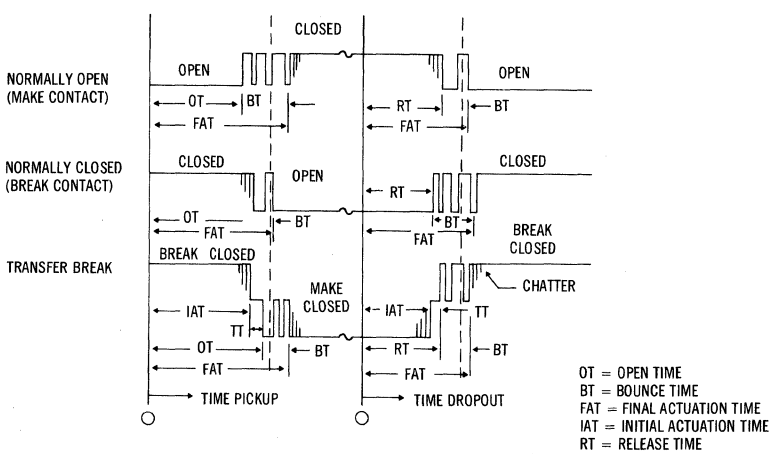


Fig. 2. Typical time vs. current (non-inductive load)

REED RELAYS

From American Relays, Inc.

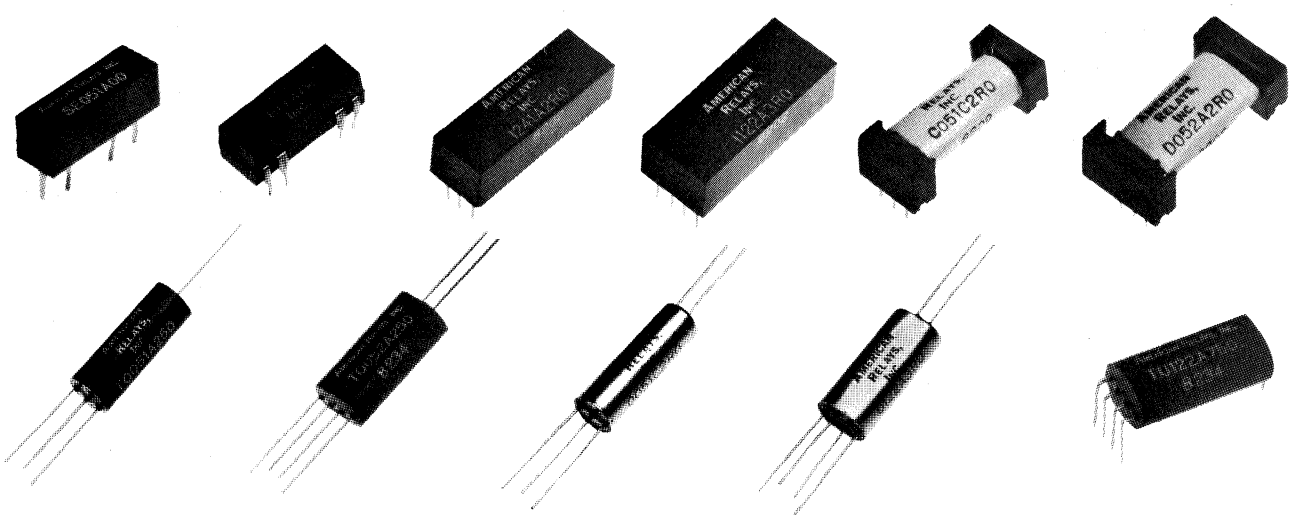
Whether you're looking for a **REED RELAY** that will meet FCC surge requirements, or a sensitive Low-Level **REED RELAY** to switch ATE signal...

AMERICAN RELAYS HAS IT ALL

High Quality — Low Price — On time Delivery

Dry and Mercury Wet contacts
With High Voltage, High Power or Low Level switching

Standard or Specified to YOUR Application,
AMERICAN RELAYS can Build the **REED RELAY** you need.



American Relays, Inc., offers a comprehensive line of super-reliable reed relays. American Relays, Inc., 100% tests all reed switches **AND** 100% final tests all reed relays. We are specialists in **"THE REED RELAY INDUSTRY".**

PACKAGE STYLES

- **Encapsulated**
- **Open Frame**

REED RELAY INDEX

RELAY TYPE	DESCRIPTION	TERMINAL GRID	CONTACT FORMS AVAILABLE POLES	PACKAGE
ENCAPSULATED	Epoxy encapsulated. Total Environmental protection. Wide range of contact forms and coil voltages are available.	1.000 × .100 1.000 × .150	Form A (1 to 6) Form B (1 & 2) Form A/B (1 & 2) Form C (1 to 4) Form A Latching (1 & 2)	
OPEN FRAME	Durable glass filled polyester bobbin construction. Switch and coil leads are securely held with epoxy potting. Cost efficient plug-in type reed relay.	1.000 × .100 1.000 × .150	Form A (1 to 4) Form B (1 & 2) Form C (1, 2, 3) Form A Latching (1)	
AXIAL	Rugged axial lead tubular relay. Nickel plated metal jacket provides magnetic shield. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1 & 2) Form A Latching (1)	T SERIES	Most economical, high performance tubular relay. Completely sealed in a flame retardant plastic tube. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1)	HIGH POWER	50W contact rating. Available with encapsulated, open frame and axial lead packages.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	HIGH VOLTAGE	25W, 1000 VDC switching. 2500 VDC breakdown voltage. Miniature size. Available with encapsulated, open frame and axial lead package.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	
MERCURY WETTED	Mercury wetted contact relay. 50W contact rating. Extremely long life expectancy. No contact bounce. Stable low contact resistance.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2) Form C (1 & 2)	
DIP RELAYS	Epoxy molded DIP reed relay. Logic compatible. Stable contact resistance. Fits all standard DIP sockets and is automatic insertion compatible.	DIP .300 × .100	Form A (1 & 2) Form B (1) Form C (1)	SIP RELAYS	High quality economical Single-In-Line package reed relays. Open frame and encapsulated packages. Various contact ratings are available.	SIP .2 × .4 × .2 .2 × .2 × .2	Form A (1) Form B (1) Form C (1)	SPECIAL RELAYS	Let us design reed relays for your application. Special relays are cost competitive with standard relays in most cases. Consult the factory or your local representative with your specific requirements.

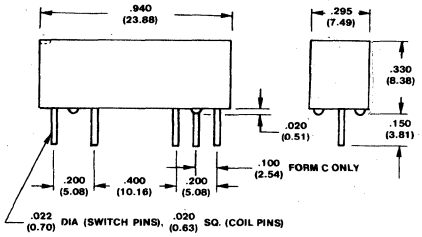
REED RELAYS

SINGLE-IN-LINE SERIES (S SERIES)



- High Quality Low Cost Single-In-Line
- Sturdy Bobbin and Encapsulated in a Polyester Case

GENERAL SPECIFICATIONS

Contact resistance: .150 ohms max.
Operate time: 0.5 ms typ.
Release time: 0.2 ms typ.
Bounce time: (Form A & B) 0.25 ms typ. (form C, NO/NC) 0.5/1.5 ms typ.
Insulation resistance: 10^{10} ohms min. (form A), 10^{9} ohms min. (form C)
Operating temperature: −40° to +85°C
Vibration: 20G (10 — 2000 Hz)
Shock: 50G @ 11 ms duration

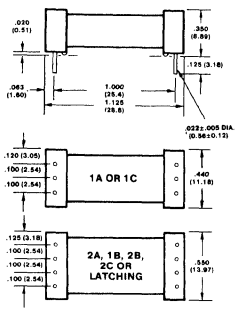
REED RELAYS

OPEN FRAME REED RELAYS (SERIES C AND D)



- High Performance, Low Cost Open Frame, PC Mount Dry Reed Relays
- Popular 1.000″ x .100″ or 1.000″ x .150″ Pin Spacing
- Rigid Polyester Relay Body with Epoxy Filled Ends

Specifications	Form A/B	Form C
Power (Resistive Load)	10 Watts	3 Watts
Voltage (Max. Switching)	200 VDC	28 VDC
Voltage (Min. Breakdown)	300 VDC	200 VDC
Current (Max. Switching)	0.5 Amps	0.25 Amps
Current (Max. Carry)	2.0 Amps	1.2 Amps
Capacitance (Typical)	0.2 Pf	0.8 Pf.
Contact Resistance (Max. Initial)	0.2 Ohms	0.2 Ohms
Operate Time (Typical)	0.5 ms	0.5 ms
Release Time (Typical)	0.2/0.5 ms	0.5 ms
Insulation Resistance (Min.)	10^{10} Ohms	10^{9} Ohms
Life (Low Level)	100 x 10^{6} Oper.	50 x 10^{6} Oper.
Life (Rated Load)	10 x 10^{6} Oper.	5 x 10^{6} Oper.
Temperature	−40°C to +85°C	
Vibration	20G to 2000 Hz	
Shock	50G @ 11 MS Duration

REED RELAYS

HIGH POWER SERIES

- Miniature High Power Reed Relays. 50W Contact Rating.
- Open Frame, Encapsulated and Axial Lead Packages are Available

HIGH VOLTAGE SERIES

- Miniature High Voltage Reed Relays
- Meets FCC Part 68 Voltage Breakdown Requirement
- Open Frame, Encapsulated and Axial Lead Packages are Available

MERCURY WETTED SERIES

- Miniature Reed Relay with Mercury Wetted Contacts
- No Contact Bounce
- 50 Watts Contact Rating
- Open Frame, Encapsulated and Axial Lead Packages are Available

Specifications	High Power	High Voltage	Mercury Wetted	
			Form A	Form C

* Mercury wetted relays should be mounted within ±30° from vertical position.

AXIAL LEAD SERIES

- Encapsulated Axial Lead Reed Relays
- Axial Leads Allows Various Mounting Configurations.
- Total Environmental Protection
- Nickel Plated Metal Tube Provides Magnetic Shielding
- Formed Leads are Also Available
- 1 Form A, 2 Form A, 1 Form B, 1 Form C and 2 Form C Types are Available
- Various Contact Ratings Available
- Contact American Relays, Inc. for Specific Part Numbers and Additional Options

SPECIAL RELAY DESIGN

American Relays, Inc. is a custom relay specialist. Our major objective is to design and build parts that fulfill special requirements for the reed relay user.

Our facility is designed and equipped for prompt, systematic processing of samples, prototype and production orders.

GENERAL PURPOSE RELAYS

On the following pages you'll find summary specifications for our most popular relays. For additional technical information on these relays, or those marked (*), which are not covered here, call (800) 854-8474. In California call (714) 660-1670. For ordering information, call local sales office listed in the eem yellow section.

AMERICAN ZETTLER, INC.
16881 Hale Avenue, Irvine, California 92714 (714) 660-1670 • Telex 67-8472, FAX 714-660-0293

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
ABS acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CAMAC computer automated measurement and control
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

AT&T

ANALOG
High-Voltage Solid State Relays

Description

AT&T's multi-purpose, solid-state relays (MSR) are low-cost bi-directional switches that can replace mechanical relays in many applications. These relays are rated at 1500 Vrms of input/output isolation and are available in a variety of package configurations. Maximum output ratings to 350 volts per pole with maximum current loads to 200 mA are standard features of these devices. Typical applications are telephone switchhook, high-voltage testers, industrial controls, triac drivers, and isolation switching. The MSRs use GaAlAs LEDs to optically couple the control signal to a dielectrically isolated, high-voltage integrated circuit. The LH1056AT/AAB/CT and LH1061AB/AAC are UL approved. UL approval for the LH1085AT is pending.

Features

- Low ON-Resistance
- Clean, bounce-free switching
- High solid-state reliability
- Low power consumption
- Noise-free operation
- High-surge capability
- dv/dt typically better than 500 V/μs
- No electromagnetic interference

Typical Electrical Characteristics T_A = 25°C

TO-5 RELAY

SIZE:

- Diameter
  - Enclosure (max) — .335 inches (8.51)
  - Base (max) — .370 inches (9.40)
- Height (max): .280 (7.11)

CONTACT RATING/ ARRANGEMENT:

- DC Rating:
  - Resistive — low level to 1 amp / 28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)

COIL VOLTAGES:

Coil Voltages (Nominal VDC)	Coil Resistance (ohms +/- 10% at 25°C)
5.0	50
6.0	98
9.0	220
12.0	390
18.0	880
26.5	1560
30.0	2500

FEATURES:

- Built in accordance with MIL-R-39016/9: other QPL versions pending
- All welded construction, hermetically sealed
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

Military Grade/Full Size Relays

RELAY	SIZE (Case Size)	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
(3 Amp Series) FW 	H- .875 (22.23)* D- .400 (10.16) W- .800 (20.32)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-5757/10 (Request Data Sheet FW-85)
(5 Amp Version) FW5A 	H- .875 (22.23) D- .400 (10.16) W- .800 (20.32)	• Low Level to 5.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • 5.0 Amp version of FW • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-5757 (Request Data Sheet FW-85)
LFW (Latching Series) 	H- .900 (22.86) D- .400 (10.16) W- .800 (20.32)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • One and two coil operation • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-5757

Military Grade/Other Relays

153/95 Coaxial Relays	H- .875 (22.23) D- .400 (10.16) W- .800 (20.32)	• RF Contacts— up to 75 Watts • 1 Form C, 2 Form C	12.0 to 26.5 VDC	• Hermetically sealed enclosures • RF switch to 1000 MHz • Meets applicable portions of MIL-R-5757 and MIL-S-3928 • Terminates with coax cable or LEPRA/CON connectors (Request Data Sheet 153/95-85)
PF 10 Amp Power Relay 	H- 1.300 (33.02) D- .515 (13.08) W- 1.075 (27.31)	• Low Level to 10.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.0 to 115.0 VDC	• Welded, hermetically sealed enclosures • Very low contact resistance • Package volume .72 cubic inch • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-5757/23 & 28 (Request Data Sheet PF-85)
MFW ⅙th Size Relay 	H- .410 (10.41) D- .230 (5.84) W- .500 (12.70)	• Low Level to 1.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	3.5 to 53.0 VDC	• Hermetically sealed enclosures • Low contact resistance • Total volume only .046 cubic inch • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/34, L & M level (Request Data Sheet MF-84)
SF 40 MW Sensitive Relay	H- 1.281 (32.54) D- .400 (10.16) W- .800 (20.32)	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	1.8 to 40.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • 40 milliwatt sensitivity • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-5757/13 (Request Data Sheet SF-85)
RD 4&6 Pole Relays 	H- 1.34 (34.04) D- 1.14 (28.96) W- 1.06 (26.92)	• Low Level to 2.0 Amps • 4 Form C, 6 Form C *mm	26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Optional all-welded construction • 100 G Shock • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-5757/1 & 7 (Request Data Sheet RD-83)

Commercial PCB Relays

RELAY	SIZE (Case Size)	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
 **MM** **(2 Amp Series)**	H- .410 (10.41)* D- .394 (10.0) W- .394 (10.0)	• Low Level (microwatts) up to 2.0 Amps 24 VDC • 2 Form C (DPDT) 1 Form C (SPDT) 1 Form A (SPNO) 2 Form A (DPNO)	3 VDC 5 VDC 6 VDC 12 VDC 24 VDC 48 VDC	• Bifurcated contacts gold clad silver-palladium. • Rated for low level to 2.0 Amp switching. • Mount six relays per square inch. • Long Life—Mechanical 100 million ops. • High shock/high vibration resistance. • .1 inch (2.54 mm) footprint. • Fast operate and release time. • Low contact resistance. • UL recognized. File #E90612 • Completely sealed (Request Data Sheet MM-87)
 **MN** **(Single PoleVersion)**	H- .390 (9.9) D- .287 (7.3) W- .406 (10.3)	• Low Level (microwatts) up to 1.0 Amps 24 VDC • 1 Form C (SPDT)	3 VDC 5 VDC 6 VDC 9 VDC 12 VDC 24 VDC	• Single Cross Bar Ag Pd Gold Cap • Completely Sealed • Contact Rating Low Level to 1.0 Amp @ 28 VDC • Meets FCC Part 68 1500 V on Request (Request Data Sheet MN-87)
 **MD** **(Dual in-line)**	H- .460 (11.7) D- .381 (9.7) W- .787 (20.0)	• Low Level (microwatts) up to 2.0 Amps 24 VDC • 2 Form C (DPDT)	5 VDC 6 VDC 9 VDC 12 VDC 24 VDC 48 VDC	• Two form C bifurcated contacts gold clad silver-palladium. • Standard and high sensitivity models. • Completely sealed. • Contact rating from low level to 2.0 Amps switching—3.0 Amps carry. • Super clean construction—inert gas filled. • Designed for low contact resistance and contact resistance stability during life. • UL recognized. File #E90612 • Conforms to FCC Part 68, 1500V peak • CSA approved #LR65354-1. (Request Data Sheet MD-85)
 **MS** **(Single Pole Series)**	H- .413 (10.5) D- .413 (10.5) W- .606 (15.4)	• Low Level (microwatts) up to 2.0 Amps 24 VDC • 1 Form C (SPDT)	3 VDC 5 VDC 6 VDC 9 VDC 12 VDC 24 VDC 48 VDC	• High reliability switching at low cost. • Standard and high sensitivity models. • Gold clad silver-palladium contacts. • Low contact resistance. • High shock and high vibration resistance. • Super clean construction—inert gas filled. • Low level to 2.0 Amps contact switching—3.0 Amps carry. • UL recognized. File #E90612 • CSA approved #LR65354-1. (Request Data Sheet MS-85)
 **MP4** **(4 Pole Flat Pack)**	H- .45 (11.5) D- 1.20 (30.5) W- .96 (24.5) *mm	• Low Level (microwatts) up to 2.0 Amps 24 VDC •4 Form C(4PDT) 4 Form D(4PDT)** [2 Form C(DPDT) [2 Form D(DPDT)** **make before break	5 VDC 6 VDC 9 VDC 12 VDC 24 VDC 48 VDC	• Low profile. • Stands only .45 inches (11.5 mm) high. • Long life: 100,000,000 mechanical operations. 1,000,000 operations at 1.0 Amps. • Environment sealed. • Designed for low contact resistance and contact stability during life. • Contact rating: From low level to 2.0 Amps switching—3.0 Amps carry. • UL recognized. File #E90612. • Conforms to FCC Part 68, 1500V peak • CSA approved #LR65354-1. (Request Data Sheet MP-4-86)

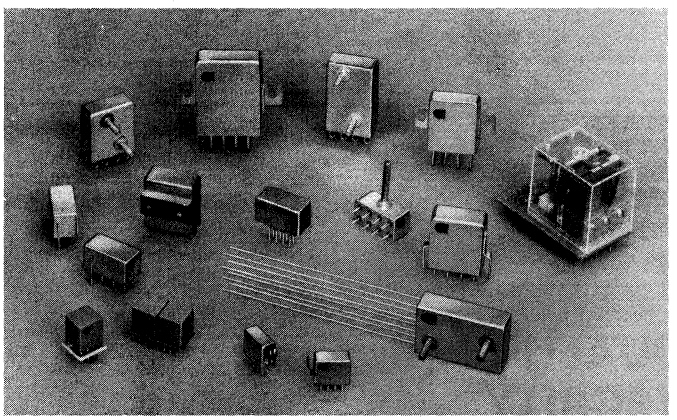
Custom Built Relays

- Build to Print
- Custom Made
- Unique Applications
- Replacement/Alternative Design
- Specialized Testing
- RF Switching
- Industrial/Commercial/Military
- High Shock
- High Vibration
- Extreme Temperatures



Application Engineering

Communications Instruments Application Engineering Department can provide technical and design assistance in the selection of the ideal relay for your application. This includes design modification, prototypes or special mounting configurations. Our technical staff is ready to help you get the most for your investment in Communications Instruments broad line of relays.

Relays Qualified to MIL-SPEC

CII relays are qualified to the following Military Specifications for electromechanical relays.

MILR39016/6	Half size, DPDT, low level to 2 Amps
MILR39016/22	Half size, DPDT, low level to 2 Amps, bifilar coil
MILR39016/34	One sixth size, DPDT, low level to 1 Amp
MILR39016/40	Half size, 4PDT, low level to 2 Amps
MILR39016/44	Half size, DPDT, low level to 2 Amps, 100/125 MW
MILR39016/45	Half size, DPDT, low level to 2 Amps, latching
MILR5757/1-026	Full size, 6PDT, low level to 2 Amps
MILR5757/7-003	Full size, 4PDT, low level to 2 Amps
MILR5757/10	Full size, DPDT, low level to 2 Amps

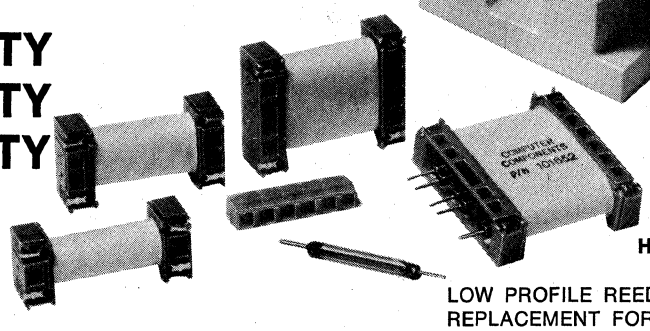
Introducing
"REEDLAYS"
The Reed Relay Division of C.C.I.

- OPEN STYLES
- HIGH VOLTAGE
- MOLDED IC COMPATIBLE
- EPOXY OR METAL HOUSINGS
- REED RELAYS TO MIL. SPECS.
- FULLY OR PARTIALLY ENCAPSULATED
- CHOICE OF 5 DIFFERENT FORM A & 4 DIFFERENT FORM C SWITCHES

QUALITY INTEGRITY RELIABILITY

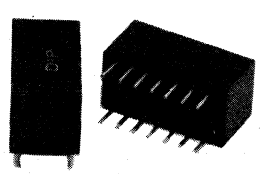


HP (Also 101, 201, 301, & 401 Series)

LOW PROFILE REED RELAY, MECHANICAL & ELECTRICAL REPLACEMENT FOR IBM 766 SERIES PLUG-IN, REPLACE REEDS, NO TOOLS-NO SOLDERING

NOW SPECIALIZING IN ALL DISCONTINUED TYPES AND BRANDS OF MERCURY REED RELAYS

Introducing our "D" series, fully moulded D.I.P. compatible relay. Also formed surface mounting.



DIP SERIES—
UP TO 6 FORM "A" OR 4 FORM "C".

SPECIAL DESIGNS

In view of the difficulty in offering a product line that is complete enough to cover every application and physical layout, Computer Components, Inc. maintains special engineering and design facilities to provide the project or design engineer with REED RELAYS specifically tailored to his particular requirements.

COTO REED RELAYS IMPROVE PERFORMANCE ACROSS THE BOARD.

Our chart proves it! We're committed to providing you with the most up-to-date, reliable relays possible. We're also committed to giving you whatever technical and applications support you need.

We're known for consistent products because of our advanced manufacturing capabilities that include extensive automation, well-established SPC procedures and computer-assisted product testing.

We also do more reed relay R&D than any other manufacturer in the world to assure that the relays we offer you tomorrow will keep pace with the requirements of your products and systems.

Find what you need on the chart and call one of our distributors. If you have a special requirement, call us in Providence at (401) 943-2686.

COTO CORPORATION

Features		Small size, 50 Ω transmission line switching. Ultra-fast switching time (500 μsec typ.). Low power (150mW). Electrostatic coaxial shields available.	High voltage & power available. Telephone switching. Electrostatic shielding. Low power.	Full magnetic shielding with DIP footprint. 500 μsec switching time. Low power. Electrostatic shielding. Diode option.	Form C, Form A mercury-wetted in DIP footprint. Diode option. 1 Amp switching.	Reed Relay with electromechanical footprint. Hermetically-sealed contacts. Electrostatic shield.	Low thermal EMF capabilities 200 nV-5 μV. High isolation 10^{12} Ω typ. High common-mode rejection.	Electrostatic & magnetic shields. Flame retardant case. Fully sealed. Low power. Low cost.	Electrostatic shield available. Diode available. 1.0"x0.1" grid.	Automated assembly methods. Diode available. Thermoset epoxy on lead-frame construction. 0.200" NARROW. Electrostatic / coaxial shield.	50Ω transmission line switching. Electrostatic / coaxial shield. Automated SMT construction. Thermoset epoxy on lead-frame construction. "J", gull wing, axial and radial terminals available.

Common features: Fully encapsulated, full magnetic shielding except for 9000, 9200, wave solderable, pc mountable, impervious to both aqueous and chemical cleaning.

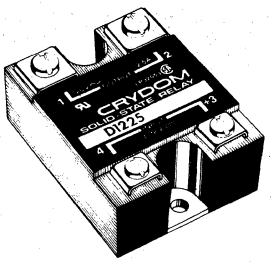
CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES 1



2.5 TO 90 AMP, 120, 240 AND 480 VAC SCR AC OUTPUT, PANEL MOUNT SOLID-STATE RELAYS

These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available.

AC Control Models—SCR Output

Crydom Model No.	Line VAC (47-63 Hz)	Max. Load Current, Amps (RMS)	One-Cycle Surge, Amps (PK)
A1202	24-140	2.5	22.5

8 TO 90 AMP, 48-530 AND 48-660 VAC AC OUTPUT SOLID-STATE RELAYS 1000-1200V BLOCKING

The highest power rated SSRs, up to 59 kw, 4000V of isolation with the highest available blocking voltages (1.2 KV) below which the SSRs will not mistrigger. The wide margin between operating and blocking voltages permits the proper use of transient suppression (MOV) devices on the 480V line. Features include high dv/dt and zero voltage switching.

General Specifications
Control Signal Range "C", "WD" 4 to 32 VDC

7.0 TO 40 AMP, 100 TO 500 VDC CMOS DC INPUT SOLID STATE RELAYS

This new Crydom series of DC power SSRs incorporates a power MOSFET as the output device in the classic Crydom package. The input can be driven from most logic circuits, requiring less than 1.6 mA at 5 VDC.

General Specifications
Control Signal Range . . . . . .3.5 to 32 VDC
Input Current @ 5 VDC . . . . . .1.6 mA max.
Isolation Voltage 50/60 Hz . . . .2500 VRMS
Operating Temperature Range. 0°C to 80°C

10 TO 75 AMP, 120-240V DC CONTROLLED, AC OUTPUT SSRs FEATURE IC FIRING CIRCUITS TO BOOST RELIABILITY AND PERFORMANCE

Combining integrated circuit technology and the proven Crydom series 1 high power dissipation output system results in superior SSRs. The reduction of control circuit components from 22 to 3 greatly increases life and reliability.

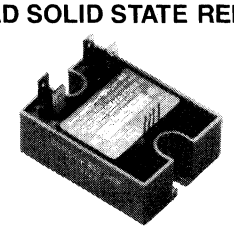
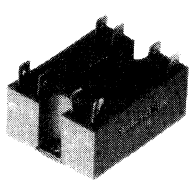
DUAL & QUAD SOLID STATE RELAYS 24-280 VAC

NEW





These space saving and cost saving "dual" and "quad" series provide two (2) or four (4) totally independent AC output solid state relays in a single Series 1 package. The "dual" types employ inverse parallel SCR outputs and are available in 25 AMP and 40 AMP models. The "quad" types have triac outputs. Protection is provided by an internal dv/dt snubber network across the output switch which restricts the rate of rise of most voltage transients to within acceptable limits. Features include 2500VRMS optical isolation, zero voltage turn-on and zero current turn-off of the load. Random voltage turn-on units (– 10 suffix) are also available for phase control applications.

These series are ideal when multiple SSR's are required for interfacing between the logic output of TTL, HTL, MOS or microprocessor circuits and AC loads such as motors, heaters, lamps, solenoids and transformers.

25, 40 AMP Dual-SCR Output 20 AMP Quad-Triac Output

General Specifications

Isolation Voltage: . . . . . .2500 VAC
Temperature Range:
Storage . . . . . – 40°C to 120°C
Operating: . . . . . – 30°C to 80°C
Weight: . . . . . .3.5 oz. (98G) Max.
Control Signal Range . . . . . .4-15 VDC
Must Operate Voltage . . . . . .4 VDC Max.
Must Release Voltage . . . . . .1 VDC Min.
Input Current . . . . . .34 mADC Max.
Off-State dv/dt . . . . . .200V/usec Min.

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

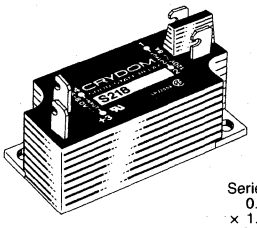
SERIES 2

8 AMPS, 120 AND 240 VAC AC OUTPUT, PANEL MOUNT SOLID-STATE RELAYS

The Crydom Series 2 solid-state relays combine small size, zero voltage switching and high current rating in a package designed for heat sink or panel mounting. Standard 0.187" push-on terminals allow quick connection and are positioned to provide maximum isolation between control and power circuits.

General Specifications

Control Signal Range. . . . . .3.5 to 8 VDC
Control Signal Range"221C" 3.5 to 7 VDC
Must Operate Voltage . . . . . .3.5 VDC max
Must Release Voltage . . . . . .1 VDC min



Series 2
0.85" (21.59 mm)
× 1.75" (44.5 mm)
× 0.83" (21.08mm)

SOLID-STATE RELAY HANDBOOK

WITH APPLICATIONS

BY ANTHONY BISHOP

This comprehensive 223 page reference to the use and applications of Solid-State Relays (SSRs) incorporates a detailed tutorial on what SSRs are and why they are used in various industrial applications. In its pages you will find:

- A thorough introduction to solid-state relays
- Descriptions of various coupling methods
- SSR operation and parameters
- Coverage of different drive methods
- Thermal considerations
- Applications of SSRs in microprocessor-based equipment for industrial machine control
- A cross reference of types and manufacturers
- A handy glossary of terms

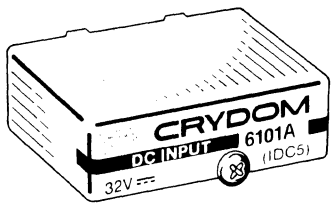
SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES 6

AC AND DC MICROPROCESSOR INPUT/OUTPUT MODULES



For electrically clean, photo-isolated, noise-free interfacing between logic level programmable controllers, microprocessors and computerized machine controls and power level loads.
Input modules accept power level signals and convert them to logic level signals. Output modules accept logic level signals to switch AC or DC loads to 3.5 Amps.

General Specifications—All Models
Dielectric (Input/Output) . . . . . .4000 VRMS
Isolation Resistance (Input/Output @ 500 V) . . . .10^{10} Ohms

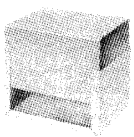
Double Pole
L = 3-11/32
W = 2-1/2
H = 2-3/8

Heavy duty power relay for industrial control applications. Particularly suited for motor controls, heater loads, welder loads, and other power switching applications. Molded nylon coil resists fungus and moisture. Long life, rugged construction. Rating: 30 amps, 1-1/2 hp, 120/240 VAC. Heavy duty screw-type terminals. Mounting: two 3/16" holes on 1-7/8" centers. Listed under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA listed (File No. 20690).



B-5 DUST COVER
L = 5
W = 4
H = 3
S/N 20257-80

Sealed knock-out holes for standard conduit fittings. Relay mounts on pre-drilled base. Constructed of Aluminum. Snap action cover release. Accommodates relay series 900.

900 SERIES

Auxiliary Switch Models are Also Available.

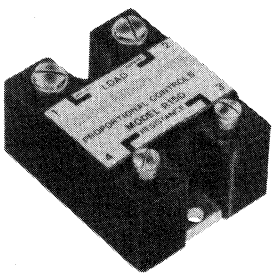
RELAYS & COIL PRODUCTS

RELAYS

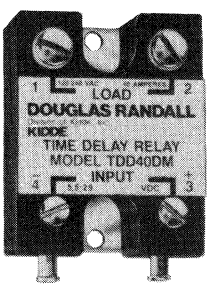
PROPORTIONAL CONTROL



- R series for variable AC control with variable resistor input
- An additional module to provide variable AC control with 0-10 VDC input
- RD series for variable AC control with 0-10 VDC input in one module

See EEM page **B•1409**

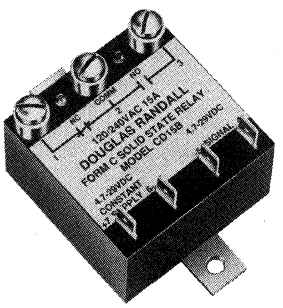
TIME DELAY



- Up to 40 amp operation
- Total solid state unit
- Timing set by external resistor from 300 ms to 23 min. duration on standard units
- Full opto-isolation, zero crossover, integral heat sink features

See EEM page **B•1407**

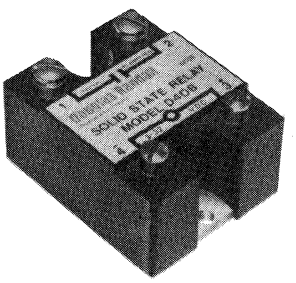
FORM C RELAY



- True Form C Function
- Full Solid State Design Incorporates Opto Isolation, 0-Voltage Switching, Integral Heat Sink
- LED Indicators of Switching Status
- Models Available for Both AC and DC Loads

See EEM page **B•1406**

SOLID STATE RELAY



- Full line of standard AC output relays UL recognized
- DC output relays to 8 amp and 500V
- Opto isolation, zero voltage switching

See EEM page **B•1408**

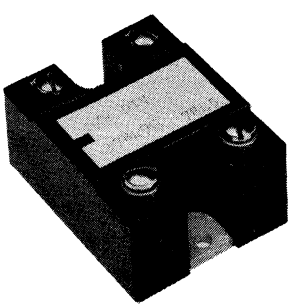
SPECIAL DESIGNS

Douglas Randall makes custom designed relays to solve difficult problems. A few models are shown below to illustrate the variety available.

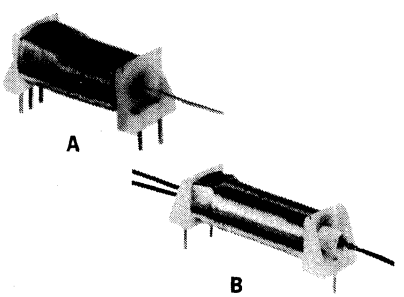
Douglas Randall will gladly review your applications and offer rapid engineering and prototype service.

CURRENT SENSING RELAYS



Douglas Randall offers a line of DC current sensing relays with coils capable of handling 25 Amperes DC. Contact arrangements can be Form 1A, Form 1B, or Form 1C.

HIGH INSULATION RESISTANCE RELAYS



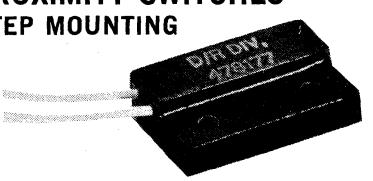
Two typical designs are shown above:

A — A miniature reed relay with a floating lead to maintain high IR.

B — This is a relay using Form A and Form B switches timed to provide a Form C (break before make) function with flying leads to maintain 10^{13} ohms. Up to 5 Form A contacts are available @ 10^{13} ohms.

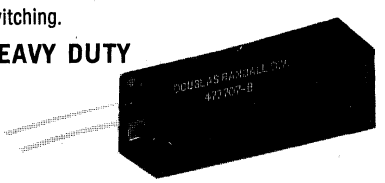
PROXIMITY SWITCHES

STEP MOUNTING



This encapsulated switch is available with Form 1A, Form 1B, Form 1C or Form 2A contacts. It can be supplied with dry reed, mercury wet, high voltage (to 1,000VDC) or high power (to 100VA) contacts. The one shown was designed for low contact resistance and low level switching.

HEAVY DUTY



The proximity switch shown above has heavy duty contacts rated at 100VA. This switch and matching magnet are epoxy encapsulated for heavy duty use on outdoor machinery.

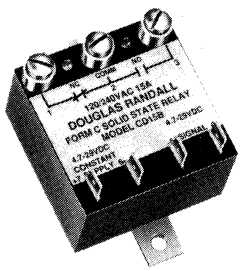
FORM C RELAYS

FORM C AC SWITCHING RELAYS



FEATURES

- True Form C Function
- Full Solid State Design Incorporates Opto Isolation, O-Voltage Switching, Integral Heat Sink
- LED Indicators of Switching Status
- Models Available for Both AC and DC Loads

The Douglas Randall Form C Solid State relay is a true break-before-make device. LEDs indicate the conducting side of the relay. Opto isolation, zero crossover and integral heat sink are standard. Units are available with either DC or AC input.

MODEL	CONSTANT SUPPLY	INPUT SIGNAL	OUTPUT
CD15B	4.7-29 VDC Continuous	4.7-29 VDC	15 Amp 120-240 VAC
CD40B	4.7-29 VDC Continuous	4.7-29 VDC	40 Amp 120-240 VAC
CA15B	90-140 VAC Continuous	Dry Switch	15 Amp 120-240 VAC
CA40B	90-140 VAC Continuous	Dry Switch	40 Amp 120-240 VAC

OPERATION

DC INPUT

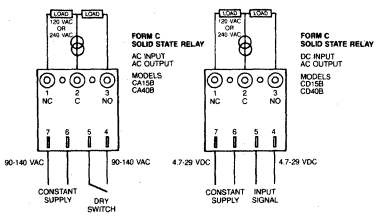
The relay requires a constant supply of DC voltage independent of the switching signal or output load functions. In order for the relay to operate, both DC constant supply and AC load must be connected to the appropriate terminals (see schematic). At this point, the NC load will conduct while the NO load will remain open. In order to switch the relay, the signal terminals are activated by a DC signal of 4.7-29 VDC. At this time the normally closed contacts will open and the normally open contacts will close. LED on indication shows the conducting side at all times. Removal of the DC signal voltage switches the relay to its initial conducting position. If the constant supply is not applied, both sides will be open and both LEDs will be off. Constant supply can be used as an on-off switch on the normally closed side.

AC INPUT

The Form C relay with AC input requires a 90-140 VAC constant supply and a dry closure for the switch signal. The operation of the relay and indication of the LEDs are the same as for the DC input models.

O-CROSSING AND TRANSFER TIME

The Form C relay incorporates a O-crossing feature to minimize switching transients. To assure break-before-make between output terminals, a 10ms. minimum transfer time is designed into the unit. Due to O-crossing variations, the maximum transfer time could be as much as 18ms.



The relay is a seven terminal device. Terminals 1, 2, and 3 are output terminals. Terminals 4 and 5 are signal terminals, and 6 and 7 are constant supply terminals.

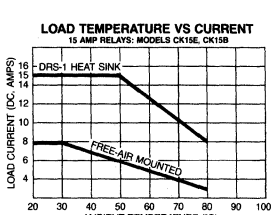
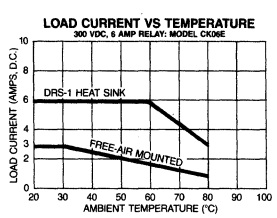
Off-State Leakage Current	5MA	5MA	10MA	10MA
Isolation Output to Base	2500V	2500V	2500V	2500V

NOTES
1. Snubbers are included. For highly inductive applications, consult factory for additional assistance.
2. Specials available. Consult factory with requirements.
3. If the relay is connected properly, one LED will be on. If both LEDs are off, the relay will not operate. Be sure power is applied to output load terminals and constant supply terminals.

FORM C DC SWITCHING RELAYS





The Douglas Randall Form C DC solid state relay is a true break-before-make device. LEDs indicate the conducting side of the relay. Opto isolation and integral heat sink are standard in a fully epoxy encapsulated unit.

MODEL	CONSTANT SUPPLY	DC SIGNAL	OUTPUT

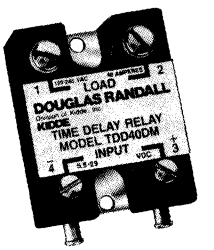
TIME DELAY RELAY SWITCHING

Series TD relays are available in delayed make or delayed break models, with DC or AC input, and switching capability up to 40 amps at 120/240 VAC. They incorporate leading edge R/C micro circuit technology and retain the desirable characteristics of our standard solid-state relays, such as opto-isolation, zero crossover, and integral heat sink. Time delay is set by applying an external resistor to the terminals provided.



MODEL*	INPUT	OUTPUT AC	MODEL*	INPUT	OUTPUT AC

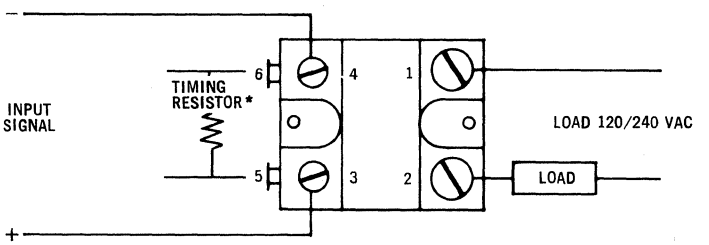
* DM—Delayed Make
DB—Delayed Break

** +10%, −5%

SCHEMATIC DIAGRAM



* Time is set by connecting the proper resistor to the terminals on the front of the unit (5 and 6). The value of the resistor corresponds to 15K ohms per second; i.e. 60K ohms will give a delay of 4 seconds. Standard units will accept up to 22 megohms, which corresponds to approximately 23 minutes. Special units may be ordered for extended time delays.

ACCURACY:

±1% from −20°C to +60°C with a common composition timing resistor. Accuracy can be improved by using special resistors or by keeping the resistor in a temperature controlled environment. Contact the factory for additional details.

SIZE:

2¼" long by 1¾" wide by 1⅛" high maximum.

WEIGHT:

4 oz. maximum.

Specifications are subject to change without notice.

GENERAL SPECIFICATIONS —ALL UNITS

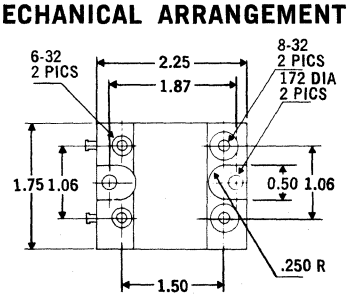
- Zero crossover switching
- 7500V opto-isolation
- Back-to-back SCR operation
- Timing: 15K ohm/second nominal; 22 megohms maximum.
- Minimum operation with resistor terminal shorted: 300 milliseconds nominal.
- All units have snubbers

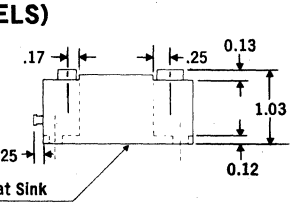
MECHANICAL OPTIONS

Available in OEM quantities. Contact Douglas Randall for details.

1. Model TD relays are available with lead wires or with spade terminals.
2. Changes in mounting hole dimensions are available as options.
3. Tapped mounting holes are available.

MECHANICAL ARRANGEMENT (ALL MODELS)





SIZE: 2¼ L x 1¾ W x 1⅛ maximum.
WEIGHT: 4 ounces maximum.

Special models can be provided with lead wires or other types of termination. Consult Douglas Randall for details.

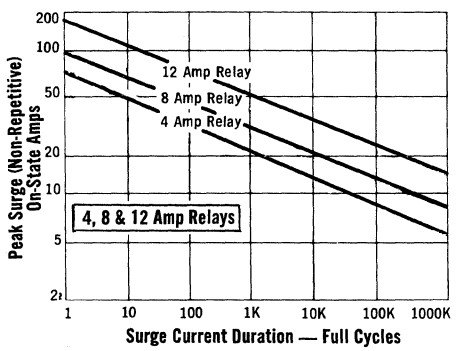
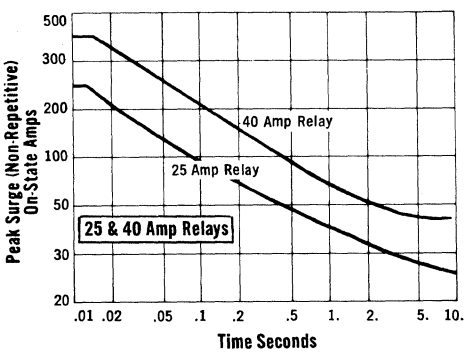
SURGE CURRENT VS TIME



OUTPUT DATA (AC OUTPUT)

Maximum Current	4A	8A	12A	25A	40A
One Cycle Surge Current	75A	100A	150A	250A	400A
Overload (1 sec., RMS)	20A	30A	50A	40A	75A
Minimum Holding Current	50mA Typ.	50mA Typ.	50mA Typ.	50mA Typ.	50mA Typ.

SURGE CURRENT VS TIME

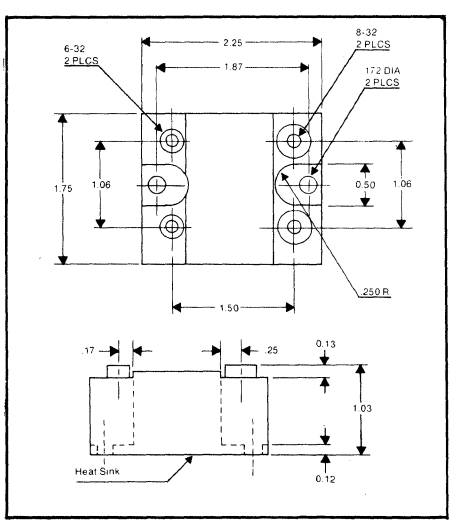


AC Line Voltage: 90/140V or 200/280V[1] @ 47-63 Hz[2]
Voltage Drop @ Rated Current: 1.6V Max.
Typical Turn-on Voltage: 5V
Response Time (DC Signal): ½ Cycle Max.
dv/dt[6] Off State: 100V/μsec.
Commutating: 5V/μsec.

Off State Leakage Current:
90/140VAC — 4.5mA Typ.
200/280VAC — 5.5mA Typ.
400/480VAC — 1.5mA Typ.
Isolation Output to Base: 1500V, 10^{10}Ω DC[3]
Contact Form: SPST (NO)[4]

NOTES AND OPTIONS

1. Special wide range models can be made which will switch loads from 18V to 140V. These relays can handle either 24VAC or 120VAC loads.
2. 2500VAC isolation between input and output.
3. Form A (SPST-NO) relays are standard. Form B (SPST-NC) switching is optional. Models incorporating this feature are designated by NC. e.g. A40B-NC.
4. All DC models are TTL compatible over the full operating temperature range.
5. All relays except 480VAC Models incorporate an RC snubber network which prevents false operation from transients up to the dv/dt level shown. More severe transients may require additional external protection. We will review your application and recommend the additional protection needed.



MECHANICAL SPECIFICATIONS

Size: 2¼"L x 1¾"W x 1⅛" maximum.

Weight: 4 ounces maximum.

Termination: Standard Models — Control Signal: 6-32 screws. Output: 8-32 screws.
Special Models can be provided with lead wires or other types of termination in OEM quantities. Consult the factory for details.

SPECIAL DESIGNS

Douglas Randall has designed many special solid state relays, such as a polarized, latching, SPDT unit which will switch 12A at 28VDC. We also have the capability of making special package sizes and terminal arrangements for our solid state relays at moderate tool cost. Your inquiries will be reviewed promptly.

SOLID STATE RELAYS SERIES K
DC OUTPUT / DC CONTROL SIGNAL

NEW Output to 250 VDC

Douglas Randall Series K are SPST (NO) or (NC) relays which will switch loads of 4, 8 or 12 Amps to 250 VDC. They provide rapid switching and opto-isolation between input and output. The sensitive inputs are compatible with DTL or TTL logic. Arc-free switching makes these relays suitable for hazardous atmospheres.

MODEL NUMBERS

Output Voltage	Current	Model
2-32VDC	4 Amp	K04A
	8 Amp	K08A
	12 Amp	K12A
2-55VDC	4 Amp	K04B
	8 Amp	K08B
	12 Amp	K12B
2-250 VDC	6 Amp	K06D

*Inductive loads must be diode suppressed.
† Normally closed add — (NC) K04A-NC.

INPUT SIGNAL DATA

Range	3-32VDC
Must Operate	3VDC
Must Release	1VDC
Input Impedance	1000Ω Min.
Isolation	
Signal to Load	1500V
Signal to Base	1500V
Temperature	−30°C to +80°C

MECHANICAL ARRANGEMENT

See AC output relays on page B•1348

OUTPUT DATA

Continuous Current	4A, 8A, or 12A
DC Line Voltage	2-32VDC or 2-55VDC
Off State Leakage	2mA DC
Turn On Time	50 Micro Sec.
Turn Off Time	500 Micro Sec.
Voltage Drop @ Rate Current	1.5VDC Max.
Isolation Load to Base	1500V

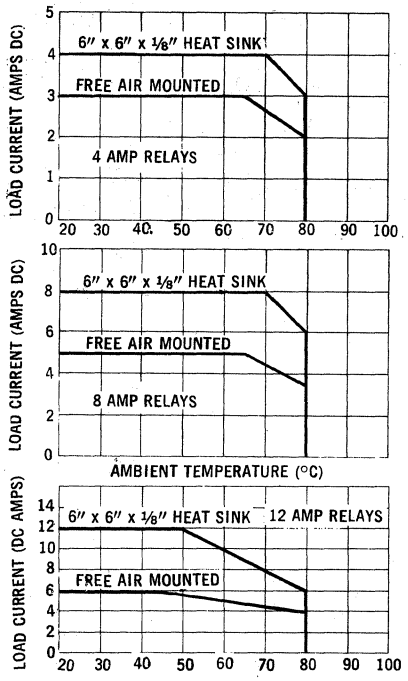
SIZE:
2¼L x 1¾W x 1⅛H Max.

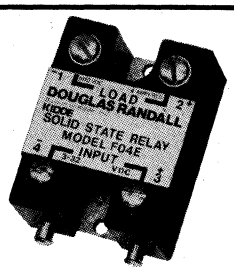
WEIGHT:
4 Ounces Max.

TERMINATION:
Standard Models —
Control Signal:
6-32 Screws
Output:
8-32 Screws

Special Models can be provided with lead wires or other types of termination in OEM quantities. Consult the factory & see pg. B•1348 for mechanical details.

LOAD CURRENT VS TEMPERATURE





500 VDC SWITCHING

Series F Relays are available SPST (NO) or SPST (NC). They provide rapid switching of loads up to 8 amperes DC. Inputs are opto-isolated and compatible with DTL or TTL logic signals. Arc-free switching makes them suitable for hazardous atmospheres as well as machine tool process control equipment.

MODEL	CURRENT	OUTPUT VOLTAGE	SURGE CURRENT (MAX.) 100μs @ 2% DUTY CYCLE
F04E	4 Amp	25-500 VDC	30 Amp
F08E	8 Amp	25-500 VDC	60 Amp

Note: To designate normally closed relays, add suffix "NC"; e.g., F04E-NC.

EICHHOFF

The leading European manufacturer since 1948.
Pioneer in EMI/RFI suppression.
Resin sealed, high performance, high reliability power line filters.
Precise performance within product specifications.
Complete engineering capability for application assistance.

* Designed to meet VDE requirements.

In addition to the reed relays shown, ELEC-TROL offers **TELEPHONE LINE SENSING RELAYS, LOW THERMAL RELAYS, RF SWITCHING RELAYS** and **PROXIMITY DEVICES.** The new **VISTA REED RELAYS** shown here are also available with up to 6 form A contacts, up to 4 form C contacts, 1 or 2 mercury wetted contacts, and a 1 form A magnetic latching contact.

The DIP, SIP, and **BLUE BOY RELAYS** also are available in other configurations.

ELEC-TROL manufactures its own **REED SWITCHES** in an ultra modern plating facility and class 100 laminar flow clean rooms. Special **REED SWITCHES** can be made to suit your special application.

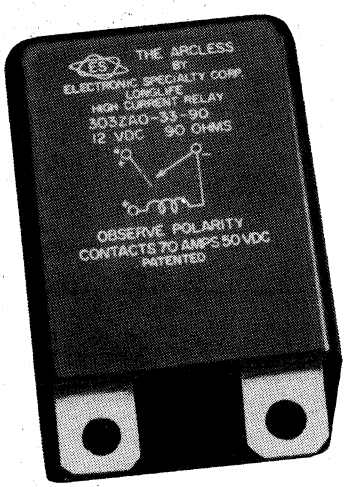
New From ES Electronic Specialty Corporation

70 AMP ARCLESS™ RELAYS



OVER 10,000,000 OPERATIONS IN OUR 185°F CHAMBER . . . AND STILL RUNNING!

If your company's products can use lightweight, more compact 70 amp relays that go and go and go, call us.

The ultimate in high current DC load switching. The load is switched with power semiconductors short term, and carried by the relay hard contacts long term, preventing the semiconductors from overheating.

The Arcless™ uses a SPST heavy duty mechanical relay. In addition to switching 70 AMP loads, the Arcless will withstand a 180 AMP inrush current from motor or lamp load.

Applications for arcless relays should include all high current DC switching where reliability and long life are important design criteria.

No arc between contact points — **No** electro-magnetic interference. This non-arcing feature is useful for switching where EMI or RFI might cause damage to equipment, software, or quality of radio signals.

Reliability, smaller size, no EMI or RFI and much longer lasting. A price of under $20, in quantity, makes reliability affordable.

OUTSTANDING CHARACTERISTICS

Life — Over 10 million operations at full load.

Low Cost — Effective cost versus performance characteristics.

High Current — 70 AMP loads at 50 VDC: Resistive Motor Lamp

Fast Switching — 1 Millisecond maximum turn on time.

Low Contact Resistance — 1.5 Milliohms maximum.

PHYSICAL

Case: Metal can or molded plastic.

Weight: 250 grams

Load Connections: 2 flat terminals.

Coil Connection: 1 flat terminal.

Sealing: Encapsulated in heat conductive epoxy compound.

ELECTRICAL

Contact Configuration: 1 Form-A SPST ground side switching only. (See block diagram)

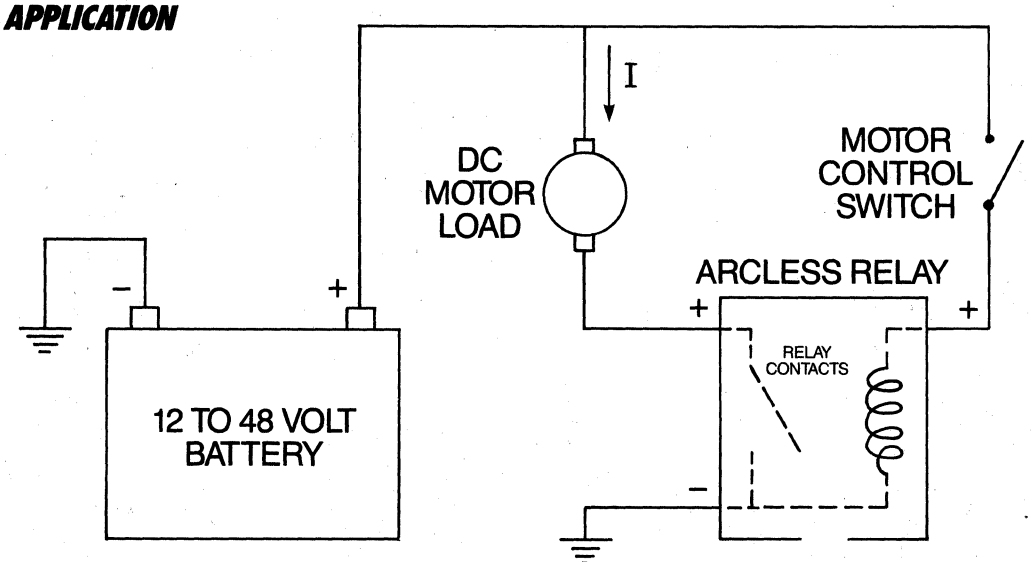
Contact/Mechanical Life: More than 10,000,000 operations at full rated electrical load and temperature.

Contact Overload: Four times rated contact load for 50 operations at 200 millisecond maximum pulse duration.

Static Contact Resistance: 1.5 milliohms maximum at rated current.

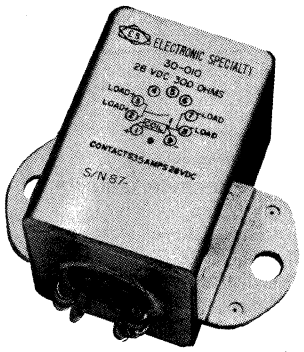
Dynamic Contact Resistance: 6 milliohms maximum at 70 AMPS from 12 to 50 VDC.

TYPICAL APPLICATION



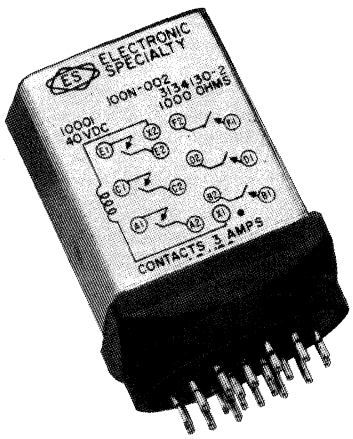
Electronic Specialty Corporation
P.O. Box 3501, Vancouver, WA 98668-3501 (206) 574-5000 FAX: (206) 573-4635

NEW! FROM ELECTRONIC SPECIALTY CORP.



ARCLESS RELAY 30 AMPERE DC SERIES 300

1. Over 1,000,000 Operations. Limited only by mechanical life of the relay.
2. No Bounce—Fast on time.
3. Low Contact Resistance—.004 ohms max.
4. Meets EMI Mil-Std-461B, REO2.
5. Vibration and Shock: Mil-R-6106 characteristic C.
6. Ambient Temperature: −55°C to +85°C.



SQUARE TO ROUND

Square peg in round hole? If you use a round can circular pin configuration we have a relay that is compatible electronically, environmentally, and mechanically—it fits into the same envelope.

Available in 4PDT 3-10 Amps rated and 6PDT 3 Amp rated.

This eliminates the need for expensive redesign and gives you:

- A solution to sole source problems
- Competitive prices
- Prompt delivers
- A quality component

Special bracket design available.

TIME DELAY

These new relays can be configured for many different applications: Pickup and dropout in same relay; sensing power interrupt, which results in a recycle or a timing decision; switching after power removed.

Combined functions can include both pickup and dropout in the same relay. Pickups range from milliseconds to hours, using internal or external timing resistors. A separate dropout function can hold the relay energized for up to 30 seconds after power is removed.

Another possible combination is a delay with a power interrupt. This stretches the time out to three times the actual power interrupt, but not more than the delay period. After time out, a power interrupt will result in a 1.5 second dropout delay before the three times power-off function becomes the controlling factor.

For engineering information and available options, contact

Mercury Relays That Operate in any Position

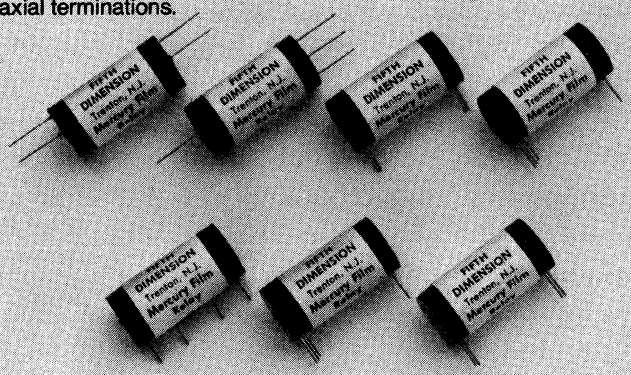
- **No Contact Bounce** — Produce clean square-wave pulses
- **Position Insensitive** — No pool of mercury
- **Self-Healing Contacts** — Always wetted with fresh mercury
- **Rugged Construction** — Welded steel switching capsule
- **Sealed Package** — High density polyethylene (WK Series)

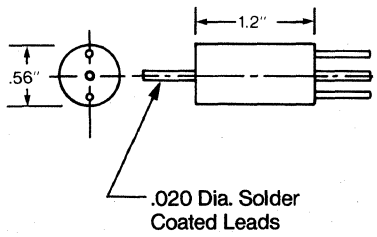
Specifications

Meet Lightning Surge Standards — 2500 volts coil-to-contact breakdown meets FCC standards (WK Series only)
Contact Type: Form A (SPST) mercury film
Contact Bounce: None at 80% of rated voltage or higher
Load Current to 52 VDC: 0.24 amps
Load Current to 200 VDC: 0.10 amps
Contact Resistance: 150 milliohms (max.)
Contact Resistance Stability: ±15 milliohms
Contact Breakdown Voltage: 800 volts DC or AC (rms)
Coil-to-Contact Breakdown: 2500 VAC
Operate Time: 4.0 milliseconds (max.)
Release Time: 4.0 milliseconds (max.)

Molded Case Series WK. Relay can be submerged in appropriate cleaning solvents during board assembly.

Series WK Mercury Relays are available in a wide variety of footprints including 0.1, 0.15 and 0.2-inch PCB spacing as well as with in-line and axial terminations.





Nominal Coil Volts	Coil Resistance (± 10%) Ohms			Must Operate Volts	Must Release Volts

JENNINGS VACUUM/GAS RELAYS

Relay Testing

Jennings operates test facilities to provide all environmental, high voltage, and radio frequency (RF) test parameters. All relays are individually tested prior to shipment for pull-in voltage, timing characteristics, contact resistance, and dielectric strength.

Vibration, shock, humidity, salt spray, temperature effects, current load and reliability tests are regularly performed on a sampling basis.

Mechanical life reliability tests are performed on a sample basis with equipment that only passes relays which cycle with proper sequences of contact operation. Some relay types have been checked to more than 10^8 operations.

JENNINGS VACUUM/COAXIAL RELAYS

Applications for these units include high speed switching from omnidirectional to directional antennas, transmit-receive switching, and switching between transmitters for standby control.

Other applications include crossbar matrices and switching trees, CCTV, CATV, and microwave telemetry and data acquisition links, as well as general coaxial instrumentation.

Jennings vacuum coaxial relays have a recorded history of dependable, maintenance free operation. Because of this, they were chosen for ground and airborne applications for the tracking network of the Apollo program and the Atlantic Missile Range Communications.

JENNINGS MINIATURE MICROWAVE RELAYS

The FL Jennings TOH Series microwave relays are designed to operate from DC to 2.5 GHz and higher. They are used in coaxial transmission lines to open, close, and divert signal paths. Applications where stringent impedance matching and isolation are required include antenna switching, radar, communications, radio telephones, and cable TV systems. Our technology represents the latest developments in materials, performance and flexibility. The TOH series microwave relays are available in coil terminal, PCB terminal, flying lead, and solder lug configurations. Operating voltages of 6, 12, 24, and 28 VDC can be specified.

The TOH Series are built using a new patented method that offers efficiency in manufacture. The result provides reliable, proven relays at lower cost.

JENNINGS VACUUM CONTACTORS

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 600 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 18 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

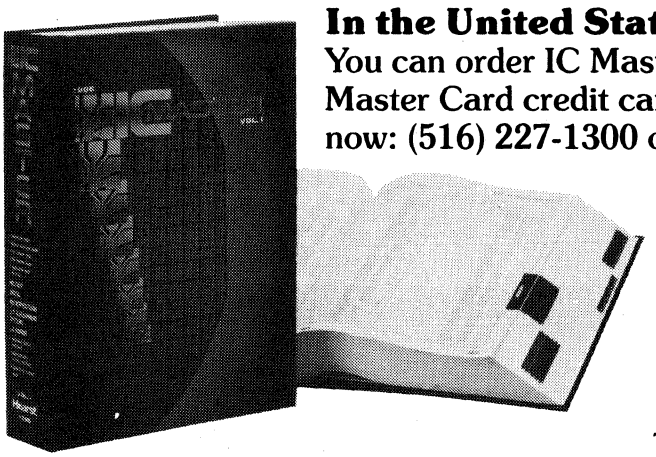
IC MASTER BELONGS ON YOUR BOOKSHELF

If you don't have your own IC MASTER, you can obtain your own copy by ordering now. Write for your own copy or order by telephone as described below.

IC MASTER is a two-volume set of technical data carefully organized to direct the engineer to the integrated circuits and related products that are closest to his specific needs. It is the surest and fastest way to find the optimum devices to answer an engineering design requirement. By ordering now, you won't have to borrow or search for IC MASTER the next time you need it.

Typical Use of IC MASTER
Can an engineer find out who makes a 256K dynamic RAM with an access time of 120 nanoseconds or faster in less than 30 seconds? He can if he turns to the Memory section of IC MASTER and looks for the 256K organization (words and bits per word) that he needs. Because each device is listed in order of access time, he can easily determine the devices that satisfy his speed requirements.



In the United States only:
You can order IC Master simply by charging it to your VISA or Master Card credit card. To place your order (USA only) call now: (516) 227-1300 or (408) 249-6800.

Or mail your order to

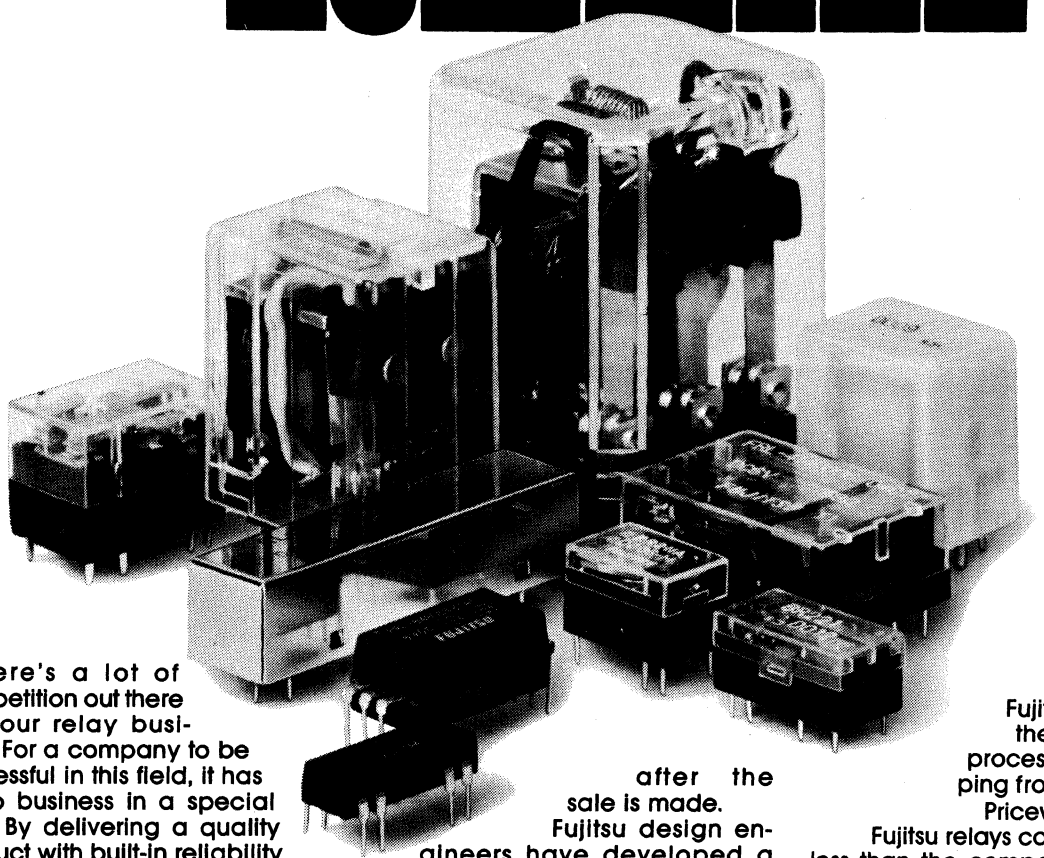
FUJITSU: RELAYS



There's a lot of competition out there for your relay business. For a company to be successful in this field, it has to do business in a special way. By delivering a quality product with built-in reliability, price and service.

Fujitsu relays have it all. Our relays meet or surpass the quality of those made by the competition. They're built to do a job and do it right. And Fujitsu relays are compatible with most relays on the market.

As far as service, Fujitsu considers it a point of pride, as well as good business to cater to your company's needs before, during and after the sale is made.

Fujitsu design engineers have developed a complete line of all the most popular relays in use today. A supply of these standard relays is always readily available. We also offer a customizing service where we work with your engineers to design relays tailored specifically to your needs.

Our warehouse is stocked to supply your company with samples of our fine products. Quantity orders come directly from the factory. And Fujitsu can match the lead time for processing and shipping from any source.

Pricewise, you'll find Fujitsu relays cost the same or less than the competition, leaving little reason not to try us.

For general purpose industrial relays to special application telecommunications relays, from fiery fractional horsepower motor loads to low-level logic circuits, it pays to switch to Fujitsu where quality, reliability and service are part of our product.

For more information on our superior components, call or write your local FCA rep or distributor today.

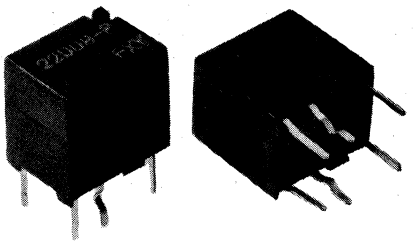
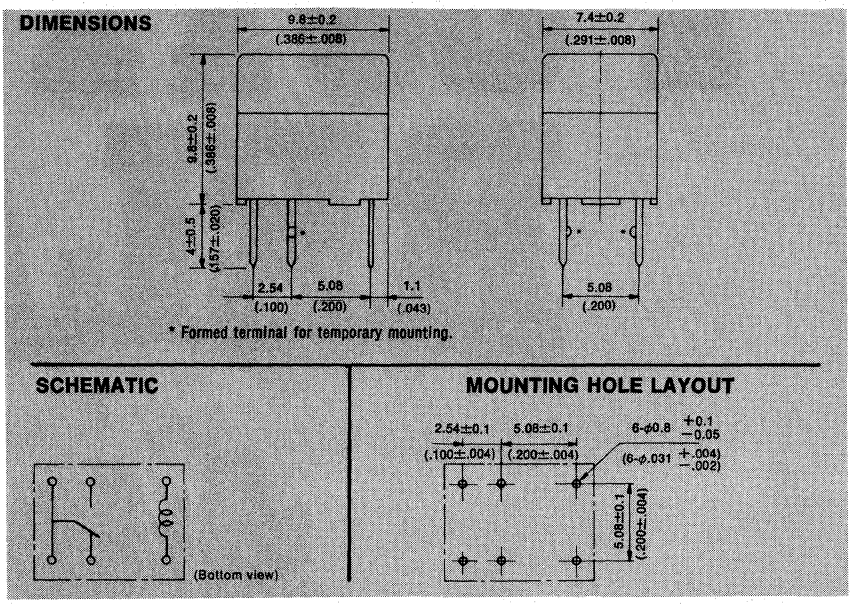
RELAYS

MICROMINIATURE RELAYS FOR P.C. BOARDS

FBR20 SERIES





Fujitsu FBR20 series relays are designed for PC board mounting with 1A contact ratings — perfect for microminiature applications.

FEATURES

- **Microminiature size**
  Two FBR20 series relays can be mounted in the space now required for a single FBR210 series relay.
- **1A contact rating**
  Despite their microminiature size, FBR20 series relays have contact rating of 1A at 24 VDC for convenient installation.
- **Gold overlay single or bifurcated contact**
  Contact reliability is assured in low level applications by contact shapes and materials especially designed for signal switching applications.
- **Low power consumption**
  With a rated power consumption of only 0.3W, today's expensive energy costs can be reduced significantly.
- **Wide range of drive voltages**
  Drive voltages from 1.5 VDC to 24 VDC are available for a wide range of applications.
- **Strong shock resistance**
  Even with a 50G shock, FBR20 series relays never miss a switch.
- **Easy to pattern-design**
  Separate terminal connection with drive and output sections allow easy pattern design.
- **Formed terminal available for temporary lock**
  The unique design of the forming terminal allows FBR20 series relays to be temporary mounted for greater design flexibility.
- **Automatic soldering provision**
  The terminal is sealed to prevent flux from entering during automatic soldering.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

ENGINEERING DATA

Item	Specifications
Contact Arrangement	SPDT (1 Form C)
Contact Shape	Single contact (FBR21), Bifurcated contact (FBR22)
Contact Material	Gold overlay silver, Gold overlay silver-palladium alloy (—P)
Contact Rating	24 VDC-1A, 120 VAC-0.5A (resistive load)
Maximum Carrying Current	2A
Maximum Switching Voltage	125 VDC, 125 VAC
Maximum Switching Power	24 WDC, 60 VA AC (resistive load)
Initial Contact Resistance	100mΩ max. (measured at 6V DC-0.1A)
Coil Power	0.3W (at rated voltage, 20°C)
Coil Temperature Rise	45°C (at rated voltage, 20°C)
Insulation Resistance	1,000MΩ min. (at 500 VDC)
Withstanding Voltage	Between contacts: 500 VAC for 1 minute Between contact and coil: 750 VAC for 1 minute
Vibration	20G, 10 ~ 300 Hz (dual amplitude, maximum 3.0 mm). No contact chatter longer than 1.0 ms.
Shock	Operation error: 50G (sine half-wave of 11 ms). No contact chatter longer than 1.0 ms.
Operate Time	5 ms max. (at rated voltage)
Release Time	3 ms max. (after rated operation)
Life Expectancy	Mechanical: 5 x 10^6 cps. min. Electrical: Gold-overlay silver contacts: 100 x 10^3 ops. min. Gold-overlay silver-palladium alloy contacts: 200 x 10^3 ops. min. (at rated contact load)
Maximum Switching Frequency	Mechanical: 18,000 operations/hour Electrical: 1,800 operations/hour (at contact rated load)
Ambient Temperature	−30°C ~ +65°C (at rated operation)
Ambient Humidity	45 ~ 85% RH
Weight	1.7 g (approx.)

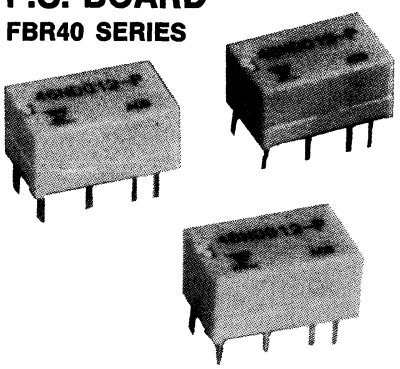
Note: Measured at 20°C.

ULTRA-MINIATURE RELAYS FOR P.C. BOARD

FBR40 SERIES



The Fujitsu FBR40 Series relay with a pick-up power consumption reduced to 85 mW is an extremely small DPDT CONTACT relay designed for PC board mounting.

FEATURES

- **Ultra-miniature low-profile design**
  At half the size of the conventional FBR240 relay and requiring only three quarters of the board area, a drastic reduction is size has been achieved in the design of the FBR40.
  15.8 (L) x 9.7 (W) x 7.8 (H) mm.
- **High dielectric strength**
  Dielectric withstanding voltage between contacts and coil is over 1,000 VAC and with the ability to withstand a surge voltage of over 1,500 V, it conforms to FCC 68.302 standard.
- **High-shockproof type**
  Even a shock force of 30 G will not result in a malfunction.
- **Low power consumption**
  With a high efficiency built-in permanent magnet, operating power consumption is only 85 mW. (Rated power consumption is 150 mW.)
- **Formed terminal for temporary lock**
  The terminals of the FBR40 are specially formed so that they can be temporarily attached to the PC board.
- **Pattern design is easy**
  The terminal connections are designed so that the drive portion (coil) and the output portion (contacts) are isolated, which simplifies pattern design.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

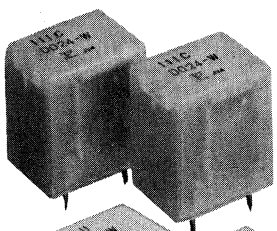
RELAYS

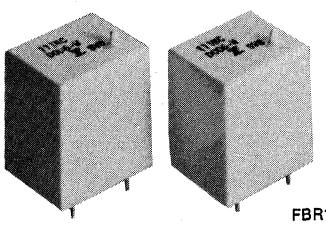
MINIATURE RELAYS FOR P.C. BOARDS

FBR100 SERIES

SPDT 3A-28V DC/120V AC, 6A-28V DC/120V AC



FBR111



FBR111N

The Fujitsu FBR111 and FBR111N Series are low cost SPDT relays with a versatile switching capability. The contact is rated 3A, 28V DC; 3A 120V AC for standard contact, or up to 6A, 28V DC; 6A, 120V AC for special heavy duty contact.

These small size, sensitive relays, designed to be mounted on printed circuit boards, feature simplified construction and a low power dissipation.

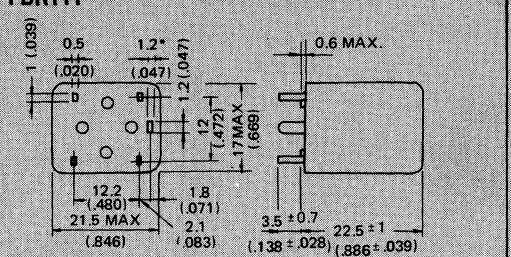
It is ideal for use in audio equipment, business machines, vending machines, security systems, game machines and automotive applications.

The FBR111N Series is the immersion cleanable version where printed circuit board cleaning is required.

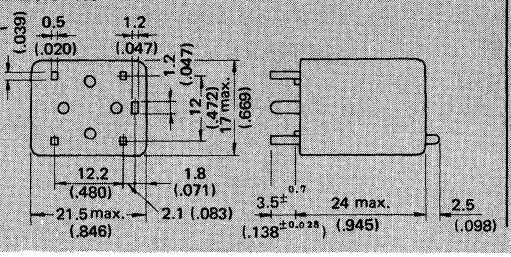
The relay specified FBR111U is UL recognized for office equipment and business machines. (File No. E63615.) CSA certified.

DIMENSIONS Unit: mm (inch)

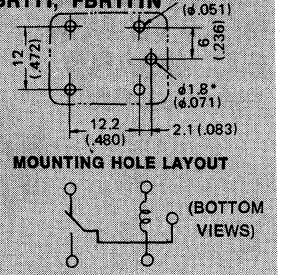
FBR111



FBR111N



FBR111, FBR111N



Notes:
1. Cut-off nib must be removed after relay soldering and board cleaning.
2. Although the plastic cover is bonded to the relay base, it is not hermetically sealed. Therefore, when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning (water temperature is less than 50°C).

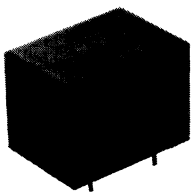
Note 1. 48V rated voltage relays are available on special order.
2. Each product bears its own designation on the top of the cover, but initial code 'FBR' is omitted.
* Add $0.14 to price for −K, $0.28 for −M, $0.14 for −W.
For CSA certified relays, −CSA suffix must be added to part number of UL type. Price is same as UL type.

SMALL CONTROL RELAYS FOR P.C. BOARDS

FBR160 SERIES



Fujitsu FBR160 series small control relays are PC board mounted and have excellent cost performance.

FEATURES

- **Same terminal array as FBR100**
  These relays have the same foot print as Fujitsu's conventional FBR100 series.
- **Lower profile**
  Since their profile is 7 mm lower than that of the FBR100 series relays, they can be used in smaller equipment.
- **Flux-prevention structure**
  The contacts are located on the top of the relay to protect them from solder flux from the terminals.
- **Meets major safety standards**
  The relays structure is designed to meet the Japan Electric Appliance Control Law (150V or less) and UL standards (114).
- **Choices of contact materials**
  Two different kinds of contact materials can be specified according to the load.
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.
- **Contact Ratings**
  • Standard (Silver)
  3A 28V DC 120V AC
  • –K (Silver-Cadmium Oxide)
  3A 28V DC 120V AC
  • –H (Silver-Cadmium Oxide)

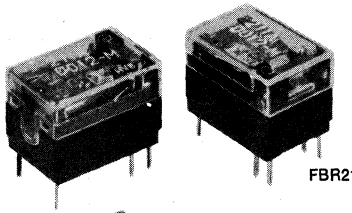
FUJITSU

RELAYS

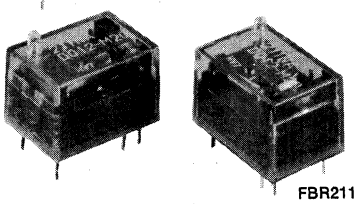
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS

FBR210 SERIES

SPDT 1A-28V DC, 0.5A-120V AC



FBR211



FBR211N

The FBR211 and FBR211N Series of ultra-miniature relays allow high component densities for savings in both equipment size and cost for the printed circuit board. The FBR-211N Series is suitable for immersion cleaning in freon and aqueous systems.

These highly sensitive relays with gold-clad SPDT contact arrangements are ingeniously designed so as to offer flux-contamination-immunity and load handling capabilities of 1A at 28V DC or 0.5A at 120V AC under a resistive load. The 0.1″ grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high density mounting and for use in audio and wireless communications, office and vending machines, automobiles and various control applications.

1. For low level or dry circuit switching, use of gold thick-overlay silver-palladium alloy contact relays are recommended.
2. *Cut off nib must be removed after relay soldering and board cleaning.
3. Although the plastic cover is bonded to the relay board, it is not hermetically sealed. Therefore when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning.

ENGINEERING DATA

Item	Specifications	
	Standard Model	High Sensitivity Model
Contact Arrangement	SPDT	
Contact Ratings	1A at 28V DC, 0.5A at 120V AC (resistive)	
Initial Contact Resistance	100mΩ max. at 6V DC, 0.5A	
Contact Materials	Standard: Gold overlay silver (—M) — Low Level: Gold overlay silver-palladium alloy (—P)	
Rated Coil Voltage	1.5, 3, 5, 6, 9, 12, 24V DC	
Coil Power Dissipation	0.45W at rated voltage	0.20W at rated voltage
Coil Temperature Rise	45°C approx. at rated voltage	25°C approx. at rated voltage
Insulation Resistance	100MΩ min. at 500V DC (at 20°C 65% RH)	
Dielectric Withstanding Voltage	500V AC for 1 minute	
Operate Time	5 ms approx. (at rated voltage, 20°C)	
Release Time	5 ms approx.	
Life Expectancy — Mechanical	5 x 16^6 ops. min.	
Electrical	300 x 10^3 ops. min. at 1A 28V DC, resistive 100 x 10^3 ops. min. at 0.5A 120V AC, resistive	
Vibration	10 to 40Hz (Dual amplitude: 1.5mm)	
Shock	10G (11 ms)	6G (11 ms)
Temperature Range	—25°C to +55°C	—25°C to +75°C
Weight	4 gr. approx.

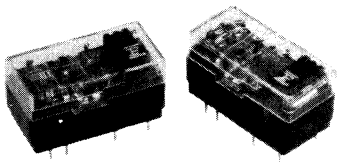
* To get price to —P type add $0.44.

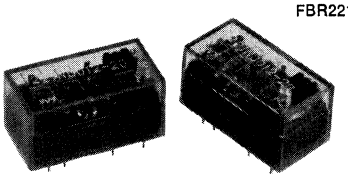
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS

FBR220 SERIES

DPDT 1A-28V DC, 0.5A-120V AC



FBR221



FBR221N

The FBR221 and FBR221N Series of ultra-miniature relays are designed to provide high component densities for savings in both equipment size and cost.

These highly sensitive relays with gold-clad DPDT contact arrangements can switch loads up to 1A at 28V DC or 0.5A at 120V AC.

The .1″ grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high density mounting — and for use in audio and wireless communications, office machines, various control applications and automobiles.

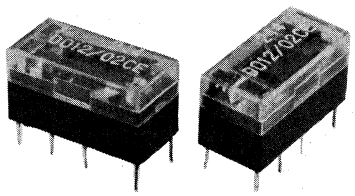
FUJITSU

RELAYS

LOW PROFILE RELAYS FOR P.C. BOARDS

FBR240 SERIES



FBR244 and FBR244N Series Relays are low profile, P.C. board relays with 2 Form C (DPDT) contact arrangements in D.I.P.-compatible plastic housing and have a 2.54mm pinout grid spacing to provide 16-pin-DIP-socket compatibility. Watertight terminal sealing prevents relay from contamination by soldering flux and N type allows automatic wave soldering and board washing without relay damage. Single or bifurcated contacts switch 1A at 28V DC or 0.5A at 120V AC and have a rated-load life-time of 5×10^5 operations. These relays are suitable for telecommunication equipment, audio equipment and business machines.

- High sensitivity versions are available in 200 mw

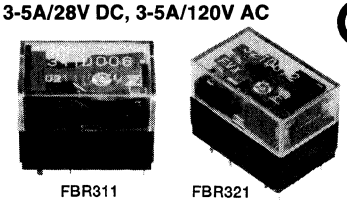
For 48V relays add $0.45 to the prices of the 24V relays.

MINIATURE RELAYS FOR P.C. BOARDS

FBR310 (SPDT) AND FBR320 (DPDT) SERIES

3-5A/28V DC, 3-5A/120V AC



FBR311 FBR321

The FBR311 (SPDT) and FBR321 (DPDT) Series miniature relays were designed to provide 3 amps ratings contacts, accommodated in truly compact packages for P.C. boards.

These sensitive miniature relays, featuring high density mounting, flux-contamination immunity, versatile switching performance from signal level to handling 3 amps, are ideally suited for such applications as audio equipment, office machines, vending machines and automotive or other control application. These relays are UL Recognized (E63615) and CSA Certified (add —CSA suffix to P/N).

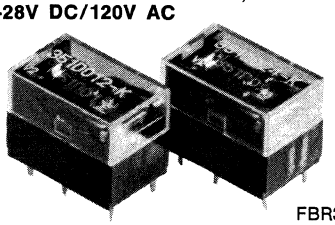
MINIATURE RELAYS FOR P.C. BOARDS

FBR350 SERIES

SPDT 3A-28V DC/120V AC, 6A-28V DC/120V AC



FBR351

FBR351 Series miniature relays are 1 Form C compact relays which can be used for a wide range of current switching from low levels to heavy loads. Two types are available: gold overlay contacts with contact ratings of 3A, 28V DC or 120V AC, and silver cadmium oxide contacts in 6A, 28V DC or 120V AC. These relays can be easily mounted on a PC board and use 3 pitch (7.62mm) pin arrangements. What's more, FBR351 Series relays endure 6KV at 40μ second in lightening. They are ideal for use in audio equipment, business machines, game machines and automotive applications.

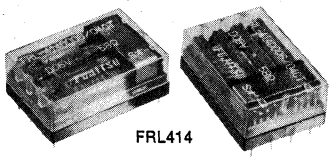
FUJITSU

RELAYS

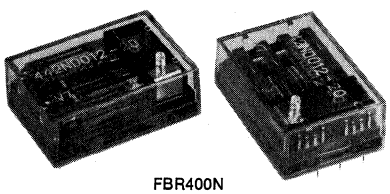
FLAT PACKAGE RELAYS

FRL410 AND FBR400N SERIES

4PDT, DPDT 1A-30V DC, 1A-120V AC



FRL414



FBR400N

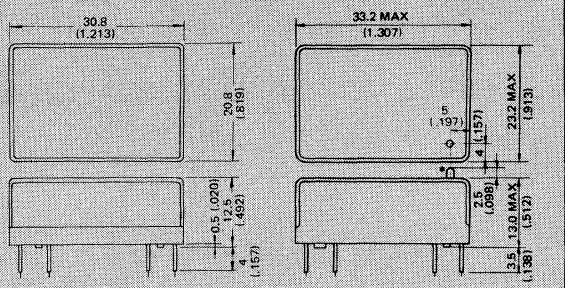
The Fujitsu FRL414 and FBR400N (immersion cleanable) Series Flat Package Relays have been designed for P.C. board mounting and are ingeniously constructed so as to offer the advantages of flux-contamination-immunity.

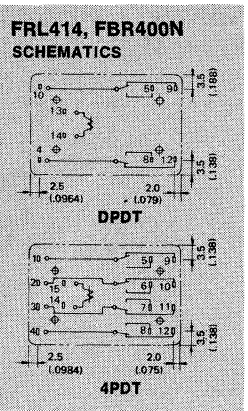
The low power consumption relays are available in both DPDT and 4PDT contact arrangements and in coil voltage ratings to 48V DC. The wide selection is useful for numerous demanding applications, including communications, data processing and controls.

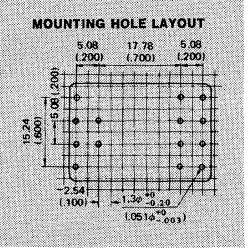
Bifurcated contacts assure high reliability. These relays are capable of handling resistive loads of up to 1A at 30V DC or 120V AC.

A low level load version with gold overlay silver-palladium alloy contacts is also available. Electrical life expectancy is more than three million operations at 1A-50V DC resistive load.

DIMENSIONS Unit: mm (inch)







Notes:
1. For low level or dry circuit switching, use of gold overlay silver-palladium alloy contact relays is recommended.
2. *Cut-off nib must be removed after relay soldering and board cleaning.
3. Although the plastic cover is bonded to the relay base, it is not hermetically sealed. Therefore when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning.

ENGINEERING DATA

Item	Characteristics
Contact Arrangement	DPDT and 4PDT with bifurcated contacts
Contact Rating	1A at 120V AC (resistive) — 1A at 30V DC (resistive)
Initial Contact Resistance	100mΩ max. at 3V DC, 0.5A initial
Contact Materials	Standard: Gold-overlay silver — Low-level Load: Gold-overlay silver-palladium alloy
Rated Coil Voltage	5, 6, 12, 24, 48V DC
Coil Power Dissipation	DPDT: 0.45W — 4PDT: 0.60W at rated voltage at 20°C
Coil Temperature Rise	DPDT: 30°C approx. — 4PDT: 40°C approx. at rated voltage at 20°C
Insulation Resistance	100MΩ min. at 500V DC (at 20°C 65% RH)
Dielectric Withstanding Voltage	500V rms (60 Hz) for 1 minute
Operate Time	15 ms max. at rated coil voltage at 20°C
Release Time	5 ms max.
Life Expectancy — Mechanical	30 x 10^6 ops. min.
Electrical	3 x 10^4 ops. min. at 30V DC, 1A (resistive) 100 x 10^3 ops. min. at 120V AC, 1A (resistive)
Shock	10G
Temperature Range	−30°C to +50°C (without freezing)
Weight	15 gr. approx.

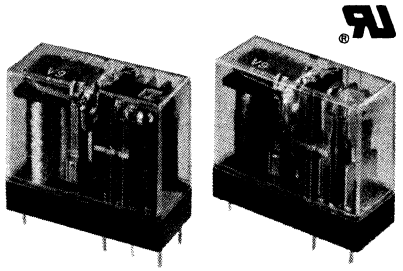
MINIATURE HIGH-POWER RELAYS

FBR600 SERIES



The FBR600 Series are miniature high-power relays with a switching capability of 10A, 30V DC or 240V AC for 1 Form C contact; and 5A, 30V DC or 240V AC for 2 Form C contacts. These relays, conforming to VDE, UL and CSA standards, are designed for mounting on printed circuit boards. Dielectric withstanding voltage is 500V AC for 1 minute and creeping distance is 8mm. These FBR600 Series relays are ideal for use in audio equipment, TV, vending machines, control machines, etc.

UL recognized (E63615) for industrial control equipment per UL508.

- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

DIMENSIONS Unit: mm (inch)

ENGINEERING DATA

Item	Specifications
Contact Arrangement	FBR611, 1 Form C — FBR621, 2 Form C
Contact Ratings	FBR611, 10A at 30V DC or 240V AC — FBR621, 5A at 30V DC or 240V AC
Carrying Current	FBR611, 10A — FBR621, 5A
Contact Material	Silver-alloy
Initial Contact Resistance	100mΩ max. at 6V DC, 1A
Rated Coil Voltage	5, 6, 9, 12, 18, 24, 48, 60V DC
Coil Power Dissipation	FBR611/621, 0.5W at 20°C
Coil Temperature Rise	FBR611/621, 35°C at rated voltage at 20°C
Insulation Resistance	1000Ω min. at 500V DC (initial) at 20°C, 65% RH
Dielectric Withstanding Voltage	
Between Coil and Contact	5000V AC for 1 minute at 20°C, 65% RH
Between Open Contacts	1000V AC for 1 minute at 20°C, 65% RH
Between Adjacent Contacts	FBR621, 3000V AC for 1 minute at 20°C, 65% RH
Lightening (1 x 40μ sec)	
Between Coil and Contact	10,000V min
Between Adjacent Contacts	FBR621, 6000V min.
Operate Time	8 ms approx. at rated voltage at 20°C
Release Time	2.5 ms approx. at 20°C
Life Expectancy — Mechanical	20 x 10^6 ops. min.
Electrical	100 x 10^3 ops. min. at rated voltage
Vibration	10~55 Hz (Dual amplitude: 1.5mm)
Shock	10G (11 ms)
Temperature Range	FBR611/621, −40°C~+70°C
Weight	16 gr. approx.

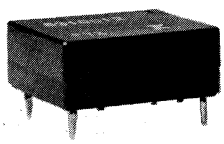
FUJITSU

RELAYS

LOW PROFILE RELAYS FOR P.C. BOARDS

FBR630 SERIES



Fujitsu's compact FBR630-series relays are only 10 mm in height, but they provide a remarkable contact rating of 10A.

Compactness and high capacity make these low-profile power relays ideally suited to mounting on PC boards.

FEATURES

- Low profile — only 10 mm high
- 5 kV minimum lightning surge (between coil and contact)
- 2.5 kV minimum dielectric withstanding voltage (between coil and contact)
- Sealed terminals to protect against flux
- Input/output isolated terminal arrangement for easy pattern design
- Wide operating temperature range— −30°C to +70°C
- Maximum contact rating: 10A (30 VDC/ 120 VAC)
- High-reliability design meeting various safety standards:

  Japan Electric Appliance Control Law
  UL508 Standard
  CSA-Class 3211 Standard
  FCC 68-302 Standard

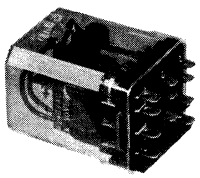
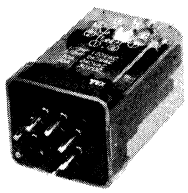
HEAVY DUTY GENERAL PURPOSE RELAYS

FRL250 AND FRL256 SERIES

SPDT, DPDT, 3PDT 10A-30V DC, 10A-240V AC



FRL250

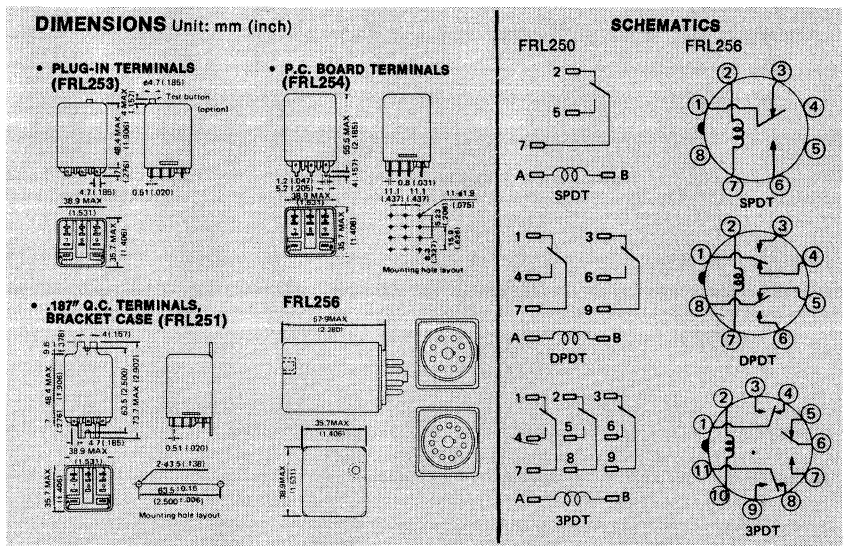


FRL256

The FRL250 Series Relays have been designed with particular attention to reliability, cost performance and versatility of application. These heavy duty general purpose relays provide SPDT, DPDT or 3PDT contacts with switching ability of 10A at 30V DC or 240V AC. The FRL-250 Series Relays provide various mounting styles such as plug-in, bracket case, tapped core, stud or P.C. board, and their terminals are convenient quick-connect/solder or P.C. board. The optional features are with or without test button for manual circuit checking and indicator lamp to indicate whether power is reaching relay.

These relays are particularly desirable for use in automation control, communication circuit and many other applications where high power switching and rugged construction are required.

The FRL250 Series relays are UL recognized (File No. E63614) and C.S.A. certified (File No. LR40304).



ENGINEERING DATA

Item	Specifications
Contact Arrangement	SPDT, DPDT, 3PDT
Contact Rating	10A at 30V DC (resistive) — 10A at 240V AC (resistive) ⅓ HP at 120V AC, ½ HP at 240V AC
Initial Contact Resistance	100mΩ max. at 6V DC, 1A
Contact Material	Gold flashed silver-cadmium oxide
Rated Coil Voltage	6, 12, 24, 48, 110V DC — 12, 24, 48, 120, 240V AC
Coil Power Dissipation	DC: 1.2W, AC: 3PDT — 2.7VA, DPDT, SPDT — 2VA at rated voltage, 60 Hz
Coil Temperature Rise	DC: 40°C max., AC: 60° max.
Insulation Resistance	100MΩ min. at 500V DC
Dielectric Withstanding Voltage	2000V AC for 1 minute (1000V AC between open contacts)
Operate Time	30 ms max. at rated coil voltage
Release Time	30 ms max.
Life Expectancy — Mechanical	10×10^6 ops. min.
Electrical	100×10^3 ops. min. at rated load
Vibration	600 to 1500 rpm (Dual amplitude: 1mm)
Shock	10G (11 ms)
Temperature Range	DC: −45°C to +70°C/AC: 3PDT: −45°C to +45C°/DPDT, SPDT: −45°C to +55°C
Weight	80 gr. approx.

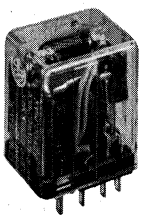
FUJITSU

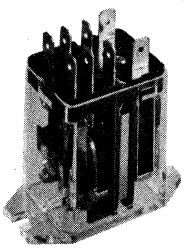
RELAYS

GENERAL PURPOSE RELAYS

FRL260 SERIES

4PDT-5A, 3PDT-5A, DPDT-10A, SPDT-15A





The FRL260 series relays with proven performance and top quality have been designed with emphasis on reliability, safety, cost performance and applicability to a wide range of uses.

These relays provide SPDT to 4PDT contacts, which are offered for contact ratings from 1 amp to 15 amps at 30V DC or 240V AC, resistive. Moreover, they are also available with 4 transfer bifurcated contacts that enable them to meet signal level or other light loads.

The FRL260 series relays are available in both DC- and AC-rated coils, and with a selection of mountings, such as solder, plug-in, P.C. boards and quick connect terminals.

The FRL260 series is UL recognized (File No. 163614/E63615) and C.S.A. certified.

ENGINEERING DATA

Item	Specifications
Contact Ratings (Resistive Load).	As per SELECTION TABLE
Initial Contact Resistance	General (S, K, V Contact): 100mΩ max. (at 6V DC, 1A) Low Level (T, L Contact): 50mΩ max. (at 6V DC, 0.1A)
Operate Time Release Time	25 ms max. (at rated coil voltage) 25 ms max.
Coil Power Dissipation	DC: 0.9W (at rated coil voltage) AC: 1.2 VA (120V max.) at rated coil voltage of 60 Hz 1.4 VA (200V min.) at rated coil voltage of 60 Hz
Coil Temperature Rise	DC: 50°C max. AC: 60°C max.
Life Expectancy — Mechanical Electrical	50 x 10^6 ops. min. (at rated load) Medium Load SPDT: 500 x 10^3 ops. min. FUJITSU

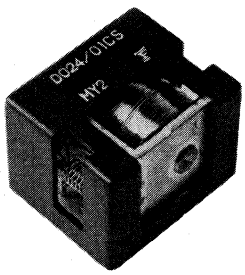
RELAYS

P.C. BOARD RELAYS FOR AUTOMOTIVE APPLICATIONS

FRL270 SERIES



Fujitsu FRL270 series power relays are for PC board mounting and are designed especially for automotive applications.

FEATURES

- **Maximum current: 30A**
  The relays are designed for high ambient and storage temperatures to ensure the contacts will endure continuous current of up to 30A.
- **Rigid, shock-resistant construction**
- **1 mm-gap contacts**
  1 mm-gap contacts are also available for controlling 24V motors in trucks and other large vehicles.
- **Welding resistant contact materials**
  Three types of welding resistant contact materials are available as standard.
- Choice of wide terminal model (−01 and −11 suffix) for maximum heat/power transfer or standard terminal model (no suffix or −10) for conventional hole/conductor sizes, at no extra charge.
- Available with case as shown (no suffix and −01) or without case (−10 and −11 suffix).

Main Uses

- **Engine control**
  Electronic fuel injection units
- **Lamp control**
  Flasher control units
  Headlight control units
- **Motor, solenoid, and heater controls**
  Windshield wiper control units for trucks
  Automatic door-lock control units
  Defogger control units
  Other various control units
- **Immersion cleaning**
  A sealed type is available for immersion cleaning.

ENGINEERING DATA

Item	Specifications
Contact Arrangement	SPDT (1 Form C) or SPST (1 Form A)
Contact Material	Silver-copper alloy (S) Silver-cadmium oxide (K) Silver-tin oxide (Y)
Contact Gap	01 type (Standard gap) 51 type (1 mm gap)
Contact Rating	N.O. contact: 12 VDC, 15A or 24 VDC, 10A N.C. contact: 12 VDC, 10A or 24 VDC, 7A (resistive load)
Rated Current	15A (Continuous)
Maximum Current	30A (Overload current when motor locks)
Voltage Drop Across Contacts	Initial: 0.3V max. After life testing: 0.5V max. (after several operations at rated current)
Coil Power	Standard coil. 1.7W approx. Low-power coil: 0.6W approx. (with rated voltage applied at 20°C)
Coil Temperature Rise	Standard coil: 75 deg. approx. Low-power coil: 35 deg. approx. (with rated voltage applied at 20°C)
Insulation Resistance	100 MΩ min. (at 500 VDC)
Withstanding Voltage	500 VAC for 1 minute
Vibration	Operation error: With 1.5 mm vibration applied at full amplitude at 10 ~ 55 Hz, contact chatter lasts less than 1 ms.
Shock	Operation error: 10G (11 ms sine half-wave) Durability: 100G (11 ms sine half-wave)
Operate Time	10 ms max. (Standard coil with 01-type contact gap)
Release Time	5 ms max. (01-type contact gap) 8 ms max. (51-type contact gap)
Life Expectancy	Mechanical: 100 x 10^6 operations or more Electrical: 250 x 10^3 operations or more (Silver-copper alloy under the rated contact load)
Ambient Temperature	−30°C ~ +80°C
Storage Temperature	−40°C ~ +100°C
Weight	20 g approx.

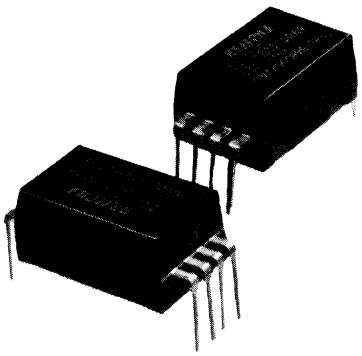
SELECTION TABLE

Type of Coil (Spec. Code)	Rated Voltage (Spec. Code)	Contact Gap (Spec. Code)	Coil Resistance (±10%)	Rated Power Consumption	Pick-Up Voltage	Drop-Out Voltage	All case/terminal suffix codes: none, −01, −10 or −11	
							Designation	Price
Standard (D)	12 VDC (012)	Standard (01)	85	1.7W approx.	Less than 6.5 VDC	More than 1.0 VDC	FRL274 D012/01AS-A (or CS-A)	$2.45 (or $2.52)
		1 mm (51)	85	1.7W approx.	Less than 6.5 VDC	More than 1.0 VDC	FRL274 D012/51AS-A (or CS-A)	$2.45 (or $2.52)
Low Power (H)		Standard (01)	240	0.6W approx.	Less than 8.4 VDC	More than 0.8 VDC	FRL274 H012/01AS-A (or CS-A)	$2.56 (or $2.62)
Standard (D)	24 VDC (024)	Standard (01)	340	1.7W approx.	Less than 13.0 VDC	More than 2.0 VDC	FRL274 D024/51AS-A (or CS-A)	$2.59 (or $2.66)
		1 mm (51)	340	1.7W approx.	Less than 13.0 VDC	More than 2.0 VDC	FRL274 D024/01AS-A (or CS-A)	$2.59 (or $2.66)
Low Power (H)		Standard (01)	960	0.6W approx.	Less than 16.8 VDC	More than 1.6 VDC	FRL274 H024/01AS-A (or CS-A)	

Notes: 1. Values listed in the table are measured at 20°C.
2. For silver cadmium oxide contacts (code "K") add $0.10.
3. For silver-tin oxide contact (code "Y") add $0.18.

MICRO REED RELAYS FOR P.C. BOARDS

FRL640 SERIES



The FRL648 Series Micro Reed Relays offer a wide selection and outstanding performance to meet those demanding on-board switching requirements and high density packaging applications.

These relays, available in 1 Form A/B and 2 Form A/B, feature a standard contact rating of 50VA/10W for S type/K type, compact size with a mounting height of only 9mm (.354"), epoxy-molded construction for immersion cleaning safety, low power consumption, and the option of magnetic shielding for isolation from the effects of adjacent relays.

These relays are ideally used for various applications for audio equipment, data processing systems, communications, measuring and control equipment.

Fujitsu field proven dry reed switches are employed as the switching element in the relays in order to offer an excellent low resistance contact and low noise characteristics.

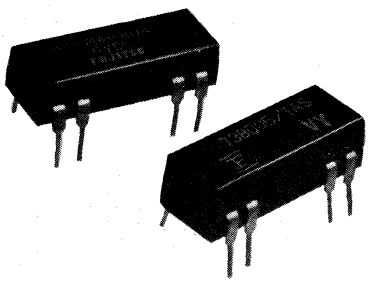
FUJITSU

RELAYS

D.I.P. REED RELAYS

FRL730 SERIES



The FRL730 Series D.I.P. Reed Relays are available in 1 Form A contact with contact rating capability of up to 10VA.

These relays can be mounted in the standard 14-pin dual-in-line package with epoxy-molded construction for safe immersion cleaning. Models with diode and/or electrostatic shield are available.

These FRL730 D.I.P. reed relays are ideal for use in data processing systems and communications, measuring and control equipment.

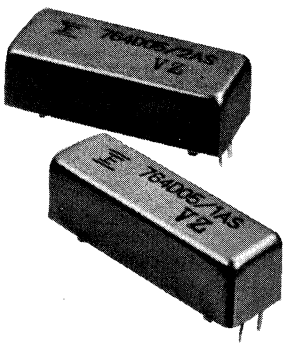
MICRO REED RELAYS FOR P.C. BOARDS

FRL760 SERIES



FRL764 and 768 Series Micro Reed Relays offer excellent operating characteristics such as fast operating time, high reliability and long life. Available in a choice of contact arrangements (1 Form A, 2 Form A and 4 Form A) and contact rating capabilities (10W for standard type and 30W DC, 50VA AC for heavy load type), they are potted by polyurethane resin. These low-profile relays are compatible with 1 x .1 inch grid spacing for P.C. board mounting. These micro reed relays are ideal for use in telecommunications, audio equipment, process control systems and vending machines.

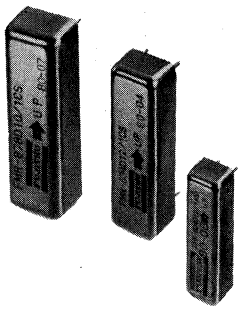
FUJITSU

RELAYS

MERCURY WETTED CONTACT RELAYS

FMR800 SERIES

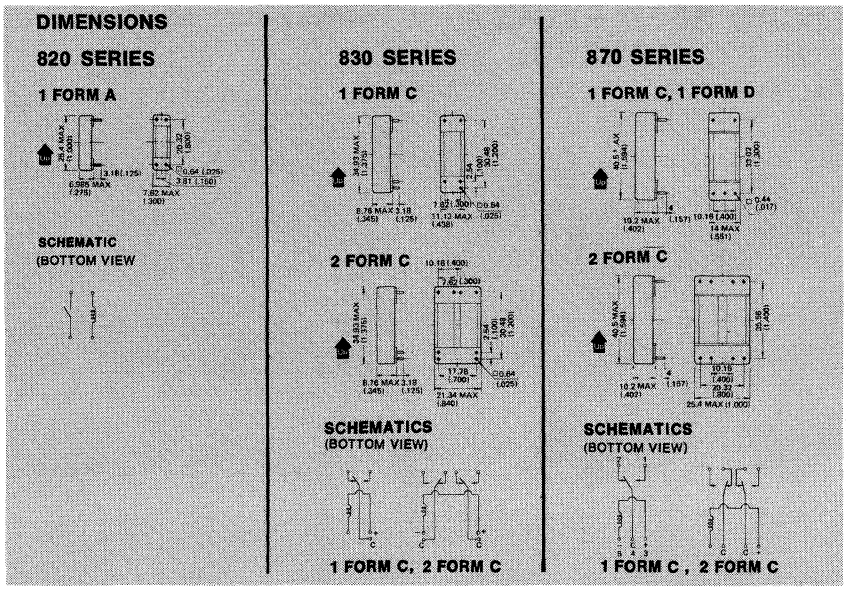


Fujitsu FMR-800 Series mercury wetted contact relays are compact for P.C. board mounting.

Highly stable, they can be used for a wide range of current switching from very low levels to heavy loads. Conventional flux cleaning can be used after P.C. board mounting as these relays are potted with polyurethane resin. The mercury switching gives these relays a bounce-free contact and an extremely long operating life. Therefore, Fujitsu mercury wetted contact relays are ideal for use in measuring equipment, communications systems, computer systems, automatic control systems etc.

FEATURES

- Extremely long life expectancy (10 x 10^9 operations)
- Short operate/release time (2 ms) and no contact bounce
- Stable, low contact resistance
- Available for wide current range switching from low level signals to 2 amps
- Contacts are independent from atmospheric conditions



SELECTION TABLE

Series	Contact Arrangement	Rated Voltage in V DC	Coil Resistance in Ω at 20°C	Coil Power Dissipation in mW	Operate in V DC at 20°C	Release in V DC at 20°C	Designation	Price

WHY do 40,000 Buyers and Electronic Engineers Keep Calling

MASTER DISTRIBUTORS

- BECAUSE orders placed by 3:00 p.m. are shipped the same day.
- BECAUSE we have over 8,000,000 relays & switches in stock.
- BECAUSE of our excellent Value-Added Service.
- BECAUSE of our Just-In-Time Program.

Notes: All specifications are based on a 25°C ambient temperature.
1. Measured with nominal coil voltage applied (except Form B).
2. Higher voltages and/or current may be switched with life expectancy reduced.
3. Excessive voltage (maximum of 6.5 VDC for 5 VDC model, 15 VDC for 12 VDC model, and 28 VDC for 24 VDC model), may cause contact reclosure on Form B models.
4. Mercury relays are position-sensitive and must be mounted within 30° from vertical, as indicated by the "up" arrow.

Products and specifications subject to change without notice.

Consult factory for technical data sheet and application assistance.

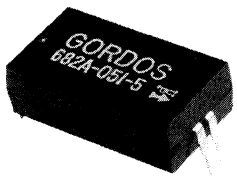
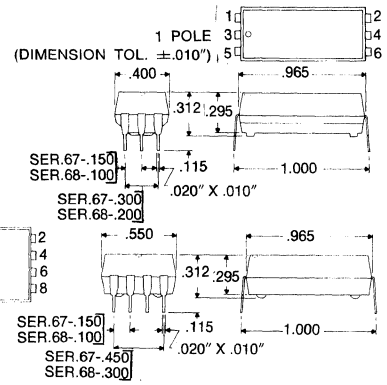
GORDOS

MIP DRY AND MERCURY WETTED REED RELAYS

67 SERIES .150" x 1.000" / 68 SERIES .100" x 1.000"





- All Gordos Relays are molded in semiconductor-grade molding compounds that meet Underwriters Laboratories 94V-0 flammability rating
- Dry reed, high-voltage, high-power, and mercury wetted versions available
- High voltage contacts recommended for FCC Part 68 use
- Logic compatible

Nominal Coil Volage DC	5	12	24
Must Operate Voltage DC	4.0	9.6	19.2
Must Release Voltage DC	0.5	1.2	2.4
Maximum Voltage DC	10	20	35

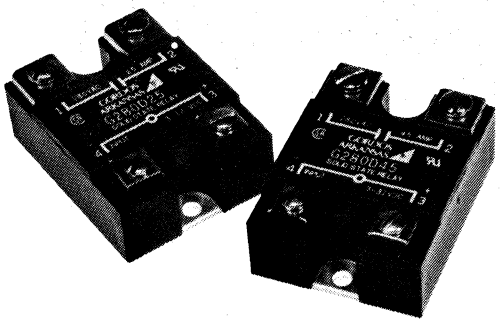
GORDOS

PANEL MOUNT SOLID STATE RELAYS



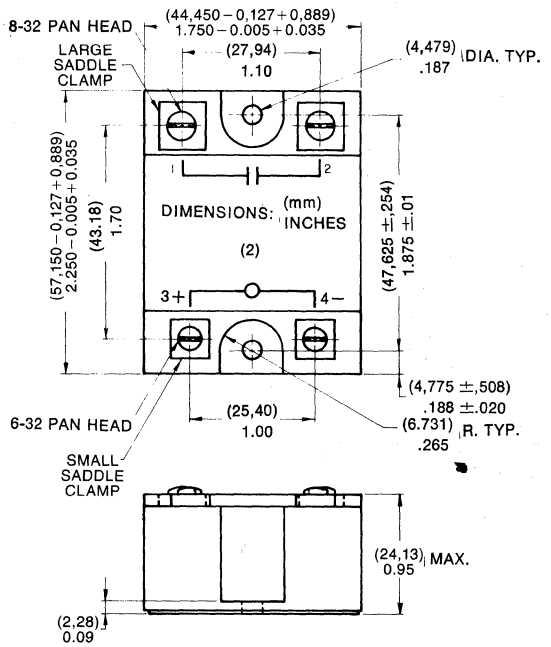
G SERIES POWER RELAYS

- Back-to-back (dual) SCR output for severe inductive loads
- Superior false turn-on immunity and positive turn-off at high dv/dt.

GA5 SERIES POWER RELAYS

- Economical triac output for general purpose applications

G SERIES AND GA5 SERIES OUTLINE DIMENSIONS



Products and specifications subject to change without notice.

G, GA5 SERIES POWER RELAYS

- Current Ratings to 45A
- Output Voltage Ratings to 480VAC with 24VAC Minimum
- AC or DC Inputs
- 4KV Optical Isolation
- Zero Voltage Turn-on
- RC Snubber Network for Inductive Loads
- UL Recognized, CSA Certified
- VDE Approval on Many Models

IDC24	3.3-32 VDC	24	●	●	

Available Options:

Order "N" suffix to obtain an enhanced level of noise immunity per NEMA ICS2-230. The "N" version of the IDC series modules also provides a line input voltage of 10.0 to 60 VDC/VAC.

Order "RN" suffix to obtain a non-zero voltage turn-on AC (Random) output.

Order "24" suffix for 24 VAC input version

Order "F" suffix to obtain a high speed DC switching device. The IDC module input voltage range with "F" suffix is 3.3 to 30 VDC.

Note: F & N are not available together.

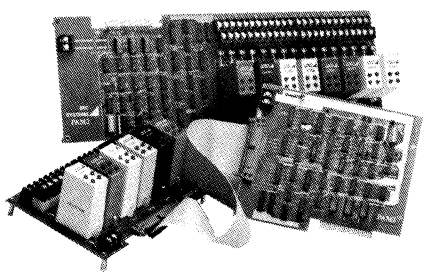
PB-16S	16 Module Positions — Separate ± Logic I/O
PG-16T	16 Module Positions

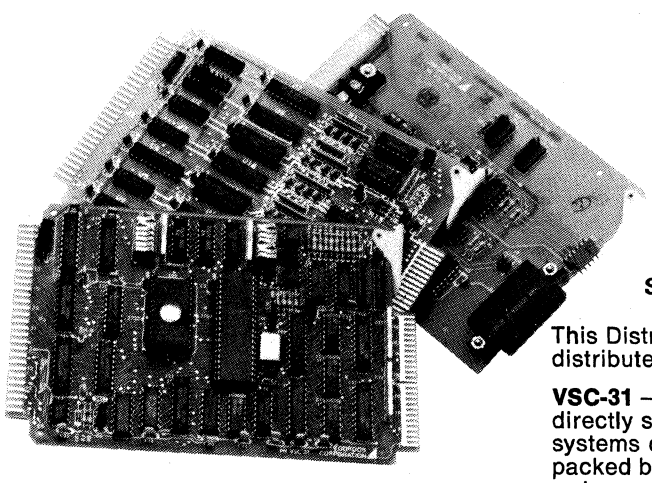


PARALLEL MULTIPLEXERS FOR POWER I/O CONTROL

This series of boards permits the control of up to 512 I/O modules with as few as 16 I/O lines. Each board can support 32 I/O modules. A full complement of 512 I/O modules requires only 16 PAM boards. Each PAM incorporates a watch dog timer function available for use in default conditions.

The PAM 2 board includes both the parallel control logic as well as the mounting space for 8 Quad Packs. Options include a 16.25″ version for a 19″ rack, AGA-7 fusing and removable terminators.

The PAM 3 is a logic only board for use with the PB-32D, PB-32Q or PB32SM I/O mounting racks.



SERIAL MULTIPLEXERS FOR POWER I/O CONTROL

This Distributed Serial System allows the user to construct distributed control and monitoring systems on a RS422 Data Link.

VSC-31 — An STD based RS-422 serial controller card that directly supports the control of 16 I/O lines. Up to 127 VSC-31 systems can be supported on one serial link. Both ASCII and packed binary formats can be used. The VSC-31 can stand alone or be mounted in an STD card cage. It can also source the PAM multiplexers.

G7507 I/O — An STD-based 24 line parallel I/O card which enables expansion of the VSC-31 system to 512 I/O lines.

VSC-TR — A bi-directional RS-232C to RS-422 translator card.

Consult factory for technical data sheet, dimensional tolerances and application assistance.

Notes: All specifications are based on a 25°C ambient temperature.
1. Measured with nominal coil voltage applied (except form B).
2. Higher voltages and/or current may be switched with life expectancy reduced.
3. Mercury relays are position-sensitive and must be mounted within 30° from vertical, as indicated by the "up" arrow.
4. Excessive voltage maximum of 6.5 VDC for 5 VDC model, 15 VDC for 12 VDC model, and 28 VDC for 24 VDC model), may cause contact reclosure on Form B models.

Consult factory for technical data sheet, dimensional tolerances and application assistance.

Products and specifications subject to change without notice.

SPECIFICATIONS

Nominal load voltages and currents are in chart. Current is rated at 25°C and derated with increases. Mini Puck relays are rated as mounted on panel 12 x 12 x 1/8 inches.

Control current is 1-17 mA (3-30 Vdc relays), 1-19 mA (3-32 Vdc relays), and 1-6 mA (all others).

Surge current rating at 1 full cycle, non repetitive, is 60A (2.5A, 3A, 4A, and 6A relays); 110A (12A relay); 250A (25A relay).

Blocking voltages are 200V, 400V, and 600V for the 24 Vac, 120 Vac, and 240 Vac relays.

Zero voltage offset is 6V, 8V, and 18V for the 24 Vac, 120 Vac and 240 Vac relays.

Transient protection is 4000 V/μS for 6A and 15A relays, 3000 V/μS for all others.

Average input impedance is 2000 ohms (3-30 & 3-32 Vdc ranges), and 6000 ohms (6-30 & 6-32 Vdc ranges).

Isolation is 10^9 ohms; dielectric strength is 2500 Vac.

Cases are solvent resistant thermoplastic (UL94V-O) potted with high thermal conductive epoxy. Heat sinks are aluminum (copper for the 25A relay), tin plated. Terminal pins are brass, tin plated; tabs are brass, lead-tin plated; screws are steel, tin plated.

STYLE V SINGLE IN-LINE PACKAGE RELAY (FIG. A)

This PC mounted relay requires only .680 inches of board area and is form, fit, and function replacement for industry standard. It is constructed of high performance, surface mount components for high reliability. Package measures .4 inches deep, and line of pins is located .3 inches from label side.

240	3	6-32	70S2-05-C-03-V

STYLES N & S MINI PUCK© SOLID STATE RELAYS (FIGS. B & C)

These heavy duty relays are fit, and function replacements for old "hockey puck" style relays, but require only one-half the space. High thermal conductive epoxy and high quality heat sinks provide superior heat transfer. Minimum panel space for heat sink effectiveness is 12 inches by 12 inches by .125 inches thick; mount with silicon grease. Body measures 1.2 inches x 1.0 inches by .85 inches high. Push tabs (Style N) add .30 inches to height. Screws (Style S) add approximately .08 inches.

STYLES H & F MICRO CUBE® AND MINI CUBE RELAYS (FIGS. D & E)

Low profile, printed circuit mounted relays allow user to stack PC boards closely together, while switching 24 Vac, 120 Vac, or even 240 Vac loads of up to 4 amperes. These relays do not require additional heat sinks. Style H is only .5 inches high; Style F is only .83 inches high. For a relay with .83 inches height and standard plug-in style termination (Style K, not shown), contact a local authorized distributor. For relays with this footprint for larger loads contact GRAYHILL.

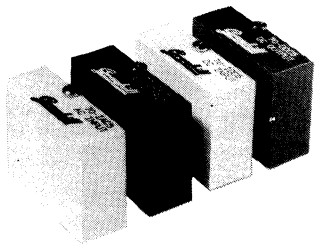
I/O Modules

- UL Recognized and CSA Certified
- Reliable SMD Construction
- Transient Protected
- Form, Fit, Function Replacement



GENERAL INFORMATION

I/O modules are optically isolated interfaces between microprocessors and external AC and DC power devices. They are provided in standard pinouts in two sizes. Standard modules have mounting screws and switch up to 3.5 Amps. Miniature modules are current regulated and switch up to 3.0 Amps. Other specifications are shown below; where the modules differ, the specification for the miniature has been listed in parentheses.

OUTPUT MODULES

CONTROL CIRCUIT—Nominal voltages of 5, 15, and 24 represent 2.5-9.0, 8(10)-18, and 15-30 Vdc respectively. Currents are 5-39, 5-18, and 5-14 mA (maximum current at nominal voltage for mini is 14, 9, and 9 mA). Average input impedances are 220 (300), 1k (1.8k), and 2.2k (2.7k) ohms. Turn-off voltage is 1 Vdc minimum; reverse control voltage, 5 Vdc maximum.

AC OUTPUT CIRCUIT—Nominal load voltages of 120 and 240 Vac represent 24-140 and 24-280 Vac. Minimum blocking voltages are 400 and 600V. Maximum zero voltage offsets are 12 (8) and 18 (8) volts peak; off state leakage is 2 and 4 mA rms maximum.Turn-on and turn-off times are 8.3 mS. DV/DT is 3000V per *u*S. Surge current is 80A. On state voltage drop is 1.5V peak. Typical power dissipation is 1 W/A. Minimum power factor is 0.4. Frequency range is 25-70 Hz. Thermal resistance is 20°C/W (25°C/W) typical. 1^2t for fusing is 35 A^2S minimum.

DC OUTPUT CIRCUIT—Load voltage is 3-60 Vdc. Clamping voltage maximum is 108 (80) Vdc. Typical power dissipation is 1W/A.Transient power dissipation is 400W at 1 mS nonrecurring. Turn-on time is 75 *u*S (20 *u*S) maximum. Turn-off time is 500 *u*S (40 *u*S) maximum. Off state leakage is 10 *u*A maximum. On state voltage drop is 1.2 Vdc maximum. Surge current is 5A for 1S.

INPUT MODULES

LOGIC CIRCUIT—Nominal supply voltages of 5, 15, and 24 Vac represent 3.5 (3.0)-6, 8-18, and 15-30 Vdc respectively. Current is 13 mA maximum. Breakdown voltage is 50 Vdc minimum. Off state leakage is 1.0 *u*A maximum. On state voltage drop is .45 Vdc maximum. Turn-on and turn-off times for the AC input modules are 20 mS maximum. Turn-on time for the DC module is 5 mS (220 *u*S) maximum; turn-off time is 5 mS (400 *u*S) maximum.

AC INPUT CIRCUIT—Nominal voltages of 120 and 240 Vac represent 90-140 and 180-280 Vac. Input currents at maximum input voltages are 11 (8) and 6 mA rms maximum. Drop out voltages are 25 and 50 Vac rms minimum. Average input impedances are 14k (22k) and 45k (60k) ohms.

DC INPUT CIRCUIT—Voltage is 3-32 Vdc. Current at maximum input voltage is 14 mA (18 mA). Drop out voltage is 1 Vdc minimum. Average input impedance is 2k (1.8k) ohms.

GENERAL CHARACTERISTICS

Specifications are made at 25°C; derate with higher temperatues. Minimum isolation is 10^{10} ohms. Dielectric strength is 4000 Vac rms. Input to output capacitance is 6 pF Vibration is 20 G's peak (.06″ DA). Mechanical shock is 1500 G's 0.5 mS half-sine. Operating temperature is −40 to +100°C; storage, −40 to +125°C. Weight is 40 grams (25 grams for the miniature). Terminals are copper wire, tin plated. Case is solvent resistant thermoplastic, UL94V-O. Potting is high thermal conductive epoxy.

ALSO AVAILABLE

AC output modules for random turn-on of 240 Vac from 5 Vdc or with normally closed circuitry. DC output modules for switching 200 Vdc from 5 Vdc. These part numbers provide non-polarized input: 70-IDC5NP switches 5 Vdc from 10-32 Vdc or 15-32 Vac; 70-IDC15NP switches 15 Vdc from 10-32 Vdc or 15-32 Vac; 70-IDC24NP switches 24 Vdc from 10-32 Vdc or 15-32 Vac. See Grayhill catalog for specifications.

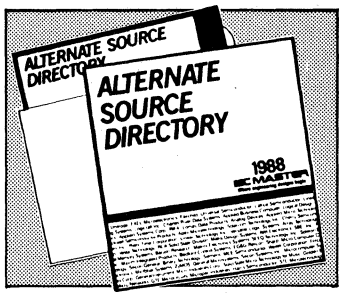
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

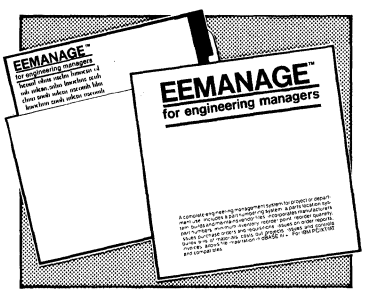
The electronic ASD is FLEXIBLE! You can add ICs and you can add comments.

You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the 1988 Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50 each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

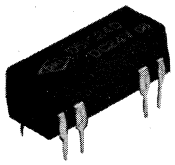
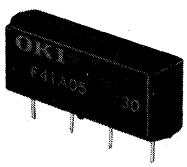
HASCO COMPONENTS INC. / REED RELAYS

SINCE 1976



DIP SERIES



SIP SERIES

FEATURES

- De-activated rhodium contacts. for stable contact resistance.
- Standard TO-116 Terminal Grid fits all standard DIP sockets.
- Interface directly with RTL, DTL, TTL, HTL logic.
- Molded epoxy package for environmental immunity.
- Automatic insertion compatible.
- Relay testing services test report available.

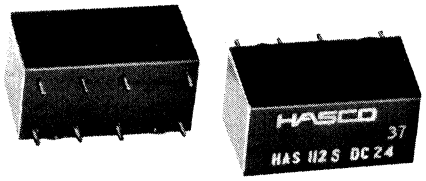
RELAYS

DPDT — DIP or PC STANDARD or SENSITIVE HAS 112/HS 212 RELAY

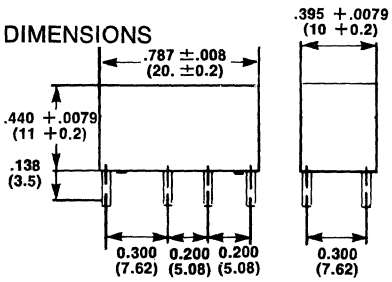


FEATURES

- Available fully sealed or "semi" sealed.
- Employing 16 pin, IC spacing.
- Low profile for tight spacing.
- Coil voltages: 5, 6, 9, 12, 24 & 48 from stock.
- Compatible and competitive!
- FCC Pt 68 available.
- Sensitive available.
- Thinner option available.
- Bifurcated contacts.
- Nitrogen sealing available.
- In stock!

SAMPLES SENT SAME DAY!

DIMENSIONS



For sealed unit specify "S"
For Pt 68 specify (2)

CONTACT DATA

Arrangement: 1 Form C (SPDT)
Material & Rating: Silver, gold flash: 3A at 24VDC or 120VAC, 1.5A at 240VAC, resistive
Silver Cadmium oxide, silver flash: 6A at 24VDC or 120VAC, 3A at 240VAC, resistive
Special alloy, silver flash: 10A at 24VDC or 120VAC, 5A at 240VAC, resistive
Max. operating Voltage: 250VAC & 125VDC
Min. permissible load (reference value): Silver contact: 5VDC, 1mA
Other contact: 5VDC, 100mA
Service life: Mechanical: 20 Million operations
Electrical: 100,000 operations min. at rated load

COIL DATA

(See coil data chart)
Voltages: From 3V to 24V
Power (at 20°C): Nominal: 0.45 watt

GENERAL DATA

Contact resistive: 50 m ohm Max.
Operate time: Approx. 6 ms (at nominal voltage)
Operate bounce time: Approx. 2 ms
Release time: Approx. 2 ms
Release bounce time: Approx. 4 ms
Insulation resistance: More than 100 M ohm at DC 500V
Dielectric strength: 750VAC (50/60 Hz), between open contact; 2000VAC (50/60 Hz), between coil & contact
Vibration: 1.5mm double amplitude, 10 to 50 Hz
Shock: 100m/sec² (approx. 10 G's)
Operation frequency: Mechanical: 18,000 operations/hour
Electrical: 1,800 operations/hour (under rated load)
Temperature range: −30°C to +85°C.
Temperature rise: Less than 35 deg.
Humidity: 45° −85% RH
Approximate weight: 10 gr.

COIL RATINGS

Nominal Coil Voltage	Coil Resistance in Ohms, ±10% at 20°C	Must Operate Voltage at 20°C	Must Release Voltage at 20°C	Maximum Voltage

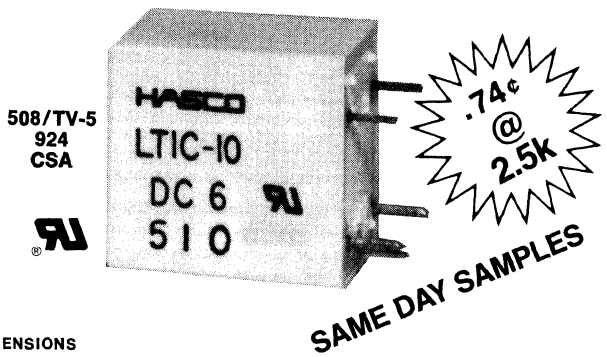
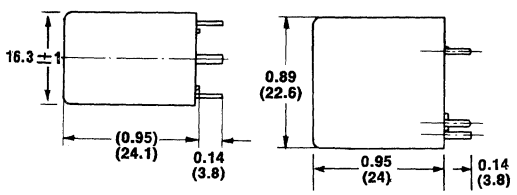
HASCO COMPONENTS INC. SINCE 1976 — RELAYS

LT MINIATURE POWER RELAYS SPDT 3, 5 & 10 AMP



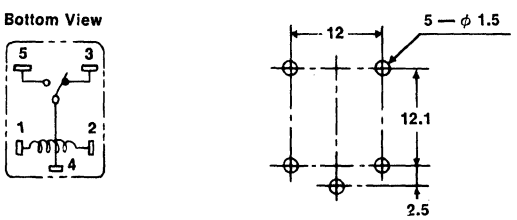
LT DIMENSIONS



Unit: inch (mm)

(Shorter height available)

CIRCUIT DIAGRAM AND MOUNTING



ORDERING INFORMATION

LT	IC	5	XXV
	C: SPDT	3 = 3 amp	5 = 5V
	B: SPNC	5 = 5 amp	6 = 6V
	A: SPNO	10 = 10 amp	9 = 9V
			12 = 12V
			24 = 24V
			48 = 48V

For lower height model use SLT

FEATURES

- Miniature, lightweight relay which requires less mounting space.
- UL 508/TV-5 available.
- High reliable relay with dielectric strength, 2000V which employs the specific construction.
- Economical and favorable price for simple construction.
- Fully sealed.
- In stock for most voltages and amps!

GENERAL CHARACTERISTICS

Ambient Temperature: −20 to +60°C (not to freeze).
Ambient Humidity: 45 to 85% (not to be dewy).
Operating Time: Less than 20 mS.
Release Time: Less than 20 mS.
Contact Resistance (at initial): Less than 100 milliohms at 6V DC, 1A.
Insulation Resistance: 500V DC, more than 100M Ohms.
Dielectric Strength: Between contacts: 500V AC (50/60 Hz) 1 minute — Between coil and contact; 2,000V AC (50/60 Hz) 1 minute.
Vibration: 6G (10 to 55 Hz).
Shock: 10G.
(The above mentioned values are at normal temperature and humidity.)

CHARACTERISTICS

Power Consumption: Approx. 0.36W to approx. 0.5W.
Temperature Rise: Less than 40 deg. after applied max. continuous voltage.

COIL RATINGS

Rated Voltage (V)	DC6	DC9	DC12	DC24
Rated Current (mA)	60	40	30	15
Coil Resistance (Ω)	100	225	400	1600

* Coil rated current tolerance is +15%, −20% at ambient temp. of 20°C.
* DC 5V coil rating also in stock.

MAXIMUM LOAD RATINGS

Type	Load	Voltage	AC 125V	DC 24V
3A	Resistive	(cos ϕ = 1)	3A	3A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	1.2A	1.2A
5A	Resistive	(cos ϕ = 1)	5A	5A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	2A	2A
10A	Resistive	(cos ϕ = 1)	10A	10A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	4A	4A

SPECIFICATIONS

Maximum Continuous Voltage: 115% of rated voltage at 20°C.
Operating Voltage: Less than 80% of rated voltage at 20°C.
Opening Voltage: More than 10% of rated voltage at 20°C.
Coil Temperature Rise: LT 1C 3/LT 1C 5—Less than 50°C at rated voltage. LT 1C 10—Less than 60°C at rated voltage.
Initial Contact Resistance: Less than 100 mΩ (1A 6V DC).
Insulation Resistance: More than 100 MΩ (500V DC).
Dielectric Strength: Between coil and contact — AC 1500V for 1 minute. Between contacts — AC 750V for 1 minute
Electrical Life: More than 100,000 operations at rated voltage.
Mechanical Life: More than 5,000,000 operations.
Contact Material: LT 1C 3 — Gold plated over silver LT 1C 5 and LT 1C 10 — Silver alloy.
Operating Temperature: LT 1C 3/LT 1C 5 — 30°C ~ +20°C. LT 1C 10 — 30°C ~ +50°C.

*** Available up to 4000V DC.**

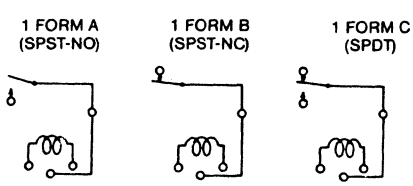
WIRING DIAGRAMS

PIN VIEW



MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

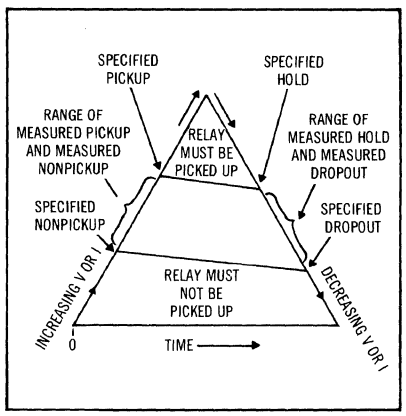
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

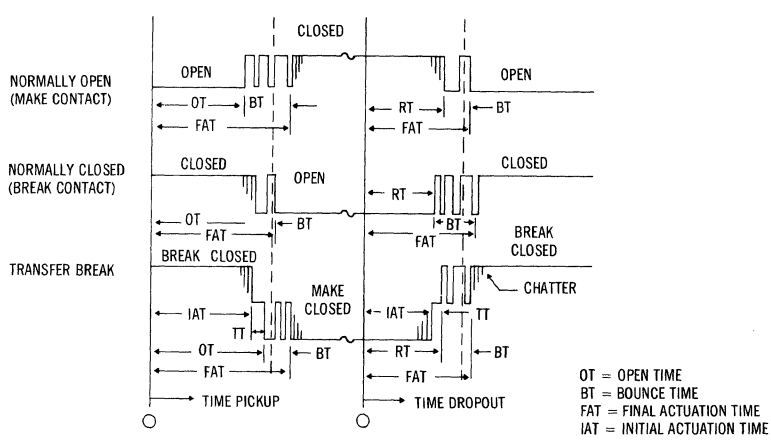


Fig. 2. Typical time vs. current (non-inductive load)

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

High Performance Miniature Relays

Hi-G Company is the leading supplier of rugged, hermetically-sealed, military-qualified relays, rated 10 amperes and under. Because all Hi-G Military Qualified relays are designed for extreme environmental conditions, they are also suited for critical commercial and computer applications.

HI-G RELAYS

Hi-G offers the most complete selection of qualified relays, rated 10 amperes and under, of any manufacturer in the world. The following charts list the appropriate military specification, relay configuration, relay contact operating parameters, and the corresponding Hi-G part number. A (J) prefix to the Hi-G part number denotes Qualified Relay; L, M, and P suffixes denote applicable failure rate.

Series (J)MA:
TO-5 Case Relay, DPDT

QUALIFIED:
MIL-R-39016/9
MIL-R-39016/15
MIL-R-39016/20
MIL-R-28776/1

Failure Rate Levels
L, M, P.

These ultra-miniature DPDT relays in transistor-style case are available in **4 types:** basic relay; with diode coil suppression (D); with two diodes for coil suppression and polarity reversal protection (DD); and with integral transistor driver and diode coil suppression (T).

Hi-G Military Relays

Series (J)MS:
Sensitive TO-5 Case Relay, DPDT

QUALIFIED:
MIL-R-39016/11
MIL-R-39016/16
MIL-R-39016/21
MIL-R-28776/3

Failure Rate Levels L, M, P.

These sensitive ultra-miniature DPDT relays in transistor-style case are available in **4 types:** basic relay; with diode suppression (D); with two diodes for coil suppression and polarity-reversal protection (DD); and with integral transistor driver and diode coil suppression (T).

Contacts: 2 Form C
Rating: 1 Amp
Sensitivity: 60 mW

Hi-G Military Relays

Series G:
1/5 Crystal Can Relay

QUALIFIED:
MIL-R-39016/13

Failure Rate Levels
L, M, P.

These 2-ampere, .150 grid, low-profile DPDT relays allow maximum packaging density under extreme environmental conditions. Relays are available in three terminal styles and in three enclosures.

Contacts: 2 Form C
Rating: 2 Amp
Sensitivity: 135 mW

Hi-G Military Relays

Series (J)2K-4940:

1/2 Crystal Can Relay Coil Transient Suppressed

QUALIFIED:
MIL-R-39016/22

Failure Rate Levels
L, M, P.

These DPDT transient suppressed relays are available with solder lugs, wire leads or pins for printed circuit board mounting. Three mounting styles are available.

Contacts: 2 Form C
Rating: 2 Amp
Sensitivity: 250 mW

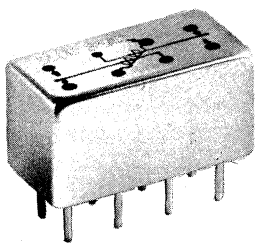
Hi-G Commercial and Computer Relays

The advantages of the hermetically-sealed relay are also available for commercial and computer applications. These versatile, high-quality relays operate reliably under extreme environmental conditions, because they incorporate military design technology.

Series FS2:
Flagship™ 2-Ampere Relay

Versatile hermetically-sealed commercial DPDT relay, with 2 form C contacts, switches up to 60 W/100 VA, 2 amperes, maximum. Sensitivity is 350 mW.



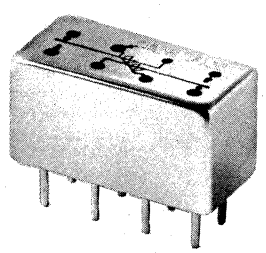
Operate Time: 4 ms max. at nominal coil voltage at 25°C.
Release Time: 4 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

COILS
Resistance: Standard available to 3500 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 350 milliwatts at 25°C.
Nominal Power Consumption: 660 milliwatts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48
MAX. CONTINUOUS VOLTAGE	6	7	14	29	43	57
PICK-UP VOLTAGE (MAX.)	3.7	4.4	8.7	17.5	26.0	35.0
DROP-OUT VOLTAGE (MIN.)	0.3	0.3	0.7	1.4	2.2	2.9
COIL RESISTANCE (OHMS)	39	55	220	870	1960	3480

Series FS3:
Flagship™ Sensitive 2-Amp Relay

This sensitive 150 mW hermetically-sealed DPDT relay has 2 form C contacts and switches up to 60 W/100 VA at 2 amperes, maximum.



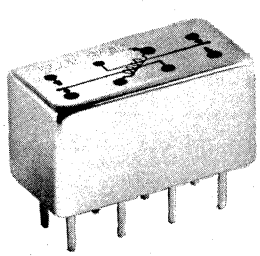
Operate Time: 6 ms max. at nominal coil voltage at 25°C.
Release Time: 4 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

COILS
Resistance: Standard available to 8300 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 350 milliwatts at 25°C.
Nominal Power Consumption: 280 milliwatts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48
MAX. CONTINUOUS VOLTAGE	6	7	14	29	43	57
PICK-UP VOLTAGE (MAX.)	3.7	4.4	8.7	17.5	26.0	35.0
DROP-OUT VOLTAGE (MIN.)	0.25	0.3	0.7	1.4	2.2	2.9
COIL RESISTANCE (OHMS)	90	130	520	2070	4550	8300

Series FS5:
Flagship™ 5-Ampere Relay

This 5-ampere DPDT relay has 2 form C contacts and switches up to 150 W/300 VA, 5 amperes, maximum. Sensitivity is 725 mW.



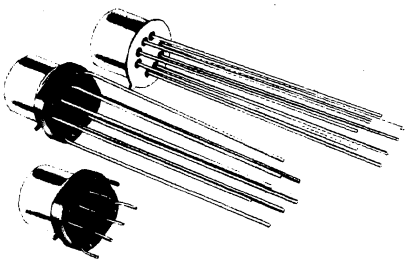
Operate Time: 5 ms max. at nominal coil voltage at 25°C.
Release Time: 3 ms max. at nominal coil voltage at 25°C.
Capacitance: Between contacts 2.5 pF.
Dielectric Strength: Between all other mutually insulated points 500 Vrms.
Insulation Resistance: 500 Megohms min.

COILS
Resistance: Standard available to 1600 ohms. Standard tolerance ±10%. Other resistances and tolerances available.
Operate Power: 725 milliwatts at 25°C.
Nominal Power Consumption: 1.4 Watts at 25°C.

VOLTAGE CODE	105	106	112	124	136	148
NOMINAL COIL VOLTAGE	5	6	12	24	36	48
MAX. CONTINUOUS VOLTAGE	6	7	14	29	43	57
PICK-UP VOLTAGE (MAX.)	3.6	4.3	8.5	17.0	26.0	34.0
DROP-OUT VOLTAGE (MIN.)	0.25	0.3	0.7	1.4	2.2	2.8
COIL RESISTANCE (OHMS)	18	25	100	400	900	1600

Series CA:
Commercial TO-5 Case Relay

These sensitive 185 mW 1-ampere TO-5 case DPDT relays, with 2 form C contacts, are available in 3 types: basic relay; with coil-suppression diode (D); and with integral transistor driver and coil-suppression diode (T).



Coil Data: Standard coil resistance available to 1,560 ohms. Design tolerance ±10%.

Contact Resistance: 200 milliohms max., initial.

Operate Time: 4.0 milliseconds max.

Release Time: 3.0 milliseconds max. basic. 6.0 milliseconds max. suppressed. 6.0 milliseconds max. transistor.

Dielectric Strength: 350 Vrms, 60 Hz, all points at sea level except between transistor terminals.

Insulation Resistance: 1,000 megohms min., all points at 500 Vdc.

Contact Capacitance: 0.7 pF typical, between contacts.

Series: CAW, CAWD, CAWT

Coil Voltage Code	Nominal Coil Voltage (Vdc)	Coil Resistance (ohms) ±10% @25°C	Pick-Up† (Vdc) Max. @25°C	Base Current to†† Turn-on (mAdc) (CAWT only)

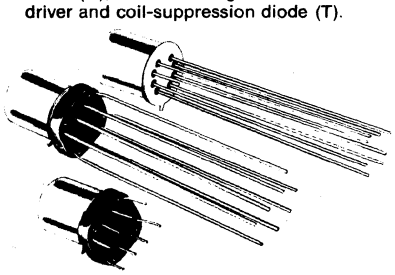
†CAWT — Not Applicable
††Limit Base/Emitter Current to 50 mA max.

Series CS:
Commercial Sensitive TO-5 Case Relay

These ultrasensitive 90 mW 1-ampere DPDT transistor-case relays, with 2 form C contacts, are available in 3 types: basic relay; with coil-suppression diode (D); and with integral transistor driver and coil-suppression diode (T).



Coil Data: Standard coil resistance available to 11,000 ohms. Design tolerance ±10%.

Contact Resistance: 200 milliohms max., initial.

Operate Time: 6.0 milliseconds max.

Release Time: 3.0 milliseconds max. basic. 7.5 milliseconds max. suppressed. 7.5 milliseconds max. transistor.

Dielectric Strength: 250 Vrms, 60 Hz, all points at sea level except between transistor terminals.

Insulation Resistance: 1,000 megohms min., all points at 500 Vdc.

Contact Capacitance: 0.7 pF typical, between contacts.

Series: CSW, CSWD, CSWT

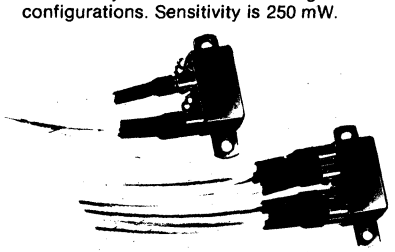
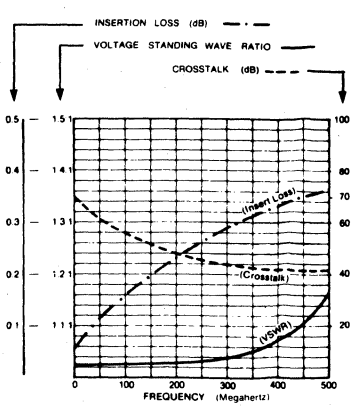
Hi-G Radio Frequency Relays

Coaxially terminated and hermetically sealed, these 0-500 MHz relays incorporate a relay design to provide reliable switching functions in the most demanding RF applications. Thousands of testing hours and millions of field operations assure the highest degree of reliability. Two-pole devices are available with either one or both sets of poles cabled. When only one set of poles is cabled, the other set is available for use with pin or hook termination.

Series RFK:
75 Watt 1/2 Crystal Can RF Relay

Coaxially-terminated, hermetically-sealed 0 to 500 MHz relays can carry 200 RF watts with low-level to 2 amperes auxiliary switching capability. These relays are available with two terminal styles and three mounting configurations. Sensitivity is 250 mW.





NOTE: Values shown are in a 50 ohm impedance coaxial system.

Voltage Code	106	112	126
Nominal Coil Voltage	6	12	26.5
Max. Continuous Coil Voltage	7.2	14.4	32.0
Max. Pick-up Voltage @ +25°C	3.3	6.5	13.5
Min. Drop-out Voltage @ +25°C	0.3	0.7	1.5
Effective DC Coil Resistance @ +25°C ohms	40	150	675

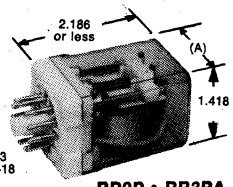
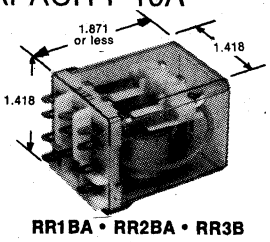
GENERAL PURPOSE RELAY/SOCKETS

RR SERIES

POWER TYPE LARGE CAPACITY-10A 1, 2, AND 3 POLES



RR2P • RR3PA



RR1BA • RR2BA • RR3B

FEATURES

- Contact mechanism secured directly to molded resin base, eliminates the intermediate plate.
- Simple construction.
- UL recognized and CSA certified.
- Available with check button for test operation and indicator lights.
- Complete line of sockets and socket accessories available for flexible application.

SPECIFICATIONS

Contact Material: Silver (AG)
Contact Resistance: 30mΩ maximum (initial value)
Operate Time: 25ms maximum
Release Time: 25ms maximum
Power Consumption: AC: Approx. 3VA (50Hz), 2.5VA (60Hz); DC: Approx. 1.5W
Insulation Resistance: 100MΩ minimum (measured w/500 DC megger)
Dielectric Strength:
Pin Type (RR2P, RR3PA)
Bet. live and non-live parts: 1,500V AC, 1 minute
Bet. contact circuits and operating coil: 1,500V AC, 1 minute
Bet. contact circuits: 1,500V AC, 1 minute
(1,000V AC bet. NO-NC contacts)
Blade Type (RR1BA, RR2BA, RR3B)
Bet. live and non-live parts: 2,000V AC, 1 minute
Bet. contact circuit and operating coil: 2,000V AC, 1 minute
Bet. contact circuits: 2,000V AC, 1 minute
Bet. contacts of same polarity: 1,000V AC, 1 minute
Frequency Response: 1,800 operations/hour
Temperature Rise: Coil: 153°F (85°C) max. Contact: 117°F (65°C) max.
Vibration Resistance: 0 to 6g (55Hz maximum)
Shock Resistance: 10g minimum
Life Expectancy:
Electrical: Over 500,000 operations (120V, 50/60Hz, 10A)
Mechanical: Over 10,000,000 operations
Operating Temperature: −22°F to +158°F (−30°C to +70°C)

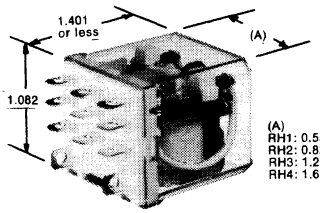
idec MIDGET POWER/GENERAL PURPOSE RELAYS

RH SERIES
MIDGET POWER TYPE LARGE CAPACITY-10A 1, 2, 3, AND 4 POLES



FEATURES
- Miniature size package allows compact system designing.
- 10 amp contact capacity.
- Dielectric strength — up to 2,000 volts.
- UL recognized and CSA certified.
- Indicator light or check button available on 2, 3 and 4-pole models.
- Complete accessories include IDEC's broad line of sockets, hold-down springs and mounting rails.

SPECIFICATIONS
Contact Material: Silver cadmium oxide (Ag-CdO)
Contact Resistance: 50 mΩ max. (initial value)
Operate Time: SPDT(RH1), DPDT(RH2) — 20 msec max., 3PDT(RH3), 4PDT(RH4) — 25 msec max.
Release Time: SPDT(RH1), DPDT(RH2) — 20 msec max., 3PDT(RH3), 4PDT(RH4) — 25 msec max.
Power Consumption (Approx.):
SPDT(RH1) — AC: 1.1 VA (50 Hz), 1 VA (60 Hz), DC: 0.8W
DPDT(RH2) — AC: 1.4 VA (50 Hz, 1.2 VA 60 Hz), DC: 0.9W
3PDT(RH3) — AC: 2 VA (50 Hz), 1.7 VA (60 Hz), DC: 1.5W
4PDT(RH4) — AC: 2.5 VA (50 Hz, 2 VA (60 Hz), DC: 1.5W
Insulation Resistance: 100 MΩ min. (measured at 500V DC megger)
Dielectric Strength:
SPDT(RH1)
Between live and non-live parts: 2000V AC, 1 minute
Between contact circuit and operating coil: 2000V AC, 1 minute
Between contacts of the same pole: 1000V AC, 1 minute
DPDT(RH2), 3PDT(RH3), 4PDT(RH4)
Between live and non-live parts: 2000V AC, 1 minute
Between contact circuit and operating coil: 2000V AC, 1 minute
Between contact circuit and operating coil: 2000V AC, 1 minute
Between contact circuits: 1500V AC, 1 minute
Between contacts of the same pole: 1000V AC, 1 minute
Frequency Response: 1800 operations/hour
Temperature Rise: Coil: 85 deg. max., Contact: 65 deg. max.
Vibration Resistance: 0 to 6g (55 Hz max.)
Shock Resistance: SPDT(RH1), DPDT(RH2) — 20g, 3PDT (RH3) 4PDT(RH4) — 10g
Operating Temperature: −22° to +158°F (−30°C to +70°C)
Weight (Approx:): RH1: 24g, RH2: 37g, RH3: 50g, RH4: 74g
Life Expectancy:
Electrical: 500,000 operations or more (120V AC, 10A)*
Mechanical: 50,000,000 operations or more
Note*: 200,000 operations or more (120V AC, 10A) in SPDT(RH1), 3PDT(RH3), 4PDT(RH4) Types.

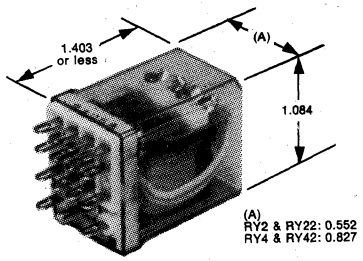
MINIATURE GENERAL PURPOSE RELAYS/SOCKETS

RY SERIES
3A RATING—2 AND 4 POLES
TWIN CONTACT ALSO AVAILABLE



FEATURES
- Available with check button for test operation and indicator lights (on 4PDT only).
- For dry circuit applications, bifurcated crossbar contacts available on both 2 and 4-pole models (contact material Ag-Pd alloy).
- Simple construction using the least possible number of components.
- UL recognized and CSA certified models.
- Complete line of sockets and socket accessories for flexible application.

SPECIFICATIONS
Contact Material: RY2, RY4: Fine Silver (Gold Plated)
RY22, RY42: Ag-Pd alloy
RY2, RY4 50 mΩ max.
Contact Resistance: RY22, RY42: 100 mΩ maximum
(Initial Value)
Operate Time: 20 ms maximum
Release Time: 20 ms maximum
Power Consumption:
RY2, RY22/AC: Approx. 1.1VA (50 Hz), 1 VA (60 Hz),
DC: Approx. 0.8W
RY4, RY42/AC: Approx: 1.4 VA (50 Hz), 1.2 VA (60 Hz),
DC: Approx. 0.9W
Insulation Resistance: 100 MΩ minimum (measured with 500V DC megger)
Dielectric Strength:
Between live and dead parts: 1500V AC, 1 minute
Between contact circuit and operating coil: 1000V AC 1 minute
Between contact circuits: 1000V AC, 1 minute
Between NO-NC contact: 700V
Frequency Response: 1800 operations/hour
Temperature Rise: Coil: 153°F (85°C) maximum; 117°F (65°C) maximum
Vibration Resistance: 0 to 6g (55 Hz maximum)
Shock Resistance: RY2, RY22: 10g minimum
RY4, RY42: 20g minimum
Life Expectancy:
RY2, RY4: Electrical: Over 200,000 operations (120V AC, 3A)
Mechanical: Over 50,000,000 operations
RY22, RY42: Electrical: Over 200,000 operations (120V AC, 1A)
Mechanical: Over 50,000,000 operations
Operating Temperature: −22° to +158°F (−30° to +70°C)

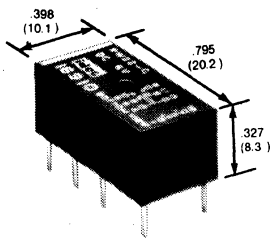
P.C. TYPE RELAYS

RW SERIES

HIGHLY SENSITIVE 200mW POWER CONSUMPTION
10μA TO 2A CONTACT CAPACITY, DPDT
MEETS 1,500V FCC SURGE REQUIREMENTS
EPOXY SEALED PACKAGE



SPECIFICATIONS

Contact Material: Silver (Gold-Clad)
Contact Resistance: 50mΩ maximum (initial value)
Operate Time: 5msec maximum (at the rated voltage)
Release Time: 5msec maximum (at the rated voltage)
Bounce Time: 5msec maximum
Insulation Resistance: 1,000MΩ minimum (500V DC megger)
Dielectric Strength: Between contact and coil: 1,500V AC, 1 minute
Between contacts of the same pole: 1,000V AC, 1 minute
Vibration Resistance: Damage Limits: 10 to 55Hz, 5 mm p-p
Operating Extremes: 10 to 55Hz, 3.3 mm p-p
Shock Resistance: Damage Limits: 1,000 m/sec^2 (Approx. 100G)
Operating Extremes: 500m/sec^2 (Approx. 50G)
Operating Temperature: −40°C to +70°C (no freezing)
Operating Humidity: 45 to 85%RH (no condensation)
Electrical Life: 500,000 operations (Rated load, at 1,800 operations/h)
Mechanical Life: 100,000,000 operations (at 36,000 operations/h)
Weight (Approx.): Approx. 3.5g

ORDERING INFORMATION

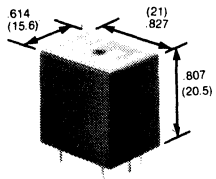
When ordering, specify the basic type number and coil voltage.

Example: **RW22-G** **DC12V**

RW22-G — Basic Type No.
DC12V — Coil Voltage

RCN SERIES

LOW COST PC RELAYS
3, 5 AND 10 AMP CONTACT RATING, SPDT
SEALED AND UNSEALED TYPE PACKAGES



SPECIFICATIONS

Contact Material: Silver (3A), Silver-Nickel (5A), Tin-Alloy (10)
Contact Resistance: 100 mΩ max. (initial value)
Operate Time: 15 msec max. (at the rated voltage)
Release Time: 10 msec max. (at the rated voltage)
Insulation Resistance: 100 MΩ min. measured with a 500V DC megger
Dielectric Strength:
Between contact and coil: 1,500V AC, 1 minute
Between contacts: 750V AC, 1 minute
Operating Frequency: 1,800 operations/hour
Vibration Resistance:
Damage limits: 10 to 55 Hz, total amplitude 1.5 mm
Operating extremes: 10 to 55 Hz, total amplitude 1.5 mm
Shock Resistance:
Operating extremes: 100 m/sec^2 (approx. 10G)
Damage limits: 1,000 m/sec^2 (approx. 100G)
Operating Temperature: −30°C to +70°C (3A) no freezing
−20°C to +50°C (5A) no freezing
Life (operations):
Mechanical: 10,000,000 (at 18,000 operations/hour)
Electrical: 100,000 (at 1,800 operations/hour)
Soldering Temperature: 260°C, 10 sec maximum
Weight: Approx. 14g

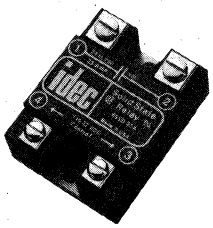
RSS SERIES
DC/AC AND AC/AC MODELS
10, 25 AND 40 AMP OUTPUT



- Photo isolation
- 600 volt blocking voltage
- 4000 volt isolation
- Zero voltage turn-on
- Built-in snubber
- 100% tested at rated current
- High surge capability
- U.L. recognized (File No. E59804)
- Dual SCR output (40A)

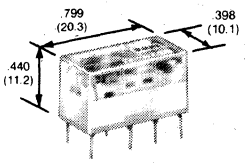
LOW PROFILE PC RELAYS
HIGHLY SENSITIVE, 400mW POWER CONSUMPTION
100μA TO 1.25A CONTACT CAPACITY, DPDT
MEETS 1,500V FCC SURGE REQUIREMENTS



SPECIFICATIONS

Contact Material: Silver (Gold-Clad)
Contact Resistance: 100mΩ max. (initial value)
Operate Time: 5 msec max. @ Rated Voltage
Release Time: 5 msec max. @ Rated Voltage
Bounce Time: 6 msec max. @ Rated Voltage
Insulation Resistance: 100MΩ min. (initial value)
Dielectric Strength:
Between contact and coil: 1,000V AC, 1 minute
Between contact of different poles: 1,000V AC, 1 minute
Between contact of the same pole: 500V AC, 1 minute
Surge Withstand Voltage: 1,500V FCC
Operating Frequency: 3,600 operations/hr.
Vibration Resistance: 10 to 55 Hz (Total amplitude: 1.5 mm)
Shock Resistance: Damage limits: 1,000 m/sec² (Approx. 100G)
Operating extremes: 200 m/sec² (Approx. 20G)

Electrical Life
(Resistive Load): 500,000 operations minimum
AC: 110V, 0.3A
DC: 24V, 1.25A
Mechancial Life: 50,000,000 operations minimum
Operating Temperature: −30°C to +70°C (no freezing)
Weight: Approx. 4.5g

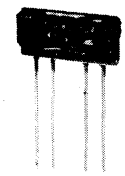
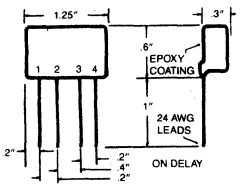
TIME DELAY RELAYS & SENSORS
SOLID STATE CONTROLS

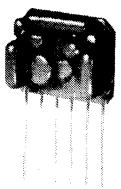
Unique tiny ICSOTIMER™ time delay modules solve big timer jobs

ICSOTIMER™ KH Series

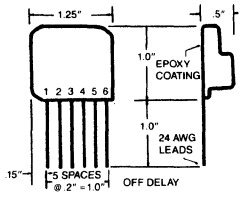


KH1





KH 2,3,4



Thick film hybrid RC type timers. Solid State Output.

Voltages: AC—12, 24, 120, 240
DC—12, 24, 48, 120

Ratings: UL File #E68153
CSA: LR54307

Action 1 = 100MA max, 10MA min

Actions 2, 3, 4 = 500MA max, 10MA min

Termination: 2" long #22AWG solid tinned leads

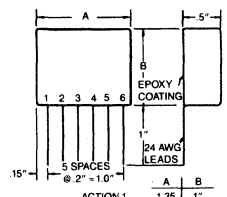
Coating: Conformal

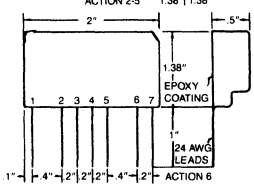
8 Time Ranges: .1 to 300 sec

Sizes: Action 1 = 1.3 × .6 × .3
Actions 2, 3, 4 = 1.3 × 1.0 × .5

ICSOTIMER™ KD Series

KD1





Digital Countdown—CMOS type timers. Solid State Output.

Voltages: AC—12, 24, 120, 240
DC—12, 24, 48, 120

Ratings:

Actions 1, 3, 5 = 1 Amp max, 20 MA min

Actions 2, 4, 6 = .5 Amp max, 10MA min

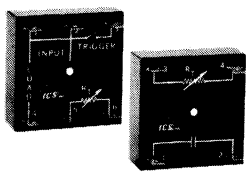
Termination: 2" long #22AWG solid tinned leads

Coating: Conformal

3 Time Ranges: .1 sec to 10 hrs

Sizes: Action 1 = 1.4 × 1.0 × .5
Actions 2, 3, 4, 5 = 1.4 × 1.4 × .5
Action 6 = 2.0 × 1.4 × .5

ICSOTIMER™ KE Series in Molded Block



Features the DIGI ICSOTIMER in a rugged 2" × 2" × ¾" package with 3/16" or ¼" quick connect terminals, center hole mounting. Drives loads to 1 amp.

Digital Countdown—CMOS type timers. Solid State Output.

Voltages: AC—12, 24, 120, 240
DC—12, 24, 48, 120

Ratings:

Actions 1, 2, 3 = 1 Amp max

Termination: 3/16" or ¼" Q.C. terminals

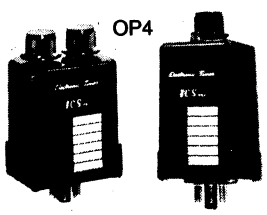
3 Time Ranges: .1 sec to 10 hrs

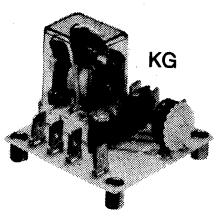
Sizes: Actions 1, 2, 3 = 2 × 2 × .8 less terminals

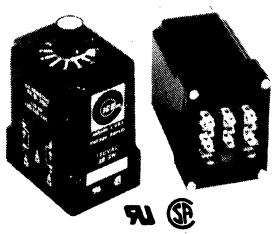
DESCRIPTION OF TIMING ACTIONS

1—On Delay, Delay on Make
2—Off Delay, Delay on Break
3—Interval
4—Triggered Interval, Single Shot
5—Recycle, Equal Off/On
6—Recycle, Off/On, independently adjustable

Time Delay Relays & Voltage Sensors







Time Delay Relays

Ratings:
DPDT—⅓ HP @ 120VAC
10 Amp res @ 240VAC, 28VDC

Voltages:
AC 12, 24, 120, 240
DC 12, 24, 48, 120

11 Time Ranges: .1 sec to 10 hours

Sizes:
OP4 Actions 1-5 = 2 × 2 × 3⅞"
OP4 Action 6 = 2⅜ × 1¾ × 3½
KG 2⅛ × 2⅛ × 1¾ high

Terminations:
OP4: Octal style plug-in base.
3/16" 11-Pin blade base.
KG: ¼" Q.C. Tabs

Voltage Sensor: K8001, 4, 5
True Off Delay: K7830, 5

Ratings:
5 Amp res @ 240VAC
Voltage Sensor DPDT
True Off Delay SPDT

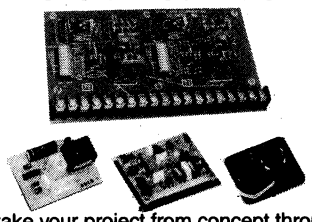
Voltages:
120, 240VAC

Size:
2⅜ × 1¾ × 3½

Terminations:
11-Pin blade base.

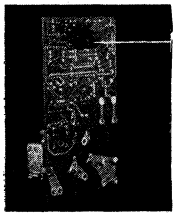
All Dimensions in Inches

Custom Controls



We take your project from concept through breadboard, prototype and production. We have over 20,000 ft² of production capability so we are able to handle any project, large or small. Our 24 years experience and QA program assures project success.

Infrared Time Controls



120 or 208/240. Senses an object up to 15 inches away. Heavy duty relay with contact rated 1 HP @ 125/250 VAC mounted on pcb. Sensing head available on the pcb or remote. Consult factory for time and other sensing configurations.

MICROELECTRONIC POWER IC RELAYS

ChipSwitch® Solid State Relay

The ChipSwitch relays utilize power integrated circuits for AC power line switching while maintaining turn-on at zero voltage crossing and turn-off at zero current crossing. They are a compact, low cost, and highly reliable interface for isolating and switching AC loads such as solenoids, valves, lamps, contactors, small motors, and heaters from low level DC signals.

BOSFET® PhotoVoltaic Relay

International Rectifier Photo-Voltaic Relays utilize a unique power integrated circuit termed a BOSFET to form a solid state replacement for signal level electromechanical relays. They feature high speed, zero offset voltage, low pick-up power, miniaturization, and are widely applied in instrumentation, multiplexing, automatic test equipment, thermocouple switching and telecommunications for general purpose switching of AC/DC analog and digital signals.

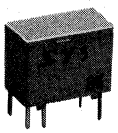
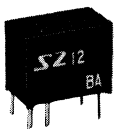
SY/SZ RELAYS

1 Amp SPDT
L — 0.492″,
W — 0.291″,
H — 0.374″





CONTACT DATA

Arrangement — 1 Form C

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial value)

Ratings — 0.5A, 120V AC or 1A, 24V DC (resistive) switched
2.0A carrying curent

Life Expectancy — Mechanical: Min. 5 million operations
Electrical: SZ Min. 200,000 operations at rated load
SY Min. 150,000 operations at rated load

COIL DATA

Voltages — 1.5 to 24V DC

Power (at 20°C) —
SZ Operate — 0.15 watt (0.16 watt for 18V coil, 0.18 watt for 24V coil)
Nominal — 0.3 watt (0.32 watt for 18V coil, 0.36 watt for 24V coil)
SY Operate — 0.075 watt
Nominal — 0.15 watt

Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 100 MΩ minimum at 500V DC

Dielectric Strength — 500V AC (50, 60 Hz), between open contacts
1000V AC between contacts and coil

Temperature Range — −40°C to +70°C (18V coil: −30°C to +65°C,
25V coil; −30°C to +60°C) (at nominal voltage)

Time Values (approx.) — Operate 1.5 mS, Release 1 mS (at nominal voltage)

Vibration Resistance — 20G (10 ~ 300 Hz) amplitude 3 mm

Shock Resistance — 50G

Mounting — For direct printed circuit mounting on grid spacing
of 2.54 mm (0.1 in.)

Approximate Weight — 1.7 gr (0.06 oz.)

Enclosure — Polybutylene terephthalate (PBT)

Surge Strength — 1000V

Nominal Coil Voltage	Coil Resistance	Operate Voltage	Type No.	List Price
3	30	2.1	SZ-3W	$2.64

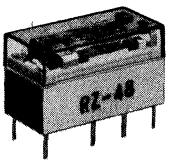
RZ/RZL RELAYS

2 Amp DPDT
L — 0.795″,
W — 0.386″,
H — 0.457″



CONTACT DATA

Arrangement — DPDT (B-M) — RZ, RZ( )W Type
Material — Gold overlaid silver-palladium alloy
Max. Switching Power —
30W/60VA — Single Contact
30W/50VA — Bifurcated contact at resistive load
Max. Switching Current —
2A AC or DC — Single Contact
1A AC or DC — Bifurcated contact at resistive load
Max. Switching Voltage —
150V DC/125V AC — Single Contact
100V DC/90V AC — Bifurcated contact at resistive load
Contact Resistance (Pin-pin) — 100mΩ Max.
Capacitance — 1.5PF max. between open contact
0.5PF max. between adjacent change-over contact
Life Expectancy —
Mechanical: 20 million operations — Single Contact
15 million operations — Bifurcated contact
Electrical: 0.5 million operations at 1.25A 24V DC or 0.4A 125V AC at resistive load — Single contact
0.5 million operations at 0.7A 24V DC or 0.25A 125V AC at resistive load — Bifurcated contact

COIL DATA

Nominal Voltage — 3 to 48 V DC — RZ, RZ( )W Type,
3 to 24V DC — RZ1, RZ1( )W Type
Power (at 20°C) — Nominal: 515 ~ 560 mW — RZ, RZ( )W Type,
Operate: 200 ~ 324 mW — RZ, RZ( )W Type
Max: 1050 mV
Temperature Range — −40°C ~ +65°C — RZ RZ( )W Type
(at nominal voltage) −40°C ~ +75°C — RZ1 RZ1( ) Type

GENERAL DATA

Dielectric Strength — 500V AC (50/60 Hz) between open contacts,
1000V AC contact-coil
Insulation Resistance — 1000 MΩ min. at 500V DC
Timing — Operate <4 ms, release <2
Bounce Time — Approx. 1 ms on operate
Approx. 4 ms on release
Vibration Resistance — 10 to 60 Hz amplitude 1.5 mm (10G)
Shock Resistance — Destruction shock: 100G (11 ms ±1 ms)
Unerror shock: 10G (11 ms ± 1 ms)
Surge Strength — 1500V AC between all conductors

Standard Coil and Contact Combinations (20°C

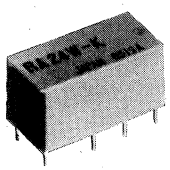
TAKAMISAWA ELECTRIC CO., LTD.

Sub Miniature Printed Circuit Board Relays

RA RELAY



1 Amp DPDT Relay
L — 0.795″
W — 0.394″
H — 0.394″

CONTACT DATA

Arrangement — 2 Form C (DPDT)
Material — Gold overlaid silver palladium alloy vs silver palladium alloy
Resistance — Max. 100 mΩ (Initial)
Rating — 24V DC 1A, or 120V AC 0.5A
Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 24V DC 1A
Min. 200,000 operations at 120V AC 0.5A
Max. Carrying Current — 2A

COIL DATA

Voltages — 1.5 to 48V DC
Power (at 20°C) — Operate: Standard 100—200 mW
Single winding latching 35~100 mW
Double winding latching 75~180 mW
Nominal: Standard 200~400 mW
Single winding latching 75~200 mW
Double winding latching 150~360 mW
Operate (at 20°C) — Less than 70% of nominal voltage
Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ at 500V DC
(Expect between P & S coil)
Dielectric Strength — 1000V AC between open contact
1500V AC between all other conductors
(Expect between P & S coil)
Temperature Range — −40°C~+80°C (RA-W, RA-WN, RAL-W, RAL-DW, RAL-WP, RAL-DWP)
−40°C~+70°C (RA-WM, RAL-DWM), at nominal voltage, Non carring Contact
Surge Strength — 1500V between coil and contact, adjacent contacts
Time Value (Max.) — Operate: (RA-WM, RAL-DWM) 4 mS
(RA-W, RA-WN, RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS
Release: (RA-WM) 3 mS
(RA-W, RA-WN, RAL-DWM) 4 mS
(RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS, at nominal voltage
Vibration Resistance — 30G (10~55 Hz) Unerror
30G (10~55 Hz) Destruction
Shock Resistance — 50G (11 ±1 mS) Unerror
100G (11 ±1 mS) Destruction
Enclosure — Polybutylene terephthalate (PBT)

Notes: • If correct polarity is not applied to the coil terminals, relay does not operate properly.
• To release latched contact, polarity to be applied to coil terminals should be reversed.

* P only. ** S only.

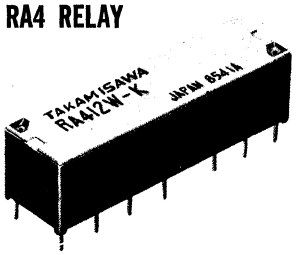
Sub Miniature Printed Circuit Board Relays

RA4 RELAY

1 Amp 4PDT
L — 1.387″,
W — 0.390″,
H — 0.433″



CONTACT DATA

Arrangement — 4 Form C (4PDT)
Material — Gold overlaid silver palladium alloy vs silver palladium alloy
Resistance — Max. 100 mΩ
Ratings — 120V AC 0.5A, 24V DC 1A (Resistive)
Max. Current — 2A
Life Expectancy Mechanical — Min. 20 million operations
Electrical — Min. 500,000 operations at 24V DC
Min. 200,000 operations at 120V AC 0.5A

COIL DATA

Voltages — 1.5 to 48V DC Power (at 20°C)

Type	RA4, RA4L		RA4-M, RA4L-M	
	Operate	Nominal	Operate	Nominal
Single Winding Non Latching	0.1W	0.2W	0.2W	0.4W
Single Winding Latching	0.045W	0.09W	0.09W	0.18W
Double Winding Latching	0.09W	0.18W	0.18W	0.36W

Operate (at 20°C) 70% of nominal voltage

GENERAL DATA

Insulation Resistance — 1000 mΩ min. at 500V DC
Dielectric Strength — 1000V AC between open contacts
1500V AC btween all other conductors
Temperature Range — −40°C ~ +80°C (RA4, RA4L),
−40°C ~ +70°C (RA4-M, RA4L-M)
Surge Strength — 1500V between coil and contact, adjacent contacts
Time Value — Operate: 6 msec max.
Release: 4 msec max.
Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
Shock Resistance — 100G (6 ±1 msec) Destructive
30G (11 ±1 msec) Unerring
} reference value
Enclosure — PBT

Notes
- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

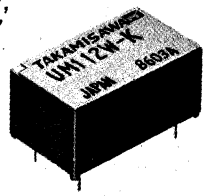
TAKAMISAWA ELECTRIC CO. LTD.

Sub Miniature RF Printed Circuit Board Relays

UM RELAY

0.1 Amp SPDT W — 0.449", L —0.787", H — 0.394"



CONTACT DATA
Arrangement — 1 form C (SPDT bifurcated)
Ratings — 24V DC 10 mA, 1W at 900 MHz
Resistance — 100 mΩ max. (initial value)
Max. Current — 100 mA DC
Max. Voltage — 30V DC
Max. Power — 1W DC, 10W at 900 MHz
Life Expectancy — Mechanical: 1,000,000 operations min.
Electrical: 300,000 operating min. at rated load

COIL DATA
Voltage — 1.5 to 48V DC
Power — (at 20°C)

Type	Operate	Nominal
Single Winding Non Latching	0.1W (0.11W for 48V coil)	0.2W (0.22W for 48V coil)
Single Winding Latching	0.1W	0.2W
Double Winding Latching	0.2W	0.4W

Operate wattage less than 70% of nominal voltage

GENERAL DATA
Insulation Resistance — 1000 MΩ min. at 500V DC (UMIL-D, except between P.S. Coil)
Dielectric Strength — 500V AC between open contacts, between contacts and earth
1000V AC between coil and other terminals
Temperature Range — −30°C ~ +80°C at nominal voltage
Time Value — 6 msec max. at nominal voltage (UMI Release Time 5 ms)
Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
Shock Resistance — 100G (6 msec) Destructive
50G (11 msec) Unerring
} reference value

HIGH FREQUENCY CHARACTERISTICS
Isolation — 60 dB min. at 900 MHz
Insertion Loss — 1 dB max. at 900 MHz
V.S.W.R. — 1.2 max. at 900 MHZ
(Impedance of the measuring devices is 75Ω)

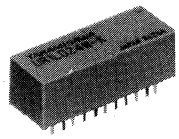
Notes
- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

UR RELAY



L–1.291"
W–0.504"
H–0.425"

CONTACT DATA
Arrangement—2 Form C (DPDT bifurcated contact)
Ratings—24VDC 10mA, 1W at 900 MHz
Resistance—100 mΩ max. (Initial value)
Max. Current—100 mA DC
Max. Voltage—30 VDC
Max. Power—1WDC, 10W at 900 MHz
Life Expectancy—Mechanical: 1,000,000 operations min.
Electrical: 300,000 operations min.

COIL DATA
Voltage—1.5 to 48 VDC **Power**—(at 20°C)

Type	Operate	Nominal
Single winding non latching	0.18W (0.2W for 48V coil)	0.36W (0.39W for 48V coil)
Single winding latching	0.125W	0.25W
Double winding latching	0.25W (0.28W for 48V coil)	0.5W (0.55W for 48V coil)

GENERAL DATA
Insulation Resistance—1000MΩ min. at 500 VDC (Except between P & S Coil)
Dielectric Strength—500VAC between open contact, between contact & Shield terminals 1000VAC between coil & other terminals
Temperature Range—−30°C ~+80°C at nominal voltage
Time Value—approx. 6 ms at nominal voltage
Vibration Resistance—30G (10~ 55Hz)...Destructive
20G (10~ 55Hz)...Unerring
Shock Resistance—100G (6ms)...Destructive
50G (11ms)...Unerring
Reference value

Notes • If correct polarity is not applied to the coil terminals, relay does not operate properly. • To release latched contact, polarity to be applied to coil terminals should be reversed. • Since this is the polarized relay, Confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

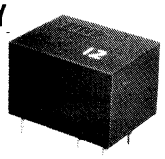
Miniature General Purpose Relays

LZ RELAY



5 Amp SPDT
L — 0.843″
W — 0.646″
H — 0.583″

CONTACT DATA

Arrangement — 1 Form C

Material — 5A type: Gold overlay silver-nickel alloy (single)
3A type: Gold overlay silver (single)
1A type: Gold overlay silver-palladium alloy (bifurcated)

Load — 5A type: 5A @ 30V DC or 120V AC, 4A @ 240V AC resistive, ⅛ HP
3A type: 3A @ 30V DC or 120V AC, 2.5A @ 240V AC resistive, $^1/_{10}$ HP
1A type: 1A @ 30V DC or 120V AC, resistive

Life — Mechanical: 20 million operations minimum
Electrical: 0.1 x 10^6 operations minimum at rated load

Timing — Operate: < 5 ms (standard type), < 6 ms (high sensitive type)
Release: < 2 ms

COIL DATA (@ 20°C)

Operate Power — 210 mW (standard type), 150 mW (high sensitive type)

Nominal Power — 450 mW (standard type), 330 mW (high sensitive type)

Maximum Power — 1.4W

GENERAL DATA

Insulation Resistance — 250 MΩ at 500V DC

Dielectric Strength — 750V AC between open contacts
2000V AC between all other points

Temperature Range — standard type −40°C to +70°C
sensitive type −40°C to +80°C

Vibration Resistance — 15G (10-55 Hz)

Shock Resistance — 15G (11 ms ±1 ms)

Approximate Weight — 8 gr (0.28 oz.)

Enclosure — Standard — polycarbonate
Washable or sealed — PBT

Surge Strength — 3000V

FEATURES

- Extremely low profile, super small & high sensitive poralized relay
  Height 5 mm
  Weight approx. 1.2 gr.
- High reliability
  —Bifurcated contact
- FCC Rules & Regulations
  (Dielectric strength 1000V AC...between all conductors)
- Wide operating range
- DIL pitch terminals
- Washable type
- Latching version available

SPECIFICATIONS

CONTACT DATA

Arrangement—2FormC (DPDT)

Material—Stationary...Gold overlaid silver palladium
Movable...Silver palladium

Resistance—Max. 100mΩ (Initial)

Rating—1A 30V DC or 0.5A 125V AC (Resistive)

Life expectancy—Mechanical: Min 100 million operations
Electrical: Min 500,000 operations at 1A 30V DC
: Min 200,000 operations at 0.5A 125V AC

COIL DATA

Voltages—4.5 to 24V DC

Power (at 20°C)—Operate 0.07W (0.11W for 24V coil)
Nominal 0.14W (0.2W for 24V coil)

Operate (at 20°C)—70% of nominal voltage

Duty—Continuous.

GENERAL DATA

Insulation resistance—Min. 1000MΩ at 500V DC

Dielectric strength—1000V AC between open contact, coil-contact, adjacent contact

Surge strength—1500V

Temperature range—−40°C ~+85°C at nominal voltage

Time Value (at nominal voltage)—Operate Max. 6mS Release Max. 4mS

Vibration Resistance—10 to 55Hz amplitude 3mm...Unerring
10 to 55Hz amplitude 5mm...Destructive } Reference Value

Shock Resistance—50G (11 mS)...Unerring
100G (6mS)...Destructive } Reference Value

Enclosure—PBT

Notes:
- Since this is the polarized relay, confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

High Voltage Relays

Applications
The capability to rapidly switch high voltages in a small package makes Kilovac® relays especially well suited for applications in ECM, communications, sonar and radar pulse forming networks, heart defibrillators and other capacitive discharge circuits, electrostatic coating equipment, laser and x-ray power supplies, digital antenna couplers (tuners), automatic dielectric-strength test equipment, and other high voltage equipment, or low voltage applications where extreme reliability is required.

Vacuum as a Dielectric
Since most high voltage arcs are initiated by ionization of the insulating medium, absence of any such medium (i.e., a hard vacuum) produces the greatest possible isolation between contact electrodes. In a vacuum of 10^{-8}mm of mercury, dielectric strengths can be achieved on the order of 2000 V/mil. A vacuum dielectric has the additional advantage of providing an inert (i.e., nonoxidizing) atmosphere in which high voltage contacts operate.

Low Contact Resistance
In conventional relays, contact resistance is variable from cycle to cycle. In Kilovac vacuum relays, it remains low and stable over the life of a relay (.015 ohms typical). Stability and low resistance are attributable to uniform cleanliness of parts, lack of oxidation or contamination, and use of only pure metals in the contact areas. Contact maintenance is never required.

Kilovac® Corporation

High Voltage Relays

Small Size and Weight
The small contact gap and short contact travel possible with a vacuum dielectric result in minimal package size and weight.

Safety
Because contacts are sealed within the high voltage envelope, switching may be safely accomplished in explosive atmospheres.

Fast Switching Time
10 ms typical, due to small contact gap and short armature travel.

Electronegative Gas as a Dielectric
Kilovac gas-filled relays are pressurized with an electronegative gas mixture. This insulating medium offers several advantages, including high voltage isolation capability in a compact package. The primary advantage is its ability to suppress arcing in heart defibrillator and other capacitive discharge circuits.

Kilovac Medical Relays
Since 1964 Kilovac has produced and delivered thousands of high voltage relays especially designed for heart defibrillators. Kilovac produces several models of patient relays, safety discharge relays, and ECG relays, as well as a multifunction relay capable of performing all of these switching functions in a defibrillator.

Kilovac® Corporation

Kilovac® High Voltage Relays

KILOVAC'S NEW K40 AND K80 SERIES RELAYS

The new Kilovac K40 and K80 series represent major advances in high voltage vacuum relay technology. Low cost, improved packaging, and high reliability make these relays the ideal choice in your high voltage and RF power applications. The Kilovac K40 series is available with up to 10 kV isolation, 15 amps dc continuous current carry, and RF ratings to 32 MHz. These relays can provide your antenna coupler, RF transmitter or frequency agile communication system with that necessary competitive edge.

The Kilovac K80 series represents a first in compact high voltage *and* high current printed circuit board mountable relays. With its unique package design, the K80 series weighs only 1.5 oz (42 gr) and occupies only 1.74 in² (11.21 cm²) of board space. The K80 series 8 kV rating (10 kV test voltage) and up to 10A current carry surpass the ratings available in any other PCB mountable relay. The K80 is available with high voltage flying leads for ease of design or, as an option, with the high voltage on the PC board terminals. The K80 series relays are built to the same tough military specifications as the K40 series.

The Kilovac Advantage

Kilovac has specialized in the manufacture of high voltage vacuum and gas-filled relays for over 20 years. It's our only business. We want to be your choice for high voltage relays; therefore, we maintain small quantities of the most commonly used K40 and K80 series in stock for immediate shipment. Call Kilovac for your special applications and unique design problems. Our factory sales engineers or our worldwide sales representative force will give you prompt and thorough assistance.

POWER SWITCHING

Kilovac K40 and K80 relays were specially designed for power switching applications—applications which require rugged relay life such as capacitive discharge circuits, pulse forming networks, and safety bleeder switches. Figure 1 shows the predicted electrical life for K40 and K80 SPST-NO relays for the contacts making a resistive load. Since circuit conditions vary widely, this figure can be considered a general guide only. Please contact the factory with your design requirements.

Hot Switching Resistive Load-Life Characteristics
K41A, K43A, K81A Relays

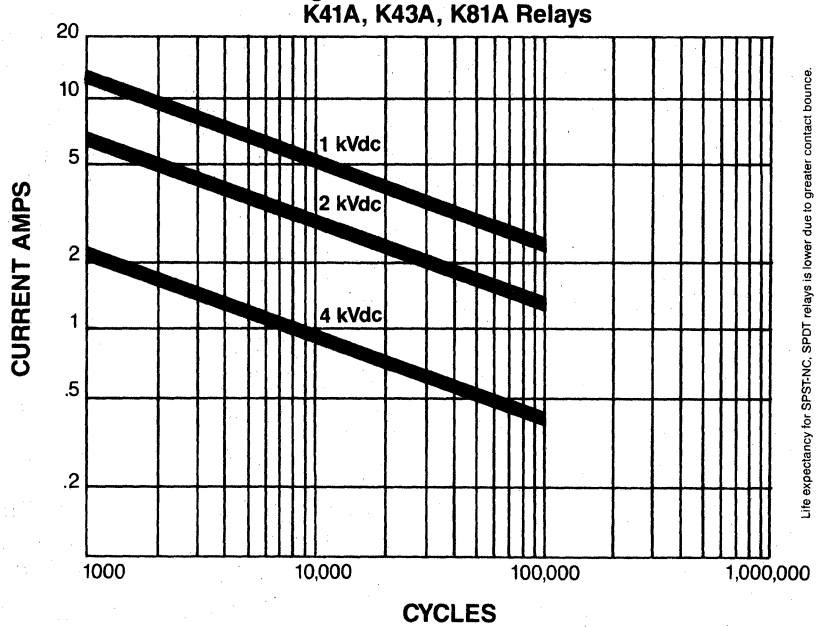

Figure 1

K80 SERIES RELAYS

In response to the need for printed circuit board mounted high voltage relays, Kilovac has introduced the K80 series. With a footprint up to 47% smaller than a high voltage reed relay, the K80 series provides many times the power handling ability of a reed relay. Compare the specifications found to the right.

Complete specifications of the K80 series can be found on the following pages.

	KILOVAC K80 SERIES	HIGH VOLTAGE REED RELAY
Continuous Current Rating	10 A	3 A
Switching Current at 4 kV 100,000 operations	up to 500 mA	4 mA
Maximum Switching Current at 1 kV	up to 12 A	0.004 A
Footprint	0.78″ × 2.23″ (1.74 in²)	1.01″ × 3.31″ (3.34 in²)

*5A Rating for K81 Series with H.V. Terminals PC Board Mounted.
** Contact factory for ratings above 85°C.

Features:

- 8 kV Rating
- 10 A continuous current carry
- 2 × 10^6 cycles mechanical life
- Can hot switch 1 AMP or greater at 8 kV
- Can hot switch up to 500 mA 100,000 times at 4 kV
- Compact 1.75 in² footprint
- Lightweight 1.5 oz. design
- Up to 47% smaller than a high voltage reed relay
- 100 times the current rating of a reed relay in power switch applications.

LEACH®

CONTROL PRODUCTS DIVISION

COMPONENTS FOR AEROSPACE ELECTRICAL POWER MANAGEMENT

TIME DELAY RELAYS • POWER MONITORS

Our reputation is built on products providing solid problem-solving capability. This began in 1919 with our first product, the break in relay, which greatly improved the efficiency of radio telegraphy.

In today's complex electrical power distribution systems, LEACH time delay relays solve sequencing problems, control "relay race" conditions and permit system tolerance of temporary nuisance signals.

Several models are electrically and physically interchangeable with widely used M6106 electromechanical relays. Our Series 6000, 7000 and 8000 provide the smallest, lightest 10 AMP, 2 and 4 pole timers in the business and are "plug compatible" with the popular MS 27400 and MS 27401 electromechanical relays. These devices combine the proven capability of industry-standard relays with highly reliable hybrid microelectronic timing circuits, screened to military standards. Most models, in our popular timing ranges, are available from our distributors for overnight delivery. Our Power Monitors and Sensors, designed to meet the requirements of the recently established specification, MIL-R-28894, constantly monitor and protect critical AC or DC circuits.

This selection guide offers a broad view of our products but for special applications or detailed specifications, please call us. Our problem solvers are anxious to work with you.

TABLE I. SPECIFYING A FIXED TIME DELAY PERIOD

LEACH and the Military identify the time delay period in the same manner. A four digit dash number specifies the delay period in milliseconds. The first three numbers are significant figures while the fourth indicates the number of zeros to follow the first three.

Examples:
—1001 = 1,000 milliseconds (1 second)
—2502 = 25,000 milliseconds (25 seconds)
—5000 = 500 milliseconds (0.5 seconds)

In the case of a repeat cycle timer (flasher), a similar method is used. The dash number indicates the length of each cycle. (Note: each cycle is 50% on, 50% off).

Examples:
—2500 = 250 milliseconds cycle or 4 cycles/sec.
—1001 = 1,000 milliseconds cycle or 1 cycle/sec.
—6002 = 60,000 milliseconds cycle or 1 cycle/min.

TABLE II. USE AND SELECTION OF ADJUSTABLE TIMERS

Adjustable timers are useful in system prototyping or breadboard circuits where the precise time delay period is unknown. By the use of an external resistor, these devices are adjustable over a specific DECADE RANGE. Although any decade range within the overall timing range can be supplied, the following ranges are offered as standards:

0.1 to 1 seconds	(Specify -1001)
1.0 to 10 seconds	(Specify -1002)
5 to 50 seconds	(Specify -5002)
50 to 500 seconds	(Specify -5003)

Note from the above that in specifying a decade range, the four digit dash number indicates the high or upper limit of the desired decade range.

The formula below provides the proper resistance value to achieve the desired time delay:

$$R_{ext} = \left(\frac{T_1}{T_0} - 1\right) 100{,}000 \text{ Ohms}$$

Where: R_{ext} = External resistance value (Ohms)
T_1 = Desired time in seconds
T_0 = Minimum time (low end of decade range) in seconds.

As an example, if using a 5 to 50 second adjustable timer and a 30 second delay is desired, the calculation is:

$$R_{ext} = \left(\frac{30}{5} - 1\right) 100{,}000 \text{ or } R_{ext} = 500 \text{ K Ohms}$$

Recommended resistors IAW MIL-R-55182 1/8 WATT, 1% (RNC6OHXXXXFS).

NOTES:

(1) The accuracy specification applies for any combination of temperature and voltage. For units with a timing range less than 1 second, add ±10 milliseconds to the ±% tolerance.

(2) Recycle time is that action which must occur to assure a new timing cycle can be completed within tolerance:

A. TD on Operate — Remove power from input terminals for the period specified.

B. TD on Release — Apply power to the control terminal for the period specified.

C. "True" TD on Release — Apply power to the input terminals for the period specfied.

NOTES:

(5) EMI test limits will not be exceeded during the timing interval or when continuously energized under steady state conditions, per paragraph 3.23, MIL-R-83726A.

(6) Terminals X1 and X2 must be connected together during the test. Dielectric withstanding voltage and insulation resistance are measured between all mutually insulated terminals and between all terminals and case.

LEACH®
CONTROL PRODUCTS DIVISION

AC POWER MONITOR SENSOR

DESCRIPTION

The PMA-7000, PMA-8000 and PMA-9000 AC Power Monitoring Sensors have been designed with thick-film hybrid microelectronics sensing circuits and MIL-R-6106 relays, packaged in a hermetically sealed enclosure. The output of the relay will energize when: 1) each of the three phase voltages is within the under and over trip points, 2) the frequency is within the under and over trip points, 3) the phase rotation is ABC, and 4) the pickup time delay period is completed.

The output of the relay will change to, or remain in, the de-energized state when any or all of the above conditions are not met. The output will change state (energize or de-energize) after the selected time delay.

TIME DELAY ON RELEASE WHEN TRIP LEVEL(S) ACHIEVED

NOTES

[1] The accuracy specification applies for any combination of operating temperature and voltage. For units with a timing range less than 1 second, add ±10 milliseconds to the ±10% tolerance.

[2] Transient and power loss specifications are based on a maximum duty cycle of 1/50.

[3] EMI test limits will not be exceeded during the timing interval or when continuously energized under steady state conditions.

[4] Terminals X1, X2, Y1 and Y2 must be connected together during the test. Dielectric withstanding voltage and insulation resistance are measured between all mutually insulated terminals and between all terminals and case.

[5] Recycle time is defined as the minimum time that power must be removed to assure that the next timing cycle will be completed within the specified timing tolerance. (Units can be recycled during timing or after time-out.)

[6] Accuracy is specified measuring one parameter at a time, with all other conditions nominal. Combinations of marginal parameters may cause another ±2% variation. Frequency accuracy is ±2% at 25°C, ±4% over the entire temperature range with input voltages at 115 Vrms. Maximum variation with voltage is ±2%.

DC POWER MONITOR SENSOR

DESCRIPTION

The PMD-6000 DC, PMD-7000 DC, PMD-8000 DC and PMD-9000 DC, Power Monitoring Sensors have been designed with thick-film hybrid microelectronics sensing circuits and MIL-R-6106 relays, packaged in a hermetically sealed enclosure. The output of the relay will energize when: 1) the input voltage is within the under and over trip points, and 2) the pickup time delay period is completed.

The output of the relay will change to, or remain in, the de-energized state when any or all of the above conditions are not met. The output will change state (energize or de-energize) after the selected time delay.

FEATURES

- Small size and weight
- High-reliability design
- Hermetically sealed
- High transient immunity

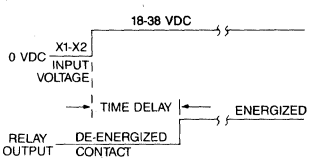
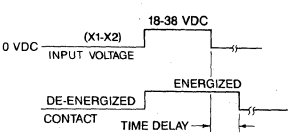
Vibration: a. Sinusoidal, 10-3,000 Hz b. Random, 50-2000 Hz, MIL-STD-810	30 G 0.4G²/Hz
Shock, 0.5 MS, 1/2 Sine, 3 Axis	100 G
Acceleration, in any Axis	20 G
Life at Rated Resistive Load; Minimum	100,000 operations

TIMING DIAGRAM



TIME DELAY ON OPERATE WHEN TRIP VOLTAGE REACHED



TIME DELAY ON RELEASE WHEN TRIP VOLTAGE REACHED

NOTES

[1] The accuracy specification applies for any combination of operating temperature and voltage. For units with a timing range less than 1 second, add ±10 milliseconds to the ±10% tolerance.

[2] Transient and power loss specifications are based on a maximum duty cycle of 1/50.

[3] EMI test limits will not be exceeded during the timing interval or when continuously energized under steady state conditions.

[4] Terminals X1 and X2 must be connected together during the test. Dielectric withstanding voltage and insulation resistance are measured between all mutually insulated terminals and between all terminals and case.

[5] Recycle time is defined as the minimum time that power must be removed to assure that the next timing cycle will be completed within the specified timing tolerance. (Units can be recycled during timing or after time-out.)

SUBMINIATURE RELAYS

Leach subminiature relays have set the industry standards for technology and reliability for decades. With their proven high performance in the most demanding applications, they are ideal for your critical subsea, shipboard, ground-based and aerospace applications.

Our Balanced Force™ subminiature relays are rugged, high-environment relays for applications where size, weight and reliability are important. For systems where size and weight are critical, our Series III subminiature relays are the smallest, lightest aircraft relays made with their contact ratings, and are 40% the size and weight of our J and K Series relays, yet offer the same high performance. Both relay types are available in a variety of terminal, mounting and operating configurations.

Dry Circuit to 12 Amp

POWER AND CONTROL RELAYS

Leach power and control relays have been used for decades in commercial and military aircraft, trucks and buses, ships and tanks — any application that calls for proven durability, high performance and long life.

To ensure that you get the right relay for your application, our power and control relays are available in a broad range of configurations. You can choose from various terminal and mounting styles, dust and moisture resistant and hermetically-sealed enclosures, and a variety of operating ratings and characteristics.

POWER MONITORS/AC & DC VOLTAGE MONITORS

GENERAL INFORMATION

Logitek power monitoring equipment is utilized to monitor incoming power on AC or DC power systems. When the system voltage, frequency or phase characteristics deviate from the predetermined acceptable limits, the relay de-energizes to activate an alarm indicator or system shut-down contactors. Voltage sensing is accomplished with an "RMS" type detector that is relatively insensitive to line distortion.

EQUIPMENT TYPES

Individual units monitor AC or DC voltage and line frequency for both high and low limits, and phase rotation for reversal/loss. Power monitors are also available incorporating any combination of these functions into a single unit. This equipment is available with factory set limits or as field adjustable.

OPERATING CHARACTERISTICS

When the voltage and frequency of the input signal are within prescribed high and low limits, and the phase rotation is ABC, the output relay will energize after the specified "pick-up" time delay. If the high or low voltage limits of any phase are exceeded for a time greater than the specified "drop-out" time delay, the relay de-energizes and remains de-energized until all phase voltages return within limits and remain at normal levels for longer than the specified "pick-up" time delay. If the input frequency exceeds the high or low frequency limits for a time exceeding the "drop-out" time delay, the relay de-energizes and remains de-energized until the frequency returns within limits and remains at normal levels for longer than the "pick-up" time delay. The ouput relay will not energize if the phase rotation is other than ABC or if any phase is disconnected. When the output relay is energized, loss of any phase will cause the relay to drop out immediately, overriding the time delay circuits.

SPECIAL PRODUCTS

Logitek's engineering department is available to discuss your applications of our product or to design special equipment to satisfy your system requirements.

TYPICAL SPECIFICATIONS

ELECTRICAL

Input Voltage	115 VAC/208 VAC/ 230 VAC
Voltage Transients	MIL-STD-704, Limits 1, 2, 3
Input Frequency	50/60/400 Hz
Sense Voltage	As required
Sense Frequency	As required
Accuracy	±1%
Phase Sequence	ABC
Time Delay (Pick-Up and Drop Out)	250 milliseconds to 10 seconds factory set or field adjustable
Relay Contacts	DPDT, 3PDT
Contact Rating	2 amp, 10 amp
Contact Life	50,000 operations min.
Power Dissipation	6 watts maximum

PHYSICAL

Finish	Gloss Blue #15177, in accordance with MIL-F-14072
Connector	Glass to metal seal solder hooks, MS3113H-20-16PN Connector
Enclosure	Steel case, hermetically sealed and encapsulated

ENVIRONMENTAL

Temperature	−55°C to +125°C −40°C to +85°C −10°C to +70°C
Vibration	Per MIL-STD 810C, Method 514.2 Procedure I, 10-2000 Hz, 20g's
Shock	Per MIL-STD 810C, Method 516.2, Procedure I, 50g's 11 ±1 millisecond any axis
Acceleration	Per MIL-STD 810C, Method 513.2, Procedure I & II, 10g's
Humidity	Per MIL-STD 810C, Method 507.1, Procedure I
Altitude	Per MIL-STD 810C, Method 504.1, Category 6 equipment, sea level to 70,000 ft.

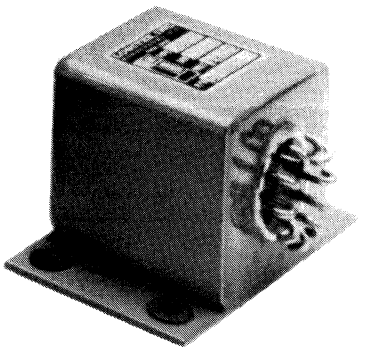
FREQUENCY MONITORS/PHASE MONITORS

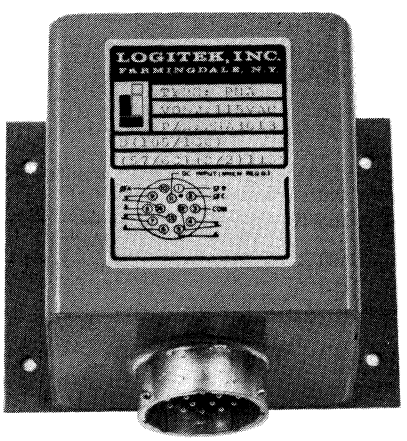
GENERAL INFORMATION



Frequency Monitors: Logitek Frequency Monitors are used in applications where electrical systems must be de-energized or alarm devices activated when the power line frequency departs from the predetermined normal range of operations.
Phase Monitors: Logitek Phase Monitors are used to protect three-phase loads, particularly rotating components, from damage resulting from phase reversals or the absence of phase. Contacts may be used to disconnect the load, to operate an alarm, or both.

OPERATING CHARACTERISTICS

Frequency Monitors: Signal voltage from the power line is applied to the designated terminals. If the line frequency is within the specified limits, the output relay energizes. If the frequency deviates from the preset limits for longer than the specified drop-out time delay, the unit de-energizes. After de-energizing, the frequency must return to within the pre-set band for longer than the pick-up time delay to re-energize the output relay.
Phase Monitors: Upon application of power, the output relay energizes if all phases are connected and the phase sequence is ABC. If any phase becomes disconnected, or if the phase rotation is abnormal, the relay immediately de-energizes.



SPECIAL PRODUCTS

TIME DELAY RELAYS • SOLID STATE FLASHERS REPEAT CYCLE & INTERVAL TIMERS

GENERAL INFORMATION

The design of complex electrical distribution systems often requires that certain operations be delayed or sustained for a precise interval of time from occurrence of a control or initializing signal. Combinations of various timing devices can be used for sequential startup or shutdown programs, load transfer or shedding, or delayed transfer to avoid race conditions. In addition, pulsers, interval timers, and flashers are used in applications, such as operating instrument panel warning lights or other annunciator devices, landing gear, door open indicators and navigation lights.

QUALITY ASSURANCE

Logitek's facilities are qualified under MIL-Q-9858A and maintains a MIL-I-45208 inspection system. These systems, along with Logitek's 100 hour burn-in cycle, contribute substantially to Logitek's uncompromising product integrity.

OPERATING CHARACTERISTICS

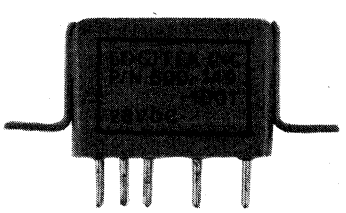
Logitek timing devices are generally CMOS integrated circuits appropriately protected from line transients and other line perturbations and either a solid state or electromechanical relay output circuit. Since there are no large capacitive timing or storage elements in these devices, recycle times (the time after control removal that will cause a new timing cycle within specified accuracy) are very short. In addition, the use of CMOS IC digital counting circuits allows the use of very stable timing elements resulting in excellent stability through wide temperature ranges.

APPLICATIONS

- Aircraft, Electrical Systems
- Mobile Radar Systems
- Equipment Test Stations
- Tanks
- Mobile Missile Launchers
- Offshore Drilling Rigs
- Computer Systems
- Shipboard Electrical Systems
- Hospital Auxiliary Power Systems

SPECIAL PRODUCTS

Logitek's engineering department is available to discuss your applications of our product or to design special equipment to satisfy your system requirements.



TYPICAL SPECIFICATIONS

ELECTRICAL

Input Voltage	115 VAC/208 VAC/ 230 VAC
Timing Range	50 milliseconds to 1000 seconds
Accuracy	±10%, ±5%, ±2%
Contacts	
Relay	DPDT
Solid State	
Radio Interference	Per MIL-1-26600

PHYSICAL

Finish	Gloss Blue #15177, in accordance with MIL-F-14072
Connector	Glass-to-metal seal solder hooks, solder pins, MIL connector, octal plug in
Enclosure	Hermetically sealed and encapsulated, Butyrate case

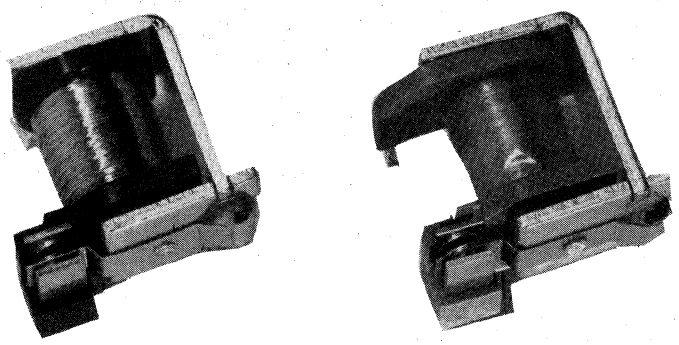
Shown Above Is A Condensed Listing Of Our Large Relay Selection

MALLORY

SERIES PCM DC COIL RELAYS

The Mallory DC coil relay is designed for direct printed circuit board mounting. 1 FORM A (SPST-NO), 1 FORM B (SPST-NC) and 1 FORM C (SPDT) circuit arrangements are available in each of two styles. Style A is designed primarily for AC loads up to 30 amps, but can be utilized for DC applications as well. Style D is designed primarily for DC loads up to 30 amps and certain low-voltage AC loads. Each style has a distinct "footprint", shown at right. A snap-on dust cover is available. Mallory relays are suited to a variety of applications including appliances, automotive, load management and heating, ventilating and air-conditioning.



Switch Arrangements - 1 Form A (SPST-NO), 1 Form B (SPST-NC), 1 Form C (SPDT)

SWITCH RATINGS

FEATURES	"The Dipper" Low level switching up to 2 amps. 16 pin dip. Sealed for PC board mounting & immersion.	Economical 3 & 5 amp switching. Designed for economy printed circuit board switching. Meets FCC Part 68 1500 VDC surge.	Economical & reliable designed for low cost PCB switching such as industrial, communications, vending or commercial equipment.	Compact & versatile 2&4 pole industrial relay. Low level switching. Available with many options.	Designed for UL Component Recognition for Motor Controllers through 240 VAC in accordance with UL Std 508, Industrial Control Equipment. Available in Octal Plug-in version.	Economical 2PDT, 10 amp rated relay, available with printed circuit terminals or 3/16", .187 quick connect terminals for plug-in socket capability or direct wiring with flange mounting option.

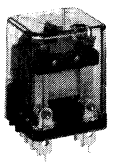
MAGNETIC LATCHING SERIES

When there is a need to conserve power, retain logic function during power outages, or improve reliability by several order-of-magnitude over outdated mechanical latching relays, the Type 157 magnetic latching state-of-the-art relay is made to order for these applications. All of the superior electrical characteristics available in the standard Type 157 relays, including 1/4" through air and 3/8" over surface spacing, are offered in the magnetic latching version. Magnetic latching is achieved by a specially designed magnet core that makes it possible to maintain a substantial magnetic force of attraction after termination of the electrical pulse that energizes the core. There are no mechanical latches associated with the design, nor permanent magnets that can result in inadvertent operation. To restore the relay to its unoperated position, a short pulse of opposite polarity and lower magnitude than the operate pulse is applied to the coil or a second concentric wound coil.

TIMING
Latching time: 13 MS nominal with a one second pulse of nominal voltage.
Unlatch time: 13 MS nominal with a one second pulse of nominal unlatch voltage after latching with a one second pulse of nominal latch voltage.
A latch pulse of 50 MS min. at nominal voltage is recommended to insure positive latching.

DESIGN & CONSTRUCTION
Insulation material, weight, marking, shock, vibration, dielectric breakdown, insulation resistance and temperature range are identical to the Type 157 relay.
UL/CSA

MAGNETIC LATCHING OPTION ALSO AVAILABLE ON 187 AND 188 SERIES



187

DPDT power relay is rated at 20 amps; DPST-NO and NC contact arrangements are rated at 25 amps. Open stud mounted or dust covered versions with 1/4" quick-connect terminals are available.

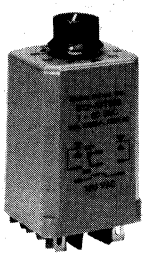
TIME DELAY RELAYS

611 SERIES

An amplifier driven relay that allows an input signal as low as 12 microwatts to control a DPDT 10 amp output. This low control sensitivity permits direct interfacing with most types of logic.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
Sensitivity—12 microwatts, 60 microwatts
Operating time (nom voltage & temp.) 15 ms.
Release time (nom. voltage & temp.) 30 ms.
Max. input voltage or current—30 VDC or 1 ma.
Max. negative blocking voltage 50 VDC
Voltage—12, 24, 48 VDC (+10%)
Power—1.2 watts
Polarity protection—YES
Duty—Continuous
Switching action 2PDT
Switching rating
-Fine silver contacts (gold flash) 5 amp, 28 VDC, 120/240VAC 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120/240 VAC 1/3 hp, 120 VAC 1/2 hp, 240 VAC
TEMPERATURE RANGE
-10°C to +55°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)



612 SERIES

Delay-on-release timer which utilizes an R-C solid state trigger circuit to drive a secondary solid state switch, which in turn controls the integral 10 amp output relay.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Operate time (max.) 100ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits—
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 1.5 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contact (Gold flash) 5 amp, 28 VDC/120,240VAC; 80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC/120,240 VAC; 80% pf, 1/3 hp, 120 VAC 1/2 hp, 240 VAC
Delay types Delay-on-release
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

613 SERIES

Economy version **Delay-on-operate** timer, which utilizes a simple R-C solid state trigger circuit, which in turn controls the integral 10 amp output relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 200ms
Recycle time (max.) 200ms
Dial scale Ref. only
Input voltage limits
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 3.0 VA
DC (approx.) 1.5 watts
Switching action 2PDT
Switching rating (max.)
-Fine silver contact (gold flash) 5 amp, 28 VDC/120/VAC, 3 amp, 240 VAC .80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120 VAC, 1/3 hp 120 VAC, 6 amp, 240 VAC .80% pf 1/2 hp, 240 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption.....YES
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

614 SERIES

Identical to the 612 series, except it functions as a **delay-on-operate.** Available with "fixed", "external resistor" adjust time setting, or "knob adjust", through an overall range of 1 to 300 seconds delay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 50ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 3.0 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash) 5 amp, 28 VDC/120 VAC, 3 amp, 240 VAC .80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide (Gold flash) 10 amp, 28 VDC/120 VAC, 1/3 hp, 120 VAC, 6 amp, 240 VAC .80% pf 1/2 hp, 240 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust

618 SERIES

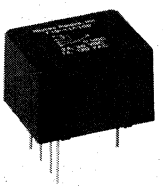
An electronic time delay module that provides a 0.5 or 2 amp SCR output to drive relays, solenoids or lamps. Units are fully encapsulated and are versatile and economic, especially when used in conjunction with power relays in the 30 amp rating category.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time (max.) 75ms
Recycle time (max.) 25ms
Input voltage limits
+25%. DC must be filtered, max. ripple 5% at nominal voltage
Switching action SPST
Solid State Output, 1.5 V voltage drop max. when on
Switching rating (max.)
-Type 1-0.5 amp at +55°C
-Type 2-2.0 amp at +25°C
1.25 amp at +55°C
TEMPERATURE RANGE
-40°C to +55°C

619 SERIES

IMPULSE RELAY
An electronically controlled single input latching relay. Repetitive input pulses cause the relay to latch and unlatch alternately up to 1,200 total pulses per minute.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient
Pulse width 25 ms. min.
Pulse repetition rate 1200 pulses per minute max.
Duty Continuous
Input voltage
12, 24, 48, 110 VDC (±25%)
Power requirements
1.8 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash) 5 amp, 28 VDC, 120/240 VAC 1/8 hp, 120 VAC
-Silver Cadmium Oxide 10 amp, 28 VDC, 120/240 VAC 1/3 hp, 120 VAC 1/2 hp, 240 VAC
TEMPERATURE RANGE
-10°C to +55°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)



719 SERIES

IMPULSE RELAY
Miniature PC style impulse relay that will alternately change states when pulsed at a common input, without changing polarity.

ELECTRICAL/MECHANICAL CHARACTERISTICS (25°C)
LIFE EXPECTANCY:
Mechanical—100 million operations min.
Electrical—100,000 operations min. at rated load
CONTROL VOLTAGES:
5 to 48 VDC standard
Set & Reset time 3ms typical
DIELECTRIC
1500 VAC input to contacts
1000 VAC across open contacts
TEMPERATURE
-40°C to +70°C
CONTACTS
-Silver/Gold bifurcated Rating
2.0 amp 30 VDC resistive
0.6 amp 110 VDC resistive
1.0 amp 125 VAC resistive

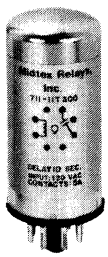
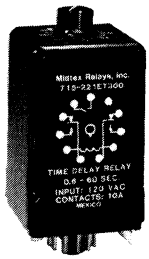
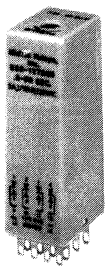
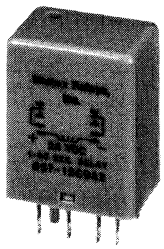
1-800-MIDTEX1 TIME DELAY RELAYS

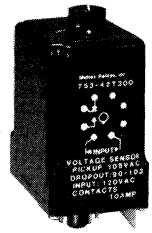
LINE MONITORING DEVICES/CURRENT VOLTAGE • PHASE

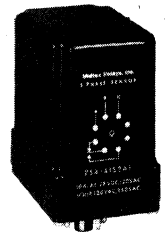












711 SERIES

Superior replacement for plug-in thermal timers. The 711 series offers 10 amp SPST-NO or NC, and SPDT snap action switching, metal enclosure is standard, (encapsulated units available), long life, and solid state type timing performance.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
CONTACTS:
10 amps 120 VAC resistive
10 amps 30 VDC resistive
4 amps 240 VAC resistive
POWER REQUIREMENTS
0.75 watts typ.
TEMPERATURE:
Storage -40°C to +85°C
Operating -25°C to +65°C
(extended ranges available)
DIELECTRIC
1000 VAC min., 750 VAC across open contacts
TIMING
Accuracy: ±10%
Repeatability: ±3%
Reset & Recycle time: 50 ms typical, 100 ms max.
SHOCK 50 g's (non-operating)
VIBRATION:
10 g's, 10-55 Hz min., without false contact action

715 SERIES

Multi-function time delay relay industry standard 8 and 11 pin octal, side terminal strip for flush mounting, and the 11 pin square base to fit the Midtex Type 157 relay sockets. UL/CSA approval.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±2%
Total timing variation ±10%
Reset time—25 ms typical, 50 ms max. (release of delay-on-operate)
Recycle time—50 ms typical.
100 ms. max. (minimum off time between timing intervals)
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC 2.5VA
DC 1.5watt
Switching action 2PDT
Switching rating (max.)
-Silver Cadmium Oxide
10 amp, 28 VDC/120 VAC; 1/3 hp, 120/240 VAC
Delay types
Delay-on-operate, Delay-on-release, Cycle, Interval and Interval-momentary start timing.
Momentary transfer upon timing cycle interruption: NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10-55 Hz (non-operating test)

655 SERIES

Delay-on-operate timers which use solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time 50 ms
Recycle time (max.) 100 ms
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC (approx.) 3VA at 120 VAC
DC (approx.) 1.2 watts
Switching action 1,2,4PDT
Switching rating
5 amp, 28 VDC, 120 VAC
10 amp, 28 VDC, 120 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption .NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave
VIBRATION
10 g's; 10 to 55 Hz
TERMINALS-
Solder, PC, Plug-In.

657 SERIES

Delay-on-operate timer which uses solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±5%
Total timing variation ±10%
Reset time (max.) 100 ms
Recycle time (max.) 100 ms
Input voltage limits
DC ±25
Power requirements
DC (approx.) 0.7 watt
Switching action 2PDT
Switching rating
2 amp, 28 VDC, 120 VAC
Momentary transfer upon timing cycle interruption .NO

Contacts
5/32" Silver Cadmium Oxide
Expected life at rated load (min.) 100,000 operations
SHOCK
15 g's, 11 ±1ms, 1/2 sinewave (non-operating test, no mechanical damage)
VIBRATION
0.06" DA or 10 g's 10-55 Hz (non-operating test)

753 SERIES

753 series voltage sensor is designed for use in monitoring voltage fluctuations. It is designed to energize and de-energize at predetermined voltage levels that may be fixed or set with adjusting knobs. Packages are available for either direct plug-in or terminal strip connection.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±1% max.
Response time 15 ms typical
25 ms maximum
Duty cycle is continuous, maximum input limit of 125% of nominal input voltage.
Switching action SPDT
Switching rating
—100 silver/gold flash
3 amps at 24 VDC or 125 VAC resistive;
1 amp at 24 VDC or 125 VAC inductive;
1.5 amps at 250 VAC resistive;
0.5 amps at 250 VAC inductive
—200 Silver Cadmium Oxide
5 amps at 24 VDC or 125 VAC resistive
2 amps at 24 VDC or 125 VAC inductive
2.5 amps at 250 VAC resistive
1 amp at 250 VAC inductive
—300 Silver Cadmium Oxide
10 amps at 24 VDC or 125 VAC resistive
4 amps at 24 VDC or 125 VAC inductive
5 amps at 250 VAC resistive
2 amps at 250 VAC inductive
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10-55 Hz (non-operating test)

754 SERIES

3-Phase sequence sensor is designed to detect loss of power on one leg or reverse phase sequence in conventional 3-phase, 4 wire, wye connected or 3-wire Delta connected 60 Hz circuits. The delay will remain energized with power applied unless a loss or reverse is detected. The 654 is ideal for the protection of expensive motors and 3-phase equipment from failure due to phase problems.

FEATURES
—Reliability of solid state sensing
—Power output switching to 10 amps
—Form DPDT contact output
—Flexibility for variety of applications
—Available with plug-in or direct wire termination
—4-wire wye or 3-wire Delta connection
—Responds to line failure in 30MS typical
CONTACTS
—5/32" Silver Cadmium Oxide 10 amp, 28 VDC/120 VAC, 80% pf
LIFE EXPECTANCY
Mechanical—in excess of 50 million operations
Electrical—100,000 operations minimum at rated loads
DIELECTRIC BREAKDOWN
Greater than 500 VAC RMS 60 Hz across open contacts;
Greater than 1500 VAC RMS 60 Hz all other mutually insulated elements
TEMPERATURE RANGE
-10°C to +55°C
DUTY CYCLE
Continuous
RESPONSE TIME
15 MS operate, 30 MS release typical
OPERATE POWER
2 watts max.

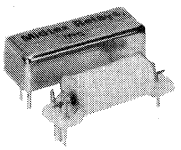
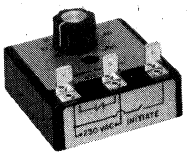
REED RELAYS



The Midtex dry reed relay series offers hermetically sealed, non-position sensitive switching in a small size with rapid response and low actuate power requirements. Available contact forms include A, B, C and D with dry reeds and forms A and B with mercury wetted. Contact arrangements include 1 to 5 Form A, 1 to 4 Form C, and 1 to 3 Form B, or any combination within the 5 pole bobbin. Consult the factory for additional details.

CUSTOM CONTROL PRODUCTS & BOARD ASSEMBLIES



Midtex Relays, Inc. designs and manufactures custom control modules and board assemblies to specific customer applications. A few common applications are listed below:

- True Form D Relay
- 20–25 amp 3/4 hp time delay relay
- 12–96 Hour Timer
- Sequencing Module For Stagger Motor Start Up
- Impulse Relay That Transfers When Voltage Is Removed
- True Off Delay Timers
- Complete Control Systems (Board level, encapsulated & Cabinet)
- Wire Wrapped Relay Control Assemblies
- Interface Modules

Most designs are generated from customers requesting a "Black Box" to solve a system problem, improved performance, lower costs etc. Please call us on our Engineering Hot Line (1-800-MIDTEX1) to discuss your application directly with Midtex Engineering.

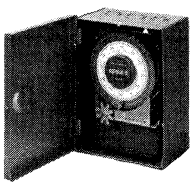
CYCLEMASTER 24-HOUR TIMER



620 SERIES

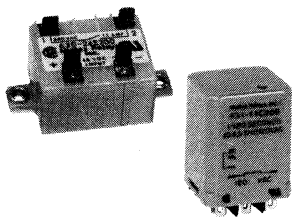
Program Time Switch—up to 48 ON-OFF operations per day with timing intervals as low as fifteen minutes. 14-day wheel, with Sunday and Holiday Skipper, provides programming for two full weeks. Eliminates operations on unwanted days.

SWITCHING ACTION
SPDT (usable three ways: SPST open; SPST closed; SP transfer)
LOAD CAPACITY
20 amps at 125, 250, or 480 VAC (1 hp at 125 VAC; 2 hp at 250 VAC) (10 amps at 125 VAC inductive)
TERMINALS
Screw terminals conveniently located
METHOD OF PROGRAMMING
Trip pin (12 supplied)
TEMPERATURE RANGE
−40 F to +140 F
Dimensions
With enclosure 8.188″ H × 6.375″ W × 4.125″ D; without enclosure 6-5/8″ H × 4-1/2″ W × 2-13/16″ D

TIMING APPLICATIONS

- Lawn sprinkling
- Greenhouse misting
- Irrigation
- Program music
- Chime system
- Oil well pumping
- Programmed heating
- Air conditioning
- Traffic systems
- Industrial processing
- Power plant exercising
- Industrial lubrication systems
- Stoker hold-fire
- Battery charging
- Paint and enamel baking
- Laboratory testing
- Oven purging
- Automatic livestock and poultry feeding systems
- Conveyors, material handling systems
- Ventilating fans
- Elevators and stairways
- Pumps and motors
- Water softening control
- Bulk, milk cooler agitation
- Laundry equipment
- Heat treating
- Plastic molding
- Bakery machinery

SOLID STATE RELAYS



630/631 SERIES

Solid State Hybrid Industrial Relay Applications are I/O interface, and switching difficult loads such as: solenoids, AC motors, lamps and other heavy industrial loads within device ratings.

Ratings are for both models, unless otherwise specified.
Current
Type 630 4, 7, 10 and 15 amps inductive or resistive.
Type 631 5 amps inductive or resistive.
Voltage drop
1.6 typical at rated current
Leakage current
6 MA max., 120 VAC/12 MA max., 240 VAC
Minimum load current
200 MA, RMS
Life
500 million operations
Contact type
1 Form A
Dielectric
1500 VAC, 60 Hz minimum between all mutually insulated terminals and mounting plate

634 SERIES

Hybrid Non Zero-Crossing Turn On PCB Relay Unit occupies less than one sq. inch of board space. This makes it ideal for applications where board space is at a premium.

Internal transient protection
Available with a snubber network to properly communicate inductive loads.
Excellent I/O isolation
Reed relay input provides input to output isolation in excess of 1500 VAC, 60 Hz dielectric breakdown.
Rapid response time
Relay will turn on in one millisecond. Turn-off occurs at the first zero amplitude current point after input power removal.
Dielectric
1500 VAC, 60 Hz minimum between input/output
Life
500 million operations
Contact type
1 Form A
Options
Input coil suppression diode; Thyristor to prevent false turn-on when transients on the line exceed the forward blocking voltage; AC input version using an internal bridge and filter capacitor.
UL Approved

640 SERIES

Solid-State Zero-Crossing Industrial Relay Ideally suited for frame or panel mounting, and is assembled in a sturdy, compact package that is sealed against environmental conditions. The design will withstand severe shock and vibration. Applications are I/O interface and switching difficult loads such as: solenoids, AC motors, lamps and other heavy industrial loads within device ratings.

Excellent isolation
The LED input-Triac output circuitry in this pure solid-state device exhibits in excess of 1,000 VAC, 60 Hz dielectric breakdown isolation between input and output terminals.
Rapid response time
Basic circuit used will turn on at the first zero amplitude voltage point after power input (within plus or minus 15 volts).
Turn-off occurs at the first zero amplitude current point after input removal.
Dielectric breakdown
1,000 VAC, 60 Hz minimum between all mutually insulated terminals and mounting plate.
Life
Indefinite
Contact type
1 Form A
Options
Thyristor to prevent false turn-on when transients on the line exceed the forward blocking voltage;
AC input version using an internal bridge and filter capacitor.
UL/CSA approvals.

OMRON Signal Control PC Board Relays

Model (Dimensions in Inches)	G5A	G6A	G6E	G5Y	G5E
						0.31″ H x 0.63″ L x 0.39″ W	0.33″ H x 0.80″ L x 0.40″ W	0.32″ H x 0.63″ max. L x 0.39″ W	0.39″ H x 0.81″ L x 0.45″ W	0.39″ H x .39″ L x .28″ W
Features	Subminiature relay ideal for security, communications and audio equipment. Latching type also available. Flux-tight or plastic sealed.	Plastic sealed relay with high impulse withstand voltage, ideal for communication equipment. Latching type available. Plastic sealed.	Subminiatue low signal switching relay has high sensitivity. Packed in a magazine for automatic insertion and soldering. Latching type available. Plastic sealed.	Ultra-small RF relay with outstanding typical values for VSWR (1.8 max.), insertion loss (0.7 dB max.) and isolation (60 dB min.) at 900 MHz. Plastic sealed.	Subminiature relay for interface applications. Flux-tight or plastic sealed.

OMRON Signal Control PC Board Relays

Model (Dimensions in Inches)	**G2Q**	**G2E**	**G2VN**	**LZN**	**G6G**
	0.31″ H x 0.51″ L x 0.39″ W G2Q-V 0.39″ H x 0.47″ L x 0.29″ W (not shown)	 0.45″ H x 0.61″ L x 0.43″ W	 0.43″ H x 0.80″ L x 0.40″ W	(DPDT Version) 0.45″ H x 1.20″ L x 0.83″ W LZN (4PDT) 0.45″ H x 1.20″ L x 0.96″ W (not shown)	0.32″ H x 0.63″ L x 0.39″ W
Features	Subminiature relay for interface applications. Choose low-profile or slim-line versions. High-sensitivity type available. Flux-tight or plastic sealed.	Small, low cost relay for signal control and interface applications. High-sensitivity and high dielectric types available. Flux-tight or plastic sealed.	Miniature relay for signal circuit and interface applications can be driven by an IC circuit. High sensitivity type available. Flux-tight or plastic sealed.	Low-profile relay with 3 A switching capacity. Sealed, high-capacity, latching and make-before-break contact types available. Flux-tight or plastic sealed.	Surface mount relay maintains stable operating characteristics after being subject to high heat mass soldering methods (i.e. vapor phase, IR and wave). Low profile and small size increase PC board capacity. High-temperature resistant resins and sealing agents.

Features	Low-profile relay for switching up to 5 A in appliances, security equipment, and environment control systems. Flux-tight or plastic sealed.	Subminiature relay for appliance applications. For power applications requiring high resistance to voltage surges. Flux-tight.	Subminiature relay with 5 A switching capability for output applications in consumer and commercial equipment. Latching type available. Plastic sealed.	High-capacity, subminiature relay switches 10 A loads with SPST-NO and 8 A loads with SPST-NO and SPST-NC. Flux-tight or plastic sealed.

OMRON Power PCB and Power Relays

Model (Dimensions in Inches)	G2R	G8P	G4W	G4B	G4E	G5D
	 1.00"H x 1.14"L x 0.51"W	 0.66"H x 1.20"L x 0.95"W	 1.22"H x 1.77"L x 0.79"W	 1.14"H x 2.00"L x 1.28"W	 1.18"H x 1.40"L x 1.20"W	 1.83"H x 2.70"L x 1.32"W
Features	Slim-styled power relay. 16 A high-capacity, bifurcated contact, sealed, Class B insulation. Latching types available.	Power relay breaks up to 30A load. Class B insulation, dust cover and sealed versions available.	Offers high impulse withstand voltage and dielectric strength. Ideal for power switching. Sealed type and Class B insulation available.	Breaks 15 A, carries 20 A and withstands 55 A inrush. 25 A high capacity and Class B insulation types available.	Double-pole power relay that breaks 15 A and withstands 55 A inrush.	Power relay has double-break contact arrangement. Class B insulation available.

Features	Exceptionally reliable power relay plugs into convenient octal pin sockets. Latching type and operation indicator versions available.	Power relay for exclusive use in control panels. Operation indicator and test button versions available.	Versatile relay, ideal for power and sequence control applications, meets many other application requests.	Compact, general-purpose relay suitable for a wide range of applications up to 15 A. Latching, operation indicator, test button versions.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
ABS acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CAMAC computer automated measurement and control
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3)
KSR keyboard send /receive

L
LC inductance capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIB microcomputer interface board
MIC microwave IC
MIPS million instructions per second
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

Opto 22

Power I/O Systems

The original and most versatile I/O system available. Over 10,000,000 trouble-free installations prove our reliability.

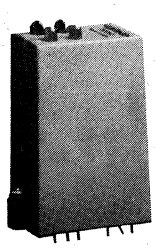
10-32VAC/DC	IDC5*
35-60VAC/DC	IDC5G
4-16 VDC	IDC5B**

** Fast Switching
* = Also Available for 15 & 24 Volt Logic

4 Channel Quad Pak™ Modules



- ☐ 4000 V Optical Isolation
- ☐ U.L. & CSA Recognized
- ☐ Plug-in
- ☐ Built-in Status Light

OUTPUT MODULES

Rating	Model
120/240 VAC	OAC5Q
60 VDC	ODC5Q
200 VDC	ODC5AQ

All Modules: 5VDC Logic

INPUT MODULES

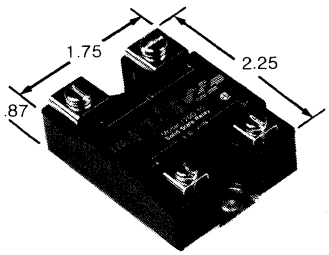
Rating	Model
120 VAC DC	IAC5Q
240 VAC DC	IAC5AQ
10-32 VAC DC	IDC5Q
4-16 VDC	IDC5BQ**

** Fast Switching

Optically Isolated SSRs

- ☐ TTL Compatible Control
- ☐ 4000 V Optical Isolation
- ☐ UL Recognized, CSA Certified
- ☐ Zero Cross Switching for low noise
- ☐ Intergal snubber–tested twice at Rated & Surge Current for both resistive load & 0.5 power factor inductive load.

Power Series–AC Load†



Chassis mount, heavy duty power relays utilizing twin SCRs & the most advanced heat transfer design.

Output Current Rating Amps	Output Voltage Rating* 120 VAC	240 VAC	1 Cycle Surge (Amps) Peak	Control Voltage
3	120D3	240D3	55	3-32 VDC
10	120D10	240D10	110	3-32 VDC
25*	120D25	240D25	250	3-32 VDC
45*	120D45	240D45	650	3-32 VDC
10	120A10	240A10	110	85-280 VAC

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

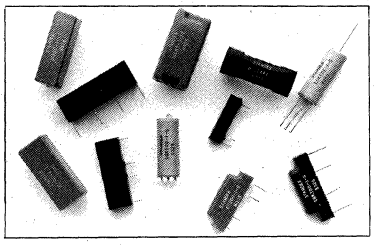
STANDEX REED RELAYS



- ☐ Widest range of pin-outs, contact configurations and contact ratings
- ☐ Versions to meet UL, CSA, FCC and European Standards — up to 5000 VDC contact to coil breakdown voltages
- ☐ Standex relays use our own reed switches with contact ratings for dry circuit and power switching applications
- ☐ Competitive pricing & delivery from stock

a Standex company

Standex manufactures over 500 standard reed relays for a broad range of applications including security, instrumentation, ATE, appliance, automotive and telecommunications. Standex reed relays use Standex reed switches (see our ad in the switch section). — A broad range of reed switches for demanding applications.

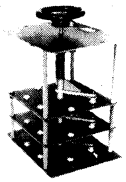
HIGH VOLTAGE DEVICES

RELAYS
SWITCHES
MEASUREMENT
CONTROL UNITS

AC
DC
PULSE
FIBER OPTICS

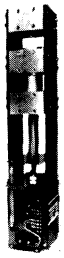
208V TO 900 KV
ENERGY STORAGE
ELECTRONIC AND POWER
SAFETY AND ACCESSORIES

HV ROTARY SWITCHES



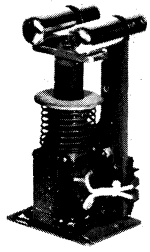
Ratings from 5 to 150KV, 1 to 200 amps. Either manual or electrical operators, depending upon requirements. Position detents and interlocks to prevent opening under load.

HIGH CURRENT SWITCHES



Models are available up to 20,000 amps continuous, and over 500,000 amps pulse, with voltage ratings of 6 volts to 300 KV peak test. Many are air cylinder or motor operated for high contact force.

HV RELAYS

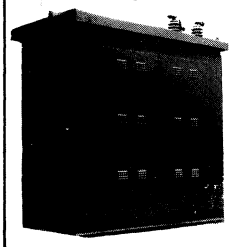


HV relays of the air insulated type both for low and high current. This series has ratings from 1 to 200 amps continuous, 100 to 100,000 amps momentary and capacitor discharge. Peak test voltages from 5 to 300KV. Single or Multipole. NO, NC, and DT. Auxiliary contacts optional on all types. Extended life and tungsten contacts also available for high current closing. Also usable in oil or insulating gas.

HV GROUNDING RELAYS

Extra high voltage low corona grounding relays of the air insulated type. Ratings up to 600 KV peak at 100 amps continuous. Solenoid, motor or air cylinder operated and spring or gravity return.

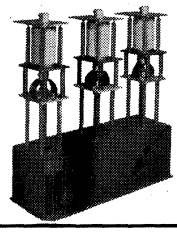
HIGH POWER



HIGH SPEED HIGH VOLTAGE CONTROL AND STEP-START SYSTEMS

½ to 1 cycle sensing and interrupt vacuum circuit breakers. Metal enclosed for indoor or outdoor applications. 5KV-38KV.

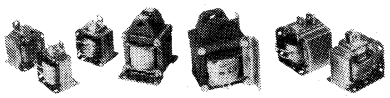
VACUUM CONTACTORS & 1 CYCLE CIRCUIT BREAKERS



Vacuum switches, single phase, three phase, upright or low profile, for high reliability sealed arc interrupting or crobar shorting. 208V to 200 KV RMS operate. 50 to 4,000 amps continuous, 2,000 to 35,000 amps AC, 10 to 20,000 amps DC interrupt, 5,000 to 100,000 amps momentary and capacitor discharge.

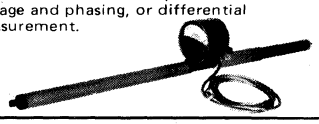
QUIET AC PRECISION SOLENOIDS

To 36 lbs. continuous hold and to 126 lbs. intermittent. Class H coils with 180°C insulation. 1" stroke, or, with special stainless steel guides, extendable to several inches. Corrosion resistant. Coil voltages offered are: 115V, 208V, 240V, and 480V, 60Hz; 50Hz optional. Other voltages and frequencies including DC are available.

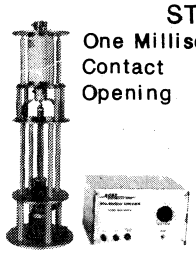


Hi-Z™ HV VOLTMETERS SAFE POWER LINE USE AC/DC

Fully safe portable, all solid state, 2% to 5% accuracy. Taut band shielded high voltage measurement with minimum circuit loading. 0.0001 V to 50 KV AC and DC. Ideal for use with Elbow capacitance tap voltage test points. For cable test point or direct line voltage and phasing, or differential measurement.

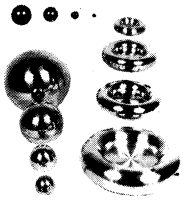


SOLENOID DRIVERS ENERGY STORAGE UNITS



For high speed or loss of power automatic circuit breaker trip and for high speed activation of contactor or circuit breaker solenoids. Energy storage up to 400 joules or more at 150 to 700 volts or more, 100 to 4,000 microfarad or more. Instantaneous SCR control available.

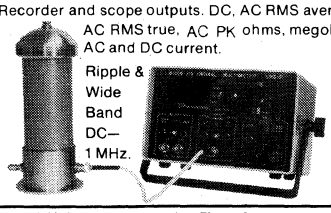
TOROIDS, SPHERES, CORONA SHIELDS, NUTS



Geometrically designed to avoid excessive voltage gradients at connecting points and other areas needing shielding or balancing of electrostatic fields to increase withstand voltage and minimize corona. Diameters are to international standard metric sizes.

HV DIGITAL MULTIMETERS

Easy to read, 4½-digit display; 0.05% basic accuracy. 0.0001 volt to 900 KV. Battery/AC with charger. Recorder and scope outputs. DC, AC RMS average, AC RMS true, AC PK ohms, megohms, AC and DC current.

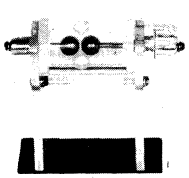


WIDE BAND HV VOLTAGE DIVIDERS DC–10 MHz

Precision compensated resistance-capacitance voltage dividers for 1 KV to 900 KV, DC up to 10 MHz or to 0.02μ Sec rise time pulse. 1,000/1 ratio matched to 1 megohm, 20 to 50 pf display or recorder. Other ratios and loads as required.

Accuracy and stability:
0.01% to 0.1% DC
0.2% to 1% AC 3% DC-1MHz

HV ADJUSTABLE SPARK GAPS



Non-melting carbon spheres, 1 cm to 10 cm and heavy wall aluminum spheres, 10 cm and above. Dust tight transparent covers used 1 KV to 88 KV. Open style to 670 KV. Direct reading micrometer type calibrating device.

HV DIGITAL PROBES

HV DC, AC, & Wideband DC-1 MHz Safety Probes for any scope or digital display or VTVM. Also available complete with large 4½-digit display 0.1% to 5% AC/DC accuracy, safety handle digital voltmeter. Battery/AC with charger. Removable Digital Display or Multimeter. 0.0001 volt to 200 KV. 0.05% accuracy basic, with DCV, ACV, ohms, megohms, AC and DC current.

WIDE BAND FIBER OPTIC TRANSMISSION DC–1 MHz

AC or rechargeable battery/AC operated. DC to 1 MHz. System has a maximum output of 10V PK (20V PK to PK) and maximum input of 1V to 1,000V PK direct from signal source. Useful from 0.1V to over 900KV when used with Ross HV wideband dividers.

SCHRACK

SCHRACK RELAYS ARE READILY AVAILABLE FROM STOCK THROUGHOUT THE U.S. AND OFFER MANY UNIQUE ADVANTAGES!

Schrack Relays are available off-the-shelf from our U.S. headquarters in New York, as well as through stocking distributors nationwide. Engineering and application assistance is also available locally if needed.

But equally important, when you select a Schrack Relay, you get advantages not found in conventional models. For example, the visual indicator is purely mechanical and does not incorporate any live components that can burn out or fail. It always shows the "real" state (open or closed) of the relay, which may not be the case with a lamp or LED. A lamp or LED only indicates that there is potential at the coil; in fact, the coil may be open or the contacts welded, and a lamp or LED may still light, causing erroneous indication. The visual on/off indicator locates such faults immediately without having to check individual relays and without having to apply an external voltage to the relay coils. A built-in orange flag moves with the relay armature and is seen through a window in the frosted top face of the dust cover. One glance is sufficient to tell you if the relay is working as well as the position of the contacts.

For more information, call or write us:
We'll try to help, and also give you the name of your nearest Schrack distributor.

Schrack Relays are recognized and/or certified by testing laboratories around the world.

SHARP Optoelectronics

Solid State Relays

Sharp has a wide product line-up, such as multi-channel types suited for high density mounting, DIP type, SIP type, and TO-220 package type as solid state relays for medium power control of on-state current ranging from 0.6 to 16A.

Type	Model No.	Internal connection diagram	Features	Approved by overseas safety standard UL	Approved by overseas safety standard CSA	Package	Absolute maximum ratings: On-state current I_T (Arms)	Absolute maximum ratings: Repetitive peak off-state voltage V_{DRM} (V)	Absolute maximum ratings: Isolation voltage (AC) Viso (Vrms)	Electrical characteristics: Minimum trigger current I_{FT} (mA) MAX. SILICON POWER CUBE

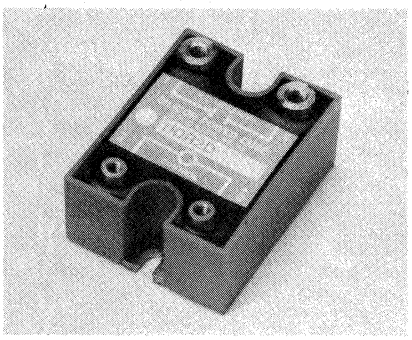
SOLID STATE AC POWER RELAYS

UL Recognized/CSA Certified



FEATURES:

- SPC's Inverse-Parallel SCR Power Hybrid Technology provides highly efficient thermal management for greatly increased cyclic life.
- High performance/low cost circuit design.
- Logic compatible inputs.
- "Zero voltage", phase controllable "random switching", and peak switching versions.
- High voltage (1200 Vpk) versions for 480 V_{RMS} service.
- Industry standard "hockey puck" package.
- 4000 V_{RMS} optical isolation.

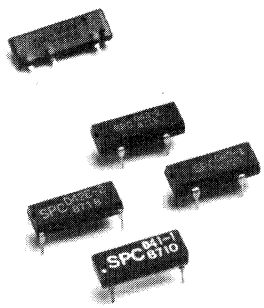
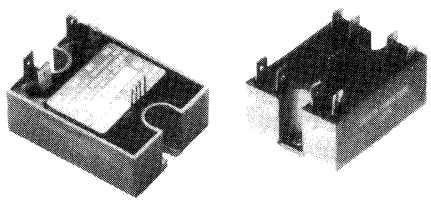
BOARD LEVEL SOLID STATE RELAYS

TO-116 DIP and 4-pin SIP packages employing thick film hybrid circuitry. Includes AC and DC switching versions from signal level to 1 amp output, with switching speeds as low as 1 μsec.

Three industry standard encapsulated PCB mount packages with AC output current ratings of 2.5 to 4 amps. Featuring 4000 Vrms optical isolation, logic compatible 3-32 Vdc input range, and either zero crossing or random phase controllable turn-on.



BOARD LEVEL RELAYS



SPECIAL PURPOSE RELAYS

Part Number	Input Specifications Voltage (VDC)	Current (mA at 5V)	Output/Load Ratings (max.) Current	Voltage	AC/DC

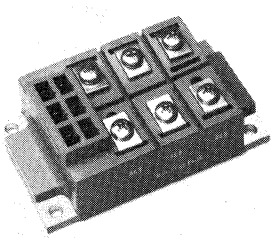
* Add "H" suffix to P/N for 600V pk output voltage rating
** Guaranteed turn-on at 5mA dc. No internal current limiting or regulation.
*** Part numbers shown are zero switching versions. Add suffix N for random turn-on.

100-250 AMP POWER SCR/DIODE MODULES—M80 SERIES

FEATURES:

- Seven Standard Circuit Configurations Available.
- High Terminal to Base Isolation of 2500V RMS.
- SCR Output Ratings of up to 180 Amps.
- Rectifier Output Ratings of up to 250 Amps.
- UL Recognized (File No. E 72446)

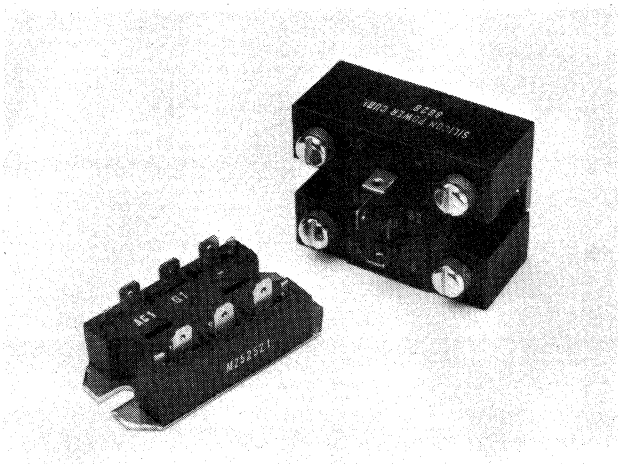


SILICON POWER CUBE CORP.

6015 OBISPO AVE. / LONG BEACH, CA 90805 / TEL: 213-634-9390 / FAX: 213-630-5338

SILICON POWER CUBE

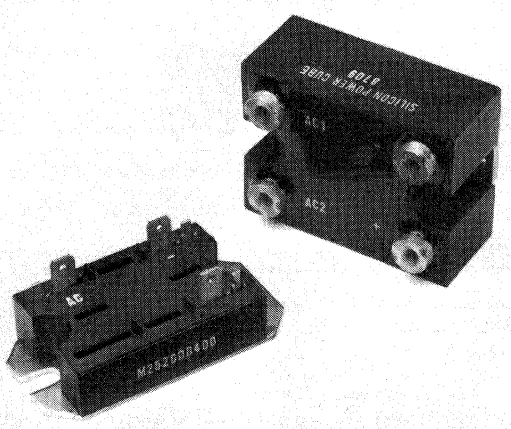
25-100 AMP POWER SCR/DIODE MODULES M25/M50 SERIES



FEATURES

- Eight Standard Circuit Configurations Available.
- Ultra-High Surge Current Capabilities Assures Long Lifetime and Reliable Performance.
- 2500VAC RMS Terminal-to-Base Iisolation.
- Proprietary SPC Unitized Power Circuit Structures Result in Very Efficient Thermal Management for Greatly Extended Cyclic Life.
- UL Component Recognition (File No. E72445).
- Available in standard 120VAC, 240VAC, 320VAC, 440VAC, and 480VAC Ratings (Higher voltages are available. Consult Factory.)

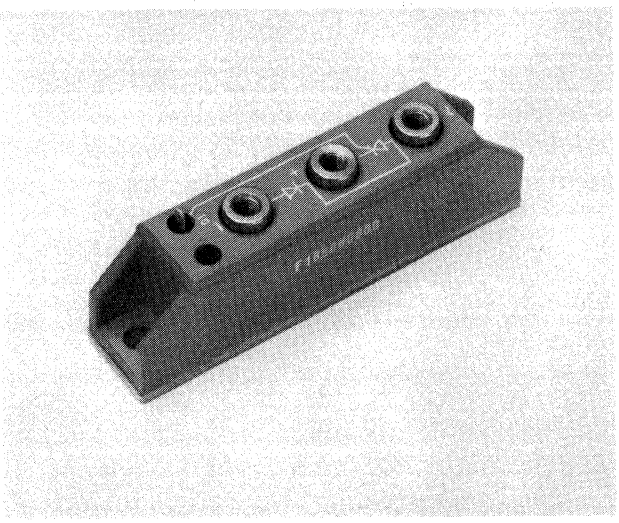
35-100 AMP POWER DIODE MODULES M25/M50 SERIES



FEATURES

- Seven Standard Diode Circuits are Available—Single-Phase Bridge; 3-Phase Bridge; Diode Doubler; Center Tap Common Cathode; Center Tap Common Anode; 3-Phase Common Cathode Half Wave Bridge and 3-Phase Common Anode Half Wave Bridge.
- SPC's Unique Unitized Power Rectifier Structures Provide Highly Efficient Thermal Management for Vastly Expanded Cyclic Lifetime.
- High Terminal-to-Base Isolation of 2500VAC RMS
- UL Component Recognition (File No. E72445).

25-90 AMP POWER SCR/DIODE MODULES F18 SERIES



FEATURES

- Thirteen Standard Module Configurations Available.
- Standard Voltages of 200 Volts to 1400 Volts. Average Device Current Output Ratings of 25 Amps to 90 Amps.
- Ultra-High Surge Current Capabilities.
- SPC's Rugged Unitized Power Circuit Structures Afford Optimally Efficient Thermal Management to Assure Extended Cyclic Life and Reliability.
- UL Component Recognition (File No. E72445).
- 2500VAC RMS Terminal-to-Base Isolation.
- All Units Are 100% Tested at Both 25°C and 125°C Temperature Levels—for Assured Quality.
- Available with Isolation Barriers

SILICON POWER CUBE CORP.

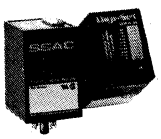
SOLID STATE TIMERS

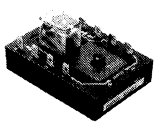
TIME DELAY RELAYS

TUD Series
- Direct Reading Switches
- LED Indication
- 0.1 to 9990 Seconds or Minutes
- Range Selector Switch
- 3 Modes Operation in One Unit
- 10 Amps Output Contacts, DPDT
- Panel Mount Kit Available

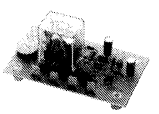


TD Series
- Switch Setable Time Delay
- 0.1 Seconds to over 2.8 Hours
- LED Indication
- All Modes of Operation
- 10 Amps Output Contacts
- Panel Mount Kit Available

PR Series
- Low Cost
- All Modes of Operation
- Popular Operating Voltage
- 50 Milliseconds to 8 Minutes
- Panel Mount Kit Available

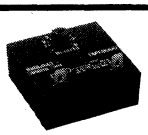


ER Series
- Surface Mount
- Onboard Adjust, Fixed, External
- 0.1 Second to over 8 Hours
- Encapsulated Circuitry
- 3 Modes of Operation
- 10 Amps Output Contacts



OR Series
- Low Cost
- Open Construction
- Onboard Adjust, Fixed, External
- 50 Milliseconds to 5 Minutes
- 3 Modes of Operation
- 10 Amps Output Contacts

UNIVERSAL TIMERS

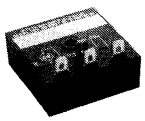


TMV8000 Series
- Operates: 19 to 288 volts AC,DC
- Adjustable: 0.1 to 8 Minutes
- Totally Solid State
- Encapsulated
- 2 Terminal Series Connection

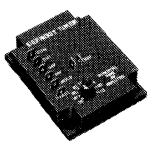
CMV8000 Series
- Unique Conduit Mounting
- Operates: 19 to 288 volts AC,DC
- Adjustable: 0.1 to 8 Minutes
- Encapsulated Circuitry
- 2 Wire Series Connection

TDU Series
- 2 Universal Voltages
- Delays from 0.1 to 2.8 Hours
- Switch Setable Delays
- Totally Solid State/Encapsulated
- 2 Terminal Series Connection

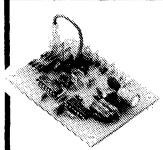
HVAC CONTROLS



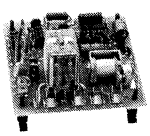
TA/TL Series
- Lockout Timer
- Prevents Rapid Recycling of Compressor
- Low Voltage Protection
- Totally Solid State/Encapsulated
- No Contactor Chatter



DTS Series
- DEFROST TIMER
- Accumulates Compressor Run Times
- Time and Temperature Terminate
- Knob Adjustable or Pin Selectable Time Intervals
- Reduced Test Times
- Encapsulated Circuitry

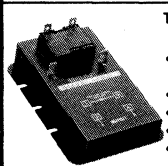


DTO Series
- DEFROST TIMER
- Low Cost Open Construction
- Accumulates Compressor Run Times
- Time and Temperature Terminate
- Knob Adjustable or Pin Selectable Time Intervals
- Reduced Test Times

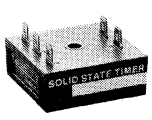


DTR Series
- DEFROST TIMER
- Includes All Relays to Operate Fan, Reversing Valve, Heat Relay
- Multiple Interval Selection
- Accumulates Compressor Run Times
- Time and Temperature Terminate
- Reduced Test Times

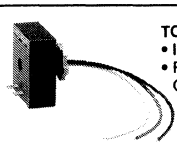
CT Series
- FAN DELAY
- Increases Efficiency by Providing an OFF delay for Circulating Fan
- Also Used for Sequencing (ON and OFF) Electric Heat Elements
- 1 to 600 Seconds Fixed



TLV Series • LOW VOLTAGE/ SHORT CYCLE PROTECTION
- Disconnects Compressor on Low Voltage
- Provides Random Starting
- Prevents Rapid Cycling
- Relay or Solid State Output
- Available in Plug Type Model

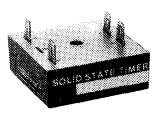


TAC Series
- Random Start or Sequencing
- Bypass Timing
- Anti-Short Cycle
- Part Winding Start
- 50 Milliseconds to 10 Minutes
- UL Recognized for Anti-Chatter

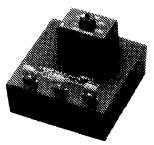


TOS/COS Series
- ISOLATOR
- Replaces Relay and Transformer Combination
- 1500 Volts RMS Isolation
- Rated at 1 Ampere Steady State
- Totally Solid State/Encapsulated

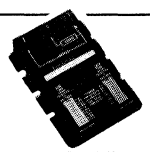
TIMING MODULES



TS Series
- All Operating Modes Available
- 50 Milliseconds to 10 Minutes
- Fixed, External Adjust (optional add-on adjustment module)
- Totally Solid State
- Encapsulated Circuit

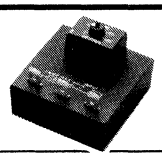


TSD Series
- All Operating Modes Available
- Digital Circuitry
- Delays to 166 Hours
- Fixed, Adjustable (shown with VR adjustment module)
- Encapsulated
- Totally Solid State

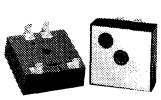


RS Series
RECYCLE TIMER SSAC offers a number of recycling timers: knob adjustable, switch setable, fixed and external. Solid State or Relay outputs. Contact SSAC by phone or letter.

HIGH POWER



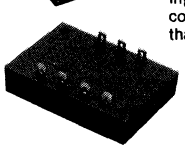
TH Series
- Analog Circuitry
- Up to 20 Amps steady state, 200 inrush • 0.1 to 600 Seconds
- External Adjust, Fixed or VR add-on Adjustment Module
- Totally Solid State/Encapsulated



THD Series
- Digital Circuitry
- Up to 20 Amps Steady State, 200 Inrush • 0.1 Sec to 16 Hours
- External Adjust, Fixed, or VR add-on Adjustment Module
- Totally Solid State/Encapsulated

OPTO ISOLATION

ISO-TIMERS
ISO-Timers offer an unusual feature; inputs are electrically isolated from the output by means of optically coupled circuits. The input may be operated from a completely separate source than that of the load (output) source.



- **Digital and Analog Circuits**
- **All Modes of Operation**
- **A Variety of Encapsulated Packages**
- **1500 Volts RMS Isolation**

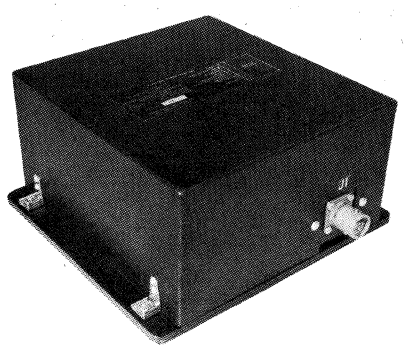
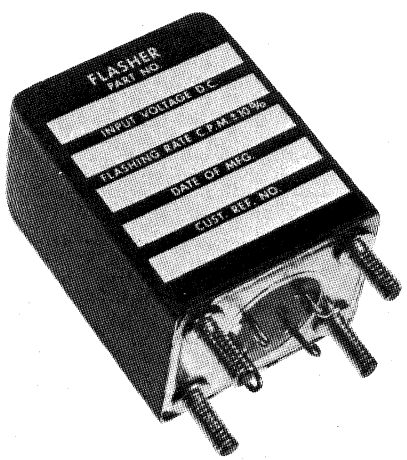
ELECTRIC POWER MONITOR



SPECIFICATIONS
INPUT VOLTAGE: 115 VRMS line to neutral ± 5.8 VRMS, 400 Hz ± 20 Hz, 3 phases plus neutral, phase sequence A-B-C (pins 1, 2, 3 & 8)
NORMAL OUTPUT: 28 VDC ± 2.8V, 4.5 to 5.0 AMP max. (pin 5), voltage regulation and ripple: 10% and 1V peak-to-peak max.
ALARM OUTPUT: 28 VDC nominal, 1.8 to 2.0 AMP max. (pin 7)
RESET SWITCH: Customer will supply a momentary normally open switch to permit normal operation when the switch is activated providing none of the fault conditions exist and the input voltage is applied (switch across pins 6 & 4)
MATERIAL AND FINISH: Housing is aluminum with black anodized finish.
OPERATING TEMP. RANGE: 0°C to +85°C
DIELECTRIC STRENGTH: 1250V, 60 Hz between contacts and case and between isolated circuits
VIBRATION: 5 to 55 CPS with DA of .06 in along any axis.
SHOCK: 20G'S for 11 MS
FAULT CONDITIONS: The monitor will supply the alarm output when any of the following conditions exist:
OVER/UNDER VOLTAGE SENSOR; Voltage is above 126.5 VAC ± 1.5V or below 105.5 VAC ± 1.5V across any one or more of the phases with respect to neutral.
PHASE SENSOR: Improper phase sequence (C-B-A) or if any one phase is open with the remaining phases closed.
FREQUENCY SENSOR: Frequency is above 420 Hz +0 Hz/–5 Hz or below 380 Hz +5 Hz/–0 Hz
VOLTAGE DROP: Any one or more of the phases drop to 95 VAC, the voltage regulation and ripple will be 10% and 1 volt peak-to-peak max. Any one or more of the phases drop to 80 VAC, the voltage regulation and ripple will be 30% and 3 volt peak-to-peak max. Any one phase is open while these conditions exist, the voltage regulation and ripple will be 30% and 6 volt peak-to-peak max.

FLASHERS



FEATURES:
- High reliability
- Rugged
- Hermetically sealed
- Compact and lightweight
- Solid state and relay outputs
- Long life

SPECIFICATIONS
SOLID STATE FLASHER
INPUT VOLTAGE: 18 to 32 VDC
POWER CONSUMPTION: 3 Watts (Not Including Lamp Power).
FLASHER OUTPUT: 200 ma, 500 ma, 2 AMP, or 5 AMP Lamp or Relay Load.
OUTPUT POLARITY: Positive or Negative Types.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON:OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 10,000 Hours Min.
SHOCK: 100 G's for 11 Milliseconds
VIBRATION: 10 G's at 10 to 500 CPS.
HERMETICALLY SEALED.
MOUNTING: Stud or Flange.
SOLDER HOOK TEMINALS.
WEIGHT: 4 Ounces Nominal.
VOLTAGE DROP: 1.5 Volts Maximum.

RELAY TYPE FLASHER
INPUT VOLTAGE: 18 to 32 VDC.
POWER CONSUMPTION: 4 watts (not including lamp power).
FLASHER OUTPUT: 500 ma, 2 AMP, 5 AMP, lamp or relay load.
CONTACTS ARE S.P.S.T. normally open.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON: OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 500,000 cycles
minimum at rated load.
SHOCK: 15 G's for 11 milliseconds.
VIBRATION: 10 G's at 10 to 500 CPS
UNIT: Hermetically sealed.
MOUNTING: Studs or flange.
SOLDER HOOK TERMINALS.
WEIGHT: 8 ounces nominal.

PHASE SEQUENCE INDICATORS

DESCRIPTION
A unique passive element circuit within the housing allows the indicator to illuminate only when the phase sequence of power being monitored is A-B-C. The phase sequence indicator will not illuminate when any one or more of the power inputs are opened or if the phase sequence is C-B-A.

The indicator will provide trouble-free instantaneous indication with no warm-up time required. The units are potted in an aluminum housing with no moving parts. Designed to meet severe environmental requirements of military applications.

SPECIFICATIONS
POWER CONSUMPTION: 2 watts
OPERATING TEMPERATURE: –55 to +125 C
WEIGHT: 2 ounces
MOUNTING: 5/8 inch dia. hole, panel thickness to 3/4 inch
LEADS: 18 inches long, teflon insulated
HOUSING MATERIAL: aluminum, black anodized
FREQUENCY AND VOLTAGE: per customer specifications
INDICATOR: lights up when all input leads are energized and phase sequence is A-B-C

CONTROL COMPONENTS DIVISION 9520 Black Mountain Road, San Diego, CA 92126-4507 USA

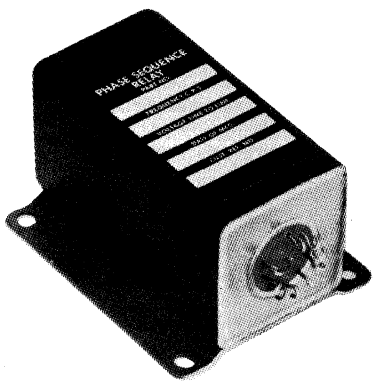
PHASE SEQUENCE RELAYS



FEATURES

- Designed for use in severe environmental conditions
- Automatic monitoring of phase sequence
- Solid state sensing circuit
- Hermetically sealed
- Light weight, small size
- Many voltages and frequency combination available

SPECIFICATIONS

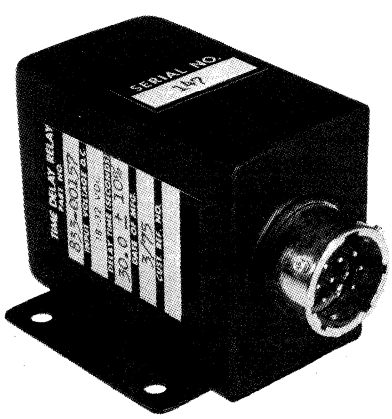
Relay picks up when all input terminals are energized and phase sequence is A-B-C.
Relay drops out if one or more power leads are grounded, opened or if the phase sequence is C-B-A.
POWER CONSUMPTION: 10 watts maximum.
OPERATING TEMPERATURE: –55 C +71 C
CONTACT RATINGS: (Per MIL-C-5757)

28 VDC	Resistive (Form C)	Inductive
2 AMP	2.0 AMPS	1.0 AMPS
3 AMP	3.0 AMPS	1.0 AMPS
10 AMP	10.0 AMPS	5.0 AMPS

115 VAC	Resistive (Form A&B)	Resistive (Form C)
2 AMP	2.0 AMPS	0.2 AMPS
3 AMP	3.0 AMPS	0.2 AMPS
10 AMP	10.0 AMPS	2.0 AMPS

VIBRATION: 10 G's to 500 Hz.
SHOCK: 30 G's for 11 milliseconds stud mount.
100 G's for 11 milliseconds flange mount.
SEAL: Hermetically sealed.
CONTACT RESISTANCE: .08 ohm maximum.
INSULATION RESISTANCE: 100 megohms minimum between terminals and case, between open contacts.
DIELECTRIC STRENGTH: 1000 Vrms 60 Hz, between terminals and **CASE;** 500 Vrms 60 Hz, between open contacts.
LIFE: 100,000 operations minimum.
WEIGHT: 11 ounces maximum.
Relays per MIL-R-5757.
Environmental testing per MIL-E-5272.
Test methods per MIL-STD-202.
Marking per MIL-STD-130.

TIME DELAY RELAYS



FEATURES

- Solid state sensing circuit
- Transient protected
- 2 amp, 3 amp, and 10 amp relay contacts, dpdt.
- Hermetically sealed.
- Light weight (3.5 to 9 oz).
- Choice of 3 operating modes.
- Designed for use in severe environmental conditions.

SPECIFICATIONS

INPUT VOLTAGE: 18 to 32 vdc
POWER REQUIREMENTS AT 28 VDC: 5 watts max, 2 amp relays
6.5 watts max, 10 amp relays
TEMPERATURE RANGE: –65 F to +185 F
VIBRATION: 20 G's, 10 to 2000 Hz
SHOCK: 100 G's for 11 milliseconds
CONTACTS: DPDT
LIFE: 100,000 cycles minimum at rated load
DROP-OUT TIME: 10 milliseconds max.
DROP-OUT VOLTAGE: 1 volt min.
PULL-IN VOLTAGE: 18 volts max.
INSULATION RESISTANCE: 100 megohms min.
DIELECTRIC STRENGTH: 500 volts 60 Hz case to terminals and across open contacts
CONTACT RATING:
2 amp & 3 amp unit: 2 amp & 3 amp resistive at 32 vdc
1 amp inductive at 32 vdc
10 amp unit: 10 amp resistive at 28 vdc or 115 vac
5 amp inductive at 28 vdc or 115 vac
CONTACT RESISTANCE: 0.050 ohms at rated current
RESET-TIME: 0.050 sec. max.
TRANSIENT PROTECTION: Will not be damaged by transients per Mil-Std-704
INTERNAL RELAYS: Per MIL-R-5757

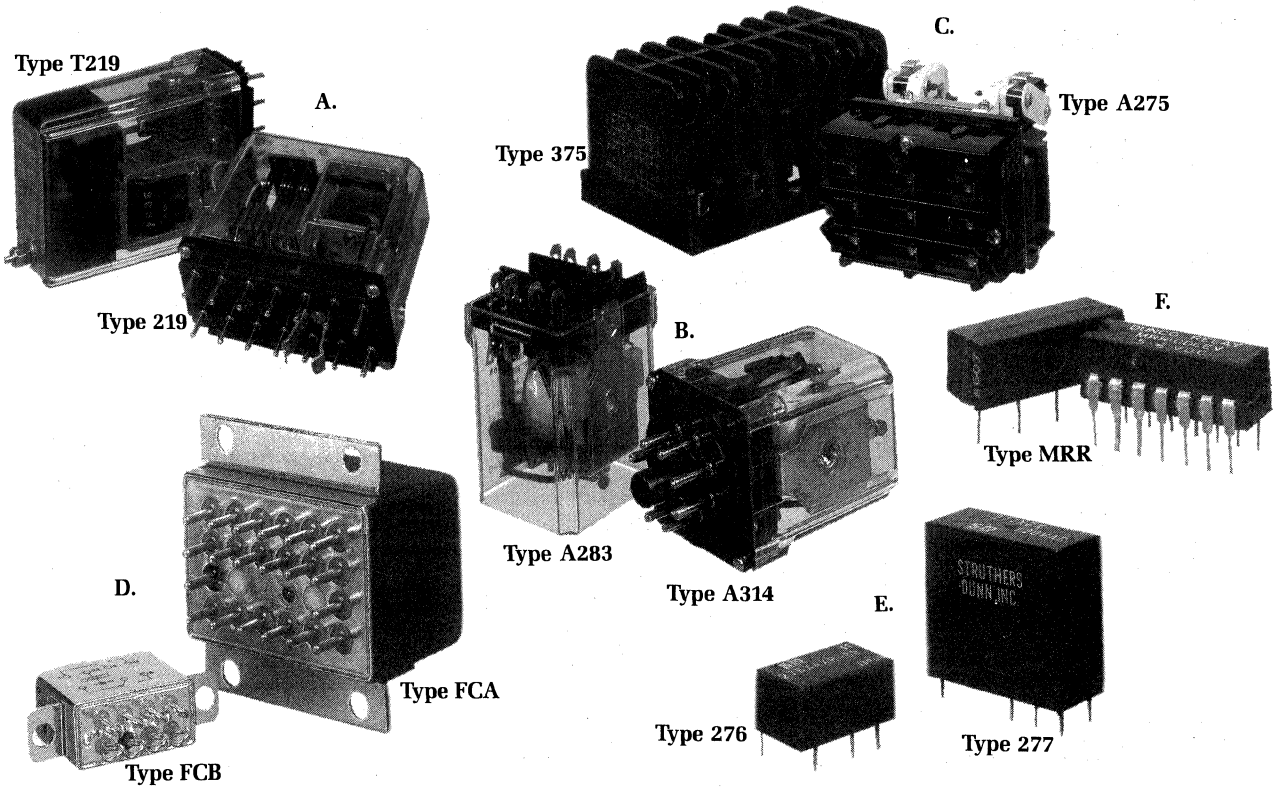
Struthers-Dunn... when you need the right relay, at the right price, right on time.



No relay application is more special than your own. And when the specs are strict, the deadline is tight, and reliable performance is mandatory, it pays to see a specialist. Nobody can match Struthers-Dunn for experience, service and a selection to meet your every cost/performance requirement.

A. Hi-Rel Industrial Relays. Complete line of plug-in relays from low level to 10 amp for general purpose, timing, latching, sequencing and over/under-voltage switching. Polycarbonate housings with either 12- or 14-pin industrial-style sockets and plugs. AC or DC coils.

B. Compact, General Purpose/Time Delay Plug-In Relays. Quality, cost-efficient relays with plug-in, solder and fast-on terminals with rectangular or octal base; 1, 3, 5, 10, 15, or 20 amp; 1, 2, 3 or 4 poles; AC or DC coils; open or enclosed. Time delay relays are available in the same configurations and ratings. Available time delays range from .1 sec to 300 sec. Various timing functions available.

C. Reversing Contactors. Definite purpose contactors for up to 7½ HP motor loads. With mechanical and electrical interlocks (the latter is optional). Suitable for industrial door control and many similar applications. UL listed and CSA certified versions available as standard.

D. Aerospace/Military Relays. Hermetically sealed relays in both miniature and power types as well as time delay versions to meet most applicable Mil specs. Low level to 25 amp; 1 to 6 PDT; AC or DC operation.

E. Miniature PC Board Relays. High-performance relays from low level to 30 amp for PC board mounting in industrial/commercial applications. Sealed and flux-tight enclosures, with contacts from 1 Form A to 2 Form C. AC or DC coil. UL recognized, CSA certified, TV-5 ratings and VDE spacing.

F. Reed Relays. Miniature and standard size reed relays in DIP, SIP and end pin termination packages with .100″ and .150″ grid spacing. U.L. recognized or Mil approved. Mercury-wetted reed contact relays available in PC and plug-in mounting models for long-life, no-bounce switching. To industrial or Mil specs.

All Available Locally From Your Reliable S-D Distributor. All the most popular Struthers-Dunn relays are immediately available from the shelves of more than 100 S-D distributors across the country. For the name of the S-D distributor or representative near you (and a copy of our comprehensive catalog), just call or write.

MIL-SPEC SENSORS

- VS, CS, FS Series for Voltage/Current/Frequency

Struthers-Dunn custom designs and manufactures a range of Mil-Spec sensors that monitor AC and DC circuits and detect and signal when the parameters of voltage, current or frequency deviate from the required nominal range. These sensors use Struthers-Dunn Mil-approved relays or timers, and are available in models ranging from 1 PDT low level with reed contacts, to 4-pole 10A or 3-pole 25A. Magnetic latching relays are available for all contact arrangements. Enclosures are hermetically sealed, with terminals for socket plug-in, circuit board mounting or solder hooks. For detailed information, contact Struthers-Dunn.

TELEDYNE RELAYS

Centigrid® Military Relays

- **General purpose 114 Series**
- **Sensitive 134 Series**

The Centigrid® 114 Series relays are subminiature, hermetically sealed, armature relays featuring low profile, .275" (6.99mm) high by .370" (9.4mm) square, with .100" grid spaced terminals. The sensitive 134 Series is .375" (9.5mm) high and features ultra-low coil power dissipation. Both Centigrids® feature all-welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum. The 114 Series and 134 Series are qualified to L, M and P levels of MIL-R-39016.

CMOS Compatible Centigrid® Military Relays

- **CMOS compatible general purpose 116C Series**
- **CMOS compatible sensitive 136C Series**
- **CMOS compatible magnetic latching 122C Series**

CMOS compatible Centigrid® relays are subminiature, hermetically sealed, armature relays capable of being directly driven by most IC logic families. Their low profile height and .100" grid spaced terminals, which precludes the need for spreader pads, make them ideal for applications where extreme packaging density and/or close PC board spacing are required. The 116C and 136C Series are qualified to L and M levels of MIL-R-28776 and incorporate internal silicon planar epitaxial type diodes for coil suppression, zener diodes to protect the MOSFET gate inputs, and N-channel enhancement-mode MOSFET chips. The 122C, which incorporates the same interface circuitry as the 116C and 136C, is a magnetic latching relay which is actuated by a short duration voltage pulse. The magnetic "memory" of this device precludes the need for constant bias and or battery backup in the event of system power failure.

TELEDYNE RELAYS

Surface Mount Centigrid® Military Style Relays

- **General purpose S114 Series**
- **Sensitive S134 Series**

Teledyne Relays' S114 and S134 Series are subminiature, hermetically sealed, surface mountable relays, which combine the proven reliability of the Centigrid® Series relays with pre-tinned leads specifically formed in compliance with MIL-STD-454 to make them ideal for all types of surface mount reflow processes. The basic design and internal construction are identical to the 114 & 134 Series Centigrid® relays (as described on Page 2) and meet the requirements of MIL-R-39016.

Low Cost 172 Series Centigrid® Commercial/Industrial Relays

Low cost commercial versions of the DPDT MIL qualified Centigrid® relays. Hermetic sealing, all welded construction, and gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum.

TELEDYNE RELAYS

High Environmental Military Style TO-5 Relays

Designed to withstand severe environmental conditions of shock, vibration, or elevated temperature in excess of normal military specification levels. The following versions are available, all of which meet other requirements of MIL-R-39016:

412H Series—High Temperature (200°C)
412K Series—High Shock (4000 g's/0.5ms)
412V Series—High Vibration (380 g's @ 200 Hz)
432H Series—High Temperature (200°C)
432V Series—High Vibration (380 g's @ 200 Hz)
422H Series—High Temperature (200°C)
422K Series—High Shock (2000 g's/0.5ms)

RF Relays

- **RF120 Series Military Style Centigrid® Relays**
- **RF170 Series Commercial Centigrid® Relays**

The RF120 and RF170 Series relays are subminiature, hermetically sealed Centigrid® relays featuring extremely low intercontact capacitance that have been optimized to provide exceptional RF performance over the full UHF spectrum. These Series combine microwave switching capability with Teledyne Relays' superior all-welded construction, proven magnetic-latching design, and high force/mass ratios for ruggedness and performance stability in severe environments. Gold plated precious metal contacts ensure reliable DC switching from low-level to ½ amp, as well as low, stable insertion loss.

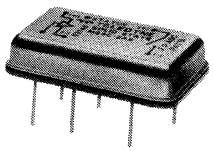
TELEDYNE SOLID STATE

Military Solid State Remote Power Controllers

Note: All military solid state remote power controllers are built in accordance with MIL-R-28750 utilizing the test methods and procedures of MIL-STD-883 and MIL-M-38510.

M85C-2AS/M33C-1NS — Remote Power Controllers (RPC)

Short Circuit Protected — True Output Status Feedback — Optically Isolated



- **Integrated Short-Circuit/Current Overload Protection Protects Unit and System Wiring**
- **True Output Status Feedback**
- **TTL/CMOS Logic Compatible Input**
- **Low ON Resistance Power FET Output**
- **Fast Switching Speed**
- **Meets 28 VDC MIL-STD-704 Surge and Spike Requirements**

OUTPUT STATE	STATUS PIN
OFF	LOW
ON	HIGH

STATUS PIN TRUTH TABLE

TELEDYNE PART NO.	MAXIMUM CONTINUOUS OUTPUT VOLTAGE	MAXIMUM LOAD CURRENT	MAXIMUM ON RESISTANCE
M85C-2AS	60 VDC	2.1 A	0.150
M33C-1NS	60 VDC	5.0 A	0.100

RPC OUTPUT RATINGS

Remote power controllers incorporate a solid state relay with output status feedback, and short circuit and current overload protection.

SHORT CIRCUIT PROTECTION

Teledyne Solid State has developed a revolutionary technique to provide the RPC with integrated short circuit protection. This short-circuit protection is provided whether switching into a dead short or shorting the relay while under load. In either case, the unit will sense the short-circuit conditon and shut down. The RPC will then block the short-circuit condition indefinitely until the short is removed and the unit is reset by cycling the input control or the output voltage.

TRUE OUTPUT STATUS FEEDBACK

In addition to short circuit protection, the RPC features an output status pin which provides feedback on the true power controller output state. Unlike electromechanical relays which employ an isolated set of auxiliary contacts, the output status indicates that the output section is ON and conducting current. This output status feedback feature provides the unit with a unique built-in-test capability. A high level on the status pin indicates the output is ON. A low level indicates the output is in the non-conducting state.

SHORT CIRCUIT TRIP STATUS

Additional models of the M85C and M33C families are available with short circuit trip status instead of true output status. Please contact the factory for additional information on these models.

M33C-1	80 VDC	0.100	10.0 A

- **3.8 to 32 VDC Input Control Range**
- **Meets 28 VDC MIL-STD-704 Surge and Spike Requirements**

These DC Power Controllers incorporate the short circuit and current overload protection features of our Remote Power Controllers.

The M90FS-2 is housed in a low profile Centrigrid® package which conserves space in high density packaging applications.

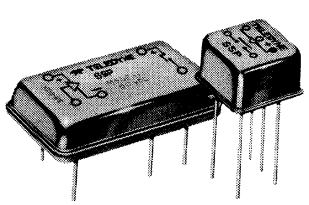
The M85FS series is housed in a metal DIP package which maximizes heat dissipation.

The M33C series is housed in a military style, low profile, 22 pin metal DIP package. Available without mounting flanges (M33C-1N).

MILITARY SOLID STATE RELAYS

M85F/M90F Series — Power FET AC/DC Hybrids — Optically Isolated Radiation Tested — High Speed

- **TTL/CMOS Logic Compatible Input**
- **3.8 to 32 VDC Input Control Range**



- **Meets MIL-STD-704 Surge and Spike Requirements**

TELEDYNE SOLID STATE
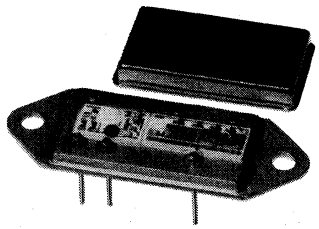
Military Solid State Relays

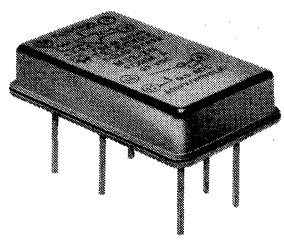
M33-1 — 10 Amps, 80 VDC Solid State Relay



- **Power FET Output**
- **Optically Isolated**
- **TTL/CMOS Logic Compatible Input**
- **Meets MIL-STD-704 Power Requirements**
- **Low Profile 22-pin Military DIP**

The M33 is a military style high power DC solid state relay, packaged in a low profile hermetically sealed case. The input and output are optically isolated to protect TTL compatible input logic circuits from output voltage transients.

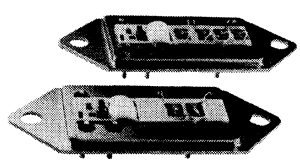
M33-2N High Current Pulse/Squib Fire Capability



- **Up to 100 Amp Pulse Load Capability**
- **Fast Switching Speed**
- **Low ON Resistance (0.07Ω)**
- **Power FET Output**
- **Transformer Isolated**

The M33-2N is a military style DC solid state relay designed specifically for high current pulse load applications such as squib firing. This device is constructed utilizing state-of-the-art microelectronic techniques and features the latest power FET output technology to eliminate bipolar offset and minimize ON resistance. This feature provides minimum output voltage drop and allows the M33-2N to switch high pulse currents up to 100 amps at higher temperatures than those allowable with bipolar devices. The input and output are magnetically isolated to protect delicate input logic circuits from output voltage transients.

M30/M31 Series — Single Pole Double Throw Bi-Directional/DC Power FET Output — Optically Isolated



- **TTL/CMOS Logic Compatible Input**
- **SPDT Break-Before-Make**
- **Low ON Resistance (0.15Ω)**

TELEDYNE PART NUMBER	MAXIMUM CONTINUOUS OUTPUT VOLTAGE	MAXIMUM OUTPUT BLOCKING VOLTAGE	MAXIMUM LOAD CURRENT (25°C)
M30-1	±80 Vpk	±80 Vpk	4.1 A RMS
M30-2	±160 Vpk	±180 Vpk	2.6 A RMS
M30-4	±320 Vpk	±380 Vpk	1.3 A RMS
M31-1	80 VDC	80 VDC	4.8 A DC
M31-2	160 VDC	180 VDC	3.0 A DC
M31-4	320 VDC	380 VDC	1.5 A DC
M31-1A	80 VDC	80 VDC	8.2 A DC
M31-2A	160 VDC	180 VDC	5.2 A DC
M31-4A	320 VDC	380 VDC	2.6 A DC

The M30 & M31 are military style SPDT high power bi-directional solid state relays, packaged in a 22-pin low profile hermetic case. The relays are optically isolated to protect delicate input logic circuits from output voltage transients. The logic input is a CMOS gate which is directly compatible with CMOS logic and TTL logic.

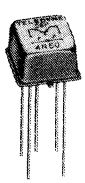
Hermetically Sealed — Radiation Tested



Packaged in a low profiled hermetically sealed case, .275″ (6.98mm) high by .370″ (9.4mm) square, with pin-out on .100″ grid centers for ease of pc board layout. Employing unique construction techniques developed for Teledyne hybrids. The miniature 4N50 provides the highest input/output isolation available in a military style optical isolator.

PERFORMANCE FEATURES	
Isolation	1500 VRMS
Transfer Ratio	140% min.
Output Voltage	40V min.

Meets DOD Radiation Requirements for Avionics and Ground Systems Applications

TELEDYNE SOLID STATE

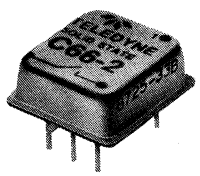
Commercial/Industrial Solid State Relays

C66 Series — Power FET Bi-directional Hybrids
Low Leakage — Ideal For Automatic Test Equipment



TELEDYNE PART NUMBER	MAXIMUM OUTPUT BLOCKING	MAXIMUM LEAKAGE CURRENT	MAXIMUM LOAD CURRENT	TURN-ON TIME (TYPICAL)	TURN-OFF TIME (TYPICAL)
C66-1	±180 Vpk	200 nA	±800 mA	400 μs	300 μs
C66-2	±380 Vpk	50 nA	±300 mA	150 μs	300 μs

- **High Voltage Output**
- **Extremely Low Leakage Current**
- **Fast Switching Speeds**
- **Low Profile 6-pin Metal Mini-DIP**

Subminiature Solid State Relays in Standard DIP Packages

Features all solid state circuitry with hybrid microcircuit construction, and high input/output isolation (up to 2500 Volts/10^9 Ohms). Fourteen models available providing choice of output; bi-directional, AC (zero or non-zero switch) and DC. 640 Series, 643 Series and C46/47 Series are direct pin-for-pin replacements for standard TO-116 DIP reed relays.

TELEDYNE PART NUMBER	INPUT DATA		COUPLING	OUTPUT (LOAD) RATINGS*			
	VOLTAGE (VDC)	MAX. CURRENT (MADC @ 5V)	TRANS-FORMER OPTICAL	AC/DC	CURRENT @ MAX. INPUT VOLTAGE	CURRENT @ 5V INPUT	VOLTAGE
640-1	4-10	22	Trans	Bi-directional	±80 mA	±40 mA	±50 Vpk

643-3	3.8-10	15	Trans	DC	600 mA	250 mA	130 VDC

Serendip Power FET Relays

C46F-1	3.8-16	12	Opto	Bi-directional	225 mA	250 mA	±100 Vpk
C46F-2	3.8-16	12	Opto	Bi-directional	180 mA	200 mA	±200 Vpk
C46F-3	3.8-16	12	Opto	Bi-directional	90 mA	100 mA	±400 Vpk
C47F-1	3.8-16	12	Opto	DC	315 mA	350 mA	100 VDC
C47F-2	3.8-16	12	Opto	DC	125 mA	140 mA	400 VDC

NOTES:

1. **641 and 645 Series, UL recognized — File #E55197: CSA Certified #31043.**
2. **645V-2H is VDE approved to VDE 0883/6.80.**
3. **645 Series meets VDE and FCC Class A conducted emission limits.**
4. **645 Series, Patent #4,339,670.**
5. **C46/C47 Series, Patent #3,791,025.**
6. **Output current ratings w/o heatsink.**

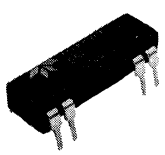
613-1	4-10 VDC	50 VDC	20 Amps
613-2	10-32 VDC		

Solid State Computer Input/Output Interface Modules

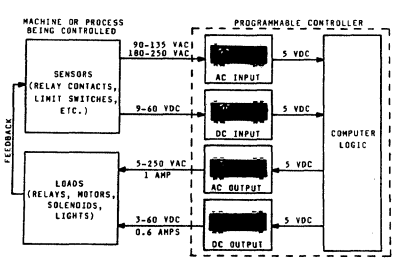
C76 Hybrid DIP I/O™ System
Optically Isolated — TTL/CMOS Logic Compatible Input



- **Enable Function on Inputs**
- **High Noise Immunity**
- **Meets VDE Voltage and Spacing Requirements**
- **TO-116 DIP Package (16 pin)**

PART NUMBER	TYPE	CHARACTERISTICS
C76AO-1	AC Output	3.8-16 VDC Input 5-250 VRMS, 1A Output
C76AI-1	AC Input	90-135 VRMS and 180-250 VRMS Inputs
C76DO-1	DC Output	3.8-16 VDC Input 3-60 VDC, 0.6A Output
C76DI-1	DC Input	9-60 VDC Input

C76 HYBRID I/O INTERFACE SYSTEM



Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolated interfacing of computer logic elements to harsh industrial environments. Modules employ custom microcircuits in a TO-116 DIP. Eliminates mounting tracks for low "per-point" cost. Meets VDE requirements. Features CMOS and TTL compatibility, optical isolation, high noise immunity and an ENABLE function on input modules. For use in robotics, computerized process control, machine tool control, programmable controllers and ATE.

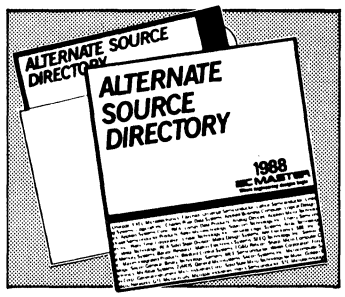
HEARST ENGINEERING SOFTWARE

ICMASD...IC Alternate Source Directory

If you've used the IC MASTER, you know what the Alternate Source Directory is. Engineers tell us that it's one of the most valuable sections of the Master. The Alternate Source Directory...ASD...is now available in floppy disk form.



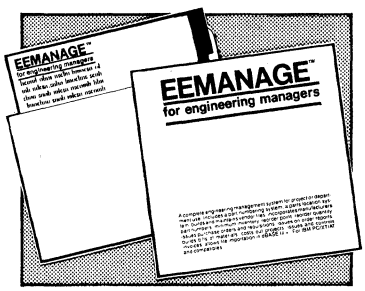
The electronic ASD is FAST! Just ask a question and the answer pops up in a split second.

The electronic ASD is FLEXIBLE! You can add ICs and you can add comments. You can add part numbers, prices, technical notes or anything else you like. You can customize the ASD to fit your needs and the needs of your company.

Order the 1988 Alternate Source Directory for your AT, XT or compatible. We'll send you two floppies and a very simple piece of printed documentation. Download the floppies and you're in business. All you need is a hard disk.

EEMANGE...for engineering managers

Developed by the publishers of EEM/ Electronic Engineers Master, EEMANAGE is a software program designed to make life easier for engineers and engineering managers.



EEMANAGE does many things: 1. Develops Bills of Materials 2. Assigns Part Numbers logically 3. Manages Engineering Inventories 4. Issues Purchase Requisitions 5. Relieves Engineering Inventories 6. Manages a Parts Storage System 7. Issues Engineering Change Notices 8. Interfaces with dBaseIII+ Programs.

EEMANAGE is completely menu driven. It is simple to understand and operate. Any competent secretary can be up and running on EEMANAGE in minutes.

Order EEMANAGE for your AT, XT or compatible. We'll send you one floppy and brief, very user friendly documentation.

The basic price for ICMASD or EEMANAGE is $149.50 each and includes floppy disk(s) and complete program documentation.

For immediate shipment you can order ICMASD or EEMANAGE on your VISA or MasterCard credit card simply by calling Marie Botta at (516) 227-1300.

To order by mail send your purchase order to:

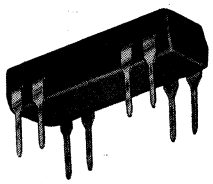
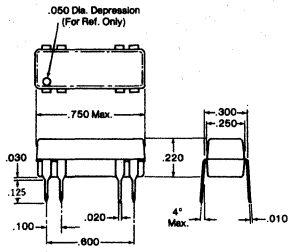
WABASH RELAY & ELECTRONICS DIVISION The Reed Relay Specialist

DIP PACKAGE DRY REED RELAYS
814 SERIES





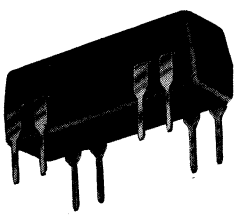
The 814 Series offers dry reed reliability and total isolation in a low profile IC type package, with DTL/TTL compatible coil drive available in most configurations.

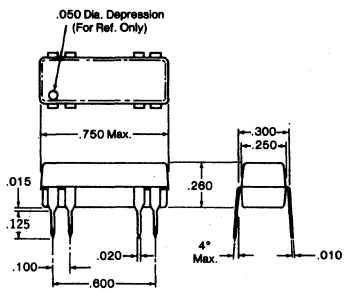
SPECIFICATIONS—Contact Ratings: 200 VDC or .500 Amps (switching); 10 watts; 200 milliohms max. initial contact resistance; 250 Volt pk. bkdn. **Temperature:** −40°C to +85°C. **Shock:** 100G max., 8 ±1 mSec. 1/2 wave. **Vibration:** 20G @ 10-5000 Hz. **Insulation Resistance:** 10^{10} Ohms min. **Capacitance:** 0.2 pf. **Operate Time (Typical):** to 0.5 mSec. **Release Time (Typical):** 0.5 mSec. **Life Expectancy:** 50 x 10^6 operations at signal level; 20 x 10^6 operations at rated load.

Contact Form	Nom. Voltage	Max. Voltage	Coil Resist. ±10%▲	Part Number
1A	5/6	16	365	814-101-014
	5	19	500	814-102-014
	6	19	500	814-103-014
	12/15	24	800	814-104-014
	24	30	1250	814-105-014

▲ Measured at 25°C.

815 SERIES





The 815 Series, with a profile slightly higher than the 814, offers increased versatility while maintaining the DIP package approach to hi-density printed circuit applications. Standard part numbers listed are subject to specifications shown for the 814 Series, however, the 815 has the capacity to offer dry reed switches to ½ Amp rating plus up to a 200 VDC max. switching voltage. Optional features include diode suppression, magnetic shielding and electrostatic shielding.

* (1A1B guarantee break-before-make)

Contact Forms Available: 1, 2, 3, 4, 5, 6, 8, & 12 Pole. Forms A, B, & C including magnetic latchers.

SPECIFICATIONS — Contact Ratings: 400 VDC, 250 VAC, 1.5 Amp (switching) 6 Amp (carry), 25 Watts, 40 V-A (AC suppressed) 50 milliohm max. initial contact resistance 500 volts peak breakdown. **Temperature:** −55°C to +105°C. **Shock:** 30 G max., 11 ±1 mSec. **Vibration:** 10 G max.@ 0-1700 Hz. **Insulation Resistance:** 10^9 Ohms min. **Capacitance:** 1.5 pf. **Life Expectancy:** Dry ckt., 100 x 10^6 ops; signal level, 50 x 10^6 ops; rated power, 20 x 10^6 ops.

Available to 12 form A. True form C also available.

846/847 SERIES

Contact Forms Available: 1 & 2 Pole. Forms A, B, & C including magnetic latchers.

SPECIFICATIONS — Contact Ratings: 400 VDC, 250 VAC, 1.5 Amp (switching) 6 Amp (carry), 25 Watts, 40 V-A (AC suppressed) 75 milliohm max. initial contact resistance 500 volts peak breakdown. **Temperature:** −55°C to +105°C. **Shock:** 30 G max., 11 ±1 mSec. **Vibration:** 10 G max. @ 0-1700 Hz. **Insulation Resistance:** 10^9 Ohms min. **Capacitance:** 1.5 pf. **Life Expectancy:** Dry ckt., 100 x 10^6 ops; signal level, 50 x 10^6 ops; rated power, 20 x 10^6 ops.

True form C also available.

* Spacing not available in 1 pole package.

The relays shown here are just a sampling of the many designs and configurations manufactured by Wabash Relay & Electronics as standard products. We also offer design assistance and custom designed relays through our fully staffed engineering department. Should you require a custom designed relay, here are some parameters to consider:

U.L. and C.S.A. Recognition

Several relay series are recognized under the Component Program of Underwriters' Laboratories. Most of these relays also have C.S.A. recognition. Regardless of which series you are interested in, Wabash Relay can help you obtain the U.L. or C.S.A. recognition your design requires.

Wabash Relay & Electronics Division
1st & Webster Streets, Wabash, Indiana 46992
(219) 563-2191 TWX: 810-290-2722 FAX: 219-563-1652

Prints and specifications, if available, are the best design tool. The minimum information required for Wabash Relay to design a relay is:

Mechanical Specifications

- Maximum length
- Maximum width
- Maximum height above P.C. board
- Pin configuration
- Open or covered
- Type of environment relay will be exposed to
- End Use

Electrical Specifications

- Switch configuration
- Nominal voltage
- Must operate voltage or current
- Must release voltage or current
- Coil resistance
- Switching current
- Contact resistance
- Carry current
- U.L. recognition required
- Special considerations (ESS, low thermal, high insulation resistance, etc.)

Dormeyer Industries

Company Facts

Dormeyer manufactures a full line of solenoids, coils and transformers. We also specialize in custom solenoid and transformer designs required by special applications. Over 36 years of experience and know-how results in production of the finest products at the lowest possible cost.

We are among the world's leading manufacturers of solenoids. We service a wide range of industries, including most major appliance, vending, lighting, heating/air conditioning and circuit protection manufacturers.

- Over 36 years of transformer and solenoid design and production.
- Facilities geared to consistently satisfy production requirements for *any quantities.*
- Delivery according to *your* schedule.
- Designs to meet all *U/L* and *CSA* requirements.
- Quality — a **"certified supplier."**
- Very competitive prices.

Our specialized teams of transformer and solenoid design engineers are always ready to work with you on application problems. Call or write for a quick solution.

SUPER "T" LAMINATED SOLENOIDS
24VAC to 240VAC
Stroke length up to 1¼"
Push or pull up to ½" stroke

AC/AC PLUG-IN TRANSFORMERS
3VAC to 24VAC 4VA to 30VA

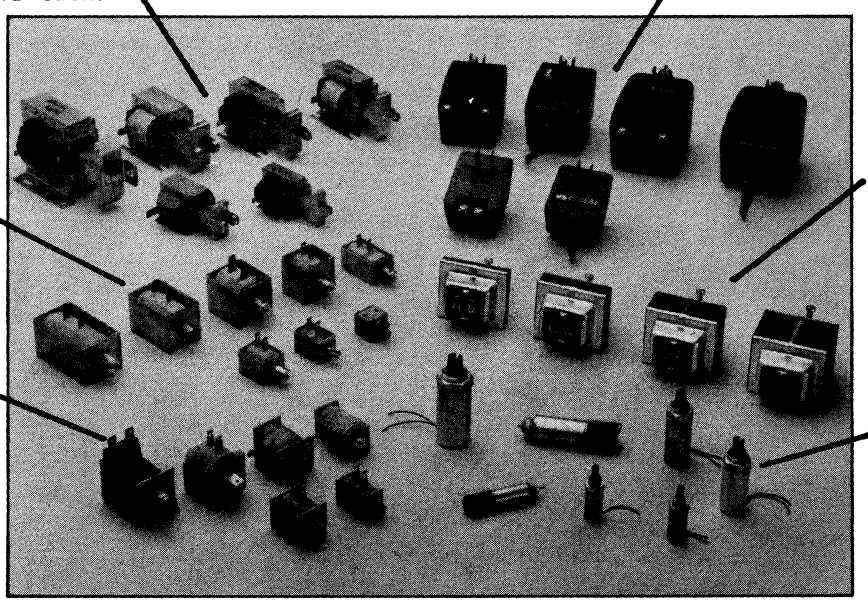
BOX FRAME SOLENOIDS
12VAC to 240VAC or 6VDC to 115VDC
Stroke length up to 1¾"

CONTROL TRANSFORMERS
Any VA rating between 5VA and 55VA

CUSTOM POWER TRANSFORMERS
5VA to 500VA

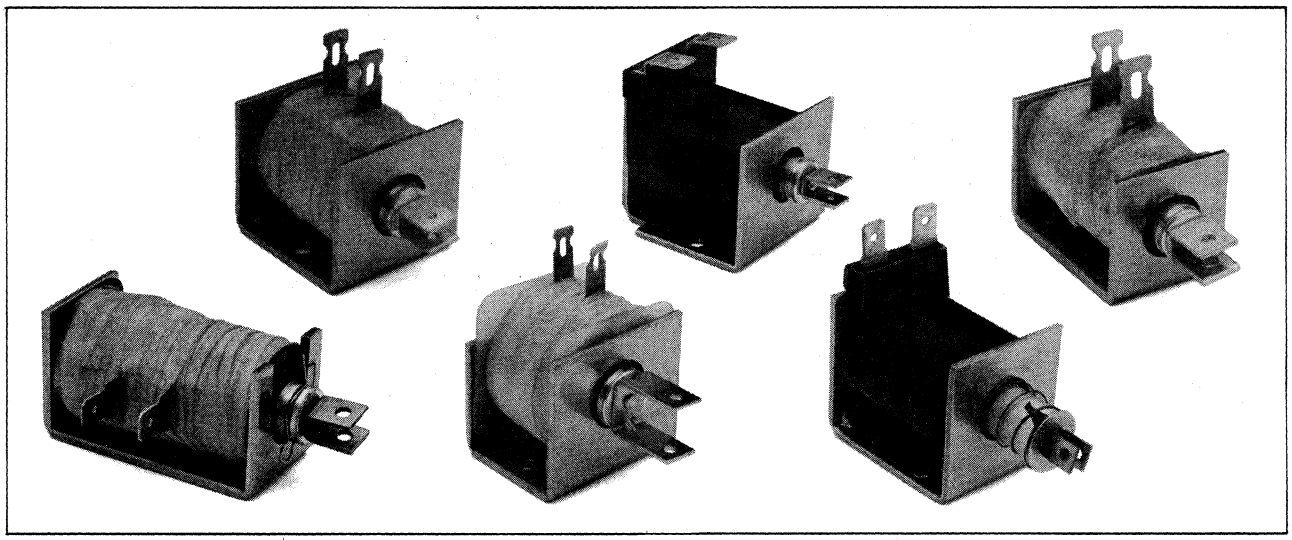
"C" FRAME SOLENOIDS
12VAC to 240VAC or 6VDC to 115VDC
Stroke length up to ¾"

DC TUBULAR SOLENOIDS
12VDC to 24VDC
Push or Pull types



Dormeyer Industries
3418 N. Milwaukee Ave., Chicago, IL 60641
Telephone: 312-283-4000 FAX: 312-283-4927

Dormeyer Industries



"C" Frame Series Solenoids

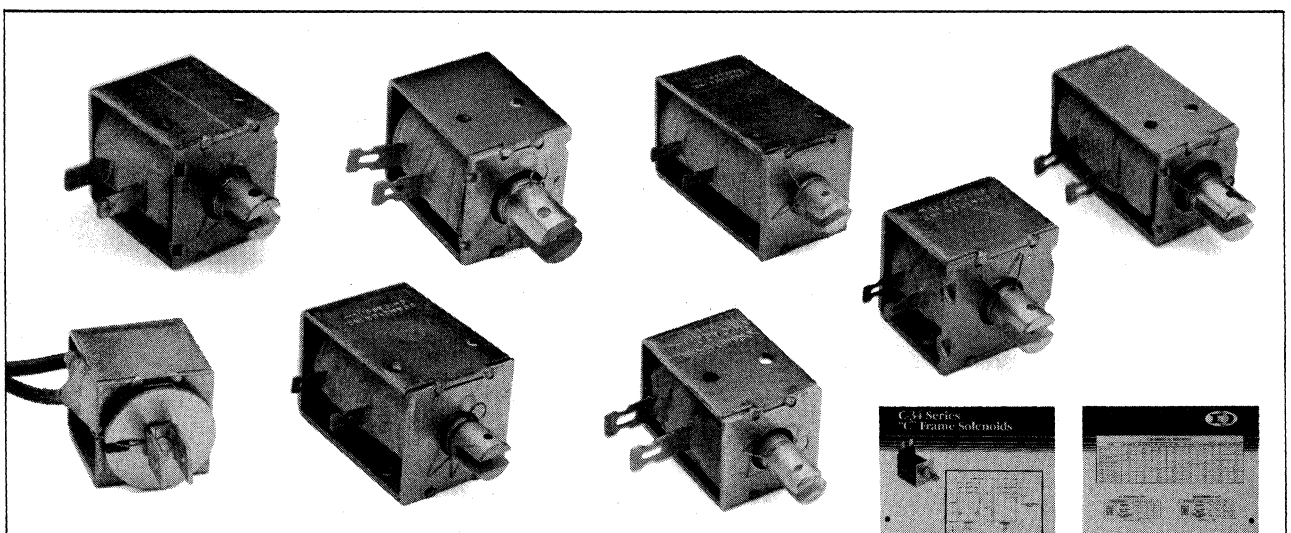
Standard Voltages	12 VAC to 240 VAC 6 VDC to 115 VDC
Stroke Length	0 to ¾"
Pull Force	up to 45 oz.

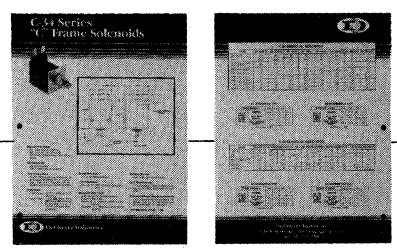
The "C" Frame Series is our lowest cost line of solendoids. Our A.C. models are designed to operate in the 12 to 240 VAC range. Our D.C. models are designed to operate in the 6 to 115 VDC range. We are tooled for high volume production. Mounting hole locations and dimensions, terminal styles, as well as plunger configurations, are easily modified with our existing tooling to meet customer requirements.

Box Frame Solenoids

Standard Voltages	12 VAC to 240 VAC 6 VDC to 115 VDC
Stroke Length	0 to 1¾"
Pull Force	up to 45 oz.

The Box Frame Series provides a longer stroke length than the "C" Frame Series along with a measureable increase in operational life. Both AC and DC models are available. As with all our products, tooling for high volume production is in place. Mounting hole locations and dimensions, terminal styles, as well as plunger configurations, are easily modified with our existing tooling to meet customer requirements.



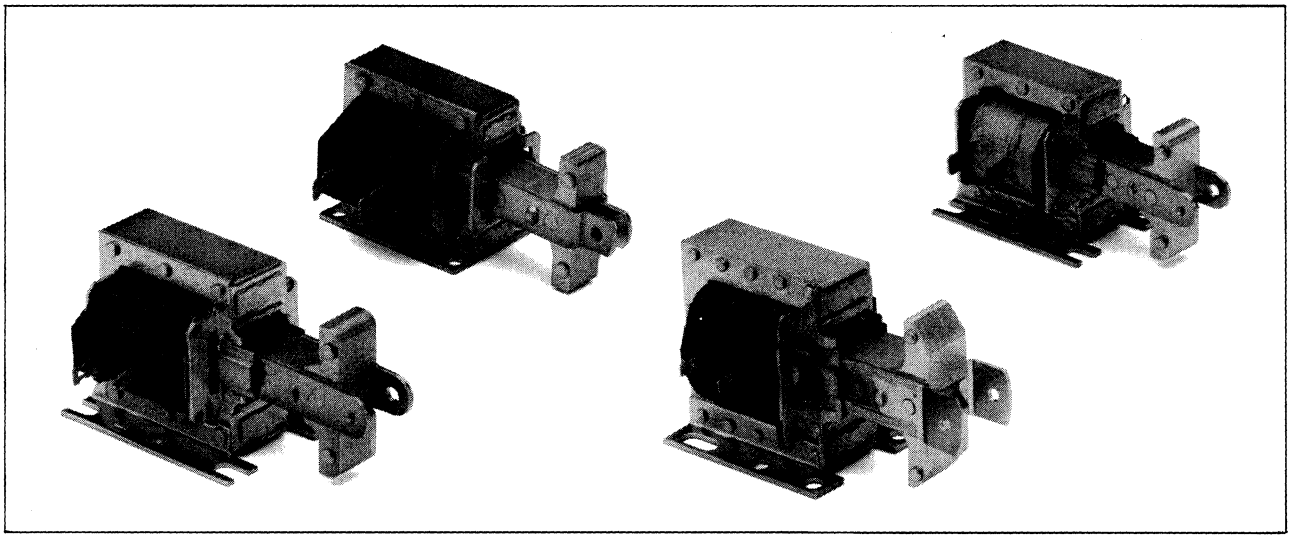


Dormeyer Industries

3418 N. Milwaukee Ave., Chicago, IL 60641 312/283-4000

Call or write for a detailed Engineering Data Sheet covering these Dormeyer products.

Dormeyer Industries



Super "T" Laminated Solenoids

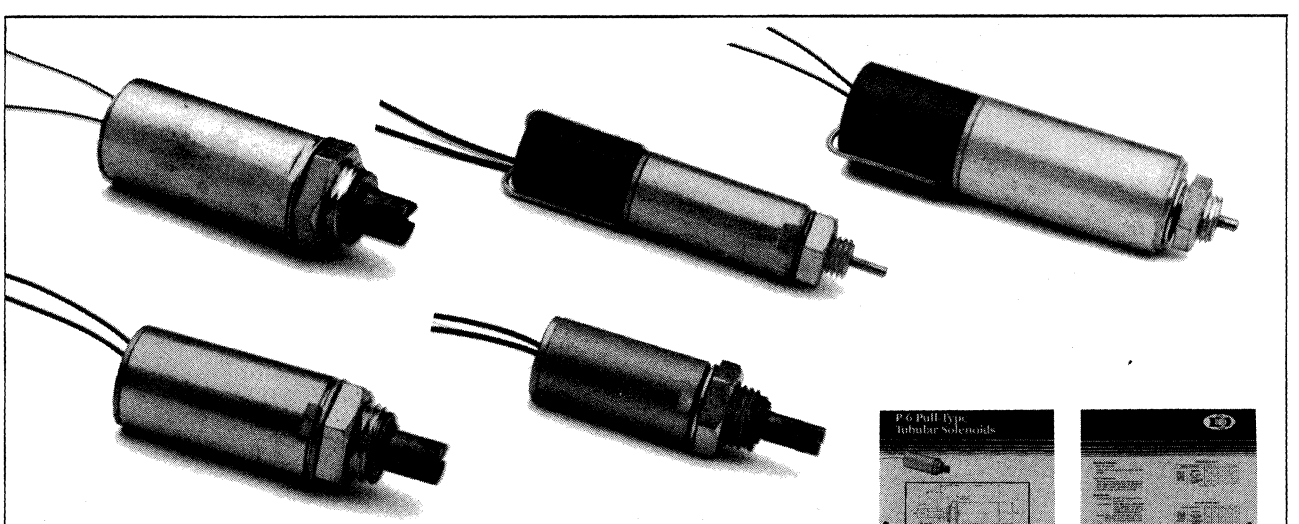
Standard Voltages	24 VAC to 240 VAC
Stroke Length	0 to 1¼"
Pull Force	up to 23 lbs.

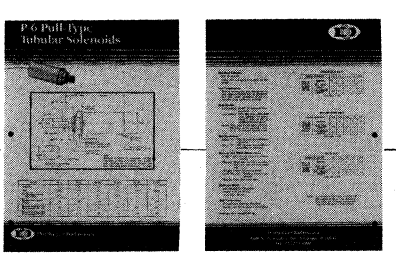
Super "T" Laminated Solenoids are designed to meet high pull force "AC" applications. We are tooled for high volume production. Terminal styles, as well as plunger configurations, are easily modified with our existing tooling to meet customer requirements.

DC Tubular Solenoids

Standard Voltages	12 VDC to 24 VDC
Stroke Length	0 to ½" pull 0 to 3/16" push
Force—pull	up to 70 oz.
Force—push	up to 50 oz.

Tubular solenoids are designed to offer very high reliability and a cycle life in excess of 25,000 operations. Both push and pull models are available for applications in the 12 VDC to 24 VDC range.





Dormeyer Industries

3418 N. Milwaukee Ave., Chicago, IL 60641 312/283-4000

SPECIALS

ELECTRO-MECHANISMS, INC., is completely equipped, both engineering and production wise, to supply you with variations of our solenoids that you might need for your application. We are also capable of designing special types that you might need within the size range of our products. We would appreciate the opportunity to help you solve design and application problems you may have in the area of miniature solenoid actuators.

The force charts below represent three different duty cycles.

Nominal voltage represents continuous duty.

2X Nominal voltage represents a 25%, intermittent duty cycle 4X Nominal voltage represents a 6% intermittent duty cycle.

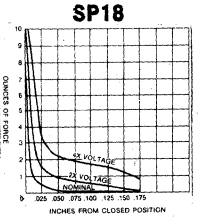
The duty cycle consists of two factors:

1. Percentage of time solenoid is energized in one complete operating cycle.

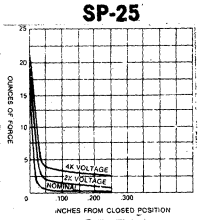
$$\text{(Ref: DUTY CYCLE} = \frac{\text{Time On}}{\text{Time On} + \text{Time Off}} \times 100\text{)}$$

2. Length of time of the longest single energization in one complete operating cycle.

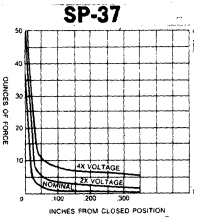
SP18



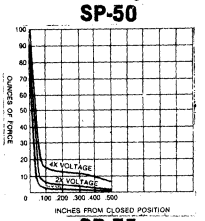
SP-25



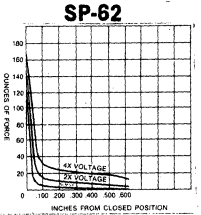
SP-37



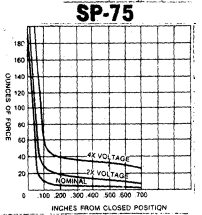
SP-50



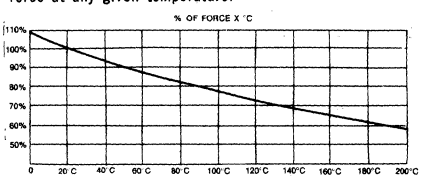
SP-62



SP-75



All forces shown are at 25° ambient. For use at higher ambient temperatures use the chart below to determine force at any given temperature.



FEATURES

ELECTRO-MECHANISMS micro-miniature solenoids offer you static and impact forces equal to standard solenoids 2 to 3 times the size of these units.

Because of their small size, they have extremely fast reaction time. As fast as 2 msec at 4x nominal voltage.

The unique design of PUSH or PULL action, offers many applications beyond the conventional pull type solenoid.

A complete line of 15 solenoids from 3/16″ O.D. to 1.250″ O.D. allows you to choose the correct solenoid with the force you require, from stock items.

The units are highly reliable with life of many millions of operations.

The solenoids are also available with coils in Class F and Class H for high temperature requirements.

Simplicity of design helps keep the costs down and allows us to pass these savings on to you, our customer.

TYPICAL APPLICATIONS

- Hammers for high speed printers
- Camera shutter actuators
- Locking mechanisms for switches, adding machines and typewriters
- Interpossers for card punching and tape perforation
- Cam actuation
- Pen lifters for plotters
- Event markers for chart recorders
- Key actuators for numerical readouts on typewriters and adding machines
- For life testing different devices
- For indicator flags
- Sensing devices
- Remote switching and actuation

SOLENOIDS

· ENGINEERING · QUALITY · DELIVERY ·

Hard to find all these in one company?

NOW YOU CAN!

Our engineers design only solenoids and relays. Their years of experience save you money and shorten your manufacturing lead time.

Complete designs from start to finish or slight modifications to existing products. We know our capabilities and if we can't design and build a cost-effective unit, we'll let you know immediately!

Quality: At Electronic Specialty quality is consistent. Our in-house environmental and dynamic testing lab gives us control of product quality and keeps our lead times to a minimum.

Delivery: Our sales engineers can help you with your particular application. Slight variations, or a totally new design, they give you answers on price and design quickly. Because we've supplied these kinds of components for years we are equipped to build and deliver your order when you need it.

Design capability, fast delivery of quality products with the assurance they are what you need. That's what Electronic Specialty Corporation offers you. Whether your orders are large or small we never forget the customer is what keeps us in business.

Call us, let us give you a competitive quote quickly and accurately.

PHYSICAL CHARACTERISTICS
Push or pull type

CASE SIZE
½″ diameter case O.D. to 3″ diameter case O.D.

STROKE RANGE
.01″ to .5″

WEIGHT
4 oz. to 48 oz.

ELECTRICAL CHARACTERISTICS
AC & DC Operation

Coil Voltages	AC	5 VRMs to 240 VRMs from 50 hz to 800 hz
	DC	5 VDC to 600 VDC

Coil resistance—Commensurate with required power and voltage requirements
Dielectric to 1500 VDC or VRMs
Insulation resistance 100 meg at 500 VDC

OPERATING CHARACTERISTICS
Force curves matched to customer requirements or use existing designs
Plunger strokes from .001 to .5 inches

ENVIRONMENTAL CHARACTERISTICS

Temperature ranges —65F to 300F	Vibration
Pressure range	Shock
Fluid compatibility	Salt Spray

CONNECTIONS

Stud screw terminal	Twist lock
Quick connect	Wire leads
Mil Spec multiple connectors
